a marked tendency to advance in prices. The principal handlers of English glass here have actually put up their quotations to $4.25 per 100 feet for first break, and reduced the discount on double diamond to 20 per cent., but importers of Belgian window glass have not as yet announced a change. Linseed oil is fairly steady at 43c. for raw, and 46c. for boiled, per gallon, in an ordinary way. Turpentine is unchanged at 77½c. per gallon in single barrels. In leads there appears to be less cutting, $4.50 being the regular quotation for No. 1 pure.

Metals and Hardware.—There has been no appreciable improvement in the demand since last report, and the volume of passing business is just moderate. Some enquiry for pig-iron is reported from outside points, but city foundrymen are light buyers at the moment. No. 1 Summerlee is quoted at $20.50 to $21 from stock, and domestic brands range about $19. Bars are steady at $1.75 to $1.80. The cable announces some easing off in Canada plates, the quotations having dropped from £8 2s. 6d., to £7 18s. 9d., but locally no change has been made in prices, $2.45 being generally asked for fifty-twos. Galvanized Canadas are steady at $3.90 for fifty-twos, and galvanized sheets, at $4.15; black sheets, $2.15 for 28 gauge; coke tins of standard brands, $3.65; and cokes, $3.90. Lead is a little easier at $3.35; copper very firm at 16¼ to 16½c., in an ordinary way; tin, 32½ to 33c.; antimony, 9½c.; spelter, $6.75. Boiler plate, iron pipe, etc., are unchanged at the moment.

⁂

CANADIAN MINING INSTITUTE.

The Canadian Mining Institute held its annual meeting in Montreal on Wednesday and Thursday of this week. Among those present, so far as we have heard at time of going to press, were: Major George R. Smith, M.L.A., of Thetford; Prof. W. G. Miller, Provincial Mineralogist of Ontario, and Eugene Coste, retiring president, both of Toronto; A. P. Low and A. E. Barlow, of the Geological Survey, Ottawa; Eugene Haanel, Dominion Superintendent of Mines, Ottawa; John Blue, M.E., Sherbrooke; H. J. Williams, of Danville; F. Hobart, of New York. Among the papers on the programme were: "Canadian Mica Mines," by Mr. E. T. Corkill, Toronto; "The Artesian and Other Deep Wells on the Island of Montreal," by Dr. F. D. Adams, Montreal; "The Possibilities of Steel Manufacture in British Columbia," by Mr. William Blackmore, M.E., Nelson, B.C., and "Canadian Metallurgical Products for the Far East," by Mr. F. Hobart, M.E., New York; "Prospecting in Western Canada," by Mr. D. D. Cains; "Mining Statistics," by Mr. F. Hobart; "Uniform Mining Statistics in Canada," by Mr. Eugene Coste, and on "Mining Laws," by Mr. J. M. Clarke, K.C., Toronto; "A New Mining District in the North of the Province of Quebec," by Mr. J. Obalski, M.E., Quebec; "The Mining

Possibilities of Arctic Canada," by Mr. A. P. Low, B.Sc., Ottawa.

* * *

As a result of the snow blockade on the railways in Nova Scotia, quite a serious state of things has set in in some parts of the Province. Some towns are almost without the necessaries of life, and fuel is perilously short in many of them. In Cape Breton, the farmers have no hay for their stock. The Intercolonial railway was able to keep its trains running for a long time, but last week even its line was blocked. Should a continuous rapid thaw come the results may be almost equally disastrous in the way of floods.

* * *

BRITISH SHIPBUILDING.

Although last year was not a prosperous one for British shipbuilding, the returns just published show that Great Britain built more than one half of all the steamships turned out last year, and, with sailing ships added, Britain's shipbuilding for 1904, was three-fifths of the entire tonnage added to the world's military marine. The tonnage of steamers built in Britain last year was 1,171,000, while that of the United States was over 238,000, and France 81,000, and Germany 202,000. The amount of work on hand in one British shipyard is now seventeen per cent. more than it was a year ago.

Publishers, Winnipeg

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

FINANCIAL CONDITION.

Æmilius Jarvis & Co., bankers and brokers, Toronto, said in their letter dated Friday, February 24th, that the steady and consistent advance of stocks during the past few months has developed in the last week into somewhat of a boom in the securities embracing a group of southern steel and coal properties, of which the leader has been Sloss. Reports as to details of different plans of amalgamation are too numerous to outline, but it is reliably stated that an important consolidation is almost accomplished between certain of these companies. We mention this matter specially as Sloss has been very largely dealt in in Toronto. In fact, Tennessee Coal and Iron and Republic Iron and Steel have both been much traded in by Canadians. It looks as though speculation were going too far, and while we still feel that financial conditions are sound and industrial enterprise is flourishing on this continent, yet we would deprecate any return to the wild speculations of two years ago. If discretion is exercised and over inflation avoided, we believe the occasion is distinctly a good one for the trader to make money, and for the investor there are still left many sound investment stocks which are selling on an advantageous return basis. The public are becoming more interested, and while the bulk of money now going into stocks is that of the very rich operator and trader, yet a good deal of it is essentially public money. Money continues to be cheap, and as every one knows, this is an important factor in prices. Notwithstanding a large export of gold in the past few months, there has been no resulting stringency. It is hard to say whether this condition will continue, but we do not feel that for some little time money is liable to be scarce.

LONG AND SHORT LETTERS.

Sherwin Cody in his "Training Course in Correct English, Business Correspondence and Advertisement Writing" lays down some rules as to the length of business letters. He says:

"Write a long letter to—

"A farmer.

"A woman.

"A customer who is angry and needs quieting down, and will be made only more angry if you seem to slight him.

"A man who is interested, but must be convinced before he will buy your goods.

"Write a short letter to—

"A busy business man.

"An indifferent man on whom you want to make a sharp impression.

"A person who has written you about a trivial matter for which he cares little.

"A man who wants only a record or a piece of information.

"A person who needs only the slightest reminder of something he has forgotten or overlooked."

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

—It is pleasant to get word of more moderate weather somewhere, and relief from the parts of the country which have been so snow-bound. A correspondent in Amherstburg, on Detroit River, a point to which mariners are accustomed to look for the earliest signs of open water and spring, thus writes: "As to trades-people, the coal dealers have certainly been in the lead this season, with the plumbers a good second. But the appearance and promise of spring is most inspiriting.

'This sunny morning, Roger, clears ye'r bluid,
And puts a' Nature in a glorious mood.'"

* * *

—A good salesman, it is said, can make women buy, whether they want to or not. According to one who has been in the business for the past twenty-five years, women shoppers belong to three classes, the intellectual, the emotional, and the volitional. Nothing but the advantage of the purchase will attract the first, while the second is good game. The third can't be persuaded, for she knows what she wants, and no amount of coaxing in the world will make her change her mind, and it's a waste of time to argue with her.—New York Sun.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

39	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00.

GENERAL AGENTS FOR CANADA.

1904 Another Successful Year for

THE NORTHERN LIFE ASSURANCE CO.

			Gain over last year
Insurance written	$1,231,580		15 %
Insurance in force	4,144,881		15½%
Premium income	130,468	85	10½%
Interest income	21,460	69	60 %
Total Assets	486,949	15	19½%
Government Reserves	311,326	00	29 %
Management Expenses	49,245	43	only 1½%

The Policies issued by the Northern Life are so liberal that agents find no difficulty in writing up applicants.

Liberal Contracts to good Agents. Write for Booklet describing different kind of Policies.

Head Office: LONDON, ONT.
JOHN MILNE, Managing Director.

THE RECORD OF THE
NORTH AMERICAN LIFE
for 1904

shows that large gains have been made in the amount of policies issued, insurance in force, income, payments to policyholders, etc.

Policies Issued $6,484,425
An increase over 1903 of $645,535
Insurance in force $35,629,988
An increase of $3,004,895
Income $1,504,063
An increase over 1903 of $122,700
Payments to Policyholders $561,136
An increase over 1903 of $137,918

The financial position of the Company is unexcelled. A good Company, both for the policyholder and agent. Applications invited for agencies in unrepresented districts.

Home Office, - TORONTO, Ont.

EVILS OF THE CREDIT SYSTEM.

Some of the speakers at the recent meeting of the Western Retail Hardware Association in Winnipeg gave useful advice in their comments on the evils of the credit system as it is allowed to go on at the present day, particularly in the west of Canada. The merchants there find themselves confronted with very large amounts of money outstanding on their books. Sometimes a man carrying say a $4,000 stock will see $10,000, or possibly even more of open accounts on his books, the consequence being that he finds himself completely tied up. The capital which he at first thought sufficient for his business is proved quite inadequate, owing to his having to pay interest on so many outstanding accounts, besides which he loses much in the form of bad debts. There can be little doubt that the merchants would all be in much better financial condition if they could shorten their credits. "There is scarcely a merchant," said one veteran hardware dealer, Mr. J. H. Ashdown, of Winnipeg, "who has not double or three or four times as much on his books as he should have," while a point to be thought of was, he said, the fact that as times goes on one's customers generally feel less and less inclined to pay their debts. The result of this state of things is that merchants who ought to have found their business quite profitable are year after year paying off bad debts, and at last end where they started, without having added anything to their capital.

One remedy would seem to be for retailers to place smaller stocks of goods on their shelves, and to be more chary in the way of credit, thus reducing interest charges and bad debts. While a strictly cash system is hardly practicable under present conditions in the West, the general opinion among those best qualified to judge is that some sort of a compromise may be effected. One speaker at another meeting of merchants, in Winnipeg, the Retail Merchants' Association of Western Canada, suggested the closing of all accounts on the first of November, and the refusal of credit until the first of May. The matter is one of very great importance. Traders in the East have long known the encumbrances of an excessive credit system, and those who wish well to the West will be heartily glad to see its ill effects reduced at the earliest practicable moment.

⁂

THE DRY GOODS TRADE.

The presence in the Montreal and Toronto markets last week of so many people interested in the millinery openings, together with the fact that the weather was so mild and spring-like, did a great deal to push business. The wholesalers report that seldom have they seen such a busy month as this has been to date, while all the indications, so far as they can be interpreted by travellers in the rural districts, point to this state of things continuing during the season. The demand has been largely for articles, textile and other, of good quality, which indicates the general prosperity of the country. It has also shown a satisfactory inclination towards domestic manufactures, though at the same time it should be said that the importations of the various lines of dry goods have been of late decidedly increasing.

The sales of hats and millinery goods are reported to have been exceptionally large, both in Montreal and Toronto. Buyers were present in both cities from as far east as Nova Scotia, and as far west as Victoria. A feature which pleased them particularly was the news that deliveries of ribbons were being made in ample time, this being a point upon which many doubts had been felt. The consumption of ribbons this year not only in the form of millinery trimmings, but for other purposes as well would appear to promise phenomenal proportions. Other features of the hat trade were spoken of in our last issue. Embroideries and veilings have been quite popular.

The movement in dress goods has been large, and more particularly has the demand been good for ladies' ready-to-wear dresses. The home manufacturers have made so much progress in this department of recent years that their use has become much more general than formerly, when usually speaking the cheaper classes of goods were shown in this branch. Good orders are coming in for rain-coats for women. All sorts of styles are allowable, the most frequent being grays, tweeds, stripes, either with or without capes.

The prices of staple goods remain steady. Even with the slump in the value of raw cotton last fall, the prices of finished goods have kept up well, it being a fully recognized fact that stocks all over the world are in small compass. In Great Britain a bull influence is the strongly increasing Chinese demand. In woolens, the only probability would appear to be a further advance. The supplies of raw crossbred wools are short, while the demand for just those varieties is apparently increasing all the time.

* * *

FARM PRODUCE.

All lines of farm produce are held very firmly in sympathy with the high prices for live hogs. There has been indeed an advance in a number of lines, more especially in lard and long clear bacon. A comparison of stocks indicates that the quantity of goods put away for the Canadian trade is not so large as in former seasons.

The butter market still continues steady though a somewhat easier feeling exists for dairies. Large rolls are coming forward more freely and with mild weather a considerable reduction in prices is likely soon to come about. The present high prices for butter are having a stimulating effect on the trade, that is to say, a number of cheese factories are contemplating making butter, besides which several new creameries are being started. We note an interesting remark in a report from an English produce merchant. He states that while the population of the United Kingdom has doubled within the past fifty years, the quantity of butter imported has about trebled in the past seventeen years. It is contended from this fact that the tendency of prices is likely to be downward. On the other hand, some of the countries from which Britain at one time used to import large quantities of butter have become lately greater consumers themselves owing to the rapid growth of their populations, for example, Germany and the United States. This causes them to become competing buyers with the English in the butter markets of the world, which should do much to offset the first-mentioned argument. It is suggested that, were it not for the high import duty on goods entering the United States, the latter would probably draw a large quantity of the supply of Denmark, Canada and other countries, which now goes to Britain. However, Canadians cannot too quickly undeceive themselves if they think they are going to have everything their own way within British markets. Australasia, Argentina, and particularly Siberia, are rapidly pushing to the fore, and so far as butter is concerned, Canada can scarcely be said to be even holding her own.

A circumstance in the butter trade which is exceptional is the importation within the past few weeks of butter into Canada from England. This was done to fill the vacancy in the market caused by the excessive snow drifts of February in Eastern Canada preventing the creameries from collecting their customary supply of milk. Some of this butter was of Australian make.

The market for eggs is well cleaned up in cold-storage and pickled stock. The receipts, however, of new-laid are increasing, and higher prices are not looked for. Exporters complain of having had a bad year's trade, and express themselves as determined to buy eggs at a lower value this season. Importers in Great Britain have intimated that they will not touch Canadian eggs this season at all unless they can get them 2 or 3c. per dozen cheaper than was the case during the last season or two. They say they have lost money, and that other countries are supplanting the Canadian business. Russia is pushing hard to capture the trade.

The importers in Great Britain are enquiring for cheese, and the market is firm, with an upward tendency. Sales have been made at 51s. to 52s. for colored, and at 52s. to 53s. for white.

* * *

SPECULATION AND STOCK EXCHANGE RULES.

It is not strange that the craze of stock speculation should seize upon the clerks or officials of stock exchange firms when we consider the examples constantly before the eyes and minds of such persons. Nor is it at all unnatural that they should be led by what goes on around them to try the risky game themselves. Hence the sound rule laid down by the London Stock Exchange Committee, which lays down in unmistakable language that members are not allowed to transact speculative business for officials or clerks without the knowledge of their employers. Much criticism, says the London Economist, is being levelled at the Stock Exchange Committee for their action in suspending six different members on account of disobedience to this rule. In the present case, the facts were simple enough.

"The secretary of a public company indulged in gambling, and his confusion between money that belonged to him and that which did not has led to his enforced retirement from the community for a while. Some, at least, of the brokers who dealt for him were under the impression that his account merely served as a cloak for what were in reality the operations of a man now notorious for gambling in the shares of a company with whose direction he is intimately connected. Perhaps the brokers did not at first take the trouble to inquire precisely the position of the speculator, but when this became more fully understood the Committee were informed by the men who stood to suffer by the disclosure. Some of the 'offences' dated back years ago, but the Committee have enforced the penalty of suspension in all cases except where the brokers were able to prove that they had kept within the strict letter of the Stock Exchange law in their dealings with this client. The sentences vary in length, and those of one month are regarded in the House as being almost nominal. From the standpoint of discipline, the Committee's action is no doubt correct. Rules are of no value unless impartially enforced, and as to whether the rule quoted above is a good one, it commands undivided recommendation from every class that is interested in Stock Exchange dealings. Speculation for clients who are clerks must manifestly include greater hazards than that on behalf of those who are independent of employers. Individual clerks, by the score, may be better off than individual employers, but only a splitter of hairs would throw doubts upon the sagacity of a rule which limits clerkly speculation to that which comes within the knowledge of the employee's principals."

* * *

CANADA'S MINERAL PRODUCTION.

We have received from the Mining Section of the Geological Survey, Ottawa, a preliminary statistical statement of the mineral production of Canada for the year 1904. It shows that it amounted in value in all to $60,343,165, or a falling off from 1903 of more than two million and a quarter dollars. This is explained, however, as being due not so much to a slackening in the permanent mineral industries of the country as to a gradual return to natural conditions after a few years of abnormal inflation on account of the rapid exploitation of the rich and more easily accessible Yukon placer mines. If the yield of the Yukon gold fields be eliminated, the production was about equal to that of the previous year, the decreases in some lines being practically offset by increases in others.

The following summary shows the details of the production last year:—

Product.	Quantity. (*a*)	Value. (*b*)
Metallic.		
Copper (*b*) ....Lbs.	42,970,594	$5,510,119
Gold, Yukon $10,337,000		
Gold, all other 6,063,000

Total metallic	......	31.222,525
Estimated value of mineral products not returned	......	300,000
Total, 1904	......	60,343.165

* The total production of pig iron in Canada in 1904 from Canadian and imported ores amounted to 303,454 tons, valued at $3,582,001, of which it is estimated 68,297 tons, valued at $901,880, should be attributed to Canadian ore, and 235,157 tons, valued at $2,680,121, to the ore imported.

(*a*) Quantity or value of product marketed. The ton used is that of 2,000 lbs.

(*b*) Copper contents of ore, matte, etc., at 12.82c. per lb.

(*c*) Lead contents of ores, etc., at 4.309 cents per lb.

(*d*) Nickel contents of ore, matte, etc., at 40c. per lb.

(*e*) Silver contents of ore at 57.221 cents per oz.

(*f*) Oven coke, all the production of Nova Scotia, British Columbia and the North-West Territories.

(*g*) Gross return from sale of gas.

(*h*) Includes crude oil sold to refiners and oil sold for fuel and other purposes.

(*i*) Zinc contents of ores at 5.100 cents per lb.

It will be seen that as formerly, the output of the coal and coke and gold together constitutes considerably more than half the mineral values produced. The per capita production of minerals in Canada for last year is estimated to have been $10.40 compared with $11.89 in 1903, or with $2.23 in 1886. Practically every province exhibits a falling off in gold production, Nova Scotia shows a decline of about one-half, attributed to the extreme drought during last season, and to the closing down of some of the best mines through financial difficulties or through accidents. In Ontario many important mines were closed down. In British Columbia there was an increased output from placer mines and a diminution in the returns from lode mines. The operations at silver-lead mines in the Kootenay country were stimulated by the Dominion Government's bounty on lead ores. The production of lead last year was about 19,000 tons compared with 9.070 tons in 1903, but in 1893 it was 31,584 tons. The copper export, in the form of ore, matte, etc., was about the same as in the previous year, a decline in Ontario being made up by the increased production from the Boundary and Coast districts of British Columbia. The production of natural rock cement, which has for a number of years been small in comparison with the output of Portland cement, shows another large decrease in 1904, the sales being only 56,814 barrels, valued at $49.397, as compared with 92,252 barrels valued at $74,655 in 1903. Although a much larger quantity of Portland cement was sold in 1904 the total value, owing to the fall in price, says the report, is only slightly in excess of that in 1903.

CANADIAN TRADE WITH SOUTH AFRICA.

We gather from an interesting article in the Cape Argus that, while the expectations formed after the conclusion of the Transvaal War, as to the development of a very large trade between Canada and South Africa have scarcely materialized, largely on account of the depression which has since prevailed in the latter country, yet the preferential treatment accorded by it to products from the sister colony is likely to lead to important results. This is more particularly to happen owing to the establishment of the direct steamship service between South Africa and the Dominion. The chief items exported by Canada at present are timber, frozen pork, and poultry, tinned goods, and cattle. To a large extent the timber consists of poplar planks for building purposes and for cabinet making. It is interesting to learn that formerly this all went to Africa via New York, but the Argus thinks there is every promise that in time the whole of the Canadian timber imported into that country will be forwarded by this line. It can be put on board cheaper at Montreal than at New York, and the rates are practically the same as those of the Prince Line. One boat alone has taken, we are told, out as many as 30,000 deals, and Johannesburg is a big customer in this line. The average number of cattle taken over by the direct line is about fifty on each steamer. These, it is agreeable to note, have given good satisfaction, and none have died on the voyage. A considerable trade is being done in apples, which are of several varieties. The shipments of poultry have lately, says the Argus, fallen off. The export of eggs from Canada to South Africa is still in its infancy, but large shipments are expected during the coming season. Frozen salmon has gone over in small quantities. In regard to flour, there is good ground for supposing that the trade will reach to large dimensions. As it is, its condition is very satisfactory, although the large surplus available for export from Australia, and the somewhat cheaper lines that country has to offer us, have affected the Canadian export.

One unsatisfactory feature of the present situation is that the steamers have at present to make the trip to Canada with practically no return cargo, which would serve to lessen freight rates outward.

* * *

FEBRUARY FIRE WASTE.

The New York Journal of Commerce and Commercial Bulletin, which keeps a carefully compiled record of the losses from fire in the United States and Canada states that the loss last month was $25,591,000. The following table gives a comparison of the fire losses of the first two months of the present year with those of the preceding year:

	1904.	1905.
January	$21,790,200	$16,378,100
February	90,051,000	25,591,000
Total	$111,841,200	$41,969,100

The reduction in the fire loss for February this year is only satisfactory so far as it goes. It is greatly less than last year, but if the losses due to the great conflagration in Baltimore be deducted, it will be seen that the amount is this year actually greater by over $5,500,000. The wastage is still going on at an appalling rate. For the full year 1903 the fire loss was $156,195,000; and for 1904 it was $252,364,000, or deducting conflagration losses at Baltimore, Toronto, and Rochester, $169,000,000.

* * *

THE LATE EDWARD CLARKE, M.P.

It is long since so marked an expression by a community of esteem for a public man was given as at the funeral, in Toronto on Monday last of E. F. Clarke, M.P. And that striking testimony was deserved. The country loses a valuable citizen in Mr. Clarke. He served this city well as mayor, and has shown eminent capacity together with a high sense of duty in whatever position he was placed. Of his intelligence and his acquirements it is not easy to speak too highly. We do not recall any one whose qualifications as a public man his so much resembled as those of the late Hon. Thomas White, of Montreal. As speakers they were lucid and convincing. Both knew their country and its people; both were approachable and by nature courteous; both, while comprehending principles, were eminently fitted to deal practically with affairs; the same high standard of self-sacrifice to public work characterized both. "Ned" Clarke was a large-minded, large-hearted man, full of sympathy, and as free from vanity as he was from bitterness. If, while spending himself for his country he died a poor man, the community in which he lived should find in that fact a warrant to extend its gratitude to his dependent ones.

* * *

POSTAL RATES ON PERIODICALS.

Sir George Drummond brought to the notice of the Senate recently the inequalities which at present exist in the local, foreign and Imperial postal rates, and affirmed the principle that the conveyance of letters, newspapers, books and periodicals should be at a lower scale of charges within the Empire than those ruling with foreign countries. That this is very far from being the case now does not require much proving. Even in letters, the rate to Great Britain from Canada for anything over half an ounce is double what it is to United States points. And when newspapers, magazines or other periodicals are considered, the discrepancies are remarkable. The postal charges on such articles from the United States to Canada is 1c. or less per pound, while from England to Canada it is 8c. per pound. This is equivalent to $175 per ton, an extraordinary charge when the cheapness of ocean transportation is borne in mind. The consequence is that very few British periodicals enter Canada, and those that do are mostly American reprints filled with advertisements of United States concerns and goods. The effect of this upon Imperial sentiment must be very marked, let alone the influence it is likely to have in the drawing of Canadian trade out of Imperial into United States channels.

Another point in connection with postal rates touched upon by Sir George Drummond was the influence of the existing regulations on Canadian papers. It is all very well for us to have reciprocity in the matter of circulation of magazines and papers between Canada and the United States; but owing to the great population of the latter country and its consequent large number of publications this reciprocity does not work out fairly. As Sir George remarked, "a Canadian magazine is almost an impossibility." Finally, he presented the following facts to show that the present rates are in their operation unjust, partial and prejudicial to several classes of our fellow-citizens:

1st. To the booksellers and distributors of literature, who are sacrificed in favor of American organizations having the same business ends.

2nd. To our manufacturers and producers, who find the wares of their rivals in the United States advertised broadcast and distributed at the expense of the Government of Canada.

3rd. To the English publishers who have to meet the competition in this market of literature artificially cheapened at the expense of the American and Canadian Governments.

4th. To the literary men and publishers of our own country, who have to maintain an unequal struggle against a flood of foreign productions.

Nobody will advocate the exclusion of United States reading matter from the Dominion. But certainly it is time that something was done to alter the present exclusion, so far as price can act, of the literature and news of our own Mother-Land through postal regulations and imports which are neither justifiable in themselves nor beneficial to the revenues of this or that Government.

Sir George Drummond, we are glad to note, was warmly applauded for his able and exhaustive speech on the subject, and the Senate passed his resolution unanimously.

* * *

HUMBUGGING ENGLISH EXPORTERS.

"Forty-five Birmingham manufacturers met in the Cosmopolitan Club in that city, and spent an hour in comparing notes concerning a Canadian visitor whose pilgrimage to Birmingham has left mingled memories. A brilliant bird of passage, the Canadian offered traders a quick way to fortune by advertising in a Canadian journal associated with commercial interests." This is part of a clipping sent us by an English friend, and doubtless refers to the now notorious "Dr." Gustavius W. Griffin, D.B., etc., who long represented in the United Kingdom two Montreal trade journals. Describing the same gathering, the Birmingham Evening Despatch, of 21st February, recounts Griffin's statement that one journal he represents is subsidized by the Canadian Government, a statement disproved by a letter from the Under-Secretary of State which declares it to be "wholly unfounded." This letter the Monetary Times printed two years ago along with one of like tenor from the Canadian Minister of Justice. Now, says the Despatch;

"The most unfortunate part of the whole business is that it tends to discredit Canada in the eyes of the British trading community. The interchange of commerce between the two countries is growing rapidly, but it will receive a check if the faith of the people on this side in the integrity of the men on the other side is shaken by such persons as the smooth-tongued 'doctor.' The Evening Despatch cannot too strongly emphasize the advice that on matters affecting the commercial relations of the Midlands and Canada the safest and soundest way is to go to Central House, New Street, Birmingham, and, consult Mr. P. B. Ball, who is the Canadian Government's accredited agent here."

Any one who does so will be enlightened as to the character and the methods of this cheeky canvasser, who is as bold and plausible as he is unscrupulous, but who has had several shafts put through his brassy armor by Mr. Ball. The "Doctor's" success in Birmingham (where he is said to have got 150 advertisements) and elsewhere in England, tends to make one change one's mind as to the Englishman being so wary and unimpressionable as he is reputed to be. In the Mercantile Guardian, of London, dated 21st February, is a reference to the wily "Doctor," and a statement that "Birmingham manufacturers who have been led to give him advertisement orders for large sums are at last up in arms, and mean to combine together and dispute the claims made" by the paper or papers he represents. And the London correspondent of the Montreal Gazette writing on 18th ult., speaks of united action being taken by exporters in the Midlands to refuse payment for advertisements given the Doctor for which no value has been received —the circulars and letters sent to Canada by them at Griffin's suggestion being often returned through the dead-letter office. Commenting upon which the Montreal Trade Bulletin declares that:

"The trade journal, whose 'plausible humbug' of an advertising agent, with his 'unscrupulous misrepresentations' referred to in the above despatch, 'has such an unenviable reputation in Canada and the United States that the journal in question would scarcely care to have him in their employ on this side of the Atlantic, nor does it publish his name as their English agent." Says the Bulletin further: "The continuation of such practices on the part of the advertising agent referred to is simply damning the prestige of Canadian trade journalism, and every proprietor in the Dominion who desires to do business on straight lines should use his influence in putting a stop to such disgraceful tactics as have been complained of repeatedly by English advertisers in, and subscribers to, Canadian trade papers."

* * *

SUSPENSION OF THE BANK OF YARMOUTH.

Word reached us on Monday last of the suspension of the Bank of Yarmouth, Nova Scotia, following last week's rumor of an intended amalgamation of that bank with the Union Bank of Halifax. The probabilities appear to be that approaches were recently made to the Halifax bank mentioned with a view to such amalgamation, but that it declined them upon enquiry, and the Yarmouth Bank then assigned. For years, the failed bank has been carrying one or two heavy and unsatisfactory accounts;, and our intelligence is that the failure of the boot and shoe manufacturing firm of W. H. Redding & Sons a day or two before precipitated the suspension of the bank. It appears that this firm owed the bank the altogether disproportionate sum of $490,000. It has been doing an excessive and highly competitive business.

The effect will not be serious, for the deposits were under $240,000 at the end of January, according to the Bank Statement, and the total liabilities $384,494. If we suppose that the total assets, which are put down at $732,678, will not realize enough to pay these (the cash assets are decidedly limited), there is still the double liability of the shareholders, some of whom are described as wealthy men. Current loans are $623,436. The capital paid up is $300,000, and there is a nominal rest of $35,000. January circulation was $52,989. The directors are John Lovitt, president; S. A. Cromwell, vice-president; H. B. Cann, Augustus Cann and J. Leslie Lovitt.

Since the above was written, we have received a communication drawing attention to the circumstances of this bank's failure and asking if it is not possible for the Government to avert such an occurrence by timely intervention, since the Deputy Minister of Finance has by law the power to go into a bank's office and investigate its assets if he has reason to doubt the soundness of its affairs. It would seem to be reasonable that, when the Canadian banks as a body guarantee the circulation of any one of them, power should lie in the hands of representatives of the banks, say the Bankers' Association, to make enquiry into the condition of a bank of whose position they have good reason to be doubtful. We know they possess, and have used, the power to make full enquiry into the note issues of banks, the object being, among other things, to ascertain that the issuing power of no one has been exceeded. But to appoint an official inspector, with power to go into detailed examination, at a certain time of the year, or whenever he or his superior officers saw fit, of the whole affairs of any bank, is a matter much more difficult of successful adjustment.

⁂

NOTES ON LUMBER CONDITIONS.

A report to the "Canadian Lumberman" from the United States states that climatic conditions in that country have been opposed to any increase in the movement of lumber, and nothing more than a normal trade has been done. The demand from the country districts is light, but this is attributed largely to the difficulty of handling lumber at this season of the year. The demand, however, will make itself felt upon the first sign of spring, when a heavy trade is anticipated. "Enquiry is active, and there are no weak spots in the white pine market. The increased stocks in Minnesota are confined chiefly to small mills in the interior, and will be consumed without perceptible effect upon prices. Low-grade boards have lost none of their recent strength, while the better quality of pine is exhibiting a stronger tone than for some months past. It is stated that mill culls sold in Duluth last week at $14 and scoots at $9.25. Spruce is maintaining its strength, and some manufacturers have declared their intention of holding their stock at an advance of 50 cents per thousand. Hemlock was never in better position. Among the hardwoods, maple, birch and elm are selling freely, while basswood lags behind, both in price and demand."

There has been a sharp advance in lath at Chicago, the current prices being $4 to $4.25 for No. 1 white pine and $3.50 to $3.75 for No. 1 mixed. Spruce lath have been but little affected by the strength in white pine, as they continue to sell in Boston at $3.40 for 1⅝ inch and $3.15 for 1½ inch.

Advices from Northern Ontario state that the quantity of logs taken out by the lumbermen this season will be much smaller than usual, there being a comparatively small number of men engaged owing to the high rate of wages asked. A large proportion of the logs have already been "watered," or put on the ice-ways in preparation for floating in spring.

⁂

WESTERN ASSURANCE COMPANY.

Less than the usual interest was taken in the proceedings at the annual meeting of the Western on Friday last, doubtless because the principal arrangements, rendered necessary by the conflagrations and untoward events of 1904 had been dealt with at the June special meeting. The president made no set speech, but referred in cheerful terms to the profit earned the latter half of last year and the improved outlook for the present year. The company's loss by the large recent fires in New Orleans and Hot Springs were but slight, and its business for the first two months of 1905 is, we are told, encouraging. The readjustment of the capital makes that account $1,500,000, and the reserve fund stood at $1.608.763 at the close of December last. Total assets are $3.305.000, of which $2,143.000 is in stocks, bonds and debentures, $340,000 in cash, real estate, mortgages and interest, $664,000 in reinsurances and agency balances. This well-known Canadian underwriting company is now in its fifty-fifth year, and since its establishment has paid no less than $40,785,765 in losses.

⁂

HAMILTON PROVIDENT AND LOAN SOCIETY.

The shareholders of the Hamilton Provident may congratulate themselves on the exhibit made by that company. It has had another good year in 1904, earned more money, and shown more net profit. If we are not misinformed its average rate of interest on investments is higher now than eight or ten years ago. This doubtless because it lends more in Manitoba and the Territories, which business is looked after closely by a branch staff in Brandon. Last year's net profits were $96.154.51—somewhat in excess of last year, which enabled the management, after paying dividends and taxes, to add $25,000 to the reserve fund, bringing that fund up to $415,000. Besides this there is at the credit of the contingent fund over $14,000, a very comfortable sum. The report tells us that payments by borrowers have been very satisfactory, and that the society's funds have been actively in use at remunerative rates. No material change is observable in the character of the business, which is that of lending on first mortgage on improved farms, except the agreeable one of a somewhat increased average rate, as we have stated above. With the exception of about a quarter-million in cash and call loans or municipal debentures, the society's assets are in first mortgages on real estate.

⁂

CROWN LIFE INSURANCE COMPANY.

A decided advance is indicated by the report for the year 1904 of the Crown Life Insurance Company. The new insurance written shows an increase, and the total in force, which is almost three millions, marks an increase of nearly thirty per cent. Cash income from premiums is $39,000 greater, and the death losses are remarkably small, being only $12,500 in all for the years 1903 and 1904. This light mortality in the early years of a company is of course to be expected, but it conduces to larger profits for policyholders in later years. Calculated at 3½ per cent. interest, the net insurance reserve fund, which at the close of 1903 was some $86,000, was swelled to $158,000 at the close of last year. A creditable feature of the present statement is the marked decrease in the cost of management relatively to the amount of business done.

The very considerable proportion of endowment insurance done accounts for the high average premium rate, something over forty dollars per $1,000. This description of business is valuable because of the likelihood of its persistence. The president states, too, that the lapse rate is very low, something like ten per cent., an uncommon circumstance. A point upon which this company has always laid stress is that Canadians should, other things being equal, give preference, in insuring their lives, to home companies. The chairman of the annual meeting, Hon. David Tisdale, who succeeds Sir Charles Tupper in the presidency, enforces this point. He believes that the Canadian people are being aroused to the sentiment of "Canada First," and are implementing it in life assurance as well as in other directions. The Crown Life certainly appears to be benefiting by inculcating this principle.

⁂

CANADIAN MINING INSTITUTE.

The Canadian Mining Institute, whose annual meeting in Montreal last week was referred to in last number, held a very successful convention in spite of prognostications to the contrary on account of certain disagreements between some sections. The annual report of the council showed that fair progress had been made by the Institute during the past year, the total membership now standing at 480. The following officers were elected for the ensuing year: President, Mr. George R. Smith, M.L.A., Thetford Mines. Vice-presidents—For Nova Scotia, Mr. Thomas Cantley, New Glasgow; for Ontario, Dr. L. Goodwin, Kingston; for Quebec, Dr. Frank D. Adams, Montreal. Secretary, Mr. H. Mortimer Lamb, Victoria, B.C.; treasurer, Mr. J. Stevenson Brown, Montreal. Council—For Nova Scotia, Messrs. Chas. J. Coll, Stellarton; C. A. Meissner, Sydney, and W. B. Robb, Amherst. For Ontario, Dr. A. E. Barlow, Ottawa, and Mr. A. B. Wilmott, Sault Ste. Marie. For Quebec, Messrs. R. T. Hopper, Montreal; J. Obalski, Quebec, and Harry J. Williams, Danville. For British Columbia, Mr. R. R. Hedley, Nelson.

⁂

COST OF VARIOUS FIRE DEPARTMENTS.

The Journal of the Union of Canada Municipalities had recently an interesting comparison of the fire-fighting equipments of various Canadian cities, including the cost of maintenance, taxable assessment, etc., for last year. In the list are the following:

Montreal—Cost of brigade, $222,537; fire alarm, $20,026; 231 men, 117 horses, 17 stations; cost per head of 87 4-5 cents per $1,000 assessment, $1.27. Population, 278,695.

Toronto—Cost of brigade, $214,204; fire alarm, $600; 200 men, 68 horses, 16 stations; cost per head, 95 2-5 cents per $1,000 assessment, $1.55. Population, 225,000.

Quebec—Cost of brigade, $46,800; fire alarm, $5,300; 67 men, 30 horses, 9 stations; cost per head, 70 9-10 cents. Population, 75,000.

Ottawa—Cost of brigade, $56,417; fire alarm, $2,294; 54 men, 36 horses, 9 stations; cost per head, 97 1-10 cents per $1,000 assessment, $2.12. Population, 61,151.

Winnipeg—Cost of brigade, $46,450; fire alarm, $1,689; 47 men, 26 horses, 3 stations; cost per head, 85 cents per $1,000, $1.32. Population, 56,603.

Hamilton—Cost of brigade, $44,000; fire alarm, $68; 51 men, 18 horses, 6 stations; cost per head, 80 8-10 cents per $1,000, $1.64. Population, 54,035.

Halifax—Cost of brigade, $28,550; fire alarm, $450; 101 men, 26 horses, 7 stations; cost per head, 58 cents per $1,000, $1.27. Population, 50,000.

London—Cost of brigade and fire alarm, $23,766; 30 men, 16 horses, 3 stations; cost per head, 86 cents per $1,000, $1.87. Population, 40,104.

Vancouver—Cost of brigade, $38,519; fire alarm, $2,000; 35 men, 20 horses, 4 stations; cost per head, $1.15 per $1,000, $2.20. Population, 35,000.

MR. A. L. EASTMURE, VICE-PRESIDENT AND MANAGING DIRECTOR ONTARIO ACCIDENT INSURANCE COMPANY.

Victoria—Cost of brigade, $27,900; fire alarm, $1,200; 36 men, 16 horses, 4 stations; cost per head, $1.16 per $1,000, $1.63. Population, 25,000.

Kingston—Cost of brigade and fire alarm, $10,256; 16 men, 7 horses, 2 stations; cost per head, 56 1-5 cents; per $1,000. $1.30. Population, 18,246.

Windsor—Cost of brigade, $7,902; fire alarm, $278; 32 men, 5 horses, 3 stations; cost per head, 61 cents per $1,000, $1.44. Population, 13,411.

St. Thomas—Cost of brigade and fire alarm, $3,574; 10 men, 4 horses, 1 station; cost per head, 30 1-5 cents per $1,000, 73 cents. Population, estimated, 11,825.

⁂

PETERBORO BOARD OF TRADE.

On Wednesday evening last, 8th March, was held the annual meeting of the Peterboro Board of Trade. The retiring president, Mr. D. Hughes Charles, delivered his annual address, in the course of which he dwelt upon the prosperous condition of the town's business, and urged the early completion of the Trent Valley Canal. It was decided to call a special meeting at an early date to consider the question of asking Andrew Carnegie for a gift toward a public library. There is likely to be, we should think, some very decided difference of opinion as to the seemliness of asking the celebrated millionaire for any of his money.

MUTUAL LIFE OF CANADA.

This well known company has passed its thirty-fifth year, and shows a statement for the twelve months just past that is as gratifying as it is creditable. The management is able to say that the volume of new business in 1904 exceeds that of any former year, while the total in force is upwards of forty millions of dollars. A gain in total income of $164,000 over 1904 is shown. The income from premiums was $1,373,364 and from interest, $351,944. Expenses and taxes absorbed 17.4 per cent. of the total income, which is an economical improvement in this respect over 1903; compared with other only purely mutual prominent companies, this is a remarkably favorable showing. The death losses, annuities and endowments, which amounted to $389,000, added to the expenses of management and taxes, made only 39.9 per cent. of the total income, so that nearly eight per cent. of the receipts of the year went to policyholders in the shape of surplus profits and purchased policies. This company has always been liberally disposed in the matter of distributing profits, one of the things, doubtless, which helps its popularity in Ontario.

There is a gain of almost a million dollars in assets ($937,372) on the year; the aggregate of cash assets is $7,794,098, and of total assets $8,220,530. Of this the reserves at 4, 3½ and 3 per cent., which are high standards, absorb $7,355,172. The total liabilities are $7,448,458, so that the surplus on the company's valuation standard is $772,000, whereas the surplus on the Government standard exceeds a million dollars. These figures, which exhibit a gain in surplus of $170,000 on the year, are excellent testimony to the work of the company's field force. The report states, referring to the earnings of the assets, which are largely in mortgages, that the demand for money having been good, and payments being well met, they had earned the very satisfactory average rate of 5.09 per cent. which is an improved rate. The amount overdue at the end of the year was very small. Evidently the Mutual Life is doing well, and deserves credit for so well exemplifying the mutual principle to its members. The showing under review is a strong and satisfactory one.

MR. FRANK J. LIGHTBOURN, SECRETARY, ONTARIO ACCIDENT INSURANCE COMPANY.

⁂

THE MONTREAL HARBOR COMMISSION.

For some time past the meetings of the Montreal Harbor Commissioners have repeatedly been the reverse of harmonious, but last Monday's was rather more than usually agitated, for it was there made known that the administration of the port last year had resulted in a deficiency of nearly $150,000. So large a gap in the revenue is startling, no doubt, and appeared to be as much so to the commissioners as to the public. How to get over it was the question. Mr. Doran claimed that a large portion of the deficit was due to extravagance in the repairing of the piers. He was, therefore, in favor of placing a rental on the piers. He thought the steamship people should pay for terminal facilities, and then the extra wharfage fee could be abolished.

Mayor Laporte: "The intention is to make Montreal a free port, and if this is to be done the sooner we know it the better. If the trust is to continue the administration, we must meet all our indebtedness." And he later moved (but was ruled out of order), that a delegation proceed to Ottawa and ascertain the intention of the Government regarding the future of the harbor before this trust make the customary allotment of berths. Mr. Robert Reford declared that matters as they stand are not satisfactory to the shipping people, and went so far as to say that he would be pleased to sell out his interests at a sacrifice, for, to his knowledge, the Allans are the only people who have made money in the St. Lawrence.

Mr. James Crathern was in favor of charging a fee of at least six cents a square foot to the steamship companies for rental of the new steel sheds. A piece of what we shall call excited conversation between the two gentlemen last named and the chairman, Mr. R. Bickerdike (who presided in the absence of Hon. Mr. Mackay), was followed by what a reporter terms an epidemic of motions and amendments, all of which were overruled as out of order.

Mr. Bickerdike suggested that the meeting adjourn and request the secretary to place before the commission the actual figures of the harbor deficit.

It is greatly to be regretted that for a long time the deliberations of this body, charged as it is with very important duties, have been carried on in an atmosphere of heated and divergent political feeling. One result has been friction, and divided counsels; another, vacillating resolves and unstable procedure. One would not consent to such a thing because it was a reflection on a former administration of the Trust (which happened to be a Tory administration); another would die before he would agree to such another thing, because to do so would be to insult Sir Wilfrid Laurier or his friends. And thus cool and business-like conduct of affairs has been difficult, time being so often lost in more or less irrelevant discussion. Some such tone occasionally pervaded the discussions, indeed, as may he found in the colloquy between Shallow and Pistol in Shakespeare's King Henry IV.

Says Shallow: "I would have you know I am from the Court, and am a person of some consequence before the King."

To which Ancient Pistol answers: "Under which King, Bezonian, speak, or die!"

* * *

FINANCIAL MATTERS.

We have received a copy of the extremely neat brochure issued by the Royal Bank of Canada, containing its thirty-fifth annual report and other matter. The statistics therein relating to Canada have been selected with good judgment.

Application is to be made by the Prairie City Loan Company, a joint stock company incorporated under the provisions of the Manitoba Joint Stock Companies Act, to the Lieutenant-Governor for supplementary letters patent, increasing the capital stock of the company from $20.000 to $500,000.

The Winnipeg Telegram states that Mr. F. J. Hunter, western inspector of the Bank of Montreal, has concluded arrangements to open a sub-agency at Oakville, Man., at once. The office will be under the supervision of the Portage la Prairie branch. A building has been secured, and a safe installed.

The United States Supreme Court, at Washington, has affirmed the decision of the Circuit Court of Appeals for the second circuit in the case of Harriman versus the Northern Securities Company, involving the distribution of the shares of the Northern Securities Company. This decision is favorable to the company.

The aggregate amount of clearings in United States clearing houses for the first two months of the present year was $22.383.922.276, a gain of 31 per cent. over the corresponding two months of 1904, and of 15 per cent. over a similar period of 1903, which held the record for that period until then. The two absolutely greatest months in clearings records so far were November and December, 1904, showing an aggregate of $25.164.000.000. It should be remembered, of course, that February is a short month.

INSURANCE ITEMS.

The Sovereign Fire Assurance Company has been granted incorporation by the Banking and Commerce Committee of the House of Commons. Its head office is to be at Toronto and capital $2,000,000. Among those primarily interested are William Dineen and Robt. E. Menzies, of Toronto. The shares subscribed for are to be paid up in full within three years.

The Insurance Institute of Toronto has issued invitations to an illustrated lecture by John B. Laidlaw, Esq., on Lessons to be Learned from Conflagrations, to be given in St. George's Hall, Monday, March 13th, 1905, at 8 p.m. In addition to a number of stereopticon slides, Mr. H. Maughan will show a series of kosmograph moving pictures of the Toronto conflagration. To secure desirable seats, persons should come early. Ladies will be welcome.

What has been said about the abolition of the Toronto Fire Underwriters' Association appears to be premature. What has been done by the C.F.U.A., however, is to bring to Toronto from Montreal Mr. J. A. Robertson, who is to fill an important position in the Association's offices. Up till March 1st, Mr. Robertson occupied the position of superintendent of agencies in Quebec for the Western Assurance Co. He is a well-qualified fire insurance expert; and any merchant who wishes advice as to the concurrence of his policies; any manufacturer, who proposes altering his premises, will find Mr. Robertson an excellent adviser upon fire underwriting affairs.

* * *

FOR GROCERS AND PROVISION DEALERS.

J. J. Call is putting up a clam-canning factory at Sidney, Vancouver Island, at a cost of about $50,000. The new industry will be known as the Saanich Canning Factory.

To show the enormous extent of the importation of eggs into Great Britain, the following figures are given: In 1904 there were 19,942,594 great hundreds (a great hundred is six score) imported at a value of £6,730,574. In 1903 the quantity was 19.848,894 great hundreds. Last year the supplies were obtained mainly from the following countries: Russia, 7,032,906 great hundreds; Denmark, 3,602,326; Germany, 3,554,232; Belgium, 2,517,073; France, 1,698,614; Canada, 317,772. In 1904 poultry was imported into the United Kingdom to the value of £1,089,944, of which Russia shipped over 31 per cent.

The Dominion Department of Agriculture is considering the question of enforcing the use of a uniform-sized barrel for apples. At present the one used in Ontario holds 112 quarts, while that used in the Maritime Provinces contains only 96 quarts, the minimum. This is confusing, and, not only that, but prejudicial to the interests of those exporters who persist in using the smaller barrels. In getting apples to the English market some half-dozen charges are encountered—railway and steamship freights, dockage, drayage, etc.—all of which are per package, so that the Ontario shipper gets his 112 quarts of apples in the English market for the same money paid by the Nova Scotian for his 96 quarts. The prices received on the other side are about proportionate to the size of the barrel, the Ontario man getting an average of about two shillings more. The latter's extra quantity is shipped, too, for all practical purposes, free of freight charges.

The Wholesale Grocers' Guild, which held its annual meeting in Toronto a few days ago, discussed the delays by railways in the settlement of claims occasioned by shortages, as well as the unsatisfactory condition of shipping facilities often afforded; also the deterioration which sometimes results in French goods owing to their detention for too long a period in New York. The removal of the duty on tea from the United States was opposed by the Guild on general principles, as the Canadian market would at once become the dumping ground of the most deleterious specimens and the cheaper class of teas. The secretary was instructed to write the Government, requesting that before any action was taken on this line the wholesalers be given an opportunity to wait on the Government. The following officers were elected: President, Col. J. I. Davidson, Toronto; vice-presidents (one for each Province)—Ontario, H.

C. Beckett, Hamilton; Quebec, Albert Hebert, Montreal; New Brunswick, A. H. F. Randolph, St. John; Nova Scotia, H. G. Bald, Halifax; Manitoba, Kenneth Mackenzie, Winnipeg; British Columbia, H. Todd, Victoria. J. Stanley Cook, Montreal, was re-elected secretary.

* * *

ANSWERS TO ENQUIRERS.

Bank Clerk, City.—You are right in one case but wrong in the other. The average clearings at the Toronto Clearing House for the nine weeks ended with 2nd March were $57,833,000 per week. In the corresponding period of 1904, the average was $45,310,000, and in 1903 it was $48,750,000 per week.

* * *

DRY GOODS ITEMS.

A shipment of silk from the "Empress of Japan," to the extent of ten cars, left Vancouver a week ago on its way east by way of the Canadian Pacific Railway. Of the consignment one car was for Winnipeg, the remaining nine being billed for the United States.

"Emporium, Limited," Montreal, capital stock $200,000, is the name of a new company which has been granted a charter by the Ottawa Government, authorizing it to open stores and deal in general merchandise, to have a department for the teaching of cutting and designing all kinds of garments, to publish a technical journal connected with the business, and to carry on a mail order business. C. Duluth and J. Petitclerc, of Montreal, are interested.

There is little change in the Belfast linen market, but the volume of business is more than maintained, and prices keep steady. There is a moderate demand for flax at full rates. Advices indicate that Dutch and French sowing of flax this year is likely to show a marked decrease. Yarns continue in steady request, and, as manufacturers have hardly any stocks, spinners hold a strong position. Prices keep firm. Export trade continues good. Orders are steadily coming in from the United States. Cuban trade is improving, and the South American markets continue to order to a satisfactory extent. Canadian trade is fair. Australasian business keeps moderate, and there is an average turnover with the Continent.

There seems to be a feeling in the raw silk market that prices have gone about as low as can be expected, and as a consequence a slight increase in demand is noted. Stocks in manufacturers' hands are undoubtedly being depleted rapidly, owing to a favorable season, and if all the indications which are in evidence at the moment are fulfilled considerably more raw material will be needed before the season is over. One favorable factor in the situation, however, is that the stocks which were bought at slightly higher figures than may be obtained to-day have been readily absorbed, and the difference between to-day's purchases and the small amount still on hand will not be so appreciable on this account.

Walking costumes in Paris, especially those of the tailor type, are not considered complete without some description of waistcoat, and to a certain extent this remark is also applicable to all sorts of toilettes, even those of an extremely dressy order. It has become an assured fact, says a special correspondent of the New York Dry Goods Economist, that the waistcoat will play a most important part among dresses for the immediate future, and so extraordinarily varied is the present waistcoat, both in point of material and construction, that all tastes will be satisfied. The draped corsage has become such a general favorite that the same idea in arrangement now extends to the waistcoat as shown by the most recent creations. It is of the perfectly fitting type, reaching some couple of inches below the waistline, at which point it is allowed to open slightly and form short points.

Offerings at the London wool auction sales on the 8th inst. numbered 14,112 bales. Fine merinos and crossbreds sold readily, but all inferior qualities were slow and were frequently withdrawn. Cape of Good Hope sold briskly. Home and Continental buyers operated freely, and Americans bought some choice New South Wales Geelong wrap wools and crossbreds at full rates. The following shows the sales in detail: New South Wales—3,000 bales; scoured, 9½d. to 1s. 10½d.; greasy, 4¾d. to 1s. 2d. Queensland—2,100 bales; scoured, 11d. to 1s. 10½d.; greasy, 6¾d. to 11½d. Victorian—1,800 bales; scoured, 1s. ½d. to 1s. 7d.; greasy, 4¾d. to 1s. 2d. South Australia—1,100 bales; scoured, 1s. 1½d. to 1s. 6½d.; greasy, 5½d. to 11d. West Australia—1,900 bales; scoured, 1s. 1½d.; greasy, 4½d. to 11d. New Zealand—2,600 bales; greasy, 6½d. to 1s. Cape of Good Hope and Natal—400 bales; scoured, 10½d. to 1s. 7½d.; greasy, 6½d. to 10d. Falkland Islands—1,000 bales; greasy, 5¾d. to 9½d.

There has been very little actual business passing in the Bradford wool market during the past week, said a letter to the last Drapers' Record to hand, either in wools or yarns, as the uncertainty in prices has caused all orders to be held over until a more settled basis of values could be arrived at. The market here has, in fact, followed almost exactly on the lines indicated above, and merino prices are firm. There can be no doubt that users of these classes in this district are much better employed than they have been for some time, and, as the increase in the production will barely keep pace with the increased consumption, there is every reason to expect the prices to be firm for many months to come. The improved consumption for merinos in this district seems to be principally on account of a better demand for fine plain cloths and coatings for the dress and costume trade, and for fine worsted Italian lining cloths.

Spring deliveries have formed the bulk of the business passing in the Glasgow wholesale warehouse trade, and, while these have been heavy, it is apparent that retailers are this year postponing the bigger proportion of their stock deliveries till March, as then the fashions will have become better known, and laying in of stock less risky. A spirit of hopefulness still rules, although it would be more to the point were travellers to send back larger orders. For dress goods it is yet early to say how business promises or what is likely to catch the popular fancy. Habit and Amazon cloths appear to be more than holding their own, but as city travellers' calls are restricted so long as the sales continue, a week must elapse ere any real trade basis can be found. Meantime, retailers confined their orders to the fulfilment of immediate wants. Manufacturers of shirtings, lappets, and dhooties are better placed for Indian business. The wholesale shirting houses are engaged with their designs and preparations of patterns for next year. Travellers will go out with these next month. With reference to linens, quite a large assortment is being taken up for export westward. It is to be hoped that these orders will lift the market out of the dull groove in which it has lain so long. Prices of raw material and yarns are helping the movement. A condition accompanying the orders, however, is that delivery is not to be hurried.

* * *

—The Quebec Board of Trade is forming a board of conciliation, before which all disputes between the employers of labor in the port of Quebec and the laborers may be brought and settled. Strikes, whether they prove either successes or failures so far as the men are concerned, necessarily entail great losses, not only to the participants, but to the localities in which they are waged; and this plan of forming an independent tribunal, composed of members of the Board of Trade and representatives of the labor unions, should do much toward bringing about better conditions.

* * *

—A few days ago there was a general strike of smelter employees in British Columbia, as a result of the defeat in the local Legislature of the eight-hour bill for employees in that industry. They wanted three shifts of eight hours each instead of two shifts of twelve hours each, as at present, or in other words, a straight increase in wages of 50 per cent. Seeing that the present state of the industry is not highly profitable, it is hardly to be wondered at that the smelter owners concerned refused absolutely to accede to the men's demands, and announced that they would sooner tie up the whole business. The strike came to a speedy end.

LAND MORTGAGE COMPANIES' ASSOCIATION.

The eighteenth annual meeting of the Land Mortgage Companies' Association, composed of the principal loaning institutions in Ontario, with aggregate investments amounting to upwards of $93,000,000, was held in Toronto yesterday with the president, Mr. J. Herbert Mason, in the chair. Representatives were present from Hamilton, London, Stratford, St. Catharines, Port Hope, and Lindsay, as well as of a number of Toronto companies.

The executive committee presented a report respecting the legislation in which land mortgage companies are interested, which was introduced during the year into the Ontario Legislature and Dominion Parliament. The report and the treasurer's statement were unanimously adopted.

Vacancies in the ranks of the executive, caused by the death of Mr. R. S. Schell, with whose family a resolution of condolence was unanimously adopted, the retirement of Mr. George M. Furby, through ill-health, and of Col. James Mason, whose company is being converted into a bank, were filled, and the remaining members of the committee were re-elected . The officers and members of the committee for the ensuing year are as follows: President, Mr. J. Herbert Mason; first vice-president, Mr. W. F. Bullen, London; second vice-president, Hon. George A. Cox; secretary-treasurer, George H. Smith, and Messrs. V. B. Wadsworth, Walter Gillespie, R. S. Hudson, and Edward Saunders, Toronto; C. W. Cartwright, and C. Ferrie, Hamilton; William Buckingham, Stratford; J. H. Helm, Port Hope; and J. W. Stewart, St. Thomas.

* * *

—A bill for the placing of a heavy tax on commercial travellers has just passed its second reading in the British Columbia Legislature.

* * *

—The Winnipeg Board of Trade has passed a resolution pointing out that whereas the boundaries set to the Province of Manitoba in 1870 were merely tentative, and that since that time, owing to the appeal to the Privy Council of the Province of Ontario, the latter's dimensions have been increased at Manitoba's expense; therefore the Dominion Government is urgently requested to take means to enlarge on equitable terms the area of the Province so as to place it on an approximate equality with that of each of the new Provinces.

* * *

—Vessel owners are becoming anxious as to the policy of the Dominion Government with respect to the continuance of "no tolls" through the St. Lawrence canals, which has been in force during the last two seasons. Canal tolls, while apparently small in amount, have a very appreciable effect upon inland shipping. At one time twenty cents per ton was charged on grain and other products, and at another period ten cents per ton was charged. At ten cents per ton an ordinary cargo of wheat brought down from the Great Lakes would have to pay not less than $200 in tolls. Besides this, there was a charge for vessels as well. The consequence of all this was that inland craft were badly handicapped. The Government, it is believed, will probably allow things to continue as they are.

* * *

Last month there was a convention of representatives of Ontario Fairs and Exhibitions. They pronounced decidedly in favor of distributing the Government grants to the different fairs on a basis of the amount of money expended by them for agricultural purposes. A resolution was also passed requesting the Government to withhold grants from such societies as permit games of chance at their exhibitions. The matter of abolishing the distinction between district and township societies was on the programme, but no decision was reached. The convention decided to ask that, in the revision of the Agriculture and Arts Act, horticultural societies be separated from agricultural societies. Mr. F. W. Hodson, Canadian Live Stock Commissioner, discussed the ownership of stock by agricultural societies before the Ontario Association of Fairs and Exhibitions in the morning. He stated that to make a success of importing and owning stock by agricultural societies the plan should be part of a general scheme of live stock improvement. The possibilities before the societies were shown by the fact that last year 1,065,673 milch cows were owned in Ontario, and 560,893 beef animals were sold for slaughter. The average yield of milk amounted to 4,038 pounds, which produced 144 pounds of butter. The average price paid for each beef animal was $32.

* * *

—We have seen the report for 1904 of the Eastern Canada Savings and Loan Company, Limited. Its capital stock paid is $105,700, and it has borrowed $390,000 on debentures and has some $20,000 in deposits. The cash value of its mortgage loans is put down at $482,000; it owns $46,000 in provincial and municipal bonds, has $21,000 in real estate and $5,000 in cash. Last year's net profit was $11,427; it paid six per cent. dividend, wrote off $3,425, and placed $1,932 to reserve. Mr. S. M. Brookfield is president and Mr. J. C. Mackintosh, vice-president. Head office, Halifax.

—The Canadian Forestry Association holds its sixth annual meeting in Quebec this week, with delegates present from all over the Dominion and some parts of the States. Interesting papers are on the programme by the following gentlemen: Prof. R. W. Brock, Queen's University, Kingston; James Lemay, New Westminster; Rev. T. W. Tyles, Levis; T. G. Loggie, Fredericton; Hon. J. W. Longley, St. John; Commander A. P. Law, of the Ontario Geological Survey, Ottawa; J. C. Langelier, Quebec Crown Lands Department; Hon. J. C. Edwards, president Province of Ontario Limit Holders' Association; Dr. Judson F. Clarke, of Toronto, and W. H. T. Addison.

* * *

—Mr. Denis Murphy, president of the Ottawa Board of Trade draws attention to the great necessity which exists for the protection of the Canadian pulp and paper industry. "Pulp-wood," he argues, "is the rawest of raw material, and the labor employed in cutting it and transporting it from the stump to the cars or boats on which it is loaded is not skilled, and those employed in this work may be termed the hewers of wood, if not drawers of water, for the great pulp and paper mills of the United States, in which skilled labor of a high quality is largely employed. The pulp-wood industry of Canada has grown from year to year, until now our annual exports to the United States have reached in value the sum of two million of dollars. The tariff of the United States," reasons Mr. Murphy, "is framed with the idea of encouraging this country to export the raw material of pulp-wood, but to seriously discourage the exportation of the manufactured article, paper, and the partly manufactured article, wood pulp and wood fibre. Many of the pulp and paper mills of the United States are absolutely dependent upon Canada for their raw material in the form of pulp-wood, and should their supplies from this source be cut off, a large number of these establishments would, without doubt," he thinks, "be immediately transferred to this side of the line."

THE CROWN LIFE INSURANCE COMPANY.

Annual Meeting of Shareholders.

The annual meeting of the shareholders of the Crown Life Insurance Company was held at the head office of the company, in the city of Toronto, on Monday, March 6th, 1905. One hundred and seventy shareholders were present or represented by proxy.

DIRECTORS' REPORT FOR YEAR ENDING DECEMBER 31st, 1904.

Your directors respectfully submit for the consideration of the shareholders their report of the company's operations for the year ending 31st December, 1904. We are glad to be able to state that owing to the continuance of the great care in the selection of risks, and the conservative methods employed in securing them, the same high grade of business has been maintained during the year that has been such a marked feature of previous years. The volume of new business, moreover, exceeds that for any previous year.

New applications for insurance amounting to $1,485,210 were received by the company during the year for consideration. Of this amount policies for $1,264,200 were issued and "taken," the balance, $221,010, being the amount declined, deferred and "not taken." There were in force at the end of the year a total of 1,783 policies for $2,985,200 of insurance and representing a premium income of $120,910.39. These figures show that the average amount of each policy is upwards of $1,600, and the average premium rate per thousand of insurance is over $40.

The cash income for the year from premiums amounted to $109,917.87, in addition to which the deferred and outstanding premiums at the end of the year amounted to $34,033.02.

The company has again been fortunate in sustaining a very small death loss during the year, the total claims amounting to only $7,000 under six policies.

As is shown by the financial statement, our liability to policyholders is represented by a reserve fund of $151,627 on the basis of the present Government standard of valuation (Hm. 3½ per cent.). The total security to policyholders from all sources as against this liability amounts to $550,333.52, as set forth in detail in the financial statement which has been duly audited in accordance with the by-laws of the company, and which is submitted herewith.

The directors report with sincere regret the loss during the past year by death of two of the most highly esteemed members of the Board, Mr. John Foy, of Toronto, and Mr. Benjamin Heartz, of Prince Edward Island.

The directors desire to express their appreciation of the faithful and efficient services rendered by the head office staff and by the company's managers and agents.

D. Tisdale,
President.

Arthur J. Hughes,
Secretary.

ELECTION OF DIRECTORS.

The following directors were elected for the ensuing year:—Col. The Hon. David Tisdale, P.C., K.C., M.P.; John Charlton, Herbert H. Mowat, K.C.; R. L. Borden, K.C., M.P.; Samuel Barker, M.P.; Arthur R. Boswell, K.C.; Rodolphe Forget, M.P.; Geo. H. Hees, Frank E. Hodgins, K.C.; Randolph Macdonald, C. B. Wilcox, W. B. McMurrich, K.C.; Geo. H. Roberts, Henry T. Machell, M.D., L.R.C.P.; J. Douglas Hazen, K.C., M.P.P.

ELECTION OF OFFICERS.

At a subsequent meeting of the new board of directors, Col. The Hon. David Tisdale, P.C., K.C., M.P., was re-elected president: Mr. John Charlton, vice-president, and Mr. Geo. H. Roberts, managing director.

BRITISH COLUMBIA PERMANENT LOAN COMPANY.

This company's head office is in Vancouver, where its seventh annual meeting has been held. The remarkable statement was made at the meeting, by one of its officers, that whereas at the end of 1898 the assets of the company amounted to only $19,753, they were at the end of 1901, $460,888, and they are now $1,400,000. So we see that things grow fast in the West; and we may learn also that there is room in British Columbia and the North-West for a loan company such as this. The British Columbia Permanent has more than a million of stock paid up out of three millions subscribed; we do not need to particularize the instalment, the permanent and other kinds, and has issued some debentures. It has made mortgage loans amounting to $1,228,000, of an average size of $830, and has other assets of $172,000, part of which consists of shares in a fire insurance company named "The Pacific Coast," the apparent purpose being to not only lend a man money on his house, but to insure it for him. The official inspector certifies that he has examined the statements and balance sheet and finds them in accordance with the law, and he approves the dividend, which is at the rate of 8½ per cent. The report states that the company has had a most successful year, and that its shares command 40 per cent. premium. The earnings of the year from interest, rents and commissions were $103,173, and the reserve is $25,000, and the contingent fund $20,000. In his address, the president, Mr. Langlois, notes that a time when the people of Canada are increasing their deposits in the banks at the rate of a million dollars a week is likely to be a time when land values boom, so the company has kept a lookout for such pitfalls. But he says he has inspected 700 dwellings in Manitoba and the Territories on which his company has loaned $700,000, and with very slight exception, found them amply secured. It is manifest, from what we know of the influx into the Territories, that there must be a brisk demand for new houses, which leads to a large increase in the business of loan companies, such as this. The British Columbia Permanent is doing well, and bids fair to be a very large concern. The directors and trustees were re-elected.

* * *

IRRIGATION IN ALBERTA.

It is a good while, says a correspondent who writes from near Calgary, since you have had any reference in your paper to the irrigation of dry lands which has been going on in this country of Alberta. When you had some articles on the subject a few years ago, they described small affairs, such as the irrigation of sections here and there in a limited way. But to-day the problem of irrigation has been taken hold of by the Canadian Pacific Railway, who do not as a rule do things by halves. They propose to irrigate a tract of land containing from two to three million acres, lying between Calgary and Medicine Hat. And the sources from which they propose to get water are the Bow River and the Red Deer River.

The work of making canals or trenches to convey water where it is most needed has been begun already. Close to Calgary is the main canal, partly cut last year, and expected to be carried twenty miles this year. The size of it will probably surprise you, for it is to be sixty feet in width and will carry ten feet of water. Secondary canals to the extent of eighty miles are planned to be cut this year also, and these will water something over two hundred thousand acres, equal to 2,000 farms of a hundred acres each, on which can then be grown oats, barley, and timothy hay. Then, of course, besides these lands there is in this district twice the area of land which lies higher and is suited for grazing and dairy farming. For a country which produces so many cattle as this district does, there is very little milk produced, most of the milk used being brought in a "condensed" form, from Eastern Canada, even from as far east as Nova Scotia. But we shall by-and-by be able to make our own condensed milk on the spot, and our own butter, too.

Another thing we can grow here, it is believed, with great success is the sugar beet. It has been proved at Raymond in Southern Alberta, that beets testing high in saccharine matter can be successfully grown on the irrigated lands down there, for the days are long and mostly sunny, so that the sugar beet can

ripen well. I am told that a big American firm is in treaty with the C.P.R. folks for the building of a beet sugar refinery to cost more than half a million.

You may have heard of the circus that has been going on for weeks and months between the municipality of Calgary and a Wisconsin company entitled the Eau Claire ("Clear Water"), Water Power Company, which has had a monopoly in that city in providing electric light. Their tolls were so high that the people would not endure them any longer, and so a by-law was brought in to provide a municipal lighting plant. A vote of the ratepayers was taken, when 600 people voted "yea" and only a dozen "nay," and tenders were called for, to be submitted by 15th March. This brought Mr. Kerr, the president of the Eau Claire concern, to Calgary for the purpose of negotiating a compromise. But he is too late, for the residents seem determined to have a lighting plant of their own. This western air does not take kindly to monopoly, especially when monopoly grows cheeky and extortionate.

* * *

CANADIAN RAILWAYS AND CANALS.

According to a report prepared by the Department of Railways and Canals, there was spent on Government railways during the fiscal year 1903-4 the sum of $12,357,250, of which $2,619,059 was chargeable to capital account, $2,132,231 to income, and $7,599,958 to revenue. On canals the sum spent was $2,980,558, of which $1,880,787 was chargeable to capital, $302,409 to income, $436,034 for staff, and $361,327 for repairs. The total number of controlling railway companies in Canada is eighty-five, besides the Government railways. Fifty-four companies were absorbed by amalgamation, and there were thirty-eight leased lines. Completed railways amount to 19,611 miles, an increase of 534 miles in the year, besides 3,327 miles of sidings. Laid with steel rails, 19,545 miles, of which 763 miles was double track. There is in operation 19,431 miles. Paid-up capital of Canadian railways amounts to $1,186,546,918, an increase of $39,996,149. Gross earnings of the year were $100,219,436, an increase of $4,154,909; working expenses, $74,563,162, an increase of $7,081,638. Net earnings, $25,656,274, a decrease of $2,926,729. Number of passengers carried, 23,640,765, an increase of 92,023; freight traffic, 48,097,519 tons, an increase of 724,102 tons. Rolling stock consists of, for passenger service, 2,149 cars; for freight service, 84,422, including 54,877 box and cattle cars, and for operation and maintenance service 4,157, making a total of 90,728 cars.

* * *

ONTARIO ACCIDENT INSURANCE COMPANY.

During the year 1904, authority was given this company to insure against accidental damage to personal property other than plate glass. And accordingly an increase of capital has been effected as well as an increased deposit at Ottawa. This is a novel form of business here, and the scope of the company's business therefore includes with this addition five elements; personal accident; liability; sickness; workmen's collective; and property damage. The year's net premiums show a very decided enlargement, namely, from $178,000, in 1903, to $223,000 last year. And the outgo for claims was $107,751 at the hands of no fewer than 1,824 persons. An increase of assets is shown as the result of the year's business. After raising the reserve fund to $55,500, keeping the contingency fund at $10,000, a dividend of seven per cent. per annum has been paid, instead of six, and $929 is carried forward. These evidences of progress ought to be gratifying to the shareholders.

The president, it will be observed, calls attention to the fact that the aggregate premium of the Ontario Accident Company since 1896 has been $900,302, while the sum of $401,916 has been paid for claims made by 8,557 beneficiaries. This represents an average payment of 966 claims per week at the rate of $47 per claim. That was a very creditable statement which Mr. Eastmure was able to make, namely, that in the liability branch of its business the company had never been called upon to contest a claim at law with a policyholder. As to sickness insurance, an increasing demand was experienced; $25,000 was received in premiums in this branch of the company's business, and benefits had been paid of $10,842 to 330 persons, many of whom doubtless found the $32.85 each they received very comforting in the payment of doctors' and nurses' bills. A tribute was paid by this gentleman at the meeting to the growing importance of casualty underwriting, and to the valuable work done by various organizations on this continent in reducing its conditions to order and uniformity.

* * *

KING'S COUNTY BOARD OF TRADE.

Kentville is the shire town of King's County, Nova Scotia, one of the prosperous and attractive districts of Nova Scotia. It has for years possessed a live Board of Trade, which takes its name from the county, instead of from the town. This body passed a resolution respecting steamship service, February 4th, 1905, which runs as follows:

Whereas the importers and exporters of merchandise, etc., in Canada have been seriously handicapped by the slow and irregular line of steamers running between the winter ports (St. John and Halifax), and London in the past,

And whereas, the present service is very unsatisfactory on account of not fulfilling the specifications of the contract,

And whereas, we require a much faster service in order to keep the legitimate trade from being driven from Canadian ports to those of our competitors, it is the opinion of the members of this Board of Trade here assembled that the movement taken by the St. John Board of Trade in requesting the Federal Government to call for tenders for an-all-year-round service between the winter ports of the Maritime Provinces and London is a very important one, and should be endorsed by every business man interested in the improvement of Canadian commerce.

Therefore, resolved, that the King's County Board of Trade earnestly request the Department of Trade and Commerce to call for tenders for an adequate steamship service between St. John, Halifax and London, after July 1st next, as specified in the estimates, requesting such tenders to be left open until April 1st, 1905, and recommend the contract to be made for five years. C. O. Allen, president; J. Howe Cox, Secretary.

Kentville, N.S., Feb. 4th, 1905.

* * *

INTERCOLONIAL RAILWAY.

In considering supply, in the Ottawa House last week, after the leader of the Opposition had shown how really appalling the depth of snow had been and how great the difficulty of keeping the Intercolonial Railway open, in late February and early March this year, an item of $100,000 passed for double-tracking some portions of the line. It was stated by Hon. Mr. Emmerson, when the item for improving the terminals at Halifax came up, that it was intended, by blasting and dredging, to give a depth of thirty feet of water at the Intercolonial Railway wharf at low water; the depth at present being twenty-eight feet. He said that the total expenditure at that harbor would approximate $1,000,000. Had the facilities which this sum would provide been in existence last year the Intercolonial Railway could have handled a large volume of traffic in connection with the Grand Trunk, and the Allan Line, which, owing to their absence, the railway had to decline. The Government railway could not, he pointed out, expect to get any advantage from the Canadian Pacific. If a great national trade was to be built up it could only be done, in his opinion, by making the ports of Halifax and St. John equal to the port of Portland, Maine. There was no use talking about projects to build up the Empire unless our own ports were properly equipped to compete with rival ports.

THE WAR EAGLE MINING CO.

The eighth annual report of the War Eagle Consolidated Mining and Development Company has been issued. It shows the result of the company's operations during the year ended December 31st last. The financial statement shows assets of $2,308,151.61, the mine's mineral claims being valued at $1,699,329.39. There is shown on hand $39,236; stores on hand, $10,335.50; accounts receivable, $25,898.58. and profit and loss, $237,822.75. The liabilities include Bank of Toronto, Rossland, overdraft, $96,378.66; George Gooderham, $451,667.44, and accounts payable, $10,050. The profit and loss account shows net proceeds from ore sales, $290,919.40, less Provincial ore tax of $5,818.37—$285,101.03. Transfer fees amounted to but $9.25. The net tonnage mined during the year is given as 56,760, plus 4.304, tons to the mill, for which there had been no returns to date. The assay value is $691,287.53; total smelting, $400,368.13, and smelters' net value, $290,919.40. The assay value was $12.18, against $13 the previous year, and $18.79 in 1902. The highest assay value was $47.33, in 1895. During the year 2,220 feet of beedings were driven and 61,064 tons of ore produced. The reserves of smelting ore are estimated at about 23,000 tons, averaging $8.50, smelters' gross assay value. One expenditure of $88,153.93, of which $27,797.78 was applied to interest on the indebtedness, and $19,903.98 was written off from depreciation, leaving $40,152.17. The cost of ore production has been brought down to $2.24, and the total cost of mining, including development work, is $3 per ton. The annual meeting has been postponed until March 28th owing to the absence of President Gooderham and the illness of Vice-President Blackstock.

* * *

—"Finance," of Cleveland, O., gives a detailed account of the result of the recent tests in that city of cheap fares on the street railways. Summarized, it shows that during the period of the three-cent test the loss in receipts was 5.74 per cent. This loss was shown when the three-cent fares collected were only 18½ per cent. of the fares collected on the entire system. The four-cent test shows a loss of 10.87 per cent., or $1,375.74 per day, or at the rate of $502,145.10 per year. This seems fairly conclusive evidence that cheap fares, at any rate so far as the company is concerned, are not so conducive to profit as has been represented. It should be borne in mind, however, that the tests were very short, and for that reason cannot be taken wholly as irrefutable evidence.

Meetings

THE HAMILTON PROVIDENT AND LOAN SOCIETY.

The thirty-third annual meeting of the shareholders of the society was held at the society's head office, Hamilton, Ont., at eleven o'clock, on Monday, 6th March. Among those present were the following:—

Col. A. H. Moore, J. F. Smith, John H. Coon, J. T. Glassco, W. J. Reid, Geo. Rutherford, J. J. Greene, Geo. Sweet, H. P. Heming, H. W. Clarkson, J. B. Fairgrieve, Alex. Turner, H. H. Anderson, Alex. Main, Geo. Watson, W. H. Wardrope, Rev. Geo. Forneret, John Eastwood, Judge Snider, R. Butler, Hon. William Gibson, P. D. Crerar, Geo. LeRiche, T. H. Crerar, W. F. Findlay, E. G. Payne, R. R. Ferrie, Charles Judd, D. M. Cameron, John McCoy.

The president, Alexander Turner, in the chair.

C. Ferrie, treasurer, acted as secretary.

The secretary read the report and annual statements as follows:—

Thirty-Third Annual Report.

The directors have pleasure in presenting to the shareholders the thirty-third annual report of the society's affairs, and accompanying financial statements, duly audited.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management and other charges, amount to $96,154.51, out of which two half-yearly dividends at the rate of 6 per cent. per annum were paid, together with taxes on capital and income, and the balance, $29,005.51, has been applied as follows:—

Added to reserve fund	$25,000.00	
Credited to contingent fund	4,005 51	
		$29,005 51

After writing off all losses, and providing for possible shrinkage in value of securities, there remains at the credit of the contingent fund, $14,547.73.

The reserve fund now amounts to $415,000.

Payments by borrowers have been very satisfactory, and the funds of the society actively employed at profitable rates of interest.

All of which is respectfully submitted.

Alexander Turner, President.

30th January, 1905.

C. Ferrie, Treasurer.

27th January, 1905.

We hereby certify that we have examined the books, accounts and vouchers of the Hamilton Provident and Loan Society, and have found the same correct. We have also examined the securities (excepting those relating to Manitoba loans), and find them in perfect order, and correct as set forth in the above statement.

W. F. Findlay, F.C.A.
Maitland Young,
Auditors.

Hamilton, 28th January, 1905.

I hereby certify that I have examined the securities and vouchers and audited the books of the Hamilton Provident and Loan Society for the year ending 31st December, 1904, as kept in their Brandon office, and have found them correct.

H. L. Adolph, Auditor.

Brandon, Man., January 21st, 1905.

On motion of the president, seconded by the vice-president, the report was adopted.

The following gentlemen were re-elected directors:—Alexander Turner, George Rutherford, Hon. William Gibson, John T. Glassco, Judge Snider, George Hope.

At a meeting of the directors, held after the annual meeting, Alexander Turner was re-elected president, and George Rutherford, vice-president.

THE DOMINION PERMANENT LOAN CO.

The fourteenth regular annual meeting of the Dominion Permanent Loan Company was held at the offices of the company on Wednesday, March 1st, 1905. A large number of shareholders were present.

The president, the Hon. J. R. Stratton, occupied the chair. Mr. T. P. Coffee, vice-president, was requested to act as secretary.

The president presented the following report of the directors for the year ending December 31st, 1904:—

Report.

Your directors are pleased to be able to state that active and profitable employment has been found for the funds of the company during the past year, the demand for satisfactory loans being sufficient to call into requisition the available funds of the company.

The earnings for the past year have enabled the company to declare and pay dividends amounting to $69,134.14, and to permit of the transfer of $45,000 to the reserve fund of the company. After payment of such dividends, and the addition to the reserve fund of $45,000, and the writing off of $1,444.54 off office furniture and premises, there remains to be placed to the credit of profit and loss the sum of $20,684.68.

Your directors are pleased to be in a position to congratulate the shareholders upon the gratifying results of the operations of the company during the past year, and have also pleasure in testifying to the generally efficient character of the services rendered by the officials, agents and staff of the company.

All of which is respectfully submitted.

J. R. Stratton, President.

AUDITORS' CERTIFICATE.

We have examined the cash transactions, receipts and payments affecting the accounts of the assets and investments for the year ended December 31st, 1904, and we find the same in good order and properly vouched. We have also examined the mortgages and securities, representing the assets and investments set out in the above account, and we certify that they were in possession and safe custody as on December 31st, 1904.

(Signed) Harry Vigeon,
O. M. Hudson, Chartered Accountants.

Toronto, February 11th, 1905.

Mr. Stratton, in moving the adoption of the report said:

It gives me very great pleasure to move the adoption of the fourteenth annual report of the Dominion Permanent Loan Company, a feeling which is to my mind amply justified by the favorable showing as to the outcome of the past year's operations, which the report demonstrates—results, which, I am sure, the directors and shareholders will regard as very proper subjects for congratulation.

The good financial standing of the company is gratifyingly reflected by the statement that the surplus of assets over liabilities shows a continued steady advance. This surplus on December 31st, 1903, amounted to $1,429,432.59, while on December 31st, 1904, the figure had advanced to $1,441,676.30. The net income arising from the operations of the company for the year under review amounted to $112,259.28. After deducting from this amount the expenses of management it will be noted that there remained a balance of $65,684.68, permitting of the transfer of $45,000 to the reserve fund, which advanced the total of that fund to $160,000, and leaving a balance of $20,684.68 for entry in the credit column of profit and loss account, as against a similar balance for the preceding year of $18,547.42.

All these things taken together afford reasonable grounds for gratification, which are all the more pleasing since the general condition of the country points to continued, if not increased, activity in the various departments of our nation's commerce. The more conspicuous position Canada as a whole is assuming in the eyes of the world at large, and the more general attention being given to her resources, and promise of growth and expansion are making this country a favorable resort for those seeking to better their condition under circumstances of the most favorable character. There is every prospect that the inflow of population from abroad will become increasingly augmented in volume for some years to come. The extension of farming operations which will naturally result means an important increase in our home market, which in turn means a corresponding increase of industrial activity. All these conditions point to increased demand for capital, not only for the work of great industrial and railway corporations, but also for the more modest demands of individuals for smaller enterprises, but numerically of sufficient extent and general distribution to create a fair demand for accommodation such as our company is equipped to afford. With an increase of population, such as the immediate future promises, and with the increasing wealth which the rapidly extending development of our great natural resources will bring, there seems to be no reason why the Dominion Permanent Loan Company should not get its full share of the business benefits from the conditions mentioned.

Thus, with a satisfactory year's operations added to past years of success and a promising future, there is reason for confidence in the coming year.

I have very great pleasure in moving the adoption of the report.

Mr. D. W. Karn, in seconding the motion for the adoption of the report, said:—

It affords me great pleasure to second the motion for the adoption of the report of the company, for it reveals a condition of affairs affording reasonable satisfactory grounds for congratulation in the improved standing and increased earnings of the company, as shown by the substantial amount available to strengthen the reserve fund, and the handsome balance carried forward to profit and loss. The extended reference of the president leaves me little to say, except to add my congratulations, which the character of the annual report so fairly justifies.

The report was after some complimentary observations of several shareholders, unanimously adopted.

The following directors were then re-elected:—Hon. J. R. Stratton, president Trusts & Guarantee Company; D. W. Karn, president of the D. W. Karn Company, Woodstock; C. Kloepfer, manufacturer and director Traders Bank, Toronto; T. P. Coffee and F. M. Holland, Toronto.

After the election of the auditors, Messrs. H. Vigeon and O. M. Hudson, the meeting adjourned.

At a subsequent meeting of the directors, Hon. J. R. Stratton was re-elected president and Mr. T. P. Coffee, vice-president.

The Ontario Accident Insurance Company

NINTH ANNUAL REPORT

The directors have pleasure in presenting to the shareholders the company's ninth annual report for the year ending December 31st, 1904, together with the balance sheet and revenue account, and the attention of all interested in the company's affairs is again directed to its continued satisfactory progress.

The net income from premiums, after deducting $7,420.31 for reinsurance, was $216,417.26.

The interest upon investments amounted to $2,017.45.

During the year the company paid under its policies 1,824 claims; the total, after deducting $3,157.09 received from reinsuring companies, amounted to $104,594.69.

The revenue account submitted herewith, after debiting all charges and expenses, shows a balance of $24,169.70. This has been applied as follows:—$10,000.00 to reserve fund, $10,000.00 to contingency account, $3,259.95 in payment of dividend No. 7, leaving $929.75 unappropriated.

The reserve fund has been raised to $55,500.00, the contingency fund standing at $10,000.00.

During the year authority was obtained from the Dominion Parliament to enable the company to insure personal property, other than plate or other glass, against accidental damage, and in relation thereto the paid-up capital has been increased to $50,070.00, and the deposit with the Receiver-General at Ottawa to $42,232.00.

The premium income shows an increase over that of 1903 of $45,051.54.

All of which is respectfully submitted.

LARRATT W. SMITH, President.

Toronto, February 1st, 1905.

Proceedings of the Ninth Annual General Meeting.

The ninth annual general meeting of the shareholders was held at the company's offices, Nos. 61-65 Adelaide Street East, Toronto, on Monday, the 20th of February, 1905, at 12 o'clock noon.

The chair was occupied by the President, Dr. Larratt W. Smith, and Mr. F. J. Lightbourn, the secretary, acted as secretary of the meeting.

The notice calling the meeting having been read by the secretary, the president submitted the report, together with financial statements, and said in part:—

President's Remarks.

Gentlemen,—I have much pleasure in submitting the ninth annual report, and in congratulating the shareholders upon the gratifying proofs which the figures give of the company's continued satisfactory progress.

On policies issued and renewed during the year the net premiums, as will be seen more fully from the statements submitted, amounted, after allowing for rebates, to $223,837.57, as against $178,786.03 in 1903.

The aggregate income derived from premiums since the company commenced business in 1896 has reached a total of $900,302.07, and during the same period payments on claims amounting to $401,916.30 were distributed among 8,557 beneficiaries.

During 1904 claims under the company's policies were received from 1,824 persons, representing in the aggregate a total of $107,751.78, all of which were satisfactorily adjusted and promptly settled.

It will be observed that the reserve, which in our last report was raised to $45,500, has been still further increased and now stands at $55,500, whilst the contingency fund remains the same at $10,000.

Mr. A. L. Eastmure, the vice-president, in seconding the motion for the adoption of the report, referred to the very satisfactory nature of it, and he had pleasure in seconding the motion for its adoption.

On motion, Messrs. Clarkson & Cross were reappointed auditors for the ensuing year.

Mr. A. W. Thomas and Mr. E. T. Lightbourn having been appointed scrutineers, reported the following gentlemen elected as directors:—Larratt W. Smith, A. L. Eastmure, W. H. Pearson, J. Herbert Mason, J. N. Shenstone, F. J. Lightbourn, Thomas Fyshe (Montreal), J. F. Smith, K.C., and G. W. Monk.

After the customary vote of thanks to the president, vice-president, secretary and officials in the office, the meeting adjourned.

At a meeting of the directors, held immediately after the annual meeting, Dr. Larratt W. Smith was re-elected president and Mr. A. L. Eastmure vice-president of the company.

Executive Committee:—Messrs. Larratt W. Smith, A. L. Eastmure, and W. H. Pearson.

DOMINION SECURITIES CORPORATION, LIMITED

26 KING STREET EAST, TORONTO

DEALERS IN

GOVERNMENT AND OTHER HIGH GRADE BOND INVESTMENTS

CORRESPONDENCE INVITED.

Mercantile Summary.

W. J. McGuire & Co., Limited, Montreal, have received a charter from the Dominion Government entitling them to carry on business as contractors and manufacturers in drainage, plumbing, heating, lighting, and ventilating apparatus.

The Wilkinson Plough Company, Toronto Junction, has purchased a controlling interest in the West Lorne Wagon Company, of West Lorne, Ont., which manufactures chiefly carts, drays, spring-coal delivery wagons, and such vehicles. The price, we understand, was $75,000.

The Government of the Bermuda Islands has passed a bill to grant to the Quebec Steamship Co. a subsidy of £4,500 for the first year and £2,500 for the second year, in consideration of the company putting on a service between Bermuda and New York during the entire year.

The hope of converting English Bay, near Vancouver, into a fine pleasure resort has not by any means been abandoned. The British Columbia Construction Company has prepared elaborate plans for the improvement of that district. They are under the consideration of the Finance Committee of the City Council.

After a hearing before a United States Government Commissioner, in Chicago last week, it was held to have been established that there was a gigantic combination controlling the drug trade of the United States and costing the consumers $40,000,000 annually. The fight against the combination is being carried on by a large retail druggist in Philadelphia, who is suing for $100,000 damages under the Sherman anti-trust law.

A despatch from Albany, N.Y., dated 28th ult., said that an agreement for the consolidation of the New York and Albany Railway Company, capital, $5,000,000, with the Schenectady and Albany Railway Company, capital $150,000, and the New York Northern Railway Company, capital $5,000,000, forming the New York Canadian Pacific Railway Company, had been filed with the Secretary of State there on that day. The consolidated company has a capital of $10,150,000, and among the directors are: W. Howard Brown, Albany; Jno. McEncree, Schenectady, and Peter H. Flagler, Clarkesville. These companies hold franchises to construct a line of railway from New York City to Canada, passing through Albany and the Adirondacks region.

Prompt attention to collections.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

MAKING A WILL

is a duty every person recognizes, and the selection of a proper executor or trustee is the most important consideration in making the will. The advantages of a trust company as executor under will over the individual are many, and are thoroughly explained in a neat booklet, which is yours for the asking.

Mercantile Summary.

The Canadian Northern Coal and Ore Dock Company, Limited, of Toronto, has been incorporated with a capital of $500,000, to carry on a general shipping, lumber, coal, ore, and grain business. J. S. Lovell, Wm. Bain and others, of Toronto, are provisional directors.

The plant of the American Cereal Company, at Cedar Rapids, Ia., which is said to be the largest of its kind in the world, comprising two entire blocks, was on the 7th inst. almost completely destroyed by fire. The loss is estimated at $1,500,000, and the insurance at $1,000,000. Two people, at least, lost their lives. The fire started in the hull grinding-room of an elevator.

A week or two ago the United States manufacturers advanced the prices of glazed kid, commenting on which the Boston Shoe and Leather Reporter remarks as follows: "In view of the steady advance in the price of goatskins, there can be no doubt that the action of the morocco manufacturers is fully warranted. In addition to this, the advance is legitimate when the high price of other materials that enter into the manufacture is considered, as well as the increase of other manufacturing expenses and the generally low prices which have continued for glazed kid, while other leather has steadily appreciated in value. Glazed kid has not advanced in sympathy with other lines of leather in the gradual but steady rise that has continued for some months, even though the necessity has been apparent, and it has been remarked that it has become too frequent a practice to allow the shoe manufacturer to make up for other advances to what extent he could by paying less for kid."

Several of the retail hardware dealers of Montreal and the surrounding district are appealing to the Government against what they style the combine formed by the Wholesale Hardware Dealers' Association of Ontario and Quebec. A. A. Wilson, of the Wilson Hardware Co., Montreal, who is a leader in the movement, says: "Satisfied that the protection afforded them by the Government has effectively shut out foreign competition, Canadian hardware manufacturers have formed a combine to keep their goods at a certain price on the market, and if a manufacturer tries to remain independent they simply crush him out of business. I may say it would not be so bad if they were satisfied to take a fair profit on the goods they manufacture. This combine does great harm. In addition to quoting regular wholesale figures, they allow the larger men a special rebate, which gives them an opportunity to undersell the less fortunate firms, who are unable, through lack of capital or extent of business, to buy as largely as the more wealthy firms of wholesalers. We maintain that it is not just or legal that these most important branches in the commercial prosperity of Canada should be thus handicapped. Surely these manufacturers, with a protection of 25 to 30 per cent. from foreign goods, should not be allowed to bleed the small wholesalers and retailers."

TORONTO, ONT

Mercantile Summary.

The A. C. Thompson Company are about to erect, either in Sydney or North Sydney, a nail factory with a capacity of 75,000 to 100,000 kegs per year.

The Boileau Reduction Company, Toronto, capital, $1,200,000, has received an Ontario Government charter empowering it to acquire the Boileau system patents for the reduction of ore and to carry on the business of milling, mining, smelting, and reducing. F. Plumb and F. V. Philpot, of Toronto, are provisional directors.

A few days ago, Hon. Mr. Domville moved in the Senate for the appointment of a select committee to enquire into the production of aluminum in this country. There was, he stated, thirteen times as much clay (from which aluminum is extracted), in the world, as iron, and the patents for the extracting process expire shortly in Great Britain and the United States and have never existed in Canada.

The district around Oxbow, Assa., has been favored with beautiful spring-like weather for the past two weeks. A telegram a few days ago to a Winnipeg paper stated that the snow has all gone and several parties are harrowing. One farmer had sowed ten acres of wheat already, as an experiment. The roads are in good condition.

As a culmination of the agreement between the city of Portland, Me., and the Grand Trunk Railway Co. made thirty years ago, the Galt wharf at that city has now been finally transferred by warranty deed to the G.T.R. The company has heretofore rented the property, which was the wharf from which the first shipment of grain was ever made from the port. The Grand Trunk will probably, it is said, inaugurate extensive improvements and alterations.

A. E. & W. E. Matthews are trying to start an abattoir enterprise in Ottawa, and make the following proposition to the city: The city to use Plouffe's Park as a site for 59 years at a nominal rental of $1 a year, to grant exemption from taxes, to guarantee for twenty years five per cent. of a bond issue of $100,000, and to have as security a first lien; to pass a by-law requiring all meat sold in the city to be slaughtered under inspection; to furnish free water and permit railway connections. A tariff would also be drawn up stating rates for slaughtering animals and for cold storage.

The Canadian Street Railway Association held a quarterly meeting in Ottawa, on Tuesday last, and appointed a special committee to investigate and report upon the best methods of safeguarding public life from street car accidents. Mr. W. G. Ross, managing director of the Montreal Street Railway, read a paper on the "Employees' Mutual Benefit Association." Other papers read were by A. S. R. Ickes, of Brantford, on "The Lord's Day Act, and Its Effect on the Operation of Electric Railways;" by C. E. A. Carr, of London, on the "Transportation of Mails by Electric Cars;" by W. H. Moore, of Toronto on "Inter-urban Railways."

IN HER PUBLIC LANDS

many thousand of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

CANADIAN WEST INDIA STEAMERS

Sail from Halifax for Bermuda, The Windward Islands and Demerara every other Monday, and for Jamaica once a month.

The demand for Canadian goods in West India markets is constantly growing, an prospective exporters should inquire as to freight rates by this line.

PICKFORD & BLACK,
HALIFAX.

The Boundary Creek Mining and Mineral Company's properties lying north and west of Greenwood, have been bonded to a syndicate who will at once go to work developing them. Another syndicate has acquired a group of claims immediately adjoining the above, including the "Anaconda," "Little Jim," and "Sudbury," from which some fine copper ore has been taken, and will develop them as rapidly as possible.

Mercantile Summary.

The Canadian Pacific Railway contemplates constructing a branch line from London to Sarnia, passing through the oil fields around Petrolia.

The Canadian Drawn Steel Company, Limited, of Hamilton, capital, $100,000, has received an Ontario charter. H. J. Waddle is a director.

R. Prefontaine, P. Galibert and other Montrealers have formed a company with the object of hunting for whales, and manufacturing, curing, and marketing the products thereof. The company will be known as the Gulf Whaling Company, Limited; capital stock, $295,000.

The Canada Brass Rolling Mills Co. has opened a factory for rolling brass, copper and silver-sheet, in New Toronto, Ont., and what we understand to be the first piece of sheet brass manufactured in Canada was turned out there a few days ago.

The Canada Steel and Tin Plate Company have been granted by the Dominion Government the right to develop 1,100-h.p. from the Williamsburg Canal, if permission can be obtained from property-holders. If the by-law carries it will authorize the council to borrow $76,100 to be divided as follows: $30,000 to the Government for developing the water power; $38,750 for electrical machinery; $5,100 for transformers, and $2,250 for land. In order to borrow this sum, the village will secure permission from the Ontario Government to consolidate the municipal debt, and will then issue debentures to cover a period of sixty years. The concessions asked for by the company are, in addition to the $2,250 for land, 700 electric horse-power, free water and exemption from taxation (except school taxes.) The village is also expected to secure to the company the right to run a railway track down to the river. The company's side of the agreement is to erect eight mills at a cost of $300,000, to employ about 400 men, and to buy from the village the surplus electric power (estimated at from 400 to 500-h.p.) at $12.50 per horse-power.

The following patents have been granted to Canadian inventors in Canada and the United States: Canadian—W. E. Cook, Ottawa, rotary pumps; W. Richmond, London, pump plungers; W. Richmond, London, pumps; E. G. Case, Niagara Falls, Ont., processes or methods of fastening abrasive material to metal or other suitable bodies; C. J. McCarthy, Moncton, N.B., devices for separating piston rod from cross heads; J. S. N. Guindon, Montreal, spring beds. United States—Helen H. Cooke, Toronto, Canada, hot food cabinet and table; Thomas G. Foster, Gravenhurst, Canada, fastening means for hames; Herbert P. H. Galloway, Toronto, Canada, time controlling damper mechanism; George G. Glenn, Hamilton, Canada, tomato peeler; Richard F. Holtermann, Brantford, Canada, bee-hive; Edwin S. Pratt, Parry Sound, Canada, sight for firearms; John B. Smith, Aylmer, Canada, non-reusable bottle; John B. Smith, Aylmer, Canada, monkey wrench; Charles D. Cutts, Toronto Junction, Canada, cinder shaker.

Construction work on the Temiskaming and Northern Ontario Railway is progressing rapidly, the rails having been laid for thirty miles beyond New Liskeard.

Replying to Mr. Osler, the Minister of Railways stated that since 1897 the purchases of rolling stock for the Intercolonial amounted to $5,751,085.

The affairs of Urgele St. Onge, a dry goods dealer, of Valleyfield, Que., are reported to be in unsettled shape. Some little time ago he is said to have obtained an extension on liabilities reaching about $21,000, but this arrangement does not appear to have afforded him the relief calculated, and a statement of his affairs is now being prepared by a firm of Montreal accountants.

A winding-up order has been granted in the matter of La Compagnie d'Approvisionnements Alimentaires, Limited (Anglice, The Provision Supply Co.), of Montreal. The company was first incorporated in 1891 to operate a number of agencies for French canned goods, wines, liqueurs, etc., a considerable proportion of French money being invested, but they apparently have met with a good many difficulties, and the majority of the agencies were transferred to Jodoin, Maloney & Lawrence last spring. A meeting of the shareholders and creditors is ordered for April 1st.

The annual meeting of Rhodes, Curry & Co., Limited, of Amherst, Nova Scotia, was held on 1st March. The report of the directors was read and adopted, and a dividend of 6 per cent. declared, which, on account of the increase in the capital stock of the company, about equals the 12 per cent. paid last year. The directors' report showed the volume of business for the year to have been $2,300,000. The receipts in 1904, from the sale of cars, were $1,400,000. The amount paid out in wages during the year was $367,000. The report further stated that at the present time the company has $1,000,000 worth of orders for cars, and about $200,000 worth of building contracts. These figures give an idea of the extent of the business of this firm, and the many hands they employ. Officers were elected as follows: N. Curry, president; N. A. Rhodes, vice-president; J. M. Curry, secretary and treasurer; E. N. Rhodes, solicitor. The vacancy on the board of directors caused by the death of the late J. M. Townshend, was filled by the appointment of J. Robson Douglas. In addition to this, Senator Mitchell, of Drummondville, Que., and B. F. Pearson, M.L.A., of Halifax, were added to the board.

Keenan Brothers have established a large wooden ware factory in Owen Sound, Ont. It will make chiefly baskets and butter tubs, and will give employment to a hundred hands.

The eighteenth annual general meeting of the E. B. Eddy Company took place in Hull, Que., on the 1st inst. The old board of directors was re-elected, as follows: Mr. E. B. Eddy, president; Mr. S. S. Cushman, vice-president, and Mr. W. H. Rowley, treasurer. It is stated that there is no foundation for, nor any truth in, the report of the Eddy Company selling out to an American or any other syndicate.

The International Railway Company, of Buffalo, was formally transferred to the International Traction Company on the 2nd inst., and the board of directors has been re-organized, as follows: Henry J. Pierce, Charles Steele, Daniel O'Day, G. L. Boissevain, Pendennis White, of Buffalo; Thomas Dewitt Cuyler, of Philadelphia; P. E. Millen, of Chicago; Arthur Robinson, of New York; H. M. Watson, of Buffalo; Robert L. Fryer, of Buffalo; T. G. Blackstock and E. B. Osler, of Toronto. The president of the International Railway Company, which is the holding company, is Henry J. Pierce, and the secretary-treasurer, F. L. Slocum.

In the matter of the P. R. Cumming Mfg. Co., Limited, manufacturers of wood specialties, at Renfrew, Ont., a winding-up order has been applied for. The company was first incorporated at Clarksburg, Grey County, Ont., in 1901, but removed to Renfrew in the fall of 1903, under an arrangement with the town, whereby a free site and a bonus of $18,000 were granted them, but they were never apparently able to get the works fairly started, nor secure sufficient capital to run the business effectively. The liabilities are said to reach $70,000.

Montreal trade failures for the week are reported as follows: Mrs. B. Legare, who has carried on the boot and shoe business of her late husband since his death four years ago, has been obliged to assign, and owes about $2,000.——J. A. Bienvenu, in the tailoring line in a small way, has made an assignment of his estate, after being in business only a few months. Liabilities are reported at $1,200.——Louis Glauberson, doing a peddlers' supply business, under the style of the European Importing Co., whose failure we noted a few weeks ago, has succeeded in arranging a compromise at 25 cents on the dollar.——Mrs. Cloutier, milliner, has effected a compromise on her small liabilities.——Calixte Corbeau, a saloonkeeper in the Ste. Cunegonde suburbs, has turned over his estate to the assignee, and files a list of liabilities aggregating $10,500.——Audette & Lajoie, saloonkeepers in the East End, have been asked to assign.

* * *

—"It is useless for you to dispute with me, sir." "But—" "But, nothing. There are no exceptions. If you want to succeed, you must begin at the bottom." "But I can't do it. I—" "Nonsense. What is your trade?" "I dig wells."

ENTERPRISING THURSO.

The little town of Thurso, Que., on the river Ottawa, thirty miles below the city, deserves to be put on the record for enterprise and push. Although the population is only 525, they have a civic system of waterworks, and filtered water, too, that cost $15,000, with a tank 150 feet above the village, and ten hydrants, the yearly revenue from it being $600. The ordinary taxes are $690, and special for waterworks $445 on a valuation of $88,160, of taxable property, with $27,000 non-taxable. There is also a permanent Board of Health, and the corporation has assumed the ownership of the roads and sidewalks. This is a splendid record for so small a place, and shows that the mixed population does not matter if the people are enterprising. The officials are as follows: Mayor, Mr. Wm. Thomson; councillors, Messrs. Duncan McGregor, Gonzague Gagnon, H. J. Metcalfe, M.D.; Francois Pelletier, Edmond Lefebvre, and Samuel Campbell; sec.-treas., Mr. J. Robillard, M.D. As further evidence of the enterprise of Thurso, it has just become a member of the U.C.M. Mr. Wm. Thomson, Mayor of Thurso, Que., has been in active business there for the last 35 years, and was elected to the first council. He has been Mayor for more than one series of years.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.
WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

P. Wasilkowski, of Grand Mere, Que., formerly a peddler, and for the past year in the clothing line at the above address, has made an assignment, after several suits had appeared against him. He is said to owe about $2,000.

Mercantile Summary

A winding-up order has been issued in the matter of L'Institut Medicale de Montreal, Limited, a concern incorporated under provincial laws in 1900, with an authorized capital of $15,000, to carry on an institution for the treatment of special diseases.

The firm of John Maitland & Co., handling clothing, etc., at Smith's Falls, Ont., are in trouble, and make a proposition to their creditors to pay 25 per cent. of their claims. Their trade liabilities are put at about $5,300, while they also owe $3,000 to relatives, and assets are shown of about $4,500.

A despatch from Kingston, Jamaica, says that the Duke of Montrose, Commissioner Sir Charles Cust, the Right Hon. Arnold Morley, the Earl of Dundonald, and the Hon. O'Neil, the nephew of the Earl, are now in the West Indies. The Duke of Montrose and the Hon. Arnold Morley will pay a visit to the United States. The party arrived in Barbados a week ago on R.M.S. "Atrato," where the Duke and the Hon. A. Morley joined the later's yacht. They will visit the United States in March after they have cruised around the islands.

⁂

TORONTO MARKETS.

Toronto, March 9th. 1905.

Chemicals, Drugs, Etc.—While the local trade continues fairly good, there is no special feature worthy of comment. The business being done in opium, quinine, and the staple lines, is about average with prices steady. Across the line normal conditions are reported. In Great Britain some improvement is spoken of in the export trade, while that for home requirements languishes, except in respect of orders for immediate needs.

Dry Goods.—The millinery openings last week brought numbers of purchasers, not only in that special line, but in general dry goods as well, to the city, with the result that business was very active. Some wholesalers, indeed, say that the trade done so far this year was never equalled, a statement which is borne out by the large increase in the customs returns respecting dry goods. An extraordinary quantity of ribbons has been sold. Trade in ready-to-wear ladies' garments has been particularly brisk. Staple articles remain quite firm in price. Woolen goods are still, if anything, advancing, while raw cotton has had, during the last few days at any rate, an upward tendency again. Payments on the 4th were not particularly good, to be accounted for, it is presumed, by the road blockades in the country during February.

Flour and Grain.—A quiet market still prevails for flour, and ninety per cent. patents sell around $4.45 in buyers' bags, east or west. Rolled oats are still on the easy side. Millfeed has an upward tendency. In grain but little or no business is being done. Oats have gone up a cent or two, while corn is firmer. Other grains nominally are the same.

Burnett & Company have bought a seat on the Montreal Stock Exchange to-day from Dr. Matthewman for $18,500.

A change has been made in the American Consulate here. Mr. Robert S. Chilton, Jr., of Washington, will succeed E. N. Gunsaulus as United States Consul in Toronto, the latter having been appointed Consul in Cork, Ireland.

The Dominion Wire Rope Company, Limited, Montreal, held their annual meeting a few days ago, and elected F. W. Fairman president, F. H. Hopkins vice-president and managing director, and J. J. Rosevear secretary-treasurer.

Meakins & Son's brush factory in Hamilton was on Wednesday last destroyed by fire at a loss of $70,000 on stock and building. A hat factory in connection was also damaged to the extent of $7,000. The total insurance is placed at about $30,000.

A despatch of Saturday last from Calgary says that a train load of American settlers came in that day from Washington and Idaho; 300 of them located between Macleod and Nanton. Plowing has begun all over that district, although three weeks earlier than in many years.

Representatives of the Lake Carriers' Association and the Cooks' Union on vessels plying the Great Lakes, agreed at Cleveland, Ohio, on Saturday last, to the terms of employment for the coming season of navigation. Last year's wages will prevail.

⁂

THE AGE OF THE TIN CAN.

A description of a great hollow-ware establishment in Wales is prefaced by the following lines in the Mercantile Guardian of Birmingham: "When, after centuries, history comes to be re-written, our era is likely enough to be classified as the Age of the Tin Can. The next Carlyle—a hundred to one—will abandon tailors for tinkers and centralize a whole philosophy about and around the universal tin pan. Perhaps no things are more intimately entwined with the life the world leads than the humble articles, cut, pressed, shaped, or fashioned from tin-plate. Civilization and the can are co-extensive. Nowadays nothing is done without the assistance of hollow-ware. Bully-beef tins litter the deserts, tin-ware pannikins dance on the saddles of the pioneers. Every shop, camp, court, or home has somewhat to show and to use which comes directly and phenomenally cheaply from the works of the tin-plate stampers. Baths, basins, buckets, jugs, mugs, pans, pots and dishes, bowls, measures, dippers, funnels; in all a thousand articles and one, each less dispensable than the last, crowd into the memory of him who would recapitulate."

⁂

PIG IRON IN THE UNITED STATES.

The pig iron industry of the United States has been feeling the effect of the severe winter, says Dun's Review. Production has been curtailed and deliveries postponed. More contracts for Bessemer iron have appeared, and the chief interruption was found in moving coke. At Connellsville the conditions were excellent, more ovens raising the yield, but it was not possible to reach some consumers, notably those at Chicago. Leading steel producers are falling further behind with their deliveries, and in a few cases there have been advances in quotations, but as a rule the disposition is to hold the market steady. In a few instances it is recorded that speculative purchases were returned to the furnaces at a loss, despite the fact that the tendency of the general market has been steadily upward. New tonnage in finished steel is not heavy because consumers provided for requirements during the first quarter when the year opened. Hence the mills are busy and will not seek new contracts for another month. Structural material is gaining slowly, elevation of tracks and bridge work supplying the bulk of current business. It will not be long before work is resumed on large office and other buildings, though the severe winter is a deterring factor of great potency. As a rule, quotations are very firmly held, and numerous cases are noted where slight concessions would largely augment the tonnage.

STUPENDOUS WORK AT NIAGARA.

That great power plants are being constructed on the Canadian side of Niagara Falls is well known, but probably not many recognize the stupendous character of the work going on, nor appreciate the relation of the new plants to the total hydro-electric development of the world. The three great power stations now being built will have an aggregate output of 285,000-h.p. distributed as follows: The Canadian Niagara Power Company, 110,000; the Toronto and Niagara Power Company, 115,000, and the Ontario Power Company, 60,000. The last named company intends increasing its stations ultimately to 180,000. Comparing the total for the present plans of 285,000, with the grand total for the world, which is given by the Engineer (London), as 1,483,000, shows what an important addition to the world's water power the Canadian plants will form. But this is not the whole story, for adding in the additional 120,000 planned for the Ontario Power Company gives a total of 405,000-h.p. for the new Canadian stations—more than 27 per cent. of the world's present hydro-electric power.—Electrical Review.

⁂

THE DIFFERENCE.

"Now," said the interviewer, after the great man had told of his achievements, "will you tell me to what you ascribe your success?"

"Do you ask for publication or for your own information?" asked the great man.

"For publication," was the reply.

"Then say," said the great man reflectively, "that I attribute my present position to industry, economy, perseverance, a determination to succeed, and a general observation of all the rules which, if you care to print them at length, you may find in the biography of any self-made man."

The interviewer laid down his pencil. "For my own information," he said, "what are the reasons for your success?"

"My relatives, friends and the grace of God," responded the great man, solemnly. Sunday Magazine.

The FIVE per cent. Debentures issued by this Company afford the following advantages:

The investment can be converted into cash at any time after two years by giving sixty days' notice.

The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.

The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.

The Debentures issued by the Company will be a first charge upon the assets.

Within the past year 160 000 new possible buyers of your goods settled in the West. Will the retail merchant offer them what you have to sell?

Established 1882
THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

THE HUGH C MACLEAN CO., LIMITED,
Publishers, Winnipeg

(Montreal Markets, Continued.)

Fruits and Vegetables.—A normal trade is going on in fruits from the South. Oranges are about steady. New Messina lemons sell at $2.50 to $2.75. Bananas fetch $1.35 to $1.75.

Groceries.—A general improvement has set in since the milder weather rendered it easier for people in the country to get about. Sugar is quite firm, and further advances are looked for. Canned goods of all descriptions are in great request. Tomatoes particularly are scarce, and some have come in from across the line. They are held in some quarters at as high as $1.30. Enquiries are coming in for canned salmon earlier than usual, perhaps due to the recognized likelihood of a lengthy close season coming into force at a not distant date. In dried fruits a seasonably good trade is being carried on. Evaporated peaches and apricots are very scarce.

Hardware.—Orders are coming in very satisfactorily for all seasonable goods and little doubt exists but that with the opening of navigation a rushing trade will be experienced. The farmers are getting ready for spring operations, and so are the various branches of the building trades, so that unless something very unforeseen happens it looks as though a very good season is before the trade. Prices show but little change from previous reports. This applies also to metals, which show a fair movement. Cement is selling at low prices.

Live Stock.—The quality of the offerings this week has been poor to middling, while the quantity was large. The consequence was that the market dragged. All the exporters, however, sold without trouble, buyers having freight space to spare. Butchers sold at good prices, that is, those of any quality at all. Most, however, were poor.

Hides, Skins, and Leather.—The market has continued steady at the recent decline, without much business being transacted. Calfskins are about the same. No change in tallow. Prices for leather are being fairly well maintained, but the demand is slow.

DELAYS ARE DANGEROUS,

Wool.—The market for domestic wool is slow. A report in the New York Journal of Commerce states, on what authority we do not know, that a quantity of Spanish wool has just been bought for the Toronto market. It asks: "Will it be washed and re-exported to the United States?"

* * *

MONTREAL MARKETS.

Montreal, 8th March, 1905.

Ashes.—The situation is little changed, and the quotations of local buyers are fairly steady at $5.40 to $5.45 for first quality pots; seconds, $4.95 to $5. Pearls are wanted, and would bring $7.50, or probably over, but there is an entire absence of business in these sorts.

Dairy Products.—There is a revival of interest in the cheese market under increasing enquiry from Britain, and several advances are noted in cable quotations. Some sales of choice fall goods are reported at 11c., with 11¼c. asked in cer-

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the la-t 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.

tain cases. The total spot stock is now figured at only about 30,000 boxes. Of prime butter a dearth still exists, and finest grades of new milk and held creamery goods are quoted at 28 to 30c.; dairy rolls, 23 to 24c. Owing to free receipts there has been a marked decline in eggs, new-laid being quoted at 24 to 25c.

Dry Goods.—With the advent of somewhat longer and sunnier days, city retailers report shoppers out in larger numbers, but sales are not greatly increased as yet. A fair number of Western and Eastern buyers have been noticed among the wholesale warehouses this week, but their selections have been generally characterized by moderation. Travellers' orders are also reported to show a conservative disposition on the part of retail buyers. Several leading houses report about 70 to 75 per cent. of customers' paper as being met on the 4th inst.

Fish.—There is a brisk Lenten demand, and prices are generally firmer, with notable advance in green cod and some other lines. We quote: Large green cod, $8 to $8.50; No. 2. do., $6 to $6.50; No. 1 mackerel, in kits, $2; Labrador herrings, $5.50 per barrel; halves, do., $2.90 to $3; sea trout, $9.50; fresh frozen herrings, $1.50 to $2.20 per hundred, as to size; haddock, 3¼ to 3½c. per lb.; fresh cod, 3½c. per lb.; haddies, 6 to 6½c. per lb.; boneless cod, 6c.; boneless fish, 5½c. in bricks.

Furs.—Some fair lots of Lake Superior and Western skins have come to hand lately, but receipts from north of this city have been light. Fine mink and skunk are bringing good prices, and we revise quotations. The London March sales begin on the 23rd inst. We quote for prime pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $4.50 to $5.50 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $25 or more; coon, $2.50 for fine black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $2; short stripe, $1.65; long stripe, 60c.; broad stripe, 25c.

Groceries.—The movement is not a brisk one, and there is little new to report except a marked advance in low grade and medium Ceylon black teas, a cable having been received to-day advising a rise in these of a full penny per lb. Japan teas keep low in price, and even easier values seem to be anticipated before new crop teas come on the market. Refined sugars have undergone no change, the factory figure for standard granulated remaining at $5.65.

Hides.—Receipts continue on the light side, and though the quality of beef hides offering is much affected by their grubby

Managers and Underwriters.

condition, prices are steadily maintained at 9½c. per lb. for No. 1. Calfskins rule steady at 13c. for No. 1, and 11c. for No. 2; sheepskins, $1.15 to $1.20 each, and lambskins, 10c. each.

Hog Products.—There has been a general advance in this line, barrel pork being put up from 75c. to $1.50 a barrel, and other lines proportionately. We quote: Heavy Canada short cut, $19; selected heavy Canada, short cut, $20; heavy flank, $17; Canada short cut backs, $18; country dressed hogs, 7½ to 7¾c.; hams, 11 to 12c.; breakfast bacon, 12½c.; extra pure lard, 8½c.; first kettle do., 9½c.; leaf lard, in 2-lb. bricks, 10½c.

Leather.—Deliveries of spring boot and shoe stocks are well advanced, and manufacturers are now mainly interested in getting travellers' salesmen equipped with fall samples, so that the local demand for leather is not very brisk at present. But there is a continued fair export movement in sole, and also some enquiry for jobbers' sole, which is in quite light supply. Prices for sole are very steady on the basis of 24c. for No. 2 mfrs., and there is a possibility of advance under more active demand. Prices of black leather are unchanged.

Metals and Hardware.—Hardware shows a moderate movement, and while heavy metals are not particularly active, some considerable buying by the larger railway companies has helped the volume of trade. As regards values, there are no noteworthy changes. Stocks of Summerlee pig iron are very low, and $21 firm is asked for No. 1 in car lots. It is said Sydney No. 1 has been offered here at $17.50. Bars, boiler plate, iron pipe, wire, nails, etc., all remain at old figures. Ingot tin rules very firm at 32½ to 33c., and lead, copper, spelter, etc., are steady at last quotations.

Oils, Paints and Glass.—The advance in window glass, referred to in last report, has become general, and jobbers of Belgian glass are now quoting $3.75 firm per 100 ft. for first break; for English glass the figure is $4.25. Turpentine remains at 77½c. per gallon for single barrels; 5-barrel lots a cent less; raw linseed oil 43c., and boiled, 46c. in ordinary lots. Fish oils are very dull and neglected. Putty is quoted at varying prices, and is sold as low as $1.40 in bulk. White leads are fairly steady on the basis of $4.50 for pure.

* * *

The property of the Canada Coal and Railway Company at Joggins, N.S., which went into liquidation last year, was sold at Amherst on the 8th inst. at the instance of the bondholders. The purchaser was Stuart Jenks, of Amherst, acting for outside capitalists, said to be Americans. The purchase price was $50,500 for the mining property, which includes the line of railway from MacCan to Joggins, and large coal mines in splendid working condition at the latter place. Timber lands embracing 1,900 acres were sold for $5,500, which, it is said, will be devoted to liquidate the miners' unpaid wages.

AUDITED AND FOUND CORRECT.

J. M. SCULLY, F.C.A., AUDITOR. GEO. WEGENAST, MANAGER.

DIRECTORS' REPORT

Your Directors have pleasure in submitting their 35th Annual Report, showing the transactions for the year, and the Financial standing of the Company as at December 31st, 1904. The business of 1904 was most gratifying in all respects, large gains having been made in Income, Assets, and Surplus.

INSURANCE ACCOUNT.—The volume of new business exceeds that of any former year, being 3.452 Policies for $5,048,168, all of which, except $30,000, was written within the Dominion. The total assurance now in force is $40,476,970.58 under 27,742 policies, the net addition for the year being $2,889 419. While many of our native Companies are seeking business abroad, some of them in distant parts of the world, it is thought by your Directors that good Canadian business is preferable to foreign business, which is secured with less certainty as to its quality, and at excessive cost.

INCOME.—The total income was $1,725,308.90, being $1,373,364.69 for premiums, and $351,944.21 for interest. The gain over 1903 was $164.238.87.

DISBURSEMENTS.—The payments to Policyholders amounted to $524,615.34, and consisted of Death Claims, $220,304.50; Endowments, $160,053; Purchased Policies, $52,394.54; Surplus, $83,183.40, and Annuities, $8,679 90. The claims by death were exceptionally light, being $51,404 less than last year, and only 41 per cent of the amount expected.

THE EXPENSES AND TAXES were $300,807, being 17.4 per cent. of the total income, or about 1 per cent. less than in 1903.

ASSETS.—The cash assets are $7,794,098.35, and the total assets $8,220,530.45, showing gains of $905.450.05, and $937.372.05 respectively. The funds are being invested in the same classes of securities as heretofore, principally in Mortgage loans on farm and city properties, Bonds and Municipal Debentures. The latter are taken into account at their book value or cost, which is considerably below their market value. The demand for money was active during the year, at better rates than for some years past, resulting in a slight advance in the rate of interest earned, viz., 5.09 per cent. Payments on Mortgages for interest and instalments of principal were well met, though in the case of our Manitoba loans they were not quite as satisfactory as in former years, due to the partial failure of the wheat crop The interest and rents overdue at the close of the year were but a small portion of the receipts, being only $13,740.19, most of which has since been paid.

LIABILITIES.—The liabilities were again computed on the Combined Experienced Table with 4 per cent. interest for all business up to January 1st, 1900. From that date to January 1st, 1903, on the Institute of Actuaries' Table with 3½ per cent., and thereafter on the same Table with 3 per cent.

SURPLUS.—After making provision for all liabilities the surplus on our own standard is $772,072.87, being an increase of $170,920.20 over 1903, and this after distributing amongst Policyholders $83,183.40. On the Government standard of reserves, namely. 4½ per cent. for business to January 1st, 1900, and 3½ per cent. thereafter, our Surplus is $1,049,400.71. The earnings for the year were $254,103.60.

On behalf of the Board. ROBERT MELVIN, President.

The various reports having been adopted, the retiring directors, Right Hon. Sir Wilfrid Laurier, A. Hoskin, Esq., K.C., Hon. Mr. Justice Garrow and E. P. Clement, Esq., K.C., were unanimously re-elected. After a number of able and thoughtful addresses had been made by members of the Board, prominent Policyholders, the Manager, the agents and others, the meeting adjourned.

The Directors met subsequently and re-elected Mr Robert Melvin, President; Mr. Alfred Hoskin, K.C., First Vice-President, and the Hon Mr. Justice Britton, Second Vice-President of the Company for the ensuing year.

(Booklets containing full report, comprising lists of death and endowment claims paid, of securities held, and other interesting and instructive particulars are being issued and will in due course be distributed among Policyholders and intending insurants.)

Waterloo, March 2, 1905. W. H. RIDDELL, Secretary.

HOW TO LESSEN GREAT FIRES.

A list of conflagrations on another page affords an intimation, which to many of our readers will be, we imagine, a novel one, of the frequency of such events in the history of the world in recent centuries. Beginning as it does with the great fire of London some two hundred and forty years ago, this list takes no account of the looting and burning of conquered cities during the earlier years of the Christian Era. There are records, however, of thirty conflagrations arising from what are termed normal causes up to the year 1100. In the twelfth century there were 27; in the thirteenth, 16; in the fourteenth, 11; in the fifteenth, 12; in the sixteenth, 13—making 79 in all before we begin to speak of the great fire of 1666, of the devastation of which Pepys' Diary affords us so graphic an account, and which probably caused the founding in England of fire insurance companies.

Tracing the origin and extent of the great burnings since that of London, as is done by Mr. J. B. Laidlaw in his excellent paper, "Lessons from Conflagrations," delivered this week first before the Insurance Institute of Toronto, and afterwards before the Insurance Institute of Montreal, it is learned that these events are unhappily not rarities, but succeed one another with tolerable regularity. Another feature of them, which is marked is not at all unnatural, namely, that they occur most often in dry weather. Numerous instances are given where these dreadful burnings have swept over towns and cities because "everything was as dry as tinder" from lack of rain over a lengthened period. As Samuel Pepys said of the great London fire, September 1st to 9th, 1666, "And everything after so long a drought proving combustible, even the very stones of churches." Time and again has this been the case. Investigation has shown that conflagrations take place where the fire protection is of the best, as well as where it is defective; that the best business blocks have been swept away along with those of poor construction, and that in some cases a fortunate change of wind or weather have proved a great factor in subduing the flames. On the whole, however, good construction of buildings and appliances preventive of fires resulted in fewer losses and of smaller amount.

The first step towards minimizing risk appears to be reduction of the area of any unit freely subject to one fire. On building construction Mr. Laidlaw remarked that it had been many times demonstrated that a building of several floors with free communication between them, or a building of large area, even though only one storey high, was a conflagration breeder. All municipalities already possess by-laws governing the erection of new buildings, but to eliminate the conflagration hazard the authorities must go further and insist on the remodelling of all existing structures in such wise as to make them less easily combustible. The regulation which is centuries old requiring fire walls to be built between mercantile buildings should be extended so as to provide that there be no interior communication whatever from floor to floor. Firemen would then have an infinitely easier task, and there would be much more probability of their preventing fire from becoming a conflagration.

Since great conflagrations have been of regular occurrence in the past they may be looked for equally in the future unless we learn from experience and change the conditions of structure of buildings and arrangement of towns. "The consideration of the direct and indirect losses to a community and to the country at large by conflagrations," says Mr. Laidlaw, "and also by all fires whether they be large or small, should receive much more attention that it now does from political economists, newspaper and magazine writers and our public men, each of whom has a share in forming public opinion." And he enforces the weight of the fact so little comprehended by the many that fire losses fall not upon insurance companies, but upon the community at large. "If the average man could be brought to see that he pays a share of the loss occasioned by every fire he would then probably welcome preventive measures in the same way that he now consents to and supports rigorous quarantine measures in regard to contagious diseases. When this consummation has been attained there will be a great change in the experience of fire insurance companies and a corresponding reduction in the rates which they are now compelled to charge—but probably not before."

Among the causes of conflagrations are these three classes. First, the absence of fire protection due to carelessness or stupidity on the part of municipal authorities, or of the controllers of a private waterworks company in emptying the reservoir or turning off water in certain sections of a town or city—this done sometimes in a very dry season. Secondly, such causes as the close contiguity of numerous buildings built of wood with shingle roofs. Thirdly, the danger from a building of large area in which intense combustion has been very rapidly set up. In such a case the gases and heated air cannot be confined within the limits of the four walls, but belch out through the windows, igniting any building within a moderate distance.

A point often made, but which cannot be too strongly insisted upon, is that the openings in the walls of buildings, the openings in their floors, and unenclosed elevator shafts, are constant and common causes of the spread of fire. For another thing, it is in vain to erect fire-proof buildings if there are allowed to be fire-trap buildings all around them, either the fire from the latter will get into the windows of the former, or the heat and imprisoned gases arising from the contents of the fire-proof buildings will burst out and communicate to the combustible matter which surrounds them.

THE FORESTRY CONVENTION.

No more important question faces the people of the Dominion than that discussed in many phases of the Canadian Forestry Association at its sixth annual meeting in Quebec last week. The objects for which this Association was organized may be summarized as follows:—The preservation of the forests for their influence on climate, fertility and water supply; the exploration of the public domain and the reservation for timber production of lands unsuited for agriculture; the promotion of judicious methods in dealing with forests and woodlands; re-afforestation where advisable; tree planting on the plains and on streets and highways; the collection and dissemination of information bearing on the forestry problem in general.

The attendance at the meeting was large and represented practically all parts of the Dominion, besides which delegates were present from many important institutions in the United States. The following were appointed vice-presidents for the year:—Ontario, Hon. E. J. Davis; Quebec, Hon. S. N. Parent; New Brunswick, His Honor J. B. Snowball, Lieut.-Governor; Nova Scotia, Hon. J. W. Longley; Prince Edward Island, Rev. A. E. Burke; Manitoba, Major Stewart Mulvey; Assiniboia, His Honor A. E. Forget, Lieutenant-Governor of the North-West Territories; Alberta, Wm. Pearce, Calgary; Athabasca, F. D. Wilson, Fort Vermilion; British Columbia, Hon. Hewitt Bostock; Keewatin, the Lieutenant-Governor of Manitoba.

An important matter was touched on in the report of the Forestry and Colonization Commission of Quebec to the local legislature. Some of the conclusions of this commission were as follows:—

> "That there is no antagonism between the holders of timber licenses and real settlers, or those who honestly take up public lands with the view of clearing them, and not of speculating in the timber. That the number of speculators in Government lots and in timber, already very considerable, is constantly on the increase. These interlopers are the scourge of colonization, a subject of continual trouble, and, on occasion, of serious losses to the license holders and the Government. The extraordinarily increased value which all woods have attained within four or five years has caused this practice to spring up in all parts of the Province, and the operations have assumed proportions which have become almost a menace to the legitimately conducted lumber industry. The first measure necessary is the division of the public domain into settlement lands and merchantable timber lands. There is a great deal of land unsuited for profitable cultivation, as much by the nature as by the conformation of the soil, but very richly timbered. It would, therefore, be in the interest of the Province to form these lands into forest reserves. That the system of protection against forest fires is insufficient, and requires an increase in the number and an improvement in the personnel of the fire ranging staff. Further restrictions as to the time and methods of setting out of fires are recommended, and the necessity for educating the people to the need for care in handling fire is urged."

Forest fires are still causing destruction in various parts of Canada, though it is satisfactory to learn that their extent has been largely controlled by the fire-ranging system now generally adopted throughout the Dominion. Parts of British Columbia, however, outside the railway belt, which is under the supervision of the Dominion fire-rangers, have suffered considerably, partly owing to the dry season and partly because that province has not provided effectively for a protection system.

The address of the President, Mr. Aubrey White, was a very able one. It touched upon many matters of interest to lumbermen and foresters, and was frequently applauded. There were also several other papers read.

BOARD OF TRADE MEMBERSHIP AND ITS DUTIES.

A pronounced rebuke was given to those business men of a community who refuse to take their share in work for the common good, by Mr. D. Hughes Charles, president of the Peterboro Board of Trade. Said that gentleman the other day when pressed to accept the presidency of the Board for another term: "I do not think that I got the support as president which I should from the town generally, and the members of the board in particular. We held four meetings during the year, and only three members attended all of them, according to the secretary's reports; four members were present at four meetings, six at three, eight at two, and sixteen at one meeting out of the five. There are thirty-seven members of this board of trade who never attended a meeting at all." Continuing, he said he came to Peterboro a stranger and had done all in his power to advance the interests of the board. He did not see why a stranger should go on doing the work where the general public was most interested and got the most benefit, but would not take the trouble to attend the meetings. He could as a private citizen spend his time just as pleasantly as any one else, but he had broken many social engagements to attend the meetings. Still, he had taken up the obligation of president and wished to carry it out. In his opinion it was a disgrace that a hockey match should take away the bulk of the members from an annual meeting.

In giving this rebuke to the merchants and manufacturers of Peterboro, Mr. Charles administered a reproof to many more business men all over the country, members of boards or committees or other associations which are intended to benefit the places in which they are established. It is true, and it has long been true, that the willing few public-spirited and self-sacrificing members of such bodies, are in the majority of cases left to do the work in which every member should take his share. The amount of selfishness shown in such cases is discreditable in the extreme. We have known it to happen in large places as well as small that men on important commercial committees would excuse themselves on very inadequate pretexts —one had "a meeting to attend," which turned out to be a whist party at the club: another had to take his wife for a drive; a third went fishing and sent no excuse at all. Assuredly that was a conspicuous instance cited by Mr. Charles, when the bulk of the members absented themselves from an annual meeting in order to attend a hockey-match. It may be pleaded that this marks the strong sporting instinct of the community. Yes, it does. But it does not indicate a business-like instinct on the part of the more staid members of that community, such as members of the Board of Trade may be presumed to be.

Can the gentlemen who thus abnegate their duties reasonably expect the unpaid officers of a body in whose proceedings all business men have an interest, to give up their own social or family engagements to work for the good of the absent ones? Presumably there were several among the baker's dozen of members that did attend that annual meeting who were just as anxious to see the hockey-match as were the others who witnessed it. Had not Mr. Charles, and Mr. Quartermain, and Col. Edwards, and the other ten good men and true as fair a right to neglect the Board of Trade meeting and see the fun as any one else? Of course they had. But they were capable of some self-sacrifice at the call of duty, while apparently the remiss ones were not.

Selfishness is ingrained in most of us; laziness is the bane of many. We are humanly fond, and properly so, of our leisure, of our recreations, of our home attractions. But there are times when something must be given up for the general good, when personal comfort must give way to the Strenuous Life. If a petition to Government to right a wrong is to be discussed, or if a meeting with the town council about municipal affairs is arranged, or a conference with railway authorities to remove injustice in freight rates, the place for a member of a board of trade is in the fighting line, with his fellow-members. Such are the occasions which bring out bold, ardent, public-spirited individuals. But these energetic leaders cannot do all the fighting: they need to be backed up by the rank and file. And a man who won't take his share in defending his own interest in such a case deserves to be called a duffer.

AFFAIRS IN NOVA SCOTIA.

Much as other parts of Canada have felt the cold weather and excessive snow falls of February, it is doubtful whether any province has had such bitter experiences of enormous snow drifts and all that they imply in the interruption of business, as Nova Scotia. The letter of our Halifax correspondent, written on 6th March, was delayed and did not reach us in time for last issue, though ordinarily these letters reach us on Wednesday of each week. The storms, it tells us, were the most severe for thirty years. Freight trains were delayed between one and two weeks, passengers were imprisoned in snow drifts for four days at a time. In the Annapolis Valley, indeed, no outward trains could be run for ten days; provisions and fuel grew scarce, churches and schools had to be closed, and flour went up to $9 per barrel. These were very real hardships; and the hindrance of business had a marked effect in lessening the transactions of merchants as well as in affecting their mails, so that inconvenience is too mild a word to describe the effect upon them of the past few weeks. Indeed the loss as a result of the succession of storms is estimated at three millions of dollars. The mileage of the railroads in Nova Scotia is about 1,125 miles, and of this about 350 miles (of the Intercolonial), was all that was in operation for that trying period.

Although Cape Breton farmers are depressed for lack of hay and for other reasons, the prospects of that Island industrially are encouraging in several respects. The Dominion Coal Company, and the Nova Scotia Steel & Coal Co. are both preparing for a large output, and it is expected that the Dominion Iron & Steel Co., which has been expending money and effort on its works to bring them economically up-to-date, will have its rail mill going by May 1st. There are hopes, too, that the new steel plant of the Nova Scotia Company will be in operation in a few months, and the Cape Breton Coal, Iron, and Rail Company will have rail communication with their shipping ports, if not with Sydney this year. All this points to a busy and let us hope a prosperous season there.

During the last fiscal year the output of coal in Nova Scotia increased, and that of gold decreased. The coal raised amounted to 5,247,135 tons, an increase of 2,000 tons over 1903. Gold production fell off 10,000 ounces as compared with the previous year. Gypsum increased in output 5,000 tons; barytes, 3,000 tons, while limestone decreased 70,000 tons. The decrease in gold output is taken to indicate that the day of the small miner and worker on tribute is passing. Operations on a large scale, however, are in progress in several sections, with hopes for good results. Deep mining is being given more attention, two mines having raised gold at a vertical depth of a thousand feet.

* * *

BRITISH COLUMBIA FINANCES.

The other day, in the British Columbia Legislature, an abstract of receipts and expenditures of the province for the half year ending 31st December, 1904, was brought down by the Premier, Mr. Tatlow. We give its principal items. First in revenue is the half-yearly capitation grant from the Dominion for lands, for subsidy and interest, in all, $153,538; land revenue brought in $108,175, and the sales of land $58,233; timber leases yielded $34,929; general mining receipts were $57,599, besides which a "mineral tax" yields

$42,497, and the royalty and tax on coal produced $36,947. There is a long array of taxes, such as the real property tax, the personalty tax, the wild land tax, the income tax, but none of them bring in great sums. The largest items in the whole list of revenues are the timber royalty and licenses, which brought in $238,975, and the Chinese Restriction Act no less than $225,000. The total revenue is put down at $1,235,463.

As to what was done with it the cost of interest on the public debt $196,000, and provision of sinking fund $58,525 are the first and most natural items of expenditure. Civil government cost $117,591, and the administration of justice, $110,770; education, $219,358; roads, streets and bridges, $252,299; works and buildings (under the heading "public works"), $69,358. Public institutions call for $101,147, principal among which are the Insane Asylum, $30,124; hospitals and charities, $29,587, and the Provincial printing office, $26,972. These items came to more than nine hundred thousand dollars, while the "miscellaneous" expenditures make $91,000 more.

* * *

THE AUTONOMY PROPOSALS.

The burning question at Ottawa now is the bills introduced arranging for the autonomy of the new western provinces of Canada. There is no abatement of the excitement which they have created—certainly no lessening of the aversion with which they have been received. Memorials, petitions, protests, continue to pour in upon the authorities at Ottawa, the tenor of which is distinctly that separate schools must not be forced upon the new provinces. (It is only fair to say that there have been petitions of an opposite tenor as well). A large and influential portion of the press of Ontario and the West condemns in round terms the proposals of the Government in this connection. And the lengthy letter of Mr. Haultain, the Premier of the Territories, makes a vigorous and logical protest against the intended legislation. All this seems to have made an impression upon the Premier of Canada, for the news now comes that the Cabinet is to submit the proposed measure to the Supreme Court in order that its constitutionality may be determined before the House pronounces upon it. There are signs that the Church of Rome has had too much influence in the preparation of the irritating bills, and strong apprehensions have arisen lest Sir Wilfrid Laurier should endeavor to force them upon the country by means of his majority, consisting largely of a solid Roman Catholic vote. Such a thing as this would be nothing short of a calamity. If persisted in, the chances are that he and his government would be swept from power. It is significant of the strength of the existing feeling that so influential a paper as the Christian Guardian declares that "the very boldness of the attempt upon personal and social liberty, * * * is enough to close the ranks and marshal the forces of the Protestantism of this Dominion as a unit, in defence of Provincial rights and public schools, and in resistance to priestly intolerance and ecclesiastical domination in Alberta and Saskatchewan. And in the fight there is only one watchword possible for all who love personal and religious freedom, and that watchword is: No Compromise and No Surrender."

* * *

—Cement makers want higher protection. They say factories in the States get coal cheaper, and freights are lower.

CHANGING CONDITIONS IN ALBERTA.

People who have not seen our prairie country, especially along the line or near the line of the Canadian Pacific, get wrong notions of the conditions that exist. Some speak of the lonely isolation of the settlers' lives west of Manitoba, and of the great distances from village to village. Such commiseration is often not needed, for the sparseness of settlement is being overcome day by day through new arrivals. We have been struck by a sketch map of the new Province of Alberta, which we find in the Calgary Trade Gazette of 28th February. The new boundary of the Province is to be near Walsh, instead of as now at Langevin. Taking the main line of the C.P.R. westward from the proposed eastern boundary near Walsh to Laggan, on the confines of British Columbia, there are forty stations upon it; then from Calgary north to Strathcona and Edmonton there are twenty-three railway stations; southward from Calgary and upon the line from the Crow's Nest through Macleod and Lethbridge to Medicine Hat we find twenty-eight. Here, then, we find ninety-one railway stations. Some of these, it is true, are merely railway stations, but each of them is a nucleus for settlement; and at many of them are villages containing from twenty or fifty persons to two hundred, and towns with populations of thousands. Besides, the places with railway stations are numerous settlements off the lines of rail, and families of farmers or stock-raisers scattered all about. At the rate people are pouring into the broad acreage of Alberta, it will not be long before the cause of loneliness to the settler or his family—the distance from neighbors or from town—is removed.

* * *

VARIETIES OF CANADIAN CLIMATE.

The charms of the British Columbia air are great. Sufficient to cause ordinarily sober business men to burst out into Nature-sentiment, as one man does, as follows, under the influence of spring sunshine. Writing from Nelson on 8th March, this correspondent says: "This is a truly glorious country when the weather is right, as it is now, and indeed has been for the last twelve months. There was some pretty stiff frost, which gave us skating for twelve miles up the lake—a most glorious piece of ice. For the last fortnight it has been mild and delightful. On Monday the boys took the four-oared shell out and finished up with a plunge in the lake. Snowdrops are out, and other bulbs are showing. We are asking each other if it is really spring. . . Our country generally seems prosperous, and there is much optimism about the future."

Just to show what a variety of climate Canada can boast, we have a mind to quote alongside this letter, one received on March 16th from a friend in Montreal. Says our friend, after indulging in some political allusions and various commercial discursions: "What a winter we have had! Everlastingly persistent records of zero and below for about four months, and even this middle of March morning at 9 o'clock it was only 12 degrees above. Yesterday, same time, it was about 2 degrees above, and had been below during the night. There was no thaw all winter, so that the snow is spongy and will go fast when once the sunny zephyrs arrive, if they ever do get here again! Meanwhile the snow-piles, even on aristocratic Dorchester street, near the Windsor, are from eight to twelve feet high, and in two days more it will be St. Patrick's Day, which means spring, gentle spring, for sure." All who have lived in Montreal any length of time can recall such winters. We did not feel the cold then so much, being younger, and fonder of snow-shoeing, sleigh-driving, curling, and the various social delights of old-fashioned winters. The cold weather is bracing and healthy, good for the soil, according to the old adage, and besides, as the Scottish shepherd reminded the Cockney tourist speaking of the rain: "It's God's wull."

* * *

RETAIL MERCHANTS OF THE WEST.

The Retail Merchants' Association of Western Canada elected officers as follows: President, Mr. T. J. Lawlor, Killarney; first vice-president, H. C. Hamelin, Lauder; second vice-president, J. D. Bain, Boissevain; secretary, A. T. Embree, Boissevain. Executive Committee—A. G. Munro, Morden; R. G. Alloway, Gladstone; W. C. McLaren, Souris; J. Brown, Portage la Prairie; R. F. More, Cartwright; E. Clingham, Virden; H. McLaren, Weyburn; G. C. Sayle, Elva; and E. H. Glinz, Oak River. At the annual meeting in Winnipeg a few days ago, it was decided to enlarge the scope of the association so as to include any bona fide retail merchants west of the Great Lakes.

MONTREAL'S PROPOSED NEW BY-LAWS.

In the proposed new building by-law of Montreal, there are several important clauses with reference to the safety of theatres, churches, stores and similar buildings. The fire-escape clause calls for good and sufficient apparatus, outside escapes, stairways, cloth or metal tubes, or other approved means of egress, as may be approved by the Inspector of Buildings. The buildings in which these will have to be put into position are specified as below. These intended arrangements are to apply to the somewhat peculiar conditions of many Montreal dwellings. It is provided that "every dwelling house occupied by three or more families above the first story, and every building already erected more than three stories in height, occupied and used as an hotel, apartment, or lodging house, and every boarding-house having more than fifteen sleeping rooms above the first story, and every factory, mill, manufactory, or workshop, hospital, asylum or institution for the care or treatment of individuals, and every building in whole or in part occupied or used as a school, or place of instruction or assembly, every office building not of fireproof construction of four stories or more in height, and every departmental store, theatre, opera house, public hall and church."

W. B. Craig and a number of retailers of the city are fighting the new civic by-law ordering all stores to be closed at eight o'clock. They claim that, owing to the competition of the big stores the evening is their best time for doing business. They point out, too, that their employees are not asked to stay, and if they themselves choose to remain in their stores they do not see why they should be prevented, especially as saloons and cigar stores are allowed to remain open. The by-law does appear to be rather an infringement on the liberty of the subject.

OUR SAINT JOHN LETTER.

Mr. A. R. Tibbitts, lately manager of the Bank of New Brunswick branch at Riverside, Albert County, is now engaged in organizing the Canada Lumber Manufacturing and Transportation Company. The plan is to amalgamate the business of Messrs. George D. and Isaac C. Prescott, and the Aptos Veneer Company into one organization with a capital stock of $200,000, divided into $50 shares. The new company talk of putting a steamer on the route between St. John and Albert County and of going extensively into the manufacture and shipping of lumber. The two concerns that it is proposed to amalgamate have been doing a large business, and united under one management and with ample capital, they will likely become an important factor in the commercial life of Albert County.

For some time past the city of St. John has been considering the purchase of the property of the Carleton Electric Lighting Company, which runs the street lights on the western side of the harbor and also has quite a business in supplying incandescent lights in that section. The city had about concluded an agreement to take over the property for $25,000, when announcement was made that the James Ready Company, of Fairville, brewers, were applying for incorporation as the Fairville Electric Light Company, and would be a competitor for business in a portion of the field served by the Carleton Company. This stimulated an agitation against the purchase and the Council, by the casting vote of the Mayor, decided to reconsider the question and to have an expert value the plant, which some say is old and worn out and not worth the price. In connection with the purchase the city intended asking the Legislature for an exclusive franchise in that portion of the city on the western side of the harbor, and one of the strong arguments in favor of the purchase is that it will show the advantages or disadvantages of civic ownership. Some of those who oppose the purchase are favorable to civic ownership, but say it will not get a fair test if a worn-out plant is purchased in a place where only a small section of the people reside.

A company is being formed, at Hampton, in King's County, to be known as the Canada Woodenware Company, and to engage in the manufacture of all kinds of woodenware, tubs, pails, baskets, shooks, matches, clothes pins, sashes, blinds, mouldings, etc. A factory will be established at Hampton and the business will be put in operation during the coming summer.

At Chatham, in Northumberland County, a company has been established with a capital of $5,000 to engage in the manufacture of barrels. This is an enterprise that should prove successful, as there is a steady demand for barrels of all kinds and the supply is none too plentiful. The staving mill of Messrs. Taylor & White, on the line of the C.P.R., near Westfield, was destroyed by fire a few days ago, causing a loss of about $10,000. The mill is now being rebuilt.

William White, one of the members of the White Candy Company, and occupying an important position in the factory, has withdrawn from the business, and, it is announced will start on his own account. The White Candy Company business has been growing steadily during the past few years, and there is a belief that both factories will find ample market for their product.

Considerable money will be spent in St. John during the coming summer by the Intercolonial Railway. It is announced that the station will be enlarged so as to give accommodation for another track and that it will be extended a hundred feet or more because it does not now cover the trains arriving here. A system of lighting will be installed by which the railway company will light the station, yards,, etc. There will be other expenditures of an extensive nature.

One does not hear much nowadays of the proposed St. John dry dock, but Mr. George Robertson, M.P.P., says the project is very much alive and that some day soon he will have important definite announcements to make on the subject. The necessity of the dock was recently shown when the S.S. "Melville," of the South African service, had to go from here to New York for some repairs to her bottom. After these were completed, she returned to St. John to load.

The St. John Board of Trade will join with other Maritime Province Boards in urging on the Government the necessity of some better means than at present exists of maintaining connection with Prince Edward Island during the winter months. Neither of the steamers on the service has been able to make a trip since January 25th, and the loss to Maritime merchants, and indeed to merchants all over the Dominion, has been very great.

St. John, N.B., 14th March. * * *

OUR ENGLISH LETTER.

By letter to a Chamber of Commerce, the British Postmaster-General has affirmed that there is no prospect at present of a re-opening of the question of newspaper postage to Canada. What a miserable piece of foolishness is here. The bulk rate between the States and the Dominion is 1 cent per lb.; between this country and the Dominion 8 cents per lb. What the sacrifice of profit to the Post Office would be in putting us on the same footing as the Yankee, one does not know precisely. Nor does it seem necessary to know. If the Imperial ties can be strengthened at all by the popularization of a common journalism and literature, the cheapened service must be worth its cost. But the British Post Office, which sweats nine employees out of ten, and pampers the remaining few beyond all reason, recks nothing of the Imperial spirit or the Yankeefication of Canadian youth. Its mission is to earn five millions a year by carrying letters and lose one million over its telegraph service.

Winnipeg, from the view-point of a disappointed emigrant, was described in unflattering terms in the High Court, Glasgow, the other day: "A muddy, jerry-built town, with things so dear that a halfpenny paper cost twopence halfpenny." Steady masons were in no demand, because "jobs did not last long enough—a house being run up and made ready for occupancy in nine days." Lancashire building records are beaten by a good length if this statement of time be true. For party-walls our builders have no time to lime the ends of bricks, and the carpenters make a rough guess from memory as to the size of door needed to fill a doorway. But bad as our bricks are in the North, they compare excellently with those used in out-of-sight building in London. One might rummage through a hundred tons of such bricks as construct suburban London without finding a single nearly perfect one.

Not much significance is attached to the vote given in favor of Tariff Reform by the delegates to the Association of Chambers of Commerce. The count disclosed 42 votes for, and 21 against, with 39 remaining neutral. These figures are enough in themselves to indicate the partial and inconclusive value of the triumph. It is interesting to observe that the anti-Chamberlain delegates advocated a Royal Commission to enquire into our fiscal system. Realizing that Royal Commissions, however long they sit, rarely hatch a brood, the Tariff Reformers resented the proposal. One of them urged that fiscal policy was now a political question to be solved only by the electorate. On other occasions the same special pleader has insisted that fiscal reform is a patriotic and not a party matter in any sense. This verbal contortion is only another manifestation of the new political method which calls all opponents traitorous. Those who are men of sense first and partizans afterwards, dislike to see too much of these opprobrious generalizations, or of the disposition to burke enquiry.

If one may judge—and the opinion is merely personal—there is a considerable bulk of business men who are neither Tariff Reformers viciously, nor Free-Traders. Some are Retaliationists, and some are not even that. They do not believe in protection more than one believes in arsenic or belladonna. But they are far from saying that the smallest dose of the violent medicine protection is fatal or even prejudicial. Like a deadly drug, it may have its beneficent uses for particular purposes. Our headlong Reformers are wont to overlook the scruples of this not unimportant or unintelligent mass. Yet they are the salt of the earth, these cautious ones who are never so addicted to one opinion that they cannot share and appreciate another. One sees evidence of the existence of such a class in the Dominion, whose attitude is scarcely to be divined from the speeches of any party leader.

An ably-written critique of life insurance methods appears in the Manchester Guardian. The critic demands why the offices are afraid to make use of all their statistics. Experience is taken as a guide to rates of mortality. He wants to know why experience is not used to frame a table showing the anticipation of lapses and why holders of policies are not greater participants in the revenue accruing in this way. It is tolerably clear that shortness of breath (of which people die), and shortness of funds (which provokes lapsing), are two separate matters and are liable to divergent variations. To reckon on surrenders and lapses as a means of income is to invite the cessation of funds from that source. But with the contention that contemporary policyholders should share in this benefit, it is possible to sympathize. At present these windfalls go to the funds in general or to shareholders in most companies. Menaced by "bond investment companies," and so forth, company managers will perhaps be led to consider a redistribution of such moneys.

The Made-in-Canada movement continues to attract the stray attention of our newspapers. In one Free-Trade organ over here, the reported mandate from the Canadian Manufacturers' Association to its members to insure all fire risks in Canadian companies is contemptuously alluded to as "the latest move in the direction of Imperial unity." Without prejudice one may say confidently that it is impossible to conceive of any parallel English body passing a similar resolution. It is not easy either to believe that the suggestion would unanimously be acted upon by individual members. But in these matters, perhaps Englishmen and Canadian must differ, each determining what for himself is best.

The drift of English fire underwriting into few hands is accentuated again by new rumors of a merger. A mutual office established nearly 200 years ago is said to be coquetting with a junior with a view to a permanent alliance. No certainty exists as to the completion of the transaction, but this and other unions are prospective chances.

Manchester, March 3rd, 1905. North Country.

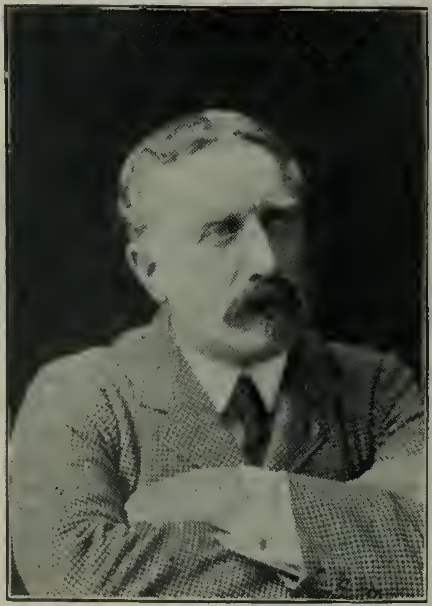
VANCOUVER BOARD OF TRADE.

The Board of Trade for Vancouver held its annual meeting on the 7th inst, the attendance not being particularly large. Attention was drawn to the fact that the lack of railroad facilities between Vancouver and Ladysmith was driving all the latter's trade to Victoria, and it was decided to petition the C.P.R. to establish daily communication. Reference was made to the recent deputation of lumbermen to Ottawa to ask for the imposition of duties on lumber and shingles imported into Canada, and the belief was expressed that the Government would accede to their desires. The report of the president stated that the board had now a membership of 158, not nearly so large as it should be. Business in the city of Vancouver, generally speaking, had been satisfactory notwithstanding the depressed state of the logging and lumbering industry and the failure of the Fraser river fisheries. Many new buildings had been erected, and property had advanced, particularly in the business section. The mining industry, on the whole, had prospered. Fruit culture had made good progress. Officers were elected as follows: President, Mr. A. B. Erskine (acclamation); vice-president, Mr. R. P. McLennan (acclamation); secretary, Mr. W. Skene (acclamation). Council—Messrs. R. H. Alexander, W. H. Malkin, W. Godfrey, C. E. Tisdall, F. C. Cotton, H. McDowell, H. T. Lockyer, F. Buscombe, R. Martin, F. T. Schooley, W. G. Mackenzie, H. A. Stone, John Boyd, J. F. Helliwell and James Ramsay. The first twelve constitute the board of arbitration.

* * *

PETERBORO' BOARD OF TRADE.

At the annual meeting of this board, which was briefly noticed in last issue, the following officers were elected for the coming year: President, Mr. D. Hughes Charles; vice-president, Mr. B. F. Ackerman; secretary, Mr. T. Q. Quartermaine; treasurer, Mr. K. Eardley-Wilmot. The president, the treasurer and Mr. R. E. Wood were appointed a committee to name the council of the Board for the coming year, but they have not yet met for the purpose.



Mr. D. Hughes Charles, President Peterboro Board of Trade.

In the president's address reference was made to industrial events in Peterboro' during 1904, which was a prosperous year for the town. Many new houses were erected, additions made to factories, and several miles of cement sidewalks laid by the corporation.

The Montreal branch of the Canadian General Electric Co. was closed early in the year, and the plant and machinery installed here, making a large increase in the number of hands employed and in the wages paid out. All the other manufacturing concerns were kept fully employed except the American Cereal Co., which had to practically close down in November through the high price of oats and the freight rates imposed by our railways, which discriminate against all Ontario mills doing an export trade. The Colonial Weaving Co. commenced manufacturing last spring, and is meeting with success. The Peterboro' Shovel Co., a new industry, have commenced building operations. Another new manufacturing company, which is to join our list of industries, is the Peterboro' Cereal Company, which has been granted a charter.

"Although our town is in general healthy, we must look to the future, and the council did a wise thing in appointing an inspector of plumbing. I would like to see the Board of Health make the use of the town water, where it can be used, compulsory, and also see that all lanes and back yards are kept thoroughly clean. A step is being made in the direction of affording better fire protection by the proposed new water mains." He then made reference to the matter of transportation and the development of the Trent waterway route. Both leading Ministers and Mr. Borden were committed to the early completion of this work, "which has already cost the country about $6,000,000, and no return can be obtained until completed and open to navigation." The opening of the lift-lock and the good service of the street railway were mentioned as important events. We regret having no room for the secretary's report. The board has now seventy-four members.

* * *

INSURANCE INSTITUTE OF TORONTO.

The feature of last Monday's gathering of the Institute and its friends was the very instructive lecture delivered by Mr. J. B. Laidlaw, Canadian manager of the Norwich Union Company, on "Lessons to be Learned from Conflagrations." Very appropriately, the Toronto authorities of the Canadian Manufacturers' Association had sent out circulars to its city members announcing that they were invited by the Institute to be present. Ladies, too, were made welcome, and the result was that St. George's Hall was crowded. Beginning with a statistical account of conflagrations in the world's history, as far as records of them had been preserved, the lecturer proceeded to discuss the features common to many of these dreadful happenings, showing that many of them had taken place in excessively dry weather, which is a warning to municipal authorities not to let their reservoirs become empty, or to turn off the water supply in the hot days of summer. Faulty construction of buildings, too, the ill-judged laying-out of towns, and the excessive congestion of merchandise in certain districts of cities, were dwelt upon as causes of these desolating burnings.

An excellent feature of the lecture was the lantern slides with which it was illustrated, giving views of the progress of great fires, the violence of flame, the helplessness of all means of fire-fighting when a conflagration has reached a certain stage. "Moving pictures" they were; moving in more ways than one, terrifying, rather, in their illustration of the ravages of fire and the constant actuality of the fire hazard. It was expressive of an awakened interest in the subject to see so many business men present, deeply attentive. And there was a peculiar appropriateness in the fact that the resolution of thanks to the speaker of the evening was moved by Mr. Eby, whose firm had been so great a recent sufferer by fire, and seconded by Senator Cox, president of our two most prominent fire-underwriting companies. We understand that Mr. Laidlaw left for Montreal yesterday to repeat the paper before the Montreal Insurance Institute.

* * *

FEDERAL LIFE ASSURANCE COMPANY.

The business of the Federal Life has swelled to very considerable proportions. Last year's new assurances came to $3,010,499 under 2,177 policies, an increase over 1903, and the total assurance in force now exceeds sixteen millions of dollars. There is an increase of assets to the creditable figure of $285,000 on the year, and their aggregate is $2,148,773, besides $870,000 of guarantee capital. Of this $2,148,000, no less than $1,810,000 is in the satisfactory shape of debentures, bonds, mortgages, loans on policies, and loans on stocks and bonds. Of liabilities, the reserves represent $1,887,700, other items, $75,210; leaving a surplus on policyholders' account of $185,837, or if we take into account guarantee capital, $1,055,837.

We are pleased to observe a sentence in the company's report indicating a careful regard for the keeping down of expenses. They are confined, we are told, to a reasonable limit, consistent with due efforts made to secure new business. The endeavors of life companies generally to secure new insurance are not always economically directed; and any disposition to keep down the ratio of expense is welcome. Death claims were rather heavier than in the previous year, and between these and dividends and annuities, the payments to policyholders amounted to almost $200,000. The income from premiums, as well as that from interest and rents, shows a gratifying augmentation, and the company's affairs have a very encouraging outlook.

* * *

NATIONAL LIFE ASSURANCE COMPANY OF CANADA.

The balance sheet and a condensed statement of this company's receipts and disbursements for the year 1904 has been published. Receipts from premiums and interest were $164,180; payments for claims and expenses, $103,558, leaving a balance of $60,622. After five years' business the National has $4,509,000 of risks in force. The total assets are now $362,853, of which $293,300 consists of real estate, bonds, debentures and cash, the remainder being premiums not due or premiums in course of collection, loans on policies and other assets not particularized. The security to policyholders is $358,748, consisting of surplus, $34,977; reserves at 3½ per cent., $323,771, and some $400,000 of uncalled capital.

* * *

DOMINION PERMANENT LOAN CO.

Unfortunately, the review of this company's operations for the year 1904, prepared for last week, did not appear along with its report in our columns on the 10th instant. The earnings appear to have been very much on a par with those of 1903; and the language of the report is almost identical with that of twelve months ago. Three paragraphs out of four consist of a repetition of the phraseology of the former report, with changes in the figures to suit the circumstances of the year under review. Gross earnings of 1904 were $214,350, according to the profit and loss account, and net income is stated by the president at $112,259, and there was, after adding $45,000 to reserve, a balance of $18,547 at profit and loss a year ago. Thus there is a balance at credit of profit and loss of something over $20,000.

Assets are stated at $3,257,513 and liabilities of deposits and debentures amount to $1,815,837; the result, a surplus of $1,441,676. Mr. Stratton, the president, and Mr. Karn, one of the directors, regarded the year's showing as one meriting congratulation. Mr. Stratton is of the opinion, and all indications confirm it, that Canada's growth is very well assured. The conditions point to increased demand for capital, which demands are likely to include the kind of accommodation the Dominion Permanent Loan Co. is calculated to afford. The company's funds continue to be well employed, and there appears to be no slackening in the request for loans such as it is in the habit of making. Real estate on hand, we observe, is rather less in amount this year than last. The reserve fund is swelled to $160,000.

* * *

—Mr. Preston, the Canadian Labor Commissioner in London, has arranged an advertising motor tour for the purpose of introducing knowledge of Canada into the out-of-the-way villages and districts of England and Wales. A wagon, twenty feet long, is to be loaded with grain, fruit, straw and other samples of Canadian produce, and lettered outside with information regarding the openings in the Dominion and free grants of land. If the experiment is successful, additional wagons, costing from £4,000 to £5,000 each, will be sent on similar journeys. These will be object-lessons. If lectures illustrated with lantern slides, have been very useful in disseminating knowledge of Canada in England, the proposed plan ought to be even better.

CONFLAGRATIONS IN RECENT CENTURIES.

The following is a list of conflagrations in the last three centuries in civilized countries, compiled by Mr. John B. Laidlaw for his paper before the Insurance Institutes of Montreal and Toronto:

Place.	Acreage. Burned Over.	Loss.
London, Eng., Sept. 1st to 9th, 1666	436	£18,000,000
New York, U.S.A., Dec. 16th, 1835	60	$15,000,000
Hamburg, Germany, May 4th, 1842	300	£ 7,000,000
Liverpool, Eng., Sept., 1842	..	£ 700,000
Quebec, Que., May 28th, 1845	..	....
New York, U.S.A., July 19th, 1845	20	$ 6,000,000
St. John's, Newfoundland, June 9th, 1846	..	£ 1,000,000
Brooklyn, N.Y., Sept. 9th, 1848	15	....
St. Louis, Mo., May 18th, 1849	..	....
San Francisco, Cal., Dec. 24th, 1849	..	$ 1,250,000
Sacramento, Cal., Nov. 12th, 1852	..	$ 5,000,000
Toronto, Canada, April 7th, 1849	15	$ 500,000
San Francisco, Cal., May 3rd, 1851	..	$ 3,500,000

Here are sixty-five extensive burnings, with a total destructiveness of six hundred and fifteen millions of dollars. And fifty of them occurred on the continent of North America, burning $460,000,000 worth of property, leaving only $155,000,000 worth chargeable to the rest of the world. This record helps to make it evident that North America has a very bad pre-eminence in the matter of property burning. Old, "effete" Europe can give us a good example in this respect.

* * *

BANKING AND FINANCIAL.

The Metropolitan Bank is opening a branch at Elmira, Ont.

The bank rate in London this day week touched 2½ per cent., the lowest rate in seven years. With money so cheap as this, business ought to be brisk, and new enterprises are sure to be launched in numbers.

According to Mr. Fielding's statement in the House of Commons, in reply to Mr. Foster, the amount of gold held in reserve on January 1, 1905, by the Dominion, was $35,306,823. The banks held in specie $17,617,539, of which a small amount was silver.

The total number of shares of the Bank of Yarmouth is 4,000 of $75 each, all paid up. The Canadian Banking Association has appointed W. E. Stavert, general manager of the Bank of New Brunswick, as curator, and in the meantime the local managers of the Banks of Nova Scotia, Montreal, and the Union, all of which have agencies in Yarmouth, have taken over the affairs of the suspended bank.

It is stated in the London Daily Mail of 15th March that the French Government has given Parisian banking houses clearly to understand that they must not conclude the proposed Russian loan unless Russia is prepared to negotiate for peace. The revolt of the French bankers is considered by the London newspapers as the most hopeful and important news of the day, promising an early conclusion of peace between Russia and Japan.

The Canadian Bond Company, Toronto, has received a Dominion charter. It intends to deal in bonds, debentures, shares in the capital stock of corporations in which the company holds securities; proposes to carry on a general brokerage and agency business, raise money to aid by way of bonuses, loans, etc. The charter members mentioned are: J. S. Lovell, W. Bain, R. Gowans, E. W. McNeil, and Richard Richardson, all of Toronto. The capital stock is stated at $250,000.

It is reported from Montreal that the Bank of Montreal will presently place a branch in the city of Mexico and another in Havana, Cuba. Mr. H. V. Meredith, assistant general manager of that bank, is at present in Cuba, and his trip is connected in the public mind with the rumored establishment of two new branches. The Royal Bank, the pioneer of the Canadian banks in Cuba, has been doing a fine business there. The desire of the Bank of Montreal is to get a share. Mr. R. B. Angus, one of the directors of the Bank of Montreal, was in Havana lately, and it is said that he urged the entrance of the bank into that city without delay.

The Minister of Finance stated in the House on Monday last that the estimated cost of equipment of the Royal Canadian mint in machinery and appliances for coinage is $64,000 nearly. The estimated cost of working is $75,000 a year. The staff will be appointed by the Imperial Treasury; a deputy master of the mint, an assayer, and a master mechanic will probably be sent out from England. The other officers will be Canadians. The capacity of the mint will be about 400,000 pieces per week. There are to be three presses, one of them an auxiliary, each capable of turning out 200,000 pieces in forty-seven hours. The charge for coinage will be three cents per ounce for bullion not exceeding 500 ounces, and two cents an ounce for over that amount. Mr. Fielding could not say how much would be coined for the British Government.

* * *

—Among the enquiries received at the Canadian Government Office, London, is one from a correspondent at Warsaw, West Russia, near the Baltic Sea, who wants to get into touch with Canadian exporters seeking a market for various kinds of merchandise. Another from a firm of merchants in Lagos, West Africa, who ask to be placed in communication with exporters in Canada for flour, hardware, and other goods.

OLD-TIME LAKE CRAFT.

First Paper.

An interesting letter reaches us from Mr. Alexander Hackett, one of a well-known family of fresh-water sailors, who has been for years a merchant and marine insurance agent at Colchester, near the western end of Lake Erie. Referring to old times on the lakes, he says:

"We have about passed through another winter, and spring time is near. Lake Erie is a solid mass of ice yet [March 8th] as far as we can see; but it must yield soon and allow the boats once more to make their appearance. It is thirty-eight years ago that we were building this wharf—do you remember it? At that time the freight traffic on the Great Lakes was carried almost entirely by sailing craft; but now it is a very rare thing to see a sailer pass. Time brings changes."

Very marked are the changes in the character of traffic on the chain of Canadian and American great lakes. Fifty years ago, when settlers bound for "the West," which then meant Michigan, Illinois and Wisconsin, travelled by way of the lakes in default of railway connection, steamers used to carry crowds of people from Buffalo and Ohio ports to Detroit and Chicago, some of whom at every trip would swarm up from the wharf at Amherstburg, where the steamers took on wood for fuel, and, looking at the long front street of that then picturesque garrison town, with the Union Jack on its flagpole, say to one another: "Well, this is Canaday. Gosh all Jerusalem! Le's go an' buy suthin' for a keepsake of England."

Quaint were the steamers of those days. The little iron steamer "Mohawk," built for British Government service, but sold and adapted to commercial purposes; the pollywog wooden steamer "George Moffatt"—so-called because her paddle-wheels were placed in recesses of the hull, close to the stern—which also went through the canals, linking Lake Huron and Lake Erie ports with Kingston and Montreal; the "Brothers," which plied between Fort Malden and Chatham, making the shores of St. Clair and the Detroit echo to the "chew-chew!" from her high-pressure exhaust. Greater, relatively, then than now was the share of traffic done by Canada upon the Great Lakes before the railway days, and when coasting laws were different, and few foresaw the vast settlement and development of the lake basin then beginning. Bruce Mines and Penetanguishene were in those days the Canadian sailor's *ultima Thule;* but Canadian paddle-wheel steamers, built at Kingston or Welland Canal ports, carried much of the passenger and goods traffic from Buffalo to Detroit. Handsome steamers some of them were, too, such as the "Canada" and the "London," the latter of which for many seasons surpassed in speed all her American competitors, until at last the "Niagara," which could make close upon twenty miles an hour, and was built in Buffalo, eclipsed her record. Next came swifter boats, such as the "Arrow," and the "Ocean," and the "Mayflower," the last-named the cynosure of all eyes, making the trip from Detroit to Buffalo, as she was said to do, in twelve to sixteen hours, according to wind and weather. To them, as the passenger traffic grew and the demand for greater speed became imperative, succeeded the magnificent steamers "Western World," "Plymouth Rock," and "Mississippi," 350 feet in length. Even more splendid and of greater size were the floating palaces "Northern Michigan" and "Southern Indiana," plying from Toledo to Buffalo; the demand for splendor and speed culminating in the "Western Metropolis" of the same line, which beautiful paddle steamer was too grand to pay, and was shortly stripped of her New York-built engines and converted into a tow-barge. A European traveller who saw this steamer, with her carved cabins and their silk hangings and Turkey carpets, said: "Why, one would expect this sort of thing on the Mediterranean, or on a yacht, but not here."

Lake Ontario had fine steamers, too. Between 1848 and 1858 there were in commission on that lake the "Princess Royal," the "Sovereign," and the "King William Fourth," Canadian steamers, as may be judged from their names, which plied between Niagara and Kingston or Hamilton and Kingston, as the circumstances might require. Of a later generation were the "New Era," a wooden boat; the "Passport" and the "Magnet," of iron, their plates being sent out from the river Clyde and put together at Kingston. Both are, if I do not mistake, still in commission, and belong to the Richelieu and Ontario line on the St. Lawrence. A fine boat in her day, but one which met with uncommon bad luck, was the "Comet," built at Kingston about the time we have spoken of. She came to grief, but was rebuilt some years after and re-christened the "Mayflower," destined, however, for a brief life under her new name. There was an American line of steamers on Lake Ontario, to which belonged the "Bay State" and "Ontario," plying from Lockport and Oswego to Ogdensburg.

Experiments were frequent in the fifties and early sixties with new forms of marine steam propulsion. Before the walking-beam type of engine became the accepted vogue the writer well remembers the sliding-beam steamboats, in which, instead of a diamond-shaped oscillating beam the power from the cylinder was communicated to the wheel shaft by an upright beam, from the transverse cross-head of which the cranks were turned. Of course, there were, too, in plenty, horizontal cylindered engines, all below decks, moving "as slow as molasses in January," scaring the Indians and negroes of those days with the long-drawn-out whistle or shriek of the high-pressure "puffers," and by night with the streams of uncanny-looking sparks from the wood-fed fire-box. Among the earlier boats on Lake Erie were the "Constellation," "Constitution," "Monticello," and "United States" (observe the proud names! every one four-syllabled), all slow side-wheel puffers. A few years later came applications of the new-fangled screw propeller, with huge windmill shaped blades, half of the screw out of water, making a vast splashing, but with a minimum of propelling force. One much-heralded steamer I recall, built somewhere on Lake Erie south shore, in which instead of paddle-wheels twin screws were placed in the centre of the boat under the guards, the blades turning half in water and half in air —a sort of toy-boat, which elicited snorts of contemptuous laughter from the stiff partisans of the paddle-wheel. These were days of experiment, of progressive trial in the use of steam, and the result of the various essays has been to establish the submerged modern screw as being, with the double or triple compound engine, the most economical application of steam power to marine propulsion. The stride has been great from the little canal-size propeller of 1860—a line of which smart and saucy American boats ran between Chicago and Ogdensburg as the Canadian canallers plied from Montreal to Erie and Huron ports—to the stately 10,000-ton express steamers "North West" and "North Land" of the Jim Hill line from Buffalo to Duluth; or to the 500-foot steel freighters of to-day that carry grain from Lake Michigan and iron ore from Lake Superior down and take back coal, 8,000 tons at a cargo, from Buffalo to the upper lakes.

To return, however, to Mr. Hackett's letter and the sailing craft of an earlier day. The subject grows on one, and my readers must be asked to permit another paper.

J. H.

OUR HALIFAX LETTER.

DELAYED BY THE SNOWDRIFTS.

Business in Nova Scotia during the past three or four weeks has been almost at a standstill, as a result of the stormiest winter known in the Province for the past thirty years. So constant has been the blockade on the Intercolonial and other lines of railway, that practically no freight has been moving, and passengers have been detained in the snowdrifts for four days at a time. Notwithstanding the irregularity of the service, a constant effort was made to keep the I.C.R. open, but on the Dominion Atlantic, the Midland, and other lines of railway, the attempt was practically abandoned, and for ten days at a time no trains ran out of the Annapolis Valley. The result was very serious there, and one storm following another during a period of about four weeks, resulted in an alarming scarcity of provisions and fuel throughout the valley. Flour sold as high as nine dollars a barrel; schools, churches, and fac-

HALIFAX, N.S., 134 Granville Street.

tories had to be closed for lack of coal; and it was seriously proposed to send down the troops from Halifax to shovel out the snowbound dwellers in the Western Counties. At this juncture, however, a partial abatement of the storms enabled the hosts of men struggling with the drifts on the railway tracks to make some progress, and at the time of this writing, traffic has been resumed with more or less regularity. Great quantities of freight are accumulated all along this part of the Intercolonial, however, and merchants are experiencing much difficulty in locating and having their freight forwarded. For many days no orders were shipped, and a great deal of trade has been lost by merchants all over the Province. In some of the Eastern Counties the outlook is far from bright, owing to the fact that residents there are bare of hay; and the spring will open with trade, thereabout, in anything but a favorable condition, there being no seed to go on with.

The possibilities of nail works have been occupying the attention of Cape Breton capitalists lately.—A company to be known as the Canada Nail and Wire Company, Limited, has been organized in Sydney to make nails and kindred hardware, with a capital of $200,000. The works are to be erected in Sydney, and, say, forty men employed. Good men are behind this project, including John E. and James T. Burchell, E. Le Roi Willis, E. E. Mosely, and W. H. Covert.

The A. C. Thompson Co., Limited, of North Sydney, a large stove and foundry concern, have definitely decided to erect nail works, either in Sydney or North Sydney. The works will have a capacity of from 75,000 to 100,000 kegs a year, and will include a wire drawing plant. They will employ about 50 men.

The annual meeting of the Windsor Foundry and Machine Co. was held last week. The new directors are: Rufus Curry, C. H. Dimock, T. O. Curry, F. W. Dimock, J. E. Graham, C. S. Wilcox, W. H. Roach. The report of the auditor showed the books of the company to be in a very unsatisfactory condition, in consequence of which the manager and secretary have resigned, and others will be appointed.

The annual meeting of the Amherst Boot and Shoe Co. was held recently, when the following directors were reelected: M. D. Pride, J. R. Lamey, D. W. Robb, W. T. Pipes, J. A. Dickey. The output of the company's factory last year was $695,000, an increase of $50,000 over 1903. A dividend of seven per cent. was declared.

The Oxford Woolen Mills Co., at Oxford, Cumberland County, have received and are installing two carloads of new machinery, making theirs a six-sett mill, the largest in Nova Scotia.

The "Halifax" Hotel, the leading hostelry of Nova Scotia, which has been conducted by H. Hesslein & Sons with great profit for forty-four years, is about to pass into new management. A company has leased the hotel for five years with an option of purchase at the end of that time. E. L. McDonald, now clerk of the Sydney Hotel, will be manager, and the hotel will be altered and renovated thoroughly. The new company is composed of well known Halifax and Montreal business men.

Mr. Malcolm McF. Hall has been appointed manager of the Nova Scotia Provincial Exhibition, to succeed Mr. John E. Wood, whose resignation has already been mentioned.

SIXTH ANNUAL REPORT OF

The NATIONAL LIFE ASSURANCE COMPANY OF CANADA.

Macdonald, Esq., M.D., G. L. Milne, M.D.

The industrial outlook in Cape Breton is very encouraging, even if the farmers are somewhat down in the mouth. The Dominion Coal Company has large contracts to fill, and is making preparations for a big output. The coal department of the Nova Scotia Steel and Coal Company is doing likewise. The Dominion Iron and Steel Company has been overhauling every department, and installing new machinery when necessary. The rail mill of that company is expected to be in operation by the latter part of April, and there will then be 3,000 men at work. The new steel plant of the "Scotia" Company will be in operation this summer, construction work being now rushed to completion. The Cape Breton C. I. and R. Co. will have completed rail communication with their shipping ports, and intend to survey and build a line to Sydney. These are indications of a very busy and prosperous season.

The Canada Coal and Railway Company, operating collieries at the Joggins Mines, Cumberland Co., went into liquidation last year, the liquidators carrying it on since. Arrears of wages then due have never been paid. The liquidators offer the property for sale March 8th.

The St. John Board of Trade, in conjunction with various Boards of Nova Scotia, has applied to the Government to subsidize a daily steamship service between St. John and Digby.

Since last writing, the various building, loan and savings companies doing business in Nova Scotia have held their annual meetings. The Acadia Loan Corporation's statement shows a satisfactory growth of business during the year. After deducting interest paid on deposits, debentures, expenses, etc., there was a net profit of $12,594.40, which, on the average paid-up capital of $130,685, is equal to over 9½ per cent. The subscribed capital increased last year from $302,300 to $500,000.

A net earning capacity of over eleven per cent. on the paid-up capital stock is shown by the Eastern Canada Savings & Loan Co. After paying dividends at six per cent., they have written off on account of office buildings, $3,425.87, and added enough to reserve and contingent accounts to bring these up to over 47 per cent. of paid-up capital. The Nova Scotia Savings and Loan Co. is now nearly fifty years old, having had a prosperous career, and being one of the oldest institutions of the kind in Canada. Its assets amount to $1,133,237.81. It is purely a benefit organization, so that no statement of profits is given. Its rest or contingent fund, it is said, amounts to $9,765.

Halifax, N.S., 6th March, 1905.

Meetings

FEDERAL LIFE ASSURANCE CO. OF CANADA.

Twenty-Third Annual Report and Financial Statement for the Year Ending December 31st, 1904.

The twenty-third annual meeting of the shareholders of this company was held at the head office of the company in Hamilton, on Tuesday, March 7th, 1905, the president, Mr. David Dexter, in the chair. The following reports and financial statement were submitted.

Directors' Report.

Your directors have the honor to present the report and financial statement of the company for the year which closed on the 31st December, 1904, duly vouched for by the auditors.

The new business of the year consisted of two thousand two hundred and fifty applications for insurance, aggregating $3,146,500, of which two thousand one hundred and seventy-seven applications for $3,010,499.50 were accepted.

As in previous years, the income of the company shows a gratifying increase, and the assets of the company have been increased by $285,979.52, and have now reached $2,148,773.37, exclusive of guarantee capital.

The security for policyholders, including guarantee capital, amounted at the close of the year to $3,018,773.37, and the liabilities for reserves and all outstanding claims, $1,962,935.56, showing a surplus of $1,055,837.81. Exclusive of uncalled guarantee capital, the surplus to policyholders was $185,837.81.

Policies on eighty-two lives became claims through death, to the amount of $157,040.00, of which $12,585 was reinsured in other companies.

Including cash dividends and dividends applied to the reduction of premiums, with annuities, the total payment to policyholders amounted to $198,911.34.

Careful attention has been given to the investment of the company's funds, in first-class bonds, mortgage securities, and loans on the company's policies amply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business.

The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the directors for your approval show an advance of thirteen and a half per cent. in assets.

The assurances carried by the company now amount to $16,047,806.23, upon which the company holds reserves to the full amount required by law, and, in addition thereto, a considerable surplus.

The field officers and agents of the company are intelligent and loyal, and are entitled to much credit for their able representation of the company's interests. The members of the office staff have also proved faithful to the company's service.

Your directors are pleased to be able to state that the business of the company for the past two months of the current year has been better than in the corresponding months of last year, and that the outlook for the future is bright.

David Dexter,
President and Managing Director.

Auditors' Report.

To the President and Directors of the Federal Life Assurance Company:—

Gentlemen: We have carefully audited the books and records of your company for the year ending 31st December last, and have certified to their accuracy.

The cash and journal vouchers have been closely examined and agree with the entries recorded.

The debentures, bonds, etc., in the possession of the company have been inspected, whilst those deposited with the Government or banks have been verified by certificate, the total agreeing with the amount as shown in the statement of assets.

The accompanying statements, namely, revenue and assets and liabilities show the result of the year's operations and, also, the financial position of the company.

Respectfully submitted,
H. S. Stephens,
Charles Stiff,
Auditors.

Hamilton, 1st March, 1905.

FINANCIAL STATEMENT FOR 1904.

Total insurance in force	16,047,806 23

The foregoing reports and statements were received and adopted on the motion of the president, David Dexter, seconded by vice-president Lieut.-Colonel Kerns.

The retiring directors were re-elected, and at a subsequent meeting of the directors the following officers were re-elected: Mr. David Dexter, president and managing director; Lieut.-Col. Kerns and Rev. Dr. Potts, vice-presidents.

* * *

BRITISH COLUMBIA PERMANENT LOAN AND SAVINGS CO.

The seventh annual meeting of the shareholders was held at the head office of the company, 321 Cambie Street, Vancouver, B.C., on Wednesday, the 22nd day of February, 1905, at 2 o'clock p.m. The president, Mr. Thos. T. Langlois, occupied the chair, and the secretary, Mr. R. H. Duke, acted as secretary of the meeting.

The treasurer read the report of the directors and the financial statement for the year 1904.

The president, in moving the adoption of the report, stated: It is most gratifying for me to again come before you in annual meeting assembled to move the adoption of such a statement as the one now before us. One year ago I stated that the earnings for the year would be over $100,000, and the assets would increase to $1,350,000. Actual results have shown my estimate to be quite conservative, earnings for the year have amounted to over $103,000, and assets have increased to $1,400,000. We all have good reason to be proud of the increase of assets for the year, which amounted to one-third of a million dollars. The statement of the receipts and disbursements for the year shows that the sum of $726,000 was received from investors in the stocks and debentures of the company; $96,000 was paid in by borrowers as interest on loans and $295,000 in repayment of principal, making total receipts for the year of over $1,100,000.

The sum of $20,000 was added to the reserve fund during the year and a further sum of $5,000 has recently been transferred to this fund, thus bringing the total up to $30,000. I desire especially to call your attention to the fact that the assets of the company were $19,753 six years ago, $460,888 three years ago, and are now over $1,400,000.

In regard to loaning the funds of the company I might state that at a time when Canada is prosperous to the extent of an increase in deposits in its chartered banks of one million dollars per week, your directors are keenly alive to the fact that land values are liable to boom in some localities, and consequently special care is exercised when considering values of property offered as security for loans. I have recently made a personal inspection of some seven hundred dwellings, on which the company has loaned a total of about six hundred thousand dollars in Manitoba and the North-West Territories, and found the securities, almost without exception, to be choice and worth about double the amount loaned.

The tide of immigration which has set in strongly toward our great North-West is having a very stimulating effect upon all of the older towns and cities, and is also causing the building of many new towns, thus continually increasing the demand for loans. The resources of all money-lending institutions are being taxed to their limit in accommodating those who desire to borrow money.

I beg to move the report of the directors for the year 1904 be received and adopted.

The vice-president, Dr. David H. Wilson, said:

In seconding the motion to adopt the report of the British Columbia Permanent Loan and Savings Company, I feel that anything I may say, or can say, in reference to the progress and management of this well and favorably known company must in the natural order of events be somewhat of a well-worn tale. A history of careful management, fulfilled pledges, satisfied borrowers, and rapid expansion, was told twelve months ago. I can only say that 1904 has been a repetition of the six preceding years, and as a member of the board I can point with no little satisfaction to the regularly paid dividends, rapidly increasing assets, and the unquestioned public confidence which the company enjoys as the justification of the very hopeful view I took of the company one year ago.

Canada is as it were having her innings, and with rapid development of the whole country, our opportunities are almost unlimited, and with our vast undeveloped resources to assure a continuance of this phenomenal growth for this generation at least, it is almost impossible to realize the future of a company of this character when vigorously and conservatively managed. I can only say, as I did last year, that efficiency and economy have characterized the administration at the head office, that the field staff has been loyal to the company, energetic in the discharge of its duties, and that the company as a whole has merited the confidence of the investing and borrowing public to a greater degree, if that were possible, than heretofore. The board looks forward to continuance of prosperity and to a realization of the expectations of the many who have invested in its stocks. As a board we have appreciated the unvarying confidence you have at all times accorded us, and I may be permitted to assure you that our most careful consideration and best judgment have at all times been exerted in your behalf.

The election of directors was then held and resulted in the election of Thos. T. Langlois, Dr. D. H. Wilson, Geo. J. Telfer, David Spencer, W. H. Malkin, Geo. Martin and Geo. Ward.

At a subsequent meeting of the board, Mr. Thos. T. Langlois, Dr. David H. Wilson and Mr. George J. Telfer, were respectively re-elected to the offices of president, vice-president and treasurer, and Mr. R. H. Duke was appointed secretary of the company.

The retiring trustees, Hon. Richard McBride, M.P.P.; Ralph Smith, M.P.; and Alderman Lawrence Goodacre, also retiring auditors, Messrs. W. T. Stein, C. A., and A. A. Boak, were re-elected. All the directors, trustees and auditors have been unanimously re-elected at each annual meeting since their first appointment, thus proving the entire confidence of the shareholders in the gentlemen who were first selected to control the affairs of the company.

GOVERNMENT INSPECTOR'S REPORT.

Vancouver, B.C., Jan. 13th, 1905.

I hereby certify that I have examined the balance sheet and dividends of The British Columbia Permanent Loan and Savings Company, as given herewith, and find the same in accordance with the by-laws of the company and the Laws of the Province. I have also examined the statements submitted to me, upon which are based the profits of the half-year, and upon which Dividend No. 13 is declared, and I approve of the principle which such dividend has been computed, and, consequently, sanction the payment of the same in accordance with Sec. 52, Chap. 22, Vic. 60.

C. GARDINER JOHNSON,
Inspector Investment & Loan Societies.

Mercantile Summary

A new steel bridge, the work of the Dominion Bridge Co., has been opened over the Kennebeccasis at Norton, N.B.

A dispatch from New York says that men in the New York grain trade are sending a strong protest to the New York railroads in regard to the "at and east of Buffalo" rates, which have been announced to take effect on the opening of navigation. These rates, it is figured, permit corn from Chicago to be placed f.o.b. steamer at Montreal 1½ to 1¾ cents per bushel lower than the best rate available on board ship at New York.

A firm at Victoria and Port Renfrew, West Coast of Vancouver Island, has commenced the manufacture of writing inks, metal polish and blueing for washing purposes. The Trade Gazette, of Calgary, understands that the company owns a deposit of tripoli, called in England rotten stone, of excellent quality and large dimensions, situated at Port Renfrew on the West Coast of Vancouver Island. This material forms the basis of all the best metal polishes on the market.

Not unnaturally, the hotel managers throughout the Dominion are desirous of forming associations for mutual protection, after the practice in the United States, where there is one great association, with affiliated branches. At a meeting of the local association in Toronto it adopted a resolution calling upon the Minister of Justice to make an amendment to the Criminal Code which will make it a criminal offence, to be punished with a year's imprisonment and a fine, for the practice of "beating" a hotel out of food or board. At present hotel managers are powerless. Large bills may be run up, and there is no recourse. A man may come to a hotel with a trunk full of bricks, impose on the management, and walk out when he pleases and pay nothing.

- The annual meeting of the Canadian Rubber Company was held in Montreal last week, when it was shown that the business of the company had almost doubled within the last two years. The retiring board of directors was re-elected. The intention of the company to extend its present plant, by the erection of a number of additional buildings, and the reconstruction of the entire plant to meet the requirements of the Fire Underwriters' Association, were the principal subjects that occupied attention. The new buildings for the extension of the company's plant at Papineau Square will be near the present premises. Work on these buildings, as well as the reconstruction of the old ones, will be carried out during the coming summer. The drectors are as named below: Sir Montague Allan, president; Mr. J. B. Learmont, vice-president; Mr. C. F. Smith, Lieut.-Col. Henshaw, Mr. H. Markland Molson, Lieut.-Col. Prevost, Mr. Hugh Allan, Mr. Andrew A. Allan and Mr. Alfred Piddington.

Mercantile Summary.

The Meaford Wheelbarrow Company, Limited, capital $90,000, is authorized to take over and carry on the wheelbarrow manufacturing business in Meaford of J. H. Cleland.

A company has been formed under the name of the Union Gas Oil Company, of Ontario, with a capital stock of $500,000, to work some new oil wells in the Leamington district.

Moosomin, Assa., council will issue debentures to raise the following amounts: $20,000 for the town hall, $7,000 for fire protection, $8,000 for drainage, $5,000 for granolithic walks.

The Ontario Government has granted a charter to the Dominion De Forest Wireless Telegraph Co., Limited, the capital of which is placed at $1,200,000, and headquarters at Ottawa. Evariste Brassard, of Montreal, is looking after the company's interests.

The J. T. Thompson Company, Limited, St. Catharines, has received an Ontario charter. Its capital is placed at $50,000. It will make and sell goods made of tin and other metals. J. T. Thompson, of Hamilton, is a prime mover in the enterprise.

The Ontario and Quebec Navigation Co., Limited, Picton, Ont., has been incorporated with a share capital of $50,000. It will buy and sell vessels and vessel property, and carry on a general transportation business. B. R. and J. DeC. Hepburn, of Picton, are provisional directors.

The Montreal Light, Heat and Power Co. offers in exchange for a fifteen-year extension of franchise from the city to furnish lighting gas at a dollar per thousand and gas for heating purposes at ninety cents, the reduction being from $1.20 and $1, respectively, and to be made by yearly instalments of five cents. The offer is being considered by the council.

—The annual meeting of the West India Electric Railway took place in Montreal a few days ago. The company is controlled by Montreal interests. Several of the shareholders present are said to have shown dissatisfaction with the reports, and some of the best officials will have no further connection with the company. The directors elected were: Messrs. James Hutchison, C. J. Fleet, W. G. Brown, R. McKeen, A. R. Oughtred, J. McDuff.

The Union Draw Steel Company, of Beaver Falls, Pa., are about to establish a branch factory in the eastern end of Hamilton, Ont., and have already purchased a site for that purpose. The Canadian company will be capitalized at $150,000. It will manufacture a full line of polished steel shafting, finishings, forgings and castings, etc. They already have a large Canadian connection. Another new industry shortly coming to Hamilton is the F. W. Bird & Sons Paper Co., who will make standard roofings, waterproof and insulating papers.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

MINING ITEMS.

The Montreal and Boston Copper Company is said to be negotiating for the purchase of the Seattle mine, on the north fork of Kettle River. The price named is $125,000.

A company has been formed under the name of the American Oil Co., Limited, with a capitalization of $1,000,000, to develop the Egg Lake oil fields in Alberta. The company has leased property there covering 4,480 acres of land. R. Secord and O. M. Biggar, of Calgary, are interested.

The tonnage of ore shipped from the Rossland mines for the week ended Saturday last was as follows: Le Roi, 3,275; Centre Star, 1,560; War Eagle, 1,290; Le Roi No. 2, 400; Spitzee, 240; White Bear, 170; White Bear (milled), 600; Jumbo, 200; total, 7,735 tons. Total for the year 60,936 tons.

Franklin camp in the Boundary district is a centre of activity just now. Recent development work indicates that there are large bodies of rich ore capable of being mined cheaply. Another thing which has made business brisker in this locality is the news that the Kettle Valley Railroad will be built very soon into the neighborhood. One-quarter interest in the Banner claim has been sold to E. A. Northrop and Wm. Spier, who have also secured an option on the balance of the claim.

A letter from the Atlin district says that this winter two hundred and fifty men have been engaged in drifting operations, most of them on Spruce and Pine Creeks and Gold Run. The Fleming Company have run about 500 feet of tunnel in their Spruce Creek claim. The most extensive underground work, however, is taking place at Boulder Creek, where Black & Grant made a very satisfactory clean-up. The total output from Atlin up to the close of navigation was in the neighborhood of half a million dollars, which is considerably larger than in 1903. Last year dredging was inaugurated, and will be done on an enlarged scale the coming season. Several properties are likely to come into prominence, and a good deal of money has been expended lately in prospecting and preparatory work which, it is expected, will show results shortly after the season opens. Considerable attention is being drawn to the large deposits in various parts of the Atlin of hydro-magnesite, which is now seen to be of commercial value.

The report of Mr. F. T. Congdon, late Commissioner for the Yukon, upon the condition of the mining industry in that region, is on the whole quite satisfactory, though the feverish excitement, which a few years ago characterized it, has no doubt departed. He points out that while there is not now, nor probably ever will be again, the same opportunity for individuals with little or no capital to work properties and make fortunes therefrom, as formerly was frequently done, it should be pointed out that there is a large improvement in the larger operations. Doubtless much small mining will still be done, but it will yearly become smaller in comparison with the operations of larger capitalists. Apart from this change, which must affect every line of business in the Territory, it must not be overlooked that in 1897 and 1898, when Dawson probably had a population of not less than 30,000 people, no person was permitted to come into the city who had not at least $750 in money or money's worth. It would be safe to place the average money possessed by every one who came into Dawson at not less than $1,000. The result was an almost unprecedented boom. At the present time wages upon the creeks are $5 a day and board, and there are not sufficient men available to supply the demand. As an offset to the falling off in mining in a small way, there is a great improvement in the larger operations. At Miller Creek the North American Transportation and Trading Company has expended nearly $200,000 in constructing ditches, and will soon be prepared to carry on hydraulic mining on a very extensive scale. Another large venture, which has invested heavily and is doing what appears excellent work, is that of the Detroit Mining Company, at the mouth of Bear Creek. Great results have been obtained from re-working of old grounds on Eldorado Creek, where the early miners passed over claims which have since turned out to be wonderfully rich. A fine vein of coal was recently discovered at Tantalus and leads to the belief by some that enough coal will eventually be discovered in the district to admit of the development of power in sufficient abundance greatly to cheapen mining operations. A scheme is on foot to mine coal at Tantalus on an extensive scale. Mr. Congdon states that collections have been excellent for some time past, and thinks there are fewer unpaid bills in the Yukon than at any previous time in its history. The future of the country as a whole probably depends on the institution of hydraulic mining on an extensive scale.

ANSWERS TO ENQUIRERS.

Old Style, Montreal.—You must have been misinformed on the point; we do not think any such notion was decided upon by the Manufacturers' Association, whatever some hot-headed members of it may have proposed to do, last year. This we do know, that in a printed account of an interview with the Toronto News some weeks ago, Mr. E. P. Heaton, the insurance expert of the C.M.A., used the following language. We give the question of the reporter and the answer: Q.—"Do you favor the New England mutual insurance companies, or any form of unlicensed competition?" Mr. Heaton was asked. A.—"No, not as against Canadian licensed companies. On the contrary, we favor Canadian companies, tariff, non-tariff, or mutuals, against companies or organizations of any other country. The department, as far as lies in its power, will work along the lines of 'Canada for the Canadians,' and further will strive to have the members of the association conform to the Canadian law in respect to insuring in unlicensed companies in any country."

* * *

FIRE INSURANCE MATTERS.

Lessons as to the needs of the New Orleans fire department are being drawn from the recent conflagration there. The acting chief says that if there had been a fire-boat, which could have reached the scene promptly, and if the cars had not prevented the engines getting at the docks, the loss would have been comparatively small. The nearest city water mains were five blocks away from the docks.

St. Boniface, Man., is now in possession of an up-to-date water system, and the work of pumping water into the mains will begin next month. The reservoir has a capacity of 64,000 gallons, and the bank, into which the water is raised 141 ft., has a capacity of 105,000 gallons. The pumps will be capable of supplying 1,500,000 gallons daily. In case of fire a pressure of 120 lbs. will be attainable, which should enable the fire apparatus to throw a stream 100 ft. high. The plant has cost $150,000.

Some one asked the Insurance Press last week how many kinds of insurance there were. And while the editor was thinking up an answer behold! he receives the business card of a local insurance agency in a Western city which claims to have on sale "all kinds of insurance and bonds." Here is the Western agency's list: Fire, life, safe, rents, theft, credit, patent, marine, tornado, accident, burglary, sprinkler, lightning, plate glass, transportation, tourists' baggage, bank and messenger robbery, tailors' and furniture floaters', physicians' and druggists' liability, travellers' samples, fidelity, official, guaranteed attorney's department, contract, judicial and court bonds, teams, health, postal, elevator, casualty, flywheel, leaseholds, automobile, contingent, steam boiler, landlord's liability, use and occupancy, employer's liability, workmen's collective. liquor dealer's license, general liability, hold-up insurance, bank accounts.

As to the effect of conflagrations upon the fire insurance business, the Baltimore Underwriter declares that the conflagration of a year ago did not hurt the insurance business in that city and State. The returns as made to the insurance department of Maryland show that all kinds of insurance were benefited by the fire. People who had before the fire given little attention to insurance as a whole, when they found that the fire insurance companies would pay their losses, took more insurance than ever, and the result is a larger return than ever before in premiums. Below will be found a table that shows this:

	1903.	1904.	Increase.
Fire premiums	$ 2,,937,961	$ 3.520,689	$ 582,728
Life premiums	7,120,704	7.739.405	618.701
Casualty premiums	378,039	706,785	328.746
Total	$10,436,704	$11,966,879	$1,530.175

A case of arson came up before the criminal sessions, County of York, this week. Judge Morgan and a jury began to hear it last Monday. Thomas Godson, his son, Joseph, his daughter, Susan Bateman, and her husband, Hamilton Bateman, are on trial, charged with setting fire to the buildings, hay and straw stacks of James Bell. All the parties live in the Township of King. The first fire occurred on July 10th, 1903, when the farmhouse went up in smoke; the next October 9th, 1903, three barns and contents; and last, October 18th, 1904, hay and straw stacks. The actual value of the property destroyed was nearly $6,000. This was increased by Bell having no barns nor implements with which to work his farm. People guilty of such an infamous crime need expect no sympathy from an honest community if the utmost rigor of the law be put forth to punish them.

The Fire Marshal for Ohio states that the too energetic firing of stoves cost the people of that state one-third of a million dollars last year. This loss was from crowding fuel into stoves or furnaces, which were in no way defective, and does not include the large number of accidents from roaring fires driving partly consumed fragments as sparks, out upon the roof, nor cases of fire from soot burning. The average temperature during 1904 being two degrees below the normal accounts for an excessive number of fires in that year. But, on the other hand, there was an increase in the number of gas stoves and they, while endangering life, are less liable to become a fire danger from over-heating. The Fire Marshal gives a list of useful pointers for the proper care of stoves and ranges.

LIFE ASSURANCE ITEMS.

Life insurance is not automatic, says the Hartford Bulletin. It will not act unless set in motion by the action of the individual to be benefited.

Fifty cents a week won't break you financially. Yet that is what it costs to cover you for $5,000 against an injury that may break you physically.—T. I. P.

The State Life Insurance Company, of Indianapolis, is appealing against the decision rendered by Judge Snider, of Hamilton, returning to Gordon Henderson $350, the amount of a first premium on a policy of $10,000 in that company, which Henderson desired to have cancelled.

Never be satisfied with a past record," is the advice of the Agents' Record. "Along the road into the past are only the monuments of old glories. Success is only to those who walk wide-eyed toward the future. Make up your mind to establish a new record in your agency this coming year."

In our notice last week of the report for 1904 of the Mutual Life Assurance Company of Canada, the fifth sentence said, referring to the company's low ratio of expenses and taxes: "Compared with other only purely mutual prominent companies, this is a remarkably favorable showing." The passage should have read: "Compared with other prominent companies," for the Mutual of Canada is the only purely mutual legal reserve life company in Canada.

"I was taken in last night," said the first footpad. "Get pinched?" asked the second. "No," was the scornful answer. "Think I don't know the cops better than that? It was this way: I held up a guy and took his leather and ticker away from him, and first thing I knew he was talking about how dangerous my work was and how I ought to provide for the future, and blow me if he didn't get me to sign an application for life insurance and give him all the money I had collected during the evening as a first payment on the policy!"—Judge.

Cancer kills about thirty thousand Americans a year. In the whole United States only seven diseases have more victims; in the cities only six. What are its causes, and is there a cure for it? For four years a commission of Harvard specialists have been studying these questions. As to the cause or causes, absolutely nothing has been found. The only cure is the knife. "Get it (the cancer) out early and quickly," says the commission. Don't dally with drugs or patent medicines!"—Everybody's Magazine.

A later stage of the suit, Henderson vs. The State Life Insurance Company, of Indiana, has been reached. The appeal from Judge Snider's decision ordering the company to return $300 premium to Gordon Henderson resulted thus far in that court's taken the matter *en delibere*, as the expression runs in the legal circles of Quebec. Chief Justice Meredith thought it was merely an offer, not an acceptance, and so not an agreement. There was therefore the right of plaintiff to withdraw his application for insurance. "But," counsel pressed, "there surely is acceptance in terms of the receipt for this first premium." "That," returned the court, "is not a premium, because there is yet no policy, and so no insurance. It is merely the payment of a sum of money, which will become a premium if the company's medical men pass the risk and the company issues the policy. Before that occurred, this applicant withdrew." "If," observed the Chief Justice, "insurance companies will use ambiguous language, should they not suffer? I think the Legislature should adopt some remedy, a statutory form of receipt and application that would be binding upon these companies."

The Ancient Order of United Workmen have been meeting in Toronto. Some 530 delegates to the Grand Lodge of the Order have been in session for several days. There were women delegates, too, six in number. On Tuesday and Wednesday warm debates were held as to the increase of rates in the Order. One party wished to adopt the Hunter rates of payment; another was resolved to adopt a lower schedule in order to be "attractive to young men." Since we have so recently and so fully gone into this matter of yearly rates for this body (Monetary Times 3rd February and 3rd March), we do not need to say more at the moment than to announce what the Order has resolved to do up to to-day, Thursday, 16th March. This is, as reported by the Globe, as under: "The Grand Lodge of the A.O.U.W., by a vote of 28,233 to 10,684, yesterday adopted the Hunter scale of insurance rates, with a modification providing for lower rates to young men up to 37 years of age. Most members of the order carry $2,000 insurance. The yearly increase in rates on $2,000 insurance to a man of 21 will be $3.60, to one of 30, $7.68, to one of 40, $14.16, and to a man of 49, after which no one can join the order, it will be $21.36." We shall be very glad if this arrangement proves the future salvation of the order. It might probably do so if there were none but new members to consider. But the thousands of members of former years, now beginning to grow old, are the factor that creates difficulty, from an actuarial standpoint.

SOUTHAMPTON BOARD OF TRADE.

The secretary of the Southampton Board of Trade informs us that at the annual meeting of the Southampton Board of Trade, held the other day, the following principal officers were elected: B. A. Belyea, president; S. M. Knechtel, vice-president; H. L. Harrison, treasurer; T. H. Burns, secretary.

ONTARIO FISHERIES.

The total yield of all kinds of fish in Ontario last year, according to a report emanating from the Provincial Fisheries Department, was 24,009,970 pounds, an increase over 1903 of 3,030,295 pounds, the estimated value being $1,793,229. In sturgeon, catfish, and tullihe there was a decrease of 9,000, 181,000, and 16,450 pounds, respectively. The increase in the catch of herring was 1,164,430 pounds; of white fish, 841,530; lake trout, 488,120, and pike, 236,375. The largest producing water in the Province was the north channel of Lake Huron, 4,343,225 pounds of fish being taken there. In the channel was also taken the largest yield of trout and whitefish in the Province, namely, 2,101,050 and 1,532,200 pounds, respectively.

Lake Erie was the most productive of herring, 2,644,300 pounds being taken there, or 63 per cent. of the total herring catch of the Province. There was a decrease of 22,000 pounds in the sturgeon taken in the same lake. Lake Nipissing produced an increased catch in all kinds but sturgeon and coarse fish, the decrease being 2,000 pounds of the former, and of the latter 5,000 pounds. The fry distributed by the Dominion hatcheries aggregated 77,359,000, compared to 93,701,000 in 1903. In the business there were engaged during the year 128 tugs, valued at $313,512, employing 672 men; 1,477 boats, valued at $105,747, and employing 2,453 men and boys. Gill nets totalling 3,490,036 yards, 108 seines, 513 pound nets, 275 hood nets, 75 dip nets, and three machines were licensed, their estimated aggregate value being $931,097. The revenue of the Fisheries Department from all sources was about $50,000, and the expenditure $34,315, leaving a balance of $13,531.83. The maintenance of the fisheries cruiser Gilphic on the Georgian Bay cost $4,500.

* * *

SMOKERS AS INCENDIARIES.

This somewhat startling title is chosen by Mr. H. D. Davis, fire marshal for the State of Ohio, for his latest deliverance on the subject of causes of fire waste. Speaking of Ohio, he says:

Tobacco smokers cost the State $122,321 in 1904, for buildings and their contents which went up in smoke from fires started from hot cigar stubs and pipe ashes. To this large amount must be added a greater, which is included in the loss charged to "Carelessness with matches," for the smokers use most of the matches. The number of fires attributable to smoking was 103, and that to the careless use of matches was 298.

Fires were started by cigar and cigarette stubs dropped through pavement gratings under which litter had accumulated; by throwng them into wooden spittoons filled with sawdust, and into waste paper baskets.

A number of fires developed in barns soon after a smoker, who had been indulging himself, left them. A serious conflagration was started by a smoker in a delivery waggon tossing the remnant of his stogie over an alley fence, where it alighted in a pile of rubbish.

Smokers' fires often occur in woodsheds, and in buildings in course of erection, from the midday or evening pipe of the mechanic.

Burning tobacco from a pipe is more likely to fire rubbish than is the cigar stub. The cigarette stump is, however, as potent an agent for mischief as the contents of the pipe.

Smokers become automatons, in the details of their habit, preparing their cigar or pipe, striking a match and twirling its burning stick away unconsciously. Smoking in bed is less common in this than in the Eastern States, if the number of fires from that cause is taken as the gauge.

* * *

FERNIE, B.C.

Fernie, British Columbia, industrial headquarters of the Crow's Nest Coal Company, the Elk Lumber and Manufacturing Co., the Fernie Lumber Co., and other producing concerns, is making progress in more directions than one. We observe that a bill was introduced into the British Columbia House some days ago by the Premier, ratifying the agreement entered into between the citizens of Fernie and the Crow's Nest Pass Coal Company, arranging terms upon which incorporation of that city was secured; and that it has been read a second time. There is a marked improvement going on; values of both real and personal properties have increased. The News says that the city assessor, who recently completed his first assessment for Fernie, has compiled the following interesting facts in connection with this work: The value of real estate inside the limits, according to Mr. Rennie's valuation amounts to $357,650. The total value of improvements amounts to $371,910, making a total valuation of $729,605. The assessed values, which include the total valuation of the real property, and half that of the improvements, amounts to $543,650, on which taxes are collectible. The place has now between three and four thousand inhabitants, and is sure to grow in proportion as the output of black diamonds from that part of the Rockies continues to increase.

* * *

THE ARKANSAS INSURANCE TROUBLE.

The Governor of Arkansas has run atilt aginst the fire insurance companies, accusing them of combination and extortion, and planning legislation to force unbearable restriction upon them. The National Board of Fire Underwriters at a special meeting, which was held in New York on Monday last, resolved to recommend the withdrawal of all fire insurance business in the State of Arkansas. This action was taken because of the proposed enforcement of the anti-compact law by the Arkansas Legislature. The bill becomes operative March 23rd, and if not repealed by that date, all policies of insurance written in the State of Arkansas will be cancelled. The new law to which the insurance companies object is an anti-trust measure which is designed to prevent, among other things, agreement upon reform rates of fire insurance by companies doing such business in Arkansas. There seems to be no reason why Arkansas should be exempt from the increased rates of fire premium imposed upon other States in the Union. The Governor must be a Socialistic crank.

* * *

CHANCES OF SUCCESS.

In looking over the field of business to-day, I should say that the chances for success are multiplied a hundredfold, rather than decreased, by the trust method of capitalization. Now, as then, there are two roads to success. One is to become an employee, the other is to begin as a proprietor, says George F. Tyrone in the Chicago Tribune. Losing one's job is often a blessing in disguise. My advice to the young man who loses his job is to stay out of a job permanently. If your employer discharges you—no matter for what cause—don't try to hire yourself to anybody else, unless it be to a rich trust or great company of one or another kind. Get into the service of a big company, or go into business for yourself—even though it be selling buttons or shoestrings.

I knew a young man in Chicago whose employer "fired" him one Saturday night for sheer incompetence. The poor fellow tried to get work and failed utterly. Then he got an option on a corner lot, sold the option at a profit of $20,000, and is now a leading real estate man.

Another real estate man who is worth $2,000,000, was launched on the road to success by being practically kicked out of the office of another real estate man. He swore he would never again be a servant. He starved for two years, but finally things began to clear up. To-day he could buy out his old employer four times over.

The same thing is true of several of the most successful insurance agents in this old town. If you are not an expert in some line, with ability that will command good wages, get back to the soil and begin selling peanuts or working on commission. On the contrary, if you can secure a position with some really big concern, take it, tend to your business, be generous with your time, do overwork, never kick, act as if the business were your own, plug steadily and silently, and you'll win. Big companies want that kind of a man, even if he isn't brilliant, and it is only a question of time when your reward will come—if not in stock, at least in a position of responsibility and trust, with correspondingly good salary.

Everybody cannot be a millionaire; everybody cannot be a high-salaried employee; everybody cannot be a successful retailer. It is a sad fact that somebody must do the work of a laborer. The majority of the people must work hard for small pay. These are facts. They are sad facts. They are facts which reformers would like to obliterate, and, personally, I presume, we would all like to see things changed. But in the present system of industry the grade method is the rule. Some men go to the top and get rich, or comparatively rich; some stay at the bottom and remain comparatively poor. But in the bottom ranks there are a few who want to climb, who are not satisfied with their pot of beer and their penny paper," and it is to that kind of young men that the philosophy in these articles is addressed.—Walden's Stationer and Printer.

* * *

Returns of accidents on Canadian Railways are given in a report prepared by the Department of Railways and Canals. This shows a total of 395 persons killed during last fiscal year, 25 being passengers, 192 employees, and 178 others, and in addition 1,405 injured, of whom 234 were passengers, 912 employees and 259 others.

TRADE NOTES.

A new industry is being boomed for British Columbia ranchers, who have rough lands. It is the raising of Angora goats for mohair. The fleece is very valuable.

The Essex Canning and Preserving Company, Limited, Toronto, capital, $100,000, has been incorporated under Ontario laws, with authority to deal in vegetables, fruits, meats, cattle, etc., and to can and preserve such goods. Robert Walker Ball, of Toronto, is among the provisional directors.

It is said that white fish are becoming comparatively scarce in the Great Lakes, owing, in a large measure, it is believed, to the license allowed by the Dominion Government in the matter of pound nets. Many of the regulations for the preservation of fish are not properly enforced. Net fishing is extensively practised along the Canadian shores of Georgian Bay to the north channel extending from Badgley Island to Sandy Island.

A paper was read a few days ago before the Textile Society of Leeds University, by Mr. B. Shaw, who has just returned from a trip to United States and Canada, after an absence of several years. He found that, generally speaking, there had been no advancement in the textile industry. Britain had nothing to learn as woolen worsted manufacturers from the United States, and less from Canada. Canada was still in its infancy in woolen worsted manufacturing, and cloths made by domestic mills were not to be compared with goods made in the Old Country.

* * *

A despatch from Boston announced the death, at his home in Brookline, on Sunday last, of Mr. George R. Harris, head of the firm of Blake Brothers & Co., bankers, Boston, and a director of the Canadian Pacific Railway, and of the National Bank of Commerce. The deceased, who was sixty-seven years of age, was well known in Montreal club and financial circles. He joined the C.P.R. directorate in 1885, and was a regular attendant at the board meetings.

* * *

—The Master Harness Makers of Ontario held their annual convention in Toronto on Wednesday last, about one hundred delegates being present. The auditors' report showed the institution to be in a satisfactory condition financially. The election of officers resulted as follows: C. A. Nix (Uxbridge), president (re-elected); Wm. McBride (Alliston), first vice-president; Chris. Prenter (Listowel), second vice-president; J. B. Moat (Toronto), secretary; H. Woolnough (Toronto), treasurer (re-elected). The executive committee is composed of the above officers and Jas. Smith and W. J. Micks; auditors, H. L. Daville and W. J. Micks; territorial vice-presidents, Alex. Thompson, Toronto; R. Matthews, Markdale; J. Howard, Hastings; E. P. Hall, Ottawa; Fred. Siegner, Tavistock; John Donaldson, Brussels; T. E. Connor, Thornbury.

* * *

—The tone of the wool market in Bradford has certainly improved within the last few days, and the nervousness which has lately been a feature of that market has nearly passed away. The fact that the consumption of pure merino wools has been distinctly on the increase, both in the worsted and woolen trade, has caused holders to continue very firm in their prices. As the Argentine clip of wool of a merino character is also unexpectedly small, and with a prospect of a still further decrease next year, French users must be forced to increase their purchases of colonial wools to replace this shortage in B. A. wools. The finer-stapled kinds of crossbred colonial wools, which are really extremely like pure merino wools, have moved in the market on the same lines as these latter wools; but the coarser kinds of crossbred wools, in the price of which there was a distinct drop at the end of the recent series of London sales, have for many months past moved in the market on quite separate lines.

* * *

—Canada and Australia find themselves at a disadvantage in trading with Japan. The Japanese have two import tariffs—the conventional tariff, to which Great Britain, Germany, France, and other countries are parties, and the general tariff, the latter, of course, being much the higher. Japan excluded India and the self-governing British colonies from the benefits of the British Treaty of 1894, and (with the exception of Newfoundland and Natal) the principal British colonies, not being entitled to most-favored-nation treatment, have to enter their goods under the Japanese general tariff. Incidentally, they have to forego other treaty rights. Presumably on account of war taxation, the Japanese general tariff has lately been raised so as to impede still more Canadian and Australian trade. The Australian leather trade, for example, has just been heavily handicapped. Canada is feeling the pinch in several directions. One line in which Canadian trade will probably be seriously affected is condensed milk, which now has to pay 11½d. per dozen tins, that from the treaty countries only having to pay 3d. per dozen tins.

* * *

—We find in Mr. Acton's Shoe and Leather Journal the following suggestion, which we think a very good one: In every large manufacturing concern there are frequent occasions when the employees are called upon to subscribe to a fund, either to purchase a present for a fellow-workman enering the matrimonial field, or for something of the kind. The subscription list is passed around usually, and each employee puts down the amount he intends to give. The fact that the others will see what is put down often leads a man to give more than he really can afford. The head of a large manufacturing firm in Toronto recently glanced over a list which had been gotten up among his employees, and he knew at once that several of them were giving more than they ought to. He then determined to change the system, and had a box made in which, when any subscriptions were taken up, the employee could drop in his subscription without anyone knowing the amount. The contributions have decreased somewhat, it is stated, but the manufacturer is confident his employees now give what they can really afford. The idea might be adopted to good advantage in many other establishments.

99th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a dividend of FIVE PER CENT. upon the Capital Stock has been declared for the current half-year, and that the same will be payable at the Office of the Bank, in Montreal, and at the Branches, on and after the

First Day of April next.

The Transfer Books will be closed from the 20th to the 31st March, both days inclusive.

By order of the Board,
JAMES ELLIOT,
General Manager.

Montreal, 24th February, 1905.

The Bank of British North America.

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that a Dividend free of Income Tax, of thirty shillings per share, will be paid on the 6th of April next, to the proprietors of shares registered in the Colonies, being at the rate of Six per cent. per annum, for the year ending 31st December, 1904.

The dividend will be paid at the Rate of Exchange current on the 6th day of April, 1905, to be fixed by the Managers.

No transfers can be made between the 23rd instant and 6th prox., as the books must be closed during that period.

By Order of the Court.
A. G. WALLIS, Secretary.

Mercantile Summary.

Efforts are being made by Berlin, Ont., parties to induce the Dennis Wire and Iron Works, London, to move to the former city.

A small dealer in shoes, Eugene Nicole, of Montmagny, Que., is arranging to pay his creditors 60 per cent. on liabilities of about $2,700, and Narcisse Gosselin, baker, of the same place, has settled his little obligations at 20 cents on the dollar.

A Montreal paragraph states that Capt. James A. Farquhar and Mr. Geo. E. Boak, of Halifax, have been in Ottawa interviewing the Government in connection with a subsidy, which they wish to obtain for a seal oil-refining plant, which it is proposed to erect in Cape Breton for the treatment of seals captured by the Newfoundland sealing fleet. At the present time, it appears, the only refinery available is that of the Magdalen Islands, to which the Newfoundland sealers send their catches.

We are told that it has been arranged to amalgamate the Canadian Otis Elevator Co., Limited, of Hamilton, and the Fensom Elevator Co., Limited, of Toronto, the name of the new company to be the "Otis-Fensom Elevator Co., Limited," with head offices in the Confederation Life Building, Toronto, and works at Hamilton. The present works in Hamilton are intended to be enlarged to more than twice their present size to accommodate the work from the Toronto shops and to take care of future increase of business. Besides enlarging the present buildings, a new fireproof pattern vault and a new foundry building will be erected. The officers of the new company are: W. D. Baldwin, president; George H. Fensom, vice-president and general manager; H. C. Black, treasurer, and T. F. Niven, secretary. The directors are: W. D. Baldwin, George H. Fensom, W. G. McCune, Joseph Wright and Watson Jack.

Tobacco is a noteworthy item in the farm produce of the County of Essex, Ontario, which lies so far south as to make that plant successfully cultivable. The Amherstburg Echo relates that one man in that county, Albert Klie. sold to the Empire Tobacco Co. 24,120 pounds of tobacco (1904 crop), and received 11½ cents per pound, which was contract price. The lump sum received by Mr. Klie was $2,773.80. This lot was in good condition and of fine quality. A week or more ago, the Empire Tobacco Co. shipped from their warehouse at Harrow. Nine cars were received, and all was first quality leaf. The whole averaged 11 cents per pound, and different persons shipped from 4,000 to 10,000 pounds each, Cook Wright, of Malden, shipping 10,800 lbs. "This concludes twenty-five cars which have been shipped from Harrow, nearly all the leaf being grown in the township of Colchester South. The aggregate tonnage was 3,500, at an estimated value of $77,000. There is no talk of hard times among our tobacco growers."

Mercantile Summary.

A compromise proposition is made to creditors by G. A. Perry & Co., general dealers, Dalhousie Station, Soulanges County, Que. Mr. Perry failed in the fall of 1902, without getting a settlement, and has since been carrying on business under cover of his wife's name. He now offers 50 cents on the dollar. Luckily he does not owe much.

For many years George Rowe has been in the carriage business at Franklin Centre, near Ormstown, Que., but changed conditions in the trade have cut off a good deal of his connection of late, and several years ago he was unfortunate in being burned out, making a serious loss. He has now been obliged to assign.

Frank Smith, a druggist, of St. Stephen, N.B., is reported in financial trouble, and has made a proposition, through his lawyer, to pay creditors 25 cents on the dollar of their claims. His liabilities are reported at $5,854, with assets of $2,800 or so. He has been many years in business, and might have done well but for a lack of proper attention to business.

The assignment is noted of Francois Lavoie, who carried on quite an extensive business in lumber, hay, etc., at Parc Laval, on the Island of Montreal, and who for several years past has carried on lumbering operations in the Laurentides, north of that city, having mills at Lac Nantel and Morrison's Siding. His operations last year in this direction do not appear to have been attended with favorable results, and he has shown signs of financial strain of late. He is said to show a nominal surplus over liabilities of some $75,000.

Urgele St. Onge, dealing in dry goods, shoes, etc., at Valleyfield, Que., whose affairs we lately reported to be undergoing investigation, has now assigned. He is said to owe some $18,000.—As the result of pressure on the part of some of his creditors, A. Palin, a custom shoemaker, of Napierville, Que., who has also lately carried some ready-made footwear stock, makes an offer of 30 cents on liabilities of about $1,500.—Israel Sigler, for a short time in a small general store way at St. Raymond, Que., is reported in embarrassed shape.

The Canadian Pacific Railway contemplates making important improvements in British Columbia. It will probably make extensions north to Comox on Vancouver Island, and west to Barkley Sound, in order to handle the traffic of the west coast of the Island. The new hotel at Victoria is to cost $500,000 It is the intention to replace before long the present car ferry from Ladysmith via Vancouver Island and Vancouver with a modern ferry to accommodate two dozen cars and provide an adequate service for unbroken carload shipments to Victoria. It is also proposed to lower grades in the mountain section at a cost of about a million dollars. The present grades will be overcome by a system of loops.

PICKFORD & BLACK,
HALIFAX.

The boot and shoe firm at Yarmouth, N.S., mentioned in last issue, W. H. Redding & Sons, manufacturers, are reported failed, and their creditors have been called together for the 18th inst. The firm has evidently been undergoing considerable financial strain for some time past, various law suits having been entered against them at different times since last summer. The senior partner was previously unsuccessful in 1885.

The Montreal Steel Works, Limited, held their annual meeting last week, Mr K. W. Blackwell in the chair. The net earnings for the year, $116,090, were considered very satisfactory. The sum of $56,000 was set aside for dividends. The election of the board of directors resulted in the re-election of the entire board, with Mr. K. W. Blackwell as president, and J. Reid Wilson as vice-president.

Mercantile Summary.

We acknowledge the receipt from the Ogilvie Flour Mills Co., Limited, of a very nicely executed lithograph, designed to illustrate a brand of their flour. Accompanying this was an attractive calendar.

Since motor legislation went into effect in Ontario in September, 1903, the number of licenses issued to owners of automobiles in Ontario has been 390, of which 237 were for Toronto, besides which 275 permits have been issued to tourists from across the line.

The Niagara Navigation Co. has given a contract to the Canadian Shipbuilding Co., Collingwood, to build a twin-screw steel passenger steamer, with a guaranteed speed of 22½ miles per hour, to ply between Toronto and Lewiston. The vessel is to be ready for service for next year's season.

The Universal Spring Motor Company, Limited, is applying to the Dominion Government for incorporation. Its capital is $500,000, and it proposes to set up a factory in Montreal for the manufacture of spring motors, as well as electric, steam and water motors. The Universal spring motor is a device which can be applied to sewing machines or other household devices.

Quite an extensive dealer in general merchandise, drugs, etc., at Fairville, N.B., a suburb of St. John, O. D. Hanson, has suspended payment and called a meeting of his creditors. He was generally considered to be in a pretty good position, and shows quite a considerable nominal surplus over estimated liabilities of $22,000, but he has been a very liberal dispenser of credit, and is said to have over $20,000 in book accounts of dubious value.

A fire on the 12th inst. at Coal Creek mines, Fernie, B.C., belonging to the Crow's Nest Pass Co., destroyed the tipples (or trestles on which the coal is run out from the mouth of the tunnel), stables, and one of the power houses. The estimated loss is $100,000, and not $200,000, as some "too previous" despatches stated. The company's other properties will be drawn upon for supplies while repairs are being made. The loss is fully covered by insurance.

The following patents have been granted during the last few days: James G. Webster, St. Johns, Iberville, Que., railway crossing; Heinrich Dorpmuller, Aix-la-Chapelle, Germany, device for preventing the creeping of rails; Christopher Jas. Gunston, Quebec, Que., process of mounting animal heads and the like; Amedee Tetrault, Coaticook, Que., sewing machine; Eben Perkins, St. John, N.B., nail-making machine; Wm. K. Bryce, Sanilac Centre, Mich., U.S.A., switch rod; Wm. Jas. Clayton, Halifax, N.S., wearing apparel; Alan J. Hart, Westmount, Que., shoe clasp. The "Inventor's Adviser" is just published. Anyone interested in patents or inventions should order a copy.

GOOD
BUSINESS

It is part of a man's good business to see that all his assistants are well bonded. — It's part of the assistant's business to see that he does not apply to his old friend for a bond. — He need not be under a compliment to a friend when we stand ready to supply him. . . . .

The ratepayers of Grimsby, Ont., have passed a by-law to loan to the Walker Steel Range Co., of Windsor, the sum of $15,000, and to give them free light and exemption from taxes, to assist them in starting a factory at the former place to employ 150 hands.

The Boston Last Co. has opened a factory for making boot lasts at Richmond, Que.

A. Pare & Co.'s carriage factory in Montreal has been nearly destroyed by fire at a loss of about $16,000, covered by insurance.

A new company has been registered in London under the name of the Western Canada Pulp and Paper Co., with a capital of £450,000.

The Public Works Department, Ottawa, is making plans for the construction of a wharf at Peterboro', on the Otonabee river, at a cost of $8,000 or $10,000.

The Standard Furniture Company has bought the extensive furniture business of Shelton & Co., in Vancouver, and will run it on an extended basis.

The Meduxnakik Electric Railway, Light and Power Co. is spending considerable money in developing water power and building up a summer resort near Woodstock, N.B.

The Bowmanville ratepayers have voted in favor of granting a loan of $15,000 to the Durham Rubber Manufacturing Co., who have secured five acres of land, and will soon begin building a factory.

According to the annual report just published in London, Eng., the receipts last year of the British-American Land Company amounted to £17,558. A dividend will be payable on "A" shares on the 10th prox.

A report is current in Toronto that negotiations are being carried on between the Canadian Pacific, Grand Trunk, Richelieu and Ontario and other transportation companies for the erection of a large modern building in a central spot, in which all the concerns could have offices.

A fire which broke out in the general store of Fairley & Co., at Ponoka, Assa., on the 13th inst., destroyed those premises completely and spread to several other buildings, including the branch of the Bank of Commerce, W. H. Shackman's hardware store, McGillivray & Co.'s furniture and undertaking, Breck's livery stable, etc. The origin of the fire is unknown. Loss, $100,000.

The Province of Quebec Timber Limit Holders' Association held their annual meeting in Quebec a few days ago and elected the following officers: President, Hon. W. E. Edwards; vice-presidents, F. P. Buck and W. Price. Executive Committee—Rod. Tourville (ex-president), Alex. McLaurin, Wm. Power, M.P., H. W. Durant, Archibald Fraser, J. W. Braneklev, F. F. Farmer, E. A. Dietrie, John Champoux, H. K. Egan, G. Starnes. Secretary-treasurer, Paul G. Owen.

⁂

NEW CARDS.

Mrs. Louise Hillard Patterson, of Falls Church, Va., has designed a novel set of playing cards, which contain instead of the old, stereotyped faces of the king, queen and jack and joker, artistically colored pictures of men and women prominent in American social, literary, charitable and industrial life. In the set the four queens of hearts, diamonds, clubs and spades are represented by well-known social leaders, authors and beauties. The ladies hold fans. The four kings contain the faces of well-known men in the field of industry and finance holding sceptres indicative of their particular line of endeavor, while the jacks portray four renowned American inventors, with a neat design illustrating the particular invention which made each famous.—Walden's Stationer.

—An interesting example of the power of a good catalogue recently came to my notice. Not long ago an advertisement man looking for an idea for a catalogue, finally concluded to send for some of those advertised in the magazines and newspapers. He accordingly wrote for and received eight. He had no intention of buying anything advertised in these catalogues, but so effective were they in description, illustration and typography that up to date he has bought a set of furniture, two pairs of shoes, a book, a piece of cut glass, two hundred and fifty cigars, and a mattress—all selected from the catalogues he had received—Louis Barta, Boston.

THE HUGH C MacLEAN CO., Limited,
Publishers, Winnipeg

Canadian Pacific Railway Company

Dividends for the half-year ended 31st December, 1904, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

Warrants for the Common Stock dividend will be mailed on or about April 1st, to Shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Saturday, 1st April, to Shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S. W.

The Common Stock Transfer Books will close in Montreal, New York and London at 3 p.m. on Wednesday, March 1st. The Preference Stock Books will also close at 3 p.m. on Wednesday, March 1st. All books will be re-opened on Monday, April 3rd.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 13th February, 1905.

Lewis Bros., Limited, capital $1,000,000, will take over the business of Lewis Bros. & Co. in Montreal, and carry on a general hardware, paint, oil and manufacturing business.

John Branscombe, conducting a small grocery store on Main street, St. John, N.B., has been closed down under a bill of sale. Mr. Branscombe is well advanced in years, and it is not likely that his obligations are heavy. He assigned some years ago.

The Cochrane Ranch Company's extensive ranges in Southern Alberta, containing 66,500 acres of land, and some 12,000 head of cattle, have been sold to United States buyers. The price, it is understood, was in the vicinity of $400,000.

Oscar D. Hanson, druggist and general dealer, of Fairville, is in financial difficulties, and has made an assignment to William A. Ewing, barrister of St. John. His liabilities are said to exceed $25,000, and a number of St. John merchants are interested. Besides his drug business, Mr. Hanson dealt in groceries, dry goods, boots and shoes, hardware, etc., and was believed to be doing well.

It is announced that Montreal is to have a splendid new hotel, a remodelled and enlarged Windsor, to be called the Windsor Annex, and a new concert hall. The additions and improvements to the Windsor will cost over $1,000,000, it is said. The new hotel, to be known as the Windsor Annex, is to be constructed immediately on the site of the present Windsor Hall. The Windsor Annex is to measure on the ground 250 by 330 feet, will be eight stories high, and will have 280 rooms. As a matter of fact, the two hotels will have in all 700 apartments.

Among the curiosities of the late Dr. Evans, the successful American dentist, of Paris, was a letter he had received long ago when he began practice in the United States. The letter was from a young farmer of Vermont, who wanted a set of artificial teeth. "My mouth," the young man wrote, "is three inches acrost, five-eighth threw the jaw, some hummocky on the edge. Shaped like a hoss-shew, toe forard.' If you want me to be more pertickler I shall hev to come thar." We assume that the young farmer "went thar."

The Dominion Coal Company is said to be looking for dockage in Toronto with the intention of competing in the soft coal trade of Ontario. The chief factor in success would be cheap freights, but this is the difficulty. However, as the company can bring a great deal of ore from the Lake Superior mines for mixing purposes, it could send its coal there as return freight much more easily than it could to Toronto. A Toronto opinion says: "The only way that this could be done, as far as Toronto is concerned, would be for these ore-carrying vessels to bring coal this far, from Nova Scotia, and take on here a general cargo for Lake Superior. There is hardly enough freight passing between here and Nova Scotia to supply sufficient freight in case they shipped direct to Toronto."

UNTIDY STOREKEEPING.

There is no excuse for rusty storekeeping, says an exchange. The man who permits his place of business to grow into a dirt heap is not in his right place; he should seek another field. It is a fact, however, that many untidy people are in the mercantile business. Their stores are a hodge-podge; we might almost say they are museums. How the owners chance to sell the goods they do is a mystery; it can only be explained on the theory that they sell to untidy people in the main. But why be untidy? There is no money to be made by it, and there is money to be made by the policy of neatness. On the other hand how quickly we are attracted to the show window of a store where there is attention to display. We enter and find order on the inside. Things look so inviting that we buy almost against our will.' When counters are cleared up we can do business easier and for less expense. Customers can find what they want without working hard for their selections. And it is just as important to keep the places under the counter in order as it is to look after the places that are in sight. Untidiness is the same in principle wherever it is found.

The man in business should take as his model the best he can find in his line and apply the principles there seen to his own work so far as practicable. The best store in the country should be the model for retailers everywhere and if necessary a trip should be made to see it. Most busi-

ness men do not look around enough. They get into a rut and stay there. It is unfortunate because a good many good men are killed by it. They might develop into larger business men if they were awake to their opportunity.

It is one of the mysteries why men are content to be selfish. We know it is so but the reason is not easy to understand. There is a psychological side to it, of course, and with this we must be satisfied. It would seem as if men would see for themselves, but we know that they are blind; in some degree we all are. There are men all about us who see more than we do, hence we may have partial understanding of the reason that governs the shiftless man. But what a relief it would be to stir him up.

⁂

UNITED STATES FINANCE.

Henry Clews & Co., New York, in their weekly circular dated March 11, say:

Is it sufficiently realized that an extraordinary rise has taken place in stocks during the past twelve months? February and March were the lowest months for the majority of active stocks in 1904, and since then the leading shares have advanced from 25 to 100 points; some having doubled in value during that period.

It is quite evident that skilful manipulation is at the bottom of much of the present rise in stocks. Improving peace prospects, the reduction in the Bank of England rate and continued strength of the London market infused fresh life into the bull contingent in this market, but it should be remarked there is conspicuous absence of genuine buyers at current prices. Investors are not taking stocks at these figures, and the public is not speculating to any extent, for the reason that nearly all conservative and reputable commission houses are cautioning ther customers against plunging on the long side at this time. The result is the big holders are not distributing their stocks as freely as they desire, nor are they likely to dispose of them very easily at this level. Perhaps this explains in part our continued high loans. The market is liable to be bulled into stagnation, and a sharp break then will be needed to galvanize it into fresh activity. A moderate decline occasionally hereafter will prove beneficial, by checking over-confidence and introducing a new buying element that will not enter without inducements. There are no bear arguments in sight, but the market may soon need some readjustment upon a more natural basis.

⁂

—On the 13th inst., at Pittsburg, Pa., there was a convention of transportation men—the semi-centennial meeting of the American Association of General Passenger and Ticket Agents. Many Canadians were present, including G. T. Bell, of the Grand Trunk; Thos. Henry, of the Richelieu and Ontario; C. H. Nicholson, of the Northern Navigation, etc.

SOMETHING AS GOOD.

A lady who is a lover of books entered a book store in Detroit.

"Have you the last Literary Digest?" she asked.

The clerk was a young woman, and evidently a novice at book selling.

"I'll see," she said, and presently returned to say the magazine wanted was not in stock.

"I'm very anxious to get a copy," said the lady.

"I'll look again," said the obliging clerk, and in a few minutes returned.

"I'm sorry, but the last copy has been sold. But I have something here that I think will do as well;" and she handed the amazed customer a copy of "What to Eat."—Detroit Free Press.

⁂

HUNDRED MILLIONS FOR A CANAL.

The new plans for the improvement of the Erie Canal provide for a work of greater magnitude than any ever before undertaken by any State of the Union. When completed, the new waterway—from Troy, the head of steam navigation on the Hudson, to the Great Lakes—will be four times as long as the Suez Canal, and will have cost a million or two more. Its length will be eight times that of the Panama Canal, and the Empire State will expend, single-handed, upon its construction at least one-half as great a sum as all the States of the Union combined expect to pay for the Isthmian enterprise. The plans for the canal improvement are interestingly described, with illustrations, in an article by Earle Hooker Eaton in the current Harper's Weekly.

⁂

TORONTO MARKETS.

Toronto, March 16, 1905.

Chemicals, Drugs, etc.—A fairly good general trade is going on. Opium is going up in sympathy with the primary markets, where there are reports of frosts. Quinine keeps steady, with little speculative buying being done. Crude camphor is quite scarce. A strong feature is iodine, which again has made a heavy advance, the syndicate interested in it having apparently succeeded in downing all appreciable competition. Citric and tartaric acids and cream tartar are very firm, and so is acetic acid.

Dry Goods.—The trade is beginning to open up very nicely. This week a number of buyers have been in town from Manitoba and the North-West. All the indications are in favor of another good year. Prices for almost all textiles remain very firm, with a decided upward tendency in linen and wool, especially the latter. Woolen yarns have advanced 50 per cent. in the year. Cotton is rather unsettled Carpet warps and batts and some grades of ducks are down a little but these are exceptions to the general trend.

Flour and Grain.—There is no change in wheat. The market is dull, and little business is doing. Rye is firm at an advance of 2 to 3c. Buckwheat has advanced. Flour is dull. The ruling price for ninety per cent. patents is $4.40 or $4.45. Millfeed continues very firm. Oatmeal is a little on the easy side.

Lumber.—Not many changes have taken place in the price of pine, but its position is quite strong. Very little remains in first hands. The only weak grade is Norway.

Live Stock.—The run of cattle this week was not heavy, and the result was a somewhat brisker demand. Good specimens sold out early. This applies both to exporters and butchers'. Prices for stockers and feeders held steady, and prices kept firm. Calves were plentiful, but the demand was good, and there was no slackening of prices. Milch cows were in request.

Groceries.—No change has occurred in sugars, but prices are well maintained. Trade in general lines remains about as last reported, with little of a new character worth reporting. Teas are dull. Canned goods are very firm and scarce, with a few lines coming in from across the line.

ESTABLISHED 1858.
Managers and Underwriters.

Hides, Skins and Leather.—Prices hold about as last week. Trade is normal. Leather merchants report prospects good for better business.

Provisions.—Smoked meats are firmer than they have been lately. Butter is a little easier, with more plentiful supplies coming from the country. Cheese is firm.

Wool.—The new clip will begin making its appearance in about a month, and until then no doubt quotations will be nominal. They are unchanged from previous reports.

⁂

MONTREAL MARKETS.

Montreal, March 15, 1905.

Ashes.—There has been little or no variation in values during the past three or four weeks; $5.50 has been paid for an occasional lot of good tares, but the general quotation for No. 1 pots is $5.35 to $5.45; seconds would bring about $4.90 to $4.95. Pearls are wanted, and would realize about $7.50.

Dairy Products.—Owing to increased receipts, including some fair lots of Australian butter, the market is easier. Sales of fine Australian are reported at 28c., and winter creamery at 25 to 26c. The cheese market continues very quiet,

MILLS AT CORNWALL

WANTED.

MANAGER FOR
Western Loan Company.

Well established loan company in Winnipeg, working on the old line permanent plan, is looking for a man to take the managership. Must be thoroughly familiar with financial matters and capable of handling office details. This is a splendid opportunity for the right man and full particulars may be obtained by addressing

H. W. WHITLA,
c/o McDonald, Haggart
& Whitla,
Winnipeg, Man.

but holders of any fine that may be here are very firm in their ideas as to price, and would ask about 11½c. for best goods, of which there are now but few here.

Dry Goods.—City retail trade has ruled quiet since last report owing to the continuance of sharp zero weather, and even the near approach of St. Patrick's day has not made business much more active. In wholesale circles the same comments are heard with regard to the apparent carefulness of buyers in placing their commands, and the volume of passing business is just moderate. With regard to values, nothing special is reported in the way of change.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to
explain our plan.

EMPLOYERS' LIABILITY
ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND,
MANAGERS. 2

Fish.—The active demand of the past two or three weeks has almost entirely cleared out stock in certain lines. Of green cod there is practically none now held here, while pickled herrings are also very scarce. We quote: Labrador herrings, $5.50 in bbls.; halves, ditto, $3; No. 1 salt mackerel, $2 in kits; sea trout, $9.50. Fresh frozen herring are dearer at $2.20 to $2.30 per hundred for large; haddock, 3 to 3½c.; steak cod, 5 to 5½c.; boneless cod, 6c.; boneless fish, 5½c. in bricks; finnan haddies, 6 to 6½c.

Furs.—Receipts are just moderate, and it is surmised that buyers for the American market are picking up fair lots at interior points. We repeat quotations as revised last week. We quote for prime pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6. as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $4.50 to $5.50 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $25 or more; coon, $2.50 for fine black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $2; short stripe, $1.65; long stripe, 60c.; broad stripe, 25c.

Groceries.—The markets for both raw cane and beet sugars are easier, but the local refiners have not as yet made any revision of prices, and are not likely to make any move in that direction until New York refiners reduce quotations. The present demand from jobbers is reported light. A cable just to hand from Barbadoes to-day advises a further advance in molasses to 21c., which means almost 34c. laid down here. The planters are reported to be treating the cane juice so as to get a larger proportion of sugar, and some authorities estimate that the crop of molasses will fall this year as low as 25,000 puncheons. Teas continue dull. The cut in starch prices did not continue long, manufacturers' quotations being restored to the old level, but they have large orders in hand at the low prices, which it will take them some time to fill. White beans continue to advance, $1.60 being asked for best grades in lots.

Hides.—The market presents no new features whatever. Though the quality of beef hides now offering is inferior, receipts are light, and dealers continue to pay 9½c. for No. 1. Calfskins are steady at 13c. for No. 1, and 11c. for No. 2; lambskins, 10c. each, and sheepskins, $1.15 to $1.20 each.

Metals and Hardware.—Hardware wholesales are making fair shipments, and also report a good proportion of orders in hand for delivery when spring freight rates come into effect.. In heavy metals the movement is about an average one for the season. Local stocks of Summerlee pig iron are now completely exhausted, but quotations for spring import are reported a little easier. Hamilton, Midland and Londonderry brands are quoted at about $19. Bar iron is fairly steady at $1.75 to $1.80, and bar steel at $1.90. Boiler plate and iron pipe are unchanged. The British tinplate market is cabled a little easier, but local figures are unaltered at $3.65 and $3.90 for cokes and charcoals respectively of standard brands; Canada plates, $2.45; black sheets of 28 gauge, $2.15; galvanized sheets, $4.15. Ingot tin is firm at 32½c.; copper, 16¼ to 16½c.; antimony, 9½c.; pig lead, $3.40 to $3.45; sheet ditto, $4.10; spelter, $6.75.

Gains in 1904 by

Head Office... WATERLOO, ONT.

The Mutual Life
OF CANADA

In Assets	**$937,372**
In Reserve.............	**737,457**
In Income	**164,239**
In Surplus.............	**170,920**

Expense rate reduced One per cent.
Death Losses only 41% of the expected.
Interest rate increased to 5.09%.

Oils, Paints and Glass.—Turpentine continues to show decline, probably due to near approach of new crop, and the present quotation for single barrels is 76c. Linseed oil is a little firmer, and some dealers claim to be getting 44c. for raw in small lots. The late advance in glass is firmly held, with spot stocks in some sizes pretty low. Leads, putty, etc., are without change.

Wool.—There is no briskness in the demand, orders coming to hand being all small. Cape wools are quoted at 18 to 22c.; fine B.A., 38 to 42c.; pulled Australian, 41c.; domestic pulled, about 30c. Of domestic fleece there is none offering; neither is there any stock of North-West here at present.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)
The Company OF the People, BY the People, FOR the People.
ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00.

FEATURES IN THE DRY GOODS TRADE.

It is now becoming possible to judge as to the effects of the recent important merger of Canadian cotton mills, which has now, after some few hitches consequent upon the indisposition of some of the shareholders interested to make the proposed change, become an accomplished fact. The fall price lists have been issued, and these, as a rule, show that while there has been some little shading, or rather equalization in prices, they remain practically as firm as ever. The Canadian Colored Cotton Co.'s revised list shows a reduction of about 5 per cent. in flannelettes, tickings, and some kinds of woven cotton goods. One point to be noted is a lessening in the number of lines manufactured. Each mill will in future be more specialized, with the hope of turning out a better article, and with less waste. Some people seem to have thought that there would be a general lowering of quotations, but this was in truth scarcely to be expected in view of the fact that, during the time of high-water values in raw material, the Canadian cotton mills did not raise the prices of their finished products to a due parity. The same settled firmness is noticeable in other cotton centres. In Massachusetts, the mills are behind with their orders, due largely to the recent strike; while in England the closing or working on half-time of so many of the Lancashire mills, owing to the famine in raw material a year ago has resulted in an extraordinary present rush in the industry.

A report from the Eastern States last week said that:—

> The cotton goods market continues to show marked improvement, both as to firmness in values, as well as activity among buyers. Prompt delivery has become the issue in the market among home buyers. The vast number of enquiries that have been made show the needs of the secondary markets. Buyers have come into the market determined to secure the goods they need for the immediate future at the best quotations they can get and insist only that shipments be made at the earliest possible moment. On most lines of heavy-weight goods there is no way of mills increasing the supply of spot goods, and they accept orders without specifying exact date for delivery. For brown, bleached and fancy fabrics, there is a stronger demand, arising from an improved movement of goods in the market for final distribution. In fine yarns and light goods the situation is not as unsatisfactory to the buyers as is the case with goods of the brown and heavy character. They are able to get cloths in sufficient volume, except in some of the counts that have been sold ahead. Heavy grays are the feature of the trade, and the remarkable strength that has been shown during the week is being wondered at by both buyers and sellers.

The situation in woolen staples is even stronger than is the case with cottons. With regard to the former, there has not even been a suspicion of any coming lowering of values, and the demand, as a consequence, has been becoming constantly brisker. The strong tendency discernible in recent London wool sales, the improving demand in the States, together with the good trade conditions existing, and the comparative scarcity of raw material here have brought about a feeling of great confidence. The retailers have been good purchasers throughout the country, and on the whole, the prospects are very bright. It is too early as yet to forecast the effect of the arrival of new-clip wool on the market. As a rule, the early purchasing is slow, and gives but little indication of the general movement of the crop. It is safe to say that while some offerings will likely be coming in say about three weeks from now, new-clip will not make much stir for some time yet.

Speaking generally, it may be said that the state of the dry goods trade at the present time is distinctly healthy. Failures have been conspicuously few, while payments as a general rule have been fairly satisfactory. The high prices in staple lines of textiles have perhaps kept orders in small compass, but, against this, turn-overs have been quick. In some cases, referring to woolens, even when orders have been of fair size, deliveries have been small, owing to the desire of manufacturers to distribute their output as widely as possible among their customers. This has had the effect of keeping up a quick circulation of trade, and renders the prospects bright for a continuation of the present healthy position of the market.

⁂

IMPROVING THE ST. LAWRENCE.

The deepening and safeguarding of the St. Lawrence River are a subject of such far-reaching and national importance that it is interesting to learn any details as to the progress being made. A channel 30 feet deep and 350 feet wide at the narrowest part of the river between Quebec and Montreal will, it is stated, be completed as far as Batiscan this year, leaving some twenty miles to be dealt with next year. Attention is also being devoted to the channel below Quebec, so that the largest steamships may come in from and go out to sea from that port at any hour of the twenty-four without being hampered by the state of the tide. Every year sees an increase in the size of steamships, and serves to show more conclusively that the larger the vessel the cheaper the freight, because such vessels, so long as their space is not limited and cramped in order to accommodate the machinery necessary to obtain record speeds, can be more economically run. It must be remembered that even now New York is accommodating vessels nearly 200 feet longer than anything coming up the St. Lawrence, and the facilities of Montreal to retain and increase its importance as a shipping port must be made sufficient to meet this constant tendency to enlarge the size of vessels. During the last few years great improvements have been made in the navigation channel of the St. Lawrence, many additional lighthouses have been built, more powerful lights and sirens, gas buoys, and other aids established, and the result has been greater size and greater speed in the vessels plying to our "national" port, while disasters have been fewer. Much remains to be done, however.

⁂

TRADE WITH AUSTRALIA.

From the February report of Mr. J. S. Larke, Canadian commercial agent for New South Wales, Queensland and New Zealand, we gain some suggestive reasons for the lack of growth of Canadian trade with Australia. Often, he says, where business offered by Australians has been declined, there has been a failure to advise the would-be buyer, causing unpleasant losses to the latter. In anticipation that his order will be filled he does not order from his old sources of supply. His stock has become exhausted and those from whom he formerly bought have perhaps arranged with other houses. There are sometimes sound reasons for not entertaining offers, but there can be no reason for failure to notify the offerer of the fact. And he mentions firms in Sydney who have had unpleasant experiences of Canadian neglect in this direction.

Some Canadian manufacturers are applying to be put in a position to secure trade with the Australian Commonwealth, but it is very rare to find one paying any attention to the conditions necessary to bring this about. They generally ask to be placed in correspondence with some one dealing in their lines. This, Mr. Larke says, is generally useless. Australians will not buy new lines without full information and samples. Catalogues, in addition to the description of the goods, should state how they are packed, how many or how much in a package, and its size in cubic feet. The price-list should give cost f.o.b. at New York and, if possible, at Sydney via Vancouver. There has been a decided improvement among Canadians in this respect, but still the great majority of inquirers fail in these requirements. There are a few lines of merchandise which selling houses have undertaken to handle. Now, says the Canadian agent, such firms ask for at least a first small consignment. "Consignment business is a bad one, though it is being done in increasing volume, and, as a rule, a proposition of trade on this basis should not be entertained. But there is reason for the request of a first consignment. The goods are unknown, and this market is well supplied with goods that have been made well known. The merchant has no guarantee that should he make the goods known that he will retain the sale and reap the benefit, but the manufacturer would have a trade. It is but reasonable, therefore, that the latter should bear a share of the expenses, he sending the goods, the Australian merchant paying freight and duty."

With the present volume of trade and its one-sided character, Mr. Larke gives it as his opinion that it is impossible to arrange direct exchange between Australia and Canada. The settling place must be London. "There is an improvement much needed in the matter of giving to Canadians coming here drafts on London. They are usually drawn in duplicate, the visitor bringing the original and the duplicate remains in Canada, often retained by the issuer. No bank here can do more than send the original for collection, involving a delay of nearly three months, and, as is generally the case, the holder needs the cash, and is in a very awkward position unless he should have friends who can help him."

⁂

BUSINESS DOWN EAST.

Replying to an enquiry as to the state of business generally in Nova Scotia, our Halifax correspondent replies: "The general concord of opinion in the province seems to be that under ordinary conditions, this would be one of the best spring seasons we have had for years; and this conclusion is arrived at by the somewhat negative process of reasoning that, considering the conditions which have existed during most of this winter, we find ourselves no worse off than we are at the opening of spring." The winter just past has undoubtedly been one of the worst experienced in the Maritime Provinces for many years, as our previous advices and editorials have shown. It appears to have affected every industry injuriously. The crews which went into the woods in the autumn to get out lumber were smaller than usual, in anticipation of smaller requirements; and even these had to be withdrawn early on account of the extraordinary depth of the snow. The cold weather and the storms have interfered very seriously with the lobster and smelt fishing. Mining has suffered from the same cause. Cash is scarce, and particularly so in the Eastern Counties as well as in Prince Edward Island, because all the spare money in the hands of the farmers has been sent out of the country for hay. In these counties and on the Island, the outlook is not regarded as particularly bright. The relieving feature of the situation, however, is that notwithstanding the unfavorable conditions, the country is showing satisfactory recuperative power, and everywhere the tone of mind is one of optimism and expectations of better things ahead. Money is pretty scarce and payments are rather slow, but every allowance is being made.

* * *

CAUSES OF CONFLAGRATIONS.

Apart from structural defects in buildings and negligences connected with fire appliances, conditions of temperature and of wind, as well as the placing of buildings, have had much to do with the spread of conflagrations. We shall cite a few of the circumstances noted, and give examples of their effect. The fire at Windsor, Nova Scotia, in 1897, occurred at a period of great dryness in the autumn. The strong wind already blowing increased to a gale and carried embers far abroad. At the time of the St. John's fire, of Newfoundland, too, the weather had been very dry and the wind was strong. Yet at such a time the city water was turned off by the authorities to make repairs! At Quebec, in June, 1881, when fifty acres were swept by fire at a loss of $2,000,000, "the weather was very warm and there had been no rain for six weeks." At the date of the New Westminster fire of September, 1898, "the weather had been dry and warm and every building was in an inflammable condition." It is to be noted also that there being at New Westminster an upper and lower town, that is a higher and lower level of buildings, a relief-tank had been put in, half way up the hill; this operated to throttle the flow of water, with the result of a poor pressure at the lower levels. When the Ottawa fire of 10th May, 1903, broke out, just three years after the $7,500,000 fire at Hull and Ottawa, "the weather had been very dry for some weeks." For another thing, in the case of both these fires, a strong wind was blowing when they began. At Antwerp in 1901, and in Paterson, New Jersey, the next year, conflagrations took place whose great extent was caused in some degree by the prevalence of strong winds.

A novel cause of fire has been instanced by Mr. J. B. Laidlaw in his paper on conflagrations. At Port of Spain, in the West Indian Island of Trinidad, on the 4th of March, 1895, fire broke out in a retail dry goods warehouse in the centre of the city. It is suspected that the fire was incendiary, being set by a colored clerk in revenge because his employer did not close as early as their neighbors on that day so as to allow him to see the English cricket match, then going on. It is clear that the savagery had not been educated out of this negro's blood. The fire burned or damaged a score of buildings.

"Had the wind been blowing towards the main portion of the town, the experience of Jacksonville in 1901 would probably have been repeated." Such is the remark made by the lecturer about the fire of 9th August, 1904, at Victoria, B.C. Shingles off an old and dry wooden building at the Albion Iron Works were blown, blazing, on to the roofs of dwellings 200 to 500 yards away, with the result that forty houses were consumed.

Any fire which has secured some headway may develop into a conflagration, and as we have seen there are some factors which greatly assist to this end: Flying shingles and flying embers; accidents to a brigade at a crucial moment; lack of water-pressure at a critical time; a long spell of dry weather; a high wind. The Jacksonville fire of 1901 was caused by, at least its great extent was due to, pieces of dried moss (lying on frames drying in the sun outside a factory), commencing to rise in the heated air and being carried by the breeze to the roofs of adjacent shingle-roofed dwellings. The burned area was two miles in length, and from a quarter-mile to three-quarters in width. The property loss was about $10,000,000, and the insurance $4,000,000 or thereabout. Shingle roofs were blamed for the conflagration.

Good construction of buildings, proper roofing, and good fire-preventive appliances will result in fewer great fires and of smaller cost. "The first step towards the elimination of conflagrations would seem to me to be," said Mr. Laidlaw before the Insurance Institutes of Montreal and Toronto last week, "the reduction of the area of any unit freely subject to one fire." That is to say, suppose there must be no unit [of construction] subject to one fire of more than 15,000 square feet area and 15 feet in height, this would permit a building 75 feet by 200, or 100 by 150 feet if of one story only; but if that building be two stories in height then the ground floor area must be reduced to 7,500 feet, if of three stories to 5,000 feet, and so on.

* * *

A CHEAPER TELEPHONE SERVICE.

Sir William Mulock's pronouncement in favor of Government ownership of telephones has created a good deal of interest. The bright prospects, especially for our rural districts, which always spring into some people's view whenever a great reduction in the cost of phones is mentioned, are always acceptable, though they need not blind us to the fact that the proposals for the nationalization of the telephone system are so far very much "in the air." This is not to say, however, that something should not be done to lead to a reduction in the cost of this important service in Canada. Few things, for instance, would be more likely to help stem the stream of country-folk cityward, which even in Canada has begun to look ominous for the future, than a good system of telephones at cheap prices such as could be afforded by the farmers. The Postmaster General's remarks on this subject are worth reading. A special committee has begun its sessions in Ottawa for the purpose of investigating the whole subject. A feature of its meeting on Wednesday last was a report by Mr. Francis Dagger, of Toronto, who is described as an expert on the telephone subject, dealing with the situation in Canada, the United States, and several countries on the continent of Europe. He stated that the rates for telephone service in this country and the United States were higher than in any country in the world, and he thought that the present usual rates might be cut in two, and still leave a satisfactory working profit.

This last is a statement calculated to make the Bell Telephone people "sit up," and if it be capable of contradiction, we may suppose that they will not be long in contradicting it. This and some other of Mr. Dagger's statements cause us to doubt whether he knows as much about the telephone as he is reputed to do. To some people's minds, the undertaking by the state of such a job as the conducting of a telephone system is an easy and a cheap matter—it can be demonstrated (on paper) to be so. But put the same people to translate their theories into successful action, and they fall short. However, Sir William and his committee will doubtless get further information than that put before them yesterday. And when that comes out we may have something more to say on the subject. Meanwhile Sir William is hardly likely to frame any practical measure based upon what Mr. Dagger has thus far put before him.

* * *

—Conferring, upon the subject of Canadian exports of flour to this country (mentioned elsewhere in this issue), with the Consul-General of Japan, that gentleman urged that Canada was by no means doing all she might in this direction. Mr. Nossé, who has his eyes open to what is going on in the present, and is by no means pessimistic as to the future of either his country or ours, declares his belief that Winnipeg will within very few years play a great part in Canadian trade with the Orient. She will be shipping to Japan and Korea and China such merchandise as breadstuffs, butter, wool, lumber. While Toronto, on her part, will he thinks be sending thither manufactured goods.

* * *

—Our Australian correspondent's letter in today's issue will be found interesting. The description he gives of the conditions existing in the Commonwealth show that both gentle and simple over there have much to learn not only of economical principles but also of the application of ordinary arithmetical rules in fiscal affairs. It is possible to have too much experiment and too many fads in nation-building. Our correspondent has many times during the last six years given Canadian exporters to Australia raps over the knuckles for their carelessness and lack of attention to instructions as to shipping. A very similar rebuke is given them by Mr. J. S. Larke, the commercial agent for Canada, in his last letter to the Canadian Government, part of which we quote elsewhere. Among the last paragraphs of our Sydney correspondent's letter is this one: "The next steamer from Vancouver can't get any cargo, yet Australia wants No. 1 hard wheat for seed, but none is to be had. Oats, first-class, are worth here nearly seventy-five cents per bushel; potatoes, fifty dollars per ton; hops, thirty cents per lb., but none from Canada. Is Canada an exporter of agricultural products anyway?"

* * *

OUR AUSTRALIAN LETTER.

The Australian trade for 1904 was imports, £16,956,419, and exports, £37,544,859, showing the enormous surplus of exports of £20,588,440. It would be imagined such a result would boom business, particularly in New South Wales, which shares about half of this splendid showing, but it has had no such result, and least of all in this State, where it is difficult to find a cheerful man, that is, relatively speaking, for the genuine Australian is rarely in despair. When he gets into that sombre stage he commits suicide and sometimes before.

There are good reasons for the small effect produced by this high surplus. One is that it is abnormal. The harvest of 1903-04, shipped in 1904, was an immense one and not likely to be repeated for years. Secondly, the wool crop of 1904-05 was shipped early. Much that ordinarily would have gone in 1905 was sent in 1904. Then the imports were also below the normal due to clearing out of stocks carried for the past three years. The chief reason is that nearly the whole of this surplus is swallowed up by the interest which Australia has to pay on its foreign indebtedness, public and private. The experts differ as to the amount of this, but Mr. Coghlan, whose reputation as a statistician is more than Australasian, places it at £15,508,000. At one time this outgoing was partly and often more than balanced by the inward flow for investment in Australia, but the current this way has seriously diminished. Australia furnishes a serious study to political economists. Just take these figures of the foreign indebtedness, public and private; total production, and population for consideration:

	1871.	1903.
Indebtedness	£56,610,000	£284,328,000
Production	46,700,000	117,672,000
Population	1,924,770	3,926,990

During this interval of thirty-two years, we find population slightly more than double, production two and a half times, and indebtedness five times. Beside public borrowings and money brought in by immigrants, British money sent here for investment averaged twelve millions sterling from 1886 to 1890, while from 1901 to 1902 it has been less than three. It is believed that last year a good deal more went out than came in. In 1903, indeed, 7,065 more persons left Australia than came in, and in this way capital flowed out of the country.

It is the common fashion to say, borrow the money and let posterity pay the bill. Posterity has arrived in Australia, and as so much of the capital was spent in folly and frippery, it finds it difficult to meet the bill. It is the fashion to throw the blame of the carnival of extravagance upon the Labor Party. This is nonsense, for the wildest period from 1880 to 1890 was before the Labor Party came into being. It is to be feared that party is responsible for the policy in most of the States that has prevailed since it came into being, and for preventing Australia arriving at financial sanity. It shares with capital the blame for encouraging borrowing when abstention was a necessity, but it is responsible for lowering production. This is illustrated by the working of the railways of New South Wales. In 1897-98, the net profit of earnings was £133 per employee, last year it had fallen to £90, and neither charges to passengers nor on freight had been lowered. The wages paid per man had increased, and the work done decreased. This would be approved of if the country could stand it, but it could not, for the exports of the State, out of which the interest of the money which has constructed these roads has to be paid, had fallen from £18 8s. 2d. per head to £13 2s. 4d. Now the candle is being burnt at both ends. Before it was wild expenditure, now decreased production has been added.

Australia has not been played out. It still has great undeveloped resources. It needs wise statesmen who can grasp the situation and have the courage to follow their convictions, and it needs an awakened public. This, too, is coming. The newspapers, though they still have the bad habit of flying at the throat of an English newspaper which ventures to repeat their statements, are talking out with a plainness that is refreshing and hopeful. The labor association have adopted as part of their policy "no borrowing for new purposes." There is some small sign of awakening of the business men of Sydney, the slowest of Australians to move. Rigid economy, hard work and proper encouragement of agriculture will ensure a prosperous future.

The Labor Party may be an obstacle to rigid economy and hard work, but it is having its own troubles. Irishmen of the Catholic faith were amongst its most active promoters. It naturally followed that the charge was made that it was under the thumb of the Catholic Church, and the Orangemen gradually broke away, and are now in open hostility. The control has now passed over to the Socialists, and the Catholic element shows signs of following the Orangemen, and the leading Catholic paper has declared every loyal Catholic must be against the Socialists. Then the ardent Socialists are denouncing the political leaders of the party as not being genuine Socialists, but only office seekers and trimmers. Then many of the steadiest of the workers are openly asserting that the agitation has ceased to be useful to them as a class. It is possible that the very success it has achieved will wreck the Labor Party. In any case its most dangerous aspect has passed. It was most harmful when it was simply a third party openly offering itself to the highest bidder for concessions. Now that it has become the Opposition or the Government, it is comparatively harmless in either position.

The fool capitalist is the best friend of the Socialist. He began the borrowing and extravagance, and encouraged it in the interest of his own pocket, little caring what would happen in the future and nothing seems to teach him prudence. The Government of Victoria proposes to build a Central Railway Station, and would need a good many bricks. Here was a chance for the idiotic money man and he promptly seized it. He formed a combine of the brick makers, shut up some of the yards, threw some men out of work, stiffened the price of bricks and thought he had the Government. The stiff old Premier, though an anti-Socialist, said nothing but bought a suitable clay field and says the State will make its own bricks. The Socialists are tickled mightily at this sudden conversion of their old enemy. It will strengthen their hands more than five years of agitation. But even the stupid capitalist may attain to common sense and things will begin to improve.

The Government of New South Wales is wrestling with a scheme for settling people on the land which includes a special bureau in London to advertise this as a home for emigrants. How it is going to compete with the free grants of fertile lands in Canada when the best it can offer is good land at three pounds per acre, with sundry fancy additions to the title, and to be ballotted for at that, does not yet appear. It has not stayed the enquiries of Australians who want to go to Canada. Last year, according to the official returns, nearly six hundred went, and six thousand would have gone if they had sufficient money to take themselves and families there. The majority of those going are bright, promising-looking young fellows, many of them with a knowledge of farming.

The only Canadians coming here latterly are those who are taking this route from South Africa. If, as is the case sometimes, they have no money on arrival here they are in for a bad time. The papers report the arrest of one for horse stealing. The judge asked the Canadian. "What did you come here for?" "To find work," was the answer. The judge said: "You ought to have known that Australia is a good place to come to spend money, but no place to look for work."

The next steamer from Vancouver can't get any cargo, yet Australia wants No. 1 hard wheat for seed, but none is to be had. Oats, first-class, are worth here nearly seventy-five cents per bushel, potatoes fifty dollars per ton, hops thirty cents per lb., but none from Canada. Is Canada an exporter of agricultural products anyway?

The ends of the earth are not so far apart. By the last Canadian steamer there arrived a man whose family reside in British Columbia, but he did not often see them. Recently he is from the frozen Klondike, where he searched for gold. Now he has gone to tropical British New Guinea, where the aboriginals are still cannibals and the fever is more deadly than the spear of the native, prospecting for rubber. He knows what he is about, for he has been there before, and was nearly done for by fever. If life will hold out for six years he expects to have a plantation more valuable than any Klondike mine, and I think he may.

The Federation of Australia was only a half done job. The Premiers of the Commonwealth and several States have concluded their annual foregathering, at Hobart, to see if something can't be done to advance the completion. Over sixty items were down for consideration, and some progress was made with a few. Even the taking over of the debts was advanced a step, though the State Premiers were by no means unanimous upon it. The great hindrance lies in the omnivorous State maw for loans, and the Commonwealth Treasurer, Sir George Turner, wants to close it.

Sydney, New South Wales, 13th Feb., 1905. F. W.

* * *

OUR HALIFAX LETTER.

The Lunenburg fleet is now preparing to start for the spring trip to the Banks of Newfoundland—a little earlier than usual—and is outfitting in Halifax. This has been a favorable feature for the city at this time of blockaded railroads, because the Lunenburg supplies can all be shipped by water, and they are a very considerable item, applying as they do to over one hundred and fifty ships. Lunenburg is a town of some 5,000 people in the county of same name, forty miles from Halifax in a direct line, but twice that nearly if one had to follow the deeply-indented coast line.

An item of interest to travelling men will be the fact that the Halifax Hotel will change hands on April 1st. A syndicate of Halifax and Montreal men are about to take over the hotel on lease for a term of years with the option of purchase. E. L. McDonald, who has become a great favorite in the Sydney Hotel, will be manager. The new lessees propose to spend a large sum of money in making the hotel thoroughly up to date, and Mr. McDonald is now visiting hotels in the large cities of Canada and the United States on an observation tour. The Messrs. Hesslein, the owners of the Halifax, have been conducting the business for many years, it having been established more than a half a century ago by their father.

A. & W. Mackinlay, wholesale stationers, a business which is as solid and almost as old as the city itself, has been changed in style to A. &. W. Mackinlay, Limited, in order to permit of giving some of the employees of the firm an interest in the business. It is now in the hands of the third generation.

Millinery houses here are preparing for the spring openings, which are to take place on March 29th and 30th, two weeks earlier than usual.

Halifax people have been enjoying cheap and luscious fruit during the past few weeks. A Halifax commission dealer made the experiment of bringing two schooners full of fruit, stowed in bulk on numerous temporary decks built in the holds. The schooners made the trip from the Bahamas in ten and seventeen days, respectively, and a great part of the fruit was landed here in good condition. The oranges were sold at the wharf at $1.25 per hundred. This is of interest, as it is the first time that a Canadian port has received shipments of oranges in this way. It is the intention of the present experimenter to bring in fruit by chartered steamers next fall in the same manner.

There has been a heavy blockade of export freight here, particularly goods bound to the West Indies, and there is much piled up all along the I.C.R.

Operations at the Londonderry Iron Works are a little dull at present. The blast furnace has been "blown out" in order to reline it, and it may be the first of May before smelting is resumed. The pipe foundry has also been shut down, but work there and at the coal-washer and coke ovens will probably be resumed shortly.

Captain J. A. Farquhar, of Halifax, has floated a company for the erection of a steel dockyard at North Sydney, capitalized at $250,000. The Dominion Government gives a subsidy of 2½ per cent. of the capital invested.

E. S. Blackie, chemist, proposes to establish at Halifax a plant for the manufacture of wood alcohol, acetate of lime, creosote, and other hardwood by-products. He is negotiating with the Standard Chemical Company, of Toronto, with a view to inducing them to take an interest in the matter.

Failures in this Province during February show an increase over those of last year. Liabilities were $72,100 as compared with $67,000 in the previous year. Assets amounted to $32,500 as compared with $22,300 in last February's failures. The figures in Prince Edward Island are less favorable, being four failures, with liabilities of $67,000, compared with one last year, with liabilities of only $4,000. These figures would probably be worse were it not for the fact that the banks as well as the wholesale people have been particularly accommodating owing to the extraordinary conditions prevailing during most of that month.

Halifax, 20th March, 1905.

* * *

NOVA SCOTIA STEEL COMPANY.

The annual statement of the Nova Scotia Steel and Coal Company, which was issued a few days ago, shows that profits for the year 1904 were $501,337, while the balance brought forward from last year was $685,642, making a total at the credit of profit and loss on December 31st last of $1,186,979. The balance carried forward at credit of the profit and loss account on the 1st of January, 1905, is $695,749, as compared with the sum of $685,642 on the 1st of January, 1904. The volume of general business transacted by the company during the past year did not differ greatly from that of 1903. The quantity of coal mined was considerably greater, the company easily maintaining its position as the second largest producer of coal in Nova Scotia. Following out the policy previously announced, the tonnage of iron ore sold was reduced during the year, the decrease from the previous year being 156,000 tons. Owing to severe depression in the iron and steel trades throughout the United States and European markets during last year, prices obtained for the company's output of these products were much less than during 1903, the difference in the amount of net profit realized on tonnage sold being, in round figures, $180,000. Since the turn of the year, however, prices have materially advanced and consumption largely increased. The regular dividend of 8 per cent. per annum on preferred shares has been paid quarterly, and a dividend of 3 per cent. on the common shares for the first half of 1904 was paid on October 15. A regular quarterly dividend of 2 per cent. on preferred shares for the first quarter of 1905 has been declared payable on the 15th of April next to shareholders of record on March 31st, 1905. With reference to the dividend on common stock, the following is an excerpt from the annual report:

In view of the earnings of the last half-year being somewhat smaller than anticipated, and of the large amount of working capital now required by reason of the increased business of the company, the directors believe the interests of the shareholders will be best conserved by husbanding the resources of the company, particularly as the proceeds of the last securities disposed of have not yet become productive, and for these reasons, they do not recommend the payment of any further dividend on the common stock for the past year.

* * *

METROPOLITAN LIFE INSURANCE CO.

Fancy, if you can, a company with more than eight million policies in force. These are largely, of course, industrial policies; they represent a total insurance in force of $1,470,000,000, fourteen hundred and seventy millions of dollars. The company's new insurance written in the year 1904 was $305,258,155 in the industrial department, and $131,312,194 in the ordinary life, a total of $436,570,349. Taking ten-year periods, the income, assets, and surplus of this remarkable company were, at December 31st, as in the table which follows:

Year.	Income.	Assets.	Surplus.
1884	$2,915,937 86	$2,304,004 87	$613,120 25
1894	18,208,742 75	22,326,622 16	4,034,028 21
1904	55,985,756 91	128,094,315 24	14,835,219 99

This is very noteworthy progress. It implies a steadfastness of management and a growth in popularity which may well challenge attention. In one year, 1904, the company paid to policyholders $16,559,494. And it has paid to policyholders since organization, plus the amount now invested for their security, $277,290,466. The growth of assets and of surplus shows increased prosperity and strength. Nowhere else, probably, than in the United States could such results have been achieved.

* * *

TRAVELERS INSURANCE COMPANY.

This well-known company has a flattering exhibit for 1904. It has added $1,385,000 to its cash income, $4,351,000 to its assets, $606,000 to its surplus to policy-holders, and $3,788,000 to its reserves, as results of last year's operations. The life insurance in force is increased by $12,316,424. The new paid-for insurance in 1904 was nearly $20,600,000, and the company had at the close of the year $145,077,000 of life insurance in force, while its assets are $44,457,000, of which over five and three-quarter million dollars are surplus funds. The Travelers has a proud record. In forty-one years it is able to show $59,000,000 paid out to policy-holders. Reviewing the year, President Dunham says: "In financial strength, in the improvement of methods, in the greater value and efficiency of service, and in the volume and character of its business, the record is one of marked and consistent progress along lines most beneficial to the company's patrons, and encouraging to those charged with the administration of its affairs."

PROVIDENT SAVINGS LIFE.

The thirtieth annual statement of the Provident Savings Life shows that it made progress last year, and has enhanced its already good financial condition. Increases are shown in income assets, premium receipts, net surplus and reserve. At the end of last year the assets amounted to $8,037,404, and a net reserve is shown of $6,951,961. The company now has 44,817 policies in force, assuring $101,189,448. During 1904 the returns to policy-holders exceeded those of any previous year in the society's history. On the first day of the year there was not a single death claim due and unpaid.

* * *

BRIDGETOWN, N.S., BOARD OF TRADE.

The annual meeting of the Board of Trade of Bridgetown, N.S., was held recently, when the following officers were elected: President, O. T. Daniels; vice-president, L. D. Shaffner; sec.-treasurer, F. F. Fay. Council, W. P. Coade, J. W. Beckwith, W. J. Hoyt, J. E. Lloyd, John Ervin, E. L. Fisher, W. A. Craig, W. D. Lockett.

* * *

A CURIOUS CONDITION IN AMHERST.

The hotels of Amherst, Nova Scotia, announce that they have closed their doors to the public, because they cannot exist without selling liquor, and continuous prosecutions and fines for so doing leave them no chance to conduct their business in peace. Private citizens of that place, we are told, have thrown open their houses to the travelling public, and there is no lack of accommodation. Complaint has long been general about the quality of the Amherst hotels, and it is expected that the present difficulty will result in a new and modern house being built and conducted there. Surely there is room. Amherst is a place of nearly 7,000 inhabitants, and it must be unbearable to be without livable hotels at this time of day.

* * *

BANKING AND FINANCIAL.

It is stated that another issue of 3 per cent. Grand Trunk Pacific stock, guaranteed by the Dominion Government, to cover a large part of the sum required for building the line from Winnipeg to the Pacific Coast, will shortly be presented before the London public.

A large block of shares of the Montreal Light, Heat and Power Company has been sold to a syndicate of English capitalists, the price being, it is said, in the neighborhood of $2,000,000. We understand that the stock is to be listed on the London Stock Exchange.

We note that the Swansea (Wales) Library Committee has ordered horse-racing news to be "blacked out" in the newspapers in its reading-room, and that it has refused to treat Stock Exchange intelligence in the same way, though it was petitioned to do so on the ground that "more lives are ruined by gambling in shares than in horse-racing."

The Bank of Toronto is to have a branch in Winnipeg. A desirable plot of ground has been secured on Main street, not far from Bannatyne street, and suitable premises will be prepared soon. The price paid for the lot secured is very far from the inordinate figures which some writer for the press has mentioned.

It is not yet ten years since a banking contributor to this journal used the following language, [Ex-Director, Monetary Times 19th July, 1895.]—"Among the thirty-eight Canadian banks, however, there are eight or nine small local banks which should be amalgamated with stronger banks and converted into branches, even if legislation to compel it be necessary." While this was in type, and before it was printed, La Banque du Peuple had suspended, thus emphasizing what "Ex-Director" had said.

The United States Consul at Birmingham, Mr. Halstead, tells his department of a "motor-car savings bank," which makes journeys in the north of France, stopping in villages on stated days to receive such sums as thrifty country people, having saved, may be desirous of depositing in a savings bank. The motor-car, which is electrically driven, carries a small safe, a desk with folding shelves for the depositors, with accommodations for two clerks and a cashier and a seat for the driver.

The official account of the town of Yarmouth, which had been carried by the defunct Bank of Yarmouth, now suspended, has been given to the Bank of Montreal on tender. The tenders were, our correspondent tells us, as follows: Bank of Montreal—Interest on minimum monthly debit balance at 3 per cent. and to charge 4½ per cent. on overdrafts. Bank of Nova Scotia—Interest at 3 per cent. on sinking fund and 2¼ per cent. on minimum daily credit balances on open account, and charge interest at 4¾ per cent. on maximum debit balances. Union Bank—Interest on daily credit balances at 3 per cent. and charge 5 per cent. on debit balances.

A despatch of Tuesday last from Kingston states that local depositors of the Ontario Building and Investment Society of that city have been notified to withdraw their deposits. Toronto shareholders succeeded in getting control at the meeting on the 15th, it is said, but Justice Britton, one of the directors, took legal proceedings to prevent the transfer. The company's capital stock is $250,000; its mortgage loans, $281,644, and it had $274,000 in deposits. The concern, which now aims to control it, is, we are told, the Colonial Investment and Loan Company, of Toronto, J. H. Mitchell, secretary.

The Canadian General Electric Company propose to increase their capital stock by $900,000, or, at the rate of one new share to each three shares of old stock. At the annual meeting this week, it was stated that the business of the company during the first two months of the current year had been the largest in the company's history. Between January 1st and March 5th, contracts were closed by the electrical department to the amount of $1,007,000, and $381,000 by the foundry department. The profits for the past year amounted to $582,519.60, as against $512,210 for 1904. After paying dividends amounting in the aggregate to $392,763.52, the sum of $113,612.37 has been written off for depreciation, $75,000 transferred to reserve, and $1,143.71 added to the credit of profit and loss account, which now stands at $81,913.42.

Says the Bankers' Magazine for March: "The House of Representatives, in the closing hours of the recent session of Congress, passed a measure to pay $190,000 to members of Congress for mileage which was supposed to be due them for attending the session following the 'constructive recess' of December, 1903. Of course, as they made no journeys to or from their homes, they were not justly entitled to this money. The item was stricken out by the Senate, so the people will not have to pay it. But the passage of the measure by the House was a regrettable exhibition of blunted moral sense." The average United States Congressman is very practical. To call this transaction by the least offensive name, it is a striking example of enlightened selfishness.

We find in the March issue of Dickerman's Detector a statement showing that the Banco Nacional de Cuba has made a very rapid growth of late. The resources, as reported semi-annually in the last four years, were:

	June 30.	Dec. 31.
1901	$3,600,000	$5,300,000
1902	5,400,000	6,200,000
1903	6,700,000	7,400,000
1904	9,100,000	12,840,000

On December 31st the deposits were $9,455,585. The capital is $3,000,000, and reserve $250,000. The head office is at Havana, and it has branches at Santiago, Cienfuegos, Matanzes, Cardenas, Manzanillo, Sagua La Grande.

⁂

—Our Halifax correspondent tells us that a delegation from the Board of Trade and City Council left that city on Monday, 20th inst., for Ottawa, where they will meet similar delegations from Ontario and British Columbia, and jointly interview the Government regarding the granting of a bonus on a tonnage basis to promote the building of steel ships in Canada. The conference is probably still going on.

SUN LIFE ASSURANCE COMPANY OF CANADA.

The exhibit made by this company of the business of 1904, and the increases effected in various items thereof over 1903, shows that it has made progress in no unstinted manner. The cash income for last year was $4,561,936, as compared with $3,986,139 in the previous year. And the assurances issued and paid for in cash last year were $15,911,904, as compared with $14,167,205 in the preceding twelve months. Insurance in force has reached large figures, being now $85,327,663, a gain of nearly $10,000,000 over the previous year. The company now has assets of $17,851,761, an increase of $2,345,984, and a surplus of $1,279,446, increased from $1,001,382 at the close of the preceding year.

This surplus is calculated on the company's standard, the Hm. Table at 4 per cent. and 3½ per cent. By the Government standard the surplus is much greater. Payments to policyholders in 1904 amounted in all to $1,491,284, of which $117,238 was in shape of profits. The whole statement exhibits a progressive business, but perhaps the table showing the leaps made in the eight-year periods, affords the most striking illustration. Since 1880, when the income was at the modest figure of $141,000, it advanced to $525,273 in 1888, to $1,886,258 in 1896, and to the extraordinary figure of $4,561,000 in 1904. Similarly, the net assets, which were a million and a half in 1888, were over six millions in 1896, approached eighteen millions in 1904. The Sun's business is a widespread one, including various countries of the world, and though it is not yet an old company, it has made wonderful headway, adding yearly to its resources and its strength and assisting to spread the name and fame of the Dominion wherever it transacts business.

⁂

INSURANCE MATTERS.

The Royal-Victoria Life shows, at the end of last year, $4,204,000 of insurance in force. The company has accumulated assets of $444,000, over and above capital. Its deposit with the Government at Ottawa for the protection of policyholders is $250,000 at par value or $268,000 at market value.

The annual meeting of the Avon Insurance Company of Windsor, N.S., was held on the 14th inst. All the officers were re-elected. A dividend of twenty per cent. was declared. When wooden shipbuilding was actively carried on in Hants and King's Counties, Nova Scotia, about twenty years ago, this company paid as high as 45 per cent. dividend. Since the decline of the industry, business has gradually decreased, and soon the company will pass away from sheer lack of occupation.

The Great West Life has gone the right way to work to widen its business by seeking, as it does by advertisement, for experienced solicitors and inspectors. Many an agent, who has been working up a risk, or a half-dozen of risks, which he cannot quite get "up to the scratch," may be enabled to clinch them if he has the assistance of a travelling inspector, who is up in the principles as well as the practice of life assurance writing.

We learn from an American exchange that a preliminary agreement looking to the adoption of uniform rates, practices and policies in the writing of bank burglary insurance has been signed by representatives of the following named companies: Fidelity and Casualty, Maryland Casualty, New Amsterdam Casualty, Ocean Accident and Guarantee, National Surety, Aetna Indemnity and the United States Fidelity and Guaranty. A meeting of the interested parties is to be held at New York City, when the proposition will be generally discussed and a committee or committees appointed to draft details.

The Continental Record has an encouraging paragraph as to the opening afforded by the insurance field to young men of the right spirit. Here is an extract. Speaking of new agents: "Many of these new agents are young men. To these we wish to say emphatically that there is no business in the world that offers any better attractions for a young man than the soliciting of insurance. It takes all the qualities of a successful salesman, and at the same time leaves him strictly independent. No other business ever offered such an opportunity for a man to make the most of himself, and in no other business does it depend so much upon the man himself as in the writing of insurance."

TRADE NOTES.

The experiment is to be tried by the Wallaceburg sugar factory of importing Trinidad raw sugar and refining it during the period when beets cannot be obtained, which is only for a few months each year.

The Battle Creek Health Food Company, Limited, capital, $30,000, head office, Toronto, has a charter from the Ontario Government authorizing it to manufacture and sell cereal foods and coffees, infants' specialties, etc. Harrison Powell, A. J. Van Nostrand, and others, of Toronto, are provisional directors.

We hear from Montreal that a large block of stock in the Lake of the Woods Milling Company has passed into the hands of a syndicate in which Montreal and Toronto capital is interested. The stock referred to formerly belonged to Mr. David Russell. The directorate will be reorganized, but Messrs. Robert Meighen, R. Reford, Thomas Fysche and Senator Mackay will remain. Mr. Meighen, it is believed, will continue to act as president of the newly-organized company.

⁂

—The president of the Sault Ste. Marie Board of Trade is Mr. J. H. D. Brown, and the secretary Mr. J. B. Way.

—A deputation containing, it is said, no fewer than 600 business men waited on the Dominion Government on the 10th inst. to urge the latter to take steps to abolish the trading-stamp and coupon systems, which they represented to be frauds on the public, as well as a gross injustice to the retail merchants of the country. It was urged that the business was really a disguised lottery, and was, therefore, in direct violation of law.

—We learn that Mr. Albert J. Ralston, manager of the Ontario branch of the Great Life Assurance Company, has been appointed general manager of the National Life, and assumed his duties as such on Monday last. Mr. Ralston's record in the Great West Life's service was a good one. He had been with that company for ten years; first as an agent, next as inspector, then manager for New Brunswick, at St. John, and finally Ontario manager at Toronto. He is well equipped for his new post, we understand, and may be expected to infuse new energy into the affairs of the National.

⁂

—New Brunswick lumbermen are protesting against the proposed action of lumbermen in the United States to construct a dam across the St. John river at the international boundary at Edmundston. The latter want the dam in order to get sufficient depth of water to collect their logs in the State of Maine and manufacture them there, instead of sending them down to St. John, there to be sawn and shipped in bond to the United States. The Canadian lumbermen in the St. John river claim, however, that the dam will be an obstruction to navigation, and as such a violation of the Ashburton treaty. They also oppose the construction of the dam as contrary to the public interests, and an encroachment on vested interests established under the treaty.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, March 23rd, 1905, as compared with those of the previous week:

	March 23.	March 17.
Montreal	$27,854,872	$25,789,565
Toronto	19,013,537	18,535,695
Winnipeg	4,817,833	5,396,844
Halifax	1,720,383	1,557,946
Hamilton	1,316,583	1,065,028
St. John	884,532	871,097
Vancouver	1,492,910	1,380,545
Victoria	680,123	788,786
Ottawa	1,291,975	1,622,911
Quebec	2,157,078	2,191,110
London	824,782	867,005
Total	$62,054,608	$60,066,532

OLD-TIME LAKE CRAFT.

After the references last week to earlier steamers on the Great Lakes it may now be found of interest to recall the sailing craft of an earlier day. The sailing fleet of 1850 and thereabout was composed of canal-sized vessels, fore-and-aft schooners or "three-and-afters," carrying 12,000 to 18,000 bushels of grain. When a dozen years had passed and the rapidly-settling prairie lands of the Western States were pouring their crops into Chicago and Milwaukee harbors, the average size of lake vessels increased, as did their symmetry and the variety of their rig, until about 1865 or 1870 the writer remembers the sensation caused by the advent of the "Cream City," a Milwaukee three-master, capable of carrying 72,000 bushels of grain, at that time a phenomenal cargo. It was in the 'sixties, by the way, that the first schooner sailed from Chicago for Liverpool, the "Golden Harvest," laden with wheat, followed shortly by another with an equally fanciful name, and alike decorated with flags and streamers as she came gaily down the River Detroit. But these had been anticipated, if I mistake not, by the schooners "Thomas F. Park" and "E. S. Adams," which were despatched by their owner, the late John MacLeod, M.P. for Essex, laden with grain and timber respectively, and destined for an English port, to bring back thence salt and other merchandise. These lengthy voyages, however, did not pay, and were abandoned after brief trial. The commander of the first-named of the above Canadian vessels, Captain John Duncanson, died in Amherstburg only last month, aged over seventy. Much did the Old Country salts of that day marvel at the daring of navigators who would bring a vessel from the interior of "America" to the Mersey or the Clyde drawing only nine or ten feet water. "It was tempting Providence," they said.

The condition of the rivers St. Clair and Detroit in those days, parts of whose channels afforded no more than nine to ten feet water, precluded, however, deeper draught vessels. Years were to pass before Uncle Sam expended his millions on the Limekiln Crossing and the Flats Canal and the Sault River to make a uniform twenty-foot channel, or before Johnnie Canuck deepened the St. Lawrence canals to fourteen feet on the mitre sill or the Welland to the same. Meanwhile, the designers of the lake ports were using their skill in design to produce ships that should combine carrying capacity with speed. The ship-builders on the New York side of Lake Erie had especial repute as modelling swift sailers. The shipyards at Dunkirk, Conneaut, Lorain, Ashtabula, Sandusky, turned out sailing vessels that would run away, having the wind "free," from those built at Buffalo or Detroit. They were sharper in the bows, cleaner in the "run," and for the most part with greater "shear," which gave them a more alert and graceful look. And it must be confessed that the sailing craft constructed on the Canadian side of the lakes, certain vessels from Kingston, perhaps, excepted, however strong and seaworthy they proved, were of the bluff-bowed, straight-railed order, not comparable in swiftness or marine beauty with their American sisters. It was possible for an accustomed observer to say, as it was long afterward said of steam craft, when a vessel hove in sight miles away: "Here comes a lower-laker, boys; and from the lower side of the lake, too. Look at her hollow bows and her shear."

What a sight it was to see the grain fleet coming up Lake Erie in the early spring, bound for the Lake Michigan ports to load with yellow wheat! A yacht race on a grand scale—a contest in seamanship and finesse—a struggle for position and the chance of first cargo at good freight rates when the distant western port should be reached. "First come, first served." If the "White Cloud" proved the swiftest on the voyage from Buffalo to Chicago, light, the chances were that she would prove the swiftest sailer on the succeeding down trip, loaded. With what delight we boys used to watch the fleet, long becalmed, or by reason of adverse wind compelled to anchor off Bar Point, presently get under way with a south-east wind. Then would we set ourselves

> "To watch the swelling sail
> Spreading fast before the gale—
> Spreading fast without a wrinkle or a fold."

Having set sail in the glittering sunlight, forward they would press in an eager cluster to enter the mouth of Detroit river, then narrower than it is to-day, under a brisk south-east breeze, their captains jockeying, freeing the sheet or hauling close to escape collision, grounding sometimes on the flats below Bois Blanc lighthouse, carrying away bowsprit or top-hamper, running ashore in the eastern bay through lack of sea-room, cheering, cursing, or jeering each other at the success or failure of a manœuvre, striving to get into the freer reaches of the river beyond the Fort so that they could set every stitch of sail for Detroit and Lake St. Clair.

If the subject did not border so closely upon the improper, one might dilate upon the style of profanity then current among mates and captains. I can truthfully pronounce their expletives not only fervid but original. For anything like them one must go back to the pages of "Tom Cringle's Log," or to Mark Twain's more recent "Old Times on the Mississippi." They had, as Kipling somewhere says, describing East Indian swearing, "a blistering, biting appropriateness." Heard from a raging and gesticulating figure on a lake schooner's deck, the cursing of the early Civil War period was horribly ingenious; often expressly technical; always intense.

And what splendid specimens of the ship-builders' art were there: the long, graceful three-master, square rigged on the foremast, and with studding sails hoisted when she got clear of the ruck; the smaller brig, more easily handled in the fight; the dainty schooner, masts close together, gaff topsails, jibs, stay-sails, all drawing. Some painted white, with a gold band below the scuppers; some green, or claret brown; one or two black, with white streak or imitation portholes at her bulwarks. In any close-hauled contest of naval wits the handy fore-and-afters had the *pas;* brigantines and barques, while comely, were cumbersome to handle, and could not lie so close to the wind. When opposite Fort Malden, and nearing the Limekiln rock, which it has since cost millions to blast away to a twenty foot depth, up would go the flag of the winning vessel, or, perhaps, a broom at her masthead in token of victory. And the cheers of her victorious crew would be answered by the cheers of a group of us youngsters on the Canadian bank, who had been wagering their wealth in marbles on the respective favorites among the fleet.

Nothing in the latter-day procession of great steel freight boats along that marvellous strait of the Detroit can equal in brightness and interest to our eyes the array of white-winged floating craft which in those days exemplified seamanship on the Great Lakes. To picturesqueness and grace has succeeded stolid, niggard, carrying capacity—smoke-belching funnels by day, lugubrious whistles, range lights and green or red signals by night. It makes one want to paraphrase Edmund Burke, and say: "The age of [marine] chivalry is gone! That of economists and calculators has succeeded."

Toronto, 12th March, 1905. J. H.

⁂

SOUTHAMPTON, ONT.

When mentioning last week the Board of Trade of Southampton, we had it in mind to notice some of the attractions of that place to visitors in search of health and recreation. We take pleasure in doing so now. The town is situate on the banks of Lake Huron, whose cool breezes temper the hot weather of summer; it is at the mouth of the Saugeen, which is called the longest river in Ontario, where there is an abundance of bass and gamey fish, excellent boating and bathing in the harbor. The Board of Trade circular says that the roads for bicycles and other vehicles are unsurpassed, all roads being free and kept in repair by the county. A two-horse carriage and driver costs $3 per day. There are very fair hotels, with rates of $7 to $10 per week. Regular steamboats plying from Sandusky, Ohio, Detroit and Windsor to the Soo call at this port. Steam and sailing craft can be chartered on reasonable terms by excursion parties to visit the island-dotted shore of the far-famed Bruce Peninsula. Small skiffs also. There is a mineral magnetic spring, the waters of which are spouting

from a depth of sixteen hundred feet, bottled, and used by invalids throughout the Dominion. A commodious bath-house in connection. Situated only a short distance from Lakeside Park. The town has telegraph and telephone connection and electric light. The town hall holds 600 persons, and there are numerous churches, and the town library has 3,000 volumes. Cottages abound, placed in shady groves of spruce and pine, but there are no black flies and very few mosquitoes, if any.

PRACTICAL TRAINING.

"A wonderful place, I call it." Such was the conclusion of a lady who had spent a day at the Ontario Agricultural College, near Guelph, and had been shown the workings of classes at the Macdonald Institute, in affiliation with that college. Her description of some of the classes in Domestic Science (she called it plain "Housekeeping," and we prefer the word) were so interesting that we shall try and repeat them, using her language. For it is of importance that Canadians should get away from the notion that this teaching is too high and too scientific for the common people. It is especially intended *for* the common people, so-called, who are, after all, those whose instruction is sought in things necessary to their health and comfort.

"Well, to begin with, take potatoes. A lot of them were on a table. Some were to be baked with their jackets on; some were to be boiled; some to be raced or fried. On the blackboard was a sketch of the ingredients of a potato—so much water, so much starch, etc. Every woman in the class learned this lesson. Each potato had to be washed *clean*, the eyes taken out where necessary, and the preparation and cooking went on. Each process was watched by the instructor—the peeling had to be done with care. Some people may think there is nothing to be learned about cleaning and cooking potatoes—but there is.

"In another room sewing and mending of cloth was taught. It was explained to the class where cotton grew and how the fibre was treated; where wool was mostly produced, the different kinds of it, and the methods of woolen manufacture. Seaming and darning were done: one woman being set to stitch a rent in a fabric, another to darn a round or square hole purposely cut. And to watch the efforts of some to darn and to over-run a seam (persons old enough to have long ago learned to do these elementary things) was very, very curious.

"How to keep a house clean and tidy is taught. Not a few seemed to think that the instructors were needlessly particular about this; but strictness or the reverse makes all the difference between good housekeeping and bad. Sweeping floors and scrubbing them—washing and scouring pots and pans—cleaning a stove or a range—dusting (which is a thing so much neglected)—the proper washing of paint --the way to wash windows and dry them clean. These and all other things that a maid would have to do in kitchen or parlor were taught at the Institute, and not only taught, but demonstrated practically by the learners.

"As to cooking, not only the how was learned, but the why of the how. For instance, they were making marmalade on the day I was there. In some cases the scum which arises on the boiling of the oranges turned green, in others it was the natural color. Proceedings were stopped to find out what was wrong. Comparing notes, it was found that some of the scholars had used beet root sugar. This not proving to be of a proper whiteness, the manufacturers had put blueing into it. This it was which caused the greenness of the scum; and here was where thoroughness and a knowledge of the chemistry of the subject came into play.

"Attention to dress is one of the things that stress is laid on. Each woman, young or elderly, must wear a white apron, and the uniform of the members of such classes is blue. There is no time or place for ornaments or fancy dressings of the hair while at work. People are there for serious business—the learning of a trade, so to speak: how to do things, and why to do them thus and so. All who take part are 'working women' for the time being."

The Monetary Times is especially pleased to receive at this time practical testimony to the value of the Macdonald Institute training, for Sir William Macdonald is putting forward and financing another scheme on a great scale for promoting education, more particularly in the Province of Quebec, but of a distinctively Protestant character. The scheme will, it is said, involve the outlay of over two million dollars. It provides for the building of a normal school in connection with the Teachers' College and College of Agriculture at Ste. Anne's, near Montreal; will give material help to consolidated schools and large benefactions to help schools in poor communities. It is intended to aid in the introduction into schools of nature study, domestic science, and manual training. It is understood that the agricultural college with which the training school is to be associated will occupy 800 acres of land on the Island of Montreal, and within fifteen or twenty miles of the city. It is intended that the institution shall be one of the best in America, and it is likely to attract students from all parts of the Dominion. Such an enterprise as this is one to which wealth may be devoted with reasonable hope of benefit to not only children, but grown-up people. Sir William Macdonald must be a happy man in witnessing the blessings that may be brought to many households by the wise use of money on a large scale.

ANSWERS TO ENQUIRERS.

S. B., Lewiston, Penn.—"Can you give us the name or names of any insurance company or companies doing business in Pennsylvania not in any underwriters' association? We will be pleased to reciprocate the favor whenever we can be of use to you."—[Cannot say definitely what Canadian companies are doing business in Pennsylvania, but the Anglo-American, the Equity, and the Independent, all Toronto companies, are understood to be writing surplus lines in the United States through P. B. Armstrong & Son, of New York City.]

G. M. R., Cleveland, Ohio.—Have written you, suggesting a Toronto name; Montreal ones will follow later.

Agent, Winnipeg, asks the following questions: "I notice in your issue of the 10th inst. an item stating that the Sovereign Fire Assurance Company has been granted incorporation with a capital of $2,000,000. Would you be good enough to furnish me with the name of the manager of this company and its address; also whether the company intends to operate as a board company or a non-tariff one?" [Answer—So far as we can learn, no manager has yet been appointed. The company is hardly in a position to transact fire insurance yet, but will, of course, try to float its stock first. It is understood that the group of persons who are behind the proposal are largely the same as those who are officers and directors of the Sovereign Life Assurance Company, viz., A. H. Hoover, president; three vice-presidents—one, Senator Edwards, of Ottawa, the others, Wm. Dineen, of Toronto, and Thomas Baker; treasurer, Robt. E. Menzie. Ordinary directors, A. F. Webster, John T. Hornibrook, E. E. Sheppard, J. B. King, all of Toronto; Judge Finkle, of Woodstock; James Dixon, W. M. German, K.C., M.P., of Welland; John McClelland, E. Guss Porter, K.C., M.P., of Belleville, and Stephen Noxon. They are to form a non-tariff company.]

T. B., London.—We have heard of the appointment, but have seen no authoritative definition of the duties of the post. In the Standard Dictionary, Commercial Agent is defined thus: "A person residing abroad and exercising quasi-consular authority under Government appointment."

Gorgon Graham, Barrie.—The difference between the wine gallon and the Imperial gallon is that the first is equal to 3.785 litres, and the latter to 4.541 litres. The litre is 61 cubic inches.

* * *

THE WEATHER DOWN EAST.

Editor Monetary Times:

Sir,—The valued "Times" of about 25th January reached me in (over)due course on the 4th March. As for the February and March issues of the "Monetary," they are still on the road.

The writer was on a train last month that was fifteen hours going fifteen miles in parts of two days. I was stormbound for ten days in Summerside, twenty-seven days in O'Leary, north of Summerside, on this island. The train from Tignish to Charlottetown, 105 miles, arrived at the latter place thirteen days late. Another train, bound from Charlottetown to Summerside, forty-nine miles, was ten days on the road.

The railroad was banked with drifts of snow ten to twenty feet deep, and the track had to be shovelled for miles; so you see that islanders have been compelled to obey the Honorable Minister of Railways' injunction to turn out and shovel snow.

The winter steamers "Minto" and "Stanley" got to within two miles of each other in the straits a week ago and transferred mails and passengers. It is now forty-five days since a regular crossing was made from Picton to Georgetown by steamer.

Yours respectfully,
HENRY F. COOMBS.

Charlottetown, P.E.I., 10th March, 1905.

* * *

SOME THINGS TO REMEMBER.

The town of Aalesund is a seaport of Norway, a shipping place on the west coast, and a station of the herring fishery. Fire broke out there at 12 o'clock, midnight, on January 23rd, 1904, in a frame building roofed with tiles, occupied as a fish-preserving factory. The temperature was moderate and the air moist, but a gale of wind was blowing from the north-west, and embers were carried to another building about 120 feet distant, also of wooden construction, although roofed with tiles, and from thence to other structures, until nearly every building in the town was burned, between 800 and 900 being consumed, and only 90 houses left standing. There were but nine of the buildings in this town of brick construction, but the roofing was almost exclusively of tile. It is said that the sparks were blown by the wind and lodged in the bent tiles.

A system of waterworks existed in the town, sufficient only for domestic supply, also one steam fire engine and two hand engines. There was some difficulty or delay about the alarm, and the brigade was late in arriving. The flames got very quickly beyond control. The loss was four millions of dollars.

This conflagration is of particular interest in that nearly the whole of the loss it caused fell upon a Government or municipal insurance scheme, the slender finances of which, of course, were completely swamped and the Government of Norway had to come to the assistance of the town (of 12,000 people), and issue bonds to raise money to pay the losses sustained by the policyholders.

On the 27th June, 1902, at half-past ten at night, fire was discovered in the City Chambers, on Grave St., Cape Town, South Africa, a building three stories high, occupied by two small stores on the first floor, with offices above, its dimensions only about 40 by 60 feet. When the brigade arrived the upper floors were burning fiercely, and in a few minutes the fire spread across a narrow passage into the large retail dry goods store of Fletcher & Co., which extended from Longmarket to Darling St., at right angles to the City Chambers. As soon as it got into this building, which was 175 ft. long and 60 ft. wide, and was open from end to end and from floor to floor, with several skylights in the roof, it got completely beyond the control of the brigade, spreading across Longmarket St. and destroying four buildings in that direction, in addition to damaging several adjoining buildings. It also destroyed the South African Mutual Building on Grave St., and damaged the Standard Bank Building, across Darling St. This blaze caused a loss to property of more than two million dollars.. The area covered by burned buildings was about two acres, while there were heavy damages to adjacent properties.

It may be noted that the wholesale grocery warehouse of J. D. Cartwright & Co. and the wholesale drug house of Haynes, Matthew & Co., which adjoined the Fletcher & Co. store upon the west, were protected by automatic sprinklers and had also stand-pipes and hose. The record is that fire entered through the windows and also through the roof, but the private fire appliances were sufficient to extinguish them, and the fire was thereby prevented from extending in that direction.

In a publication just received from the British Fire Prevention Committee, No. 11, of the special subject series, there are notes on page 63 in regard to the warehouses erected upon the site of those destroyed by the Antwerp fire, by which it would seem that although at first sight the risks are of exceedingly good construction, being divided into compartments by walls and floors of fire resistive construction, they have permitted the installation of several elevators which cut through the floors of the compartments, the elevators being enclosed in thin, although incombustible partitions, with very large door openings protected by light iron doors of poor construction, which do not close properly; while in addition a number of openings about nine inches in diameter have been left in the concrete floors, for what purpose is not apparent. It is pointed out that such openings would allow of the rapid spread of fire and lead to much damage by water.

This is interesting, because insurance men so frequently find after a great deal of money has been spent to accomplish the object of division of a risk, both vertically and horizontally, that careless workmen or unintelligent architects have practically destroyed the value of the effort by breaking through the floors and the partition walls, to the utter disregard of the purpose in the erection of the building.

* * *

PICTON BOARD OF TRADE.

A large meeting of prominent business men in Picton, Ont., took place on the 17th inst., and a Board of Trade was formed for that town. H. B. Bristol is president; D. J. Barker, vice-president; P. C. Mackie, secretary-treasurer, and there are already about 45 members.

* * *

BOARD OF TRADE MEMBERS.

Editor Monetary Times:

Sir,—I read your remarks in last week's Monetary Times about members of Boards of Trade. And you come down pretty heavy on members of the board or members of committees who do not attend meetings. But you ought to bear in mind that there is something to be said on the other side of the question. Once a month, I think, is too often to expect a storekeeper to attend Board of Trade meetings. And besides, what do we elect a president and a council for if they do not do the work? You must admit that a big meeting of members is no good to get through work, there is too much talking, for one thing.

I have been on the council of a board and have had my share of committee work, too, and I think it is too much to expect of a man to be on hand once a week, when he has other meetings to attend, and has his home, besides his business to look after. There are good presidents and secretaries and poor ones, and a good president is a good thing for such boards. But the secretary can very often save a man from a committee meeting if he will go and see him for a few minutes and tell him what is wanted and not haul him away to a meeting. I notice your Winnipeg man, writing a few weeks ago, said, about their Board of Trade meeting: "The fact is, this is such a busy community that it seems hard for many merchants to tear themselves away from their own business to attend to commercial interests in general."

May be this is not so busy a place as Winnipeg, but we are busy enough not to want to have too much of our time taken up in looking after other people's business.

I am, sir, yours,

One Who Has Been There.

Galt, 21st March, 1905.

* * *

GERMAN-AMERICAN INSURANCE CO.

This company, which has its headquarters in New York, and has agencies throughout Canada, makes an excellent showing for the year 1904. It received net premiums ot $5,326,000 in that year, as compared with $4,932,000 in the preceding twelve months. The assets, which were $12,074,000 at the close of 1903, were increased to $12,980,000 last December. And its surplus has been increased, in spite of the unfavorable fire-waste conditions of the conflagration year, from $5,633,000 at the end of 1903, to $5,841,000 at the end of last year. These are handsome gains. The company is a strong one; well conducted and carefully supervised in all its territory. Its reinsurance reserve, which was $4,012,000 at the close of 1903, was increased to $4,713,000 at the close of last year.

* * *

DRY GOODS.

Advices from Manchester, England, state that the feeling throughout the cotton districts is much more healthy in tone, and steady employment is expected for some time ahead, if raw material only remains at a reasonable level. The fact that China business in shirtings has been arranged for next summer shows that over-sea buyers are in good heart, while the prospect of abundant work for spindles and looms ensures for home trade houses a steady flow of orders from the cotton districts. The distribution of fancy season's goods has certainly not been below the average in the principal textile districts, although complaints are made as to the turnover in the Midlands.

There has been little change in the Belfast linen market lately, Demand is steadily maintained, the turnover is not unsatisfactory, and prices are practically unaltered. Yarns have sold a little more freely, and as manufacturers have hardly any stocks, the deliveries are pressed for. Export trade continues to expand. There has been a further improvement in demand from the United States, and as the state of trade in that important market is reported to be very prosperous, it is anticipated orders for linens will show no falling off for some time. Demand from Canada is tending towards improvement, and there is a moderate business with Australasia. Trade with the Continent is hardly up to the mark.

A special correspondent of the Dry Goods Economist, speaking of the prevailing Paris fashions, mentions an excellent spring jacket, perfectly fitting and of the basquine order, the basques being from twelve to eighteen inches in length. It is made without collar and quite low around the throat. The trimming of this stylish little garment, of which the material is black taffeta on satin, is new and original, consisting of two bouillonnés of the material about two inches wide and bordered by two small rouleaux of the same on either side. The first of these bouillonnés entirely surrounds the jacket, also descending on either side of the front and passing round the neck; the second, placed rather more toward the side, starts from the shoulder and descends in the same manner, but ceases some inches above the edge of the basque, where it forms a point. The sleeve is very full and is caught in gathers in both inner and outer seams.

The Drapers' Record says that the demand for Bradford worsted yarns for the Continent is very quiet for the time being, but as soon as a definite basis of price is fixed for Colonial crossbred wool there will, no doubt, be an increase in the business offering in this department of the market. In the dress goods and general home trade distributing warehouse there has been a considerable expansion of business since the beginning of the month, and travellers in Lancashire and the coal and iron districts report that the prospects of this season's trade are much more promising than they have been for some time past. Very light shades in various styles of tweed and similar fabrics are still in good demand, both in good and medium-priced cloths. Some of the tweed makers report that their new styles for the next autumn season have already been well taken up. The returns of the exports from Bradford to the United States for the month of February compare extremely well with those of the corresponding month last year.

Although the market for raw silk, says a New York report, has been very quiet during the week, there has been no further evidence of weakness on the part of importers, nor is it expected that further developments will produce any lower level. The fact that there is a general belief that consumption must be enlarged, the very favorable business which is in progress with many manufacturers would seem to preclude the possibility of lower figures, at least until the new crop commences to arrive. Buyers have been endeavoring to secure low-priced silk of late, but their efforts have, as a rule, been unsuccessful, except on lines which are not regarded as being fully up to the market in standard. A good deal of inferior stuff has been shipped in, as is usually the case at the end of a crop season, and on this character of silk prices which look rather cheap have been made, but on first quality silk no concession is being made by local importers, and the latter seem to show an increased firmness in their attitude.

* * *

—The Dominion Marine Association will hold its annual meeting in a few days. The chief topic for discussion will probably be the question of "averages and shortages," and the shipowners will make a determined effort to shake off this long-standing grievance. As conditions are at present, a vessel may load at Fort William, receive the Government weighmaster's certificate for, say, 100,000 bushels. On reaching Owen Sound or Midland the grain may be weighed in 500 or 1,000 bushels short. The vessel owners, under present arrangements, must pay for this shortage, which in some instances exceeds the profits of the trip.

* * *

—By the last report of Mr. McLean to the Department of Trade and Commerce, at Ottawa, we gather that the imports of Canadian flour into Japan increased very sensibly in the last two years. For example, the Japanese imported only $11,677 worth of our flour in the year 1902, and $15,964 worth in the year before; but in 1903 their imports went up to a value of $95,399, and in 1904 to $106,203. One might think this was doing fairly well until he comes to read the imports of flour from the United States into Japan. These were in value $1,393,270; $1,621,887; $5,051,838; and $4,671,550 in the last four years, respectively.

* * *

—The disposition of the human race to-day towards less work and more play, less of simple economy of former years and more display and expenditure, is thus rebuked by Mr. J. Spencer Phillips, the president of the London Bankers' Institute: "The crying evil of the present day is the extravagance of the age; be it imperial, be it municipal, be it personal. On all sides this is increasing by a geometrical progression. Surely it is time, and more than time, to cry 'halt.' How much are we benefited, either as a nation or as individuals, by this excessive expenditure? and always with this extravagance comes an increasing desire for less work and more holidays. Has not the time come to take stock of our position, and seriously consider how long we can with prudence venture to go on living at the present rate?" One might have expected such language from a thoughtful observer in the United States, but when it comes from the more sedate Old Country, one is impelled to think that extravagance such as is here described is world wide.

TheSTANDARD TRUSTS COMPANY

J. T. GORDON, Esq., M.P.P., President.
WM. WHYTE Esq., 2nd Vice President C.P.R.
Vice President.

CORRESPONDENCE INVITED.

Mercantile Summary.

On demand an assignment has been made by Ernest L. W. Saunderson, of Montreal, doing business as the Montreal Belting Co. The amount of indebtedness is not yet ascertained.

Max Appel, in a small clothing and peddling way at Thetford Mines, Que., has made over his estate to the assignee. His liabilities are reported at about $1,800.

A St. James Street tailor in Montreal, Hugh Ross, whose account has been reported for some time as a dragging one, has now effected a compromise arrangement on liabilities stated at about $6,000.

In December last E. S. Sweet, carrying on a general business at Cross Roads, Country Harbor, N.S., was heard from as seeking a general extension, and he is now before his creditors with an offer of compromise at 30 cents on the dollar, cash. He has been in trade about twelve years, and six years ago obtained indulgence from creditors in the shape of an extension. His liabilities are figured at $6,000 or thereabout.

C. B. Fraser, who carried on a millinery and haberdashery store at Inverness, N.S., which was destroyed by fire in January last, has made an offer to his creditors of 33 per cent. cash on liabilities of $3,591.—An assignment has been made by A. B. Boomer, a young man of Great Village, N.S., who has been tinsmithing and peddling for the past year or two. His liabilities do not much exceed $1,000.

An offer of compromise at the rate of 50 cents on the dollar, cash, is made by L. N. Desrosiers, general merchant, of Sandy Bay, in Rimouski county, on the Gulf of St. Lawrence, who has been prominently in trade there for some thirty years. About the end of February he was heard of as asking an extension, but on the 6th inst. his premises were destroyed by fire, and it is reported he has insurance of only $5,000, while his stock amounted to something like $15,000. His liabilities are placed at $13,500, and he cannot possibly pay in full.

By supplementary letters patent of Ontario the capital stock of the Guelph Worsted Spinning Company, Limited, has been increased from $40,000 to $200,000 by the issue of 1,600 shares new stock of $100 each. A charter has also issued to Louis Bredannaz, Jules Bredannaz and Alphonse Bredannaz, machinists; James Millar Ewing, accountant, and Austin Gregory Ross, gentleman, all of Toronto, to make, sell and deal in woolen, cotton, textile, mill and other machinery and supplies therefor; also dye stuffs and all other mill supplies, and to do business as mechanical engineers, machinists' fitters, millwrights and founders, the corporate name of the company to be Toronto Woolen Machinery, Limited, $40,000 capital, head office to be in Toronto, and the provisional directors of the company to be the three Messieurs Bredannaz already mentioned.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

A letter from Barrie, dated 20th March, gives a very cheery account of the state of affairs in that Ontario town. Says the writer: "Business of all kinds is very good here. There is not a vacant store, nor is there an unoccupied dwelling to be had."

Mercantile Summary

For the past twenty-two years Leon Ferland, of St. Alexandre d'Iberville, Que., has carried on a small general store business in the Concessions, several miles from the village, at the same time cultivating a farm. He has hitherto paid his way in full, but is now reported as having assigned to a firm of Montreal accountants. Possibly his semi-pastoral, semi-mercantile life is now at an end, and he will have to be all farmer.

Arrangements have been made for the installation of electrical machinery to operate all the locks in the Lachine canal, and it is confidently expected that the entire new system will be in working order on the opening of navigation. Special power-houses have already been completed at Cote St. Paul, and steamers will be able to take advantage of the big saving in the time that will be effected. It is calculated that there will be a saving of slightly over five minutes at each lock. The improvements for the different canals around Montreal during the coming season will cost about $400,000.

The creditors of the insolvent boot and shoe firm of W. H. Redding & Sons, Yarmouth, was held on 18th March. The statement was substantially as follows: Liabilities, $525,000; assets, including real estate, factory, tannery, stock in hand, goods in process of manufacture, book debts, $74,000. The Bank of Yarmouth claim is for roundly about half a million dollars. W. E. Stavert, manager of the Bank of New Brunswick, and curator of the Bank of Yarmouth, was appointed joint assignee with the official assignee, and the meeting adjourned until the 4th of April. It was urged by Mr. Beal, of Ontario, one of the creditors, that efforts be made to have the factory continued, if any one could be got to take hold of it, and in this way enable the creditors to get back some of their money, directly and indirectly.

We receive from the estate of the Hon. J. Arthur Paquet, of Quebec, whose testamentary executors are the Hon. V. W. Larue, N.P., M.C.L., and Mr. G. A. Vandry, a circular of the following tenor: It is with the deepest regret that we have to announce to you the death of Mr. Zephirin Paquet, Sr., father of the late Senator J. Arthur Paquet, which occurred on Sunday, the 26th February, in this city, at the age of 86. As he had retired from the firm since 1898, his death does not cause any change in the business, which will be continued without interruption as heretofore, under the names and styles of Z. Paquet for the retail section and J. Arthur Paquet for the wholesale section. To his many friends in the trade especially we might say that we will work along the lines which he established so firmly, and to which are to be attributed so much of his well-deserved success. G. A. Vandry, general manager.

Mercantile Summary.

The Economic Construction Co., Toronto, propose to erect a gas plant in Sydney, C.B., at a cost of $60,000.

The Imperial Government invites Canadian contractors to tender for the work of deepening, widening and buoying St. George's Channel, Bermuda.

The Edmonton Board of Trade are enterprising enough to ask a grant of $2,500 from the city council to establish and operate an advertising bureau.

Gananoque, Ont., ratepayers have passed a by-law granting a loan of $15,000 and exemption from taxes to the Lampson Bolt Co.

A boiler explosion in a large shoe factory belonging to R. B. Grover & Co. at Brockton, Mass., wiped out some sixty lives on Monday last. The damage is estimated at about $200,000.

It is now stated by the promoters of the Hamilton, Ancaster and Brantford Railway that that project has been abandoned for the present, owing to the alleged insecurity of the concessions granted by the municipalities interested.

Baker's restaurant and one or two adjoining stores in Moose Jaw, Assa., were on the 20th inst. destroyed by fire at a loss of $8,500, mostly insured. On the same day Alex. Dobson's flour mill at Beaverton, Ont., was gutted, with some 20,000 bushels of wheat and flour. The total loss is figured at $40,000, with an insurance of $14,000.

The Committee on Railways has reported the bill incorporating the International Terminal and Bridge Company, composed of E. W. Backus, Minneapolis; John H. Stanton, Hamilton; R. A. Grant and Alex. McKenzie, Toronto, and Wm. Johnson, Ottawa, with a capital of $1,000,000, and head office in Toronto, to build a bridge over the Rainy River at Fort Frances.

The Ruggles-Coles Engineering Company, of New York, have ordered from the Robb Engineering Company a 350 horse-power Corliss engine and two 175 horse-power boilers for the cement works being built at Sydney, C.B. The latter company are also building a steam plant for the Munro Wire Works at New Glasgow, N.S., and one for the newly-organized Restigouche Lumber Co., which is putting in a large woodworking factory at Dalhousie, N.B.

A bill is before the Railway Committee of the House of Commons to grant extended powers to the Ottawa Railway Company, which purposes building a line from Georgian Bay through comparatively undeveloped country to London and Lake Erie. According to the bill it is proposed to start a branch of the new railway at Orillia, on Lake Simcoe. This branch will run south-west through Barrie and straight on to Stratford, in so doing cutting across several present railways. From Stratford the intention is to come down to London, perhaps over G.T.R., and from London the line will be continued to St. Thomas.

Mercantile Summary.

A by-law to grant a loan of $15,000 and exemption from taxes to the Sampson Bolt Co. was carried at Gananoque on Monday by 110 votes over the required number of ratepayers. Only 19 votes were registered against the by-law.

The McPhee Automatic Signalling Company, of Toronto, has been incorporated with a capital of $100,000. It purposes to acquire certain inventions and patents for signalling and stopping railway trains, and to dispose in rights for using them. J. Carling Kelly, of Toronto, is a provisional director.

The annual meeting of the Wetaskiwin Board of Trade has been held and the following officers elected: President, V. C. James; vice-president, J. H. D. Benson; secretary-treasurer, D. A. Ward; councillors, Messrs. J. F. Fowler, Geo. B. Henwood, John West, O. H. Anderson, A. R. Dickson, J. C. McKay, C. E. Compton and Dr. Walker. Wetaskiwin is in Alberta, not far from Edmonton.

A despatch states that great fields of the highest grade petroleum have been discovered in Alberta and Athabasca. The territory thus far prospected shows an area of 200 square miles. Subterranean reservoirs have been tapped, and oil flows as from artesian wells. The discovery was made in the Mormon settlements, but was kept quiet for a time. Now capital is rushing in and buying up the land, but the field is too large to be controlled.

According to a report recently issued in London, the Canada Company last year sold or leased, with right of purchase, 8,973 acres of land, compared with 10,656 in 1903. The total land occupied, with or without the option of purchase, was 108,275 acres. The total rental received was £9,860, a small reduction on 1903. The revenue account reached £11,711, compared with £12,711 in 1903. The proceeds on land realization were £23,690, compared with £20,506 in 1903. The mineral department had shown no special activity, though there was some interest in an oil field towards the end of the year. The peat fuel industry was still in an experimental stage.

Things are evidently moving quickly in Moose Jaw, Assa. A despatch from that place dated 15th inst. gives the estimate that upwards of $600,000 will be expended in buildings there during this coming spring and summer. More than three hundred structures are now under consideration. It is reported that the C.P.R. will erect a large machine shop at this point, and also enlarge the stock yards which were partially completed last fall. The Masonic temple, post-office and other large buildings are among the new buildings to be erected. It is reported that the town is to have a stove foundry, shirt factory and a steam laundry.

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.
Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.
For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W Gibson, Director Bureau of Mines, Toronto.

Mercantile Summary.

"Young Jones is taking boxing lessons." "At the new athletic club?" "No. Wholesale dry goods house."

The Western Corporation, Limited, Vancouver, will apply to the Legislature of British Columbia for power to increase its capital stock by $100,000, and to build wharves and tramways.

A syndicate is negotiating for the purchase of blocks of land near Newtonville, Ont., with a view to establishing peat works, there being very large supplies of that material favorably situated as regards transportation, etc.

Wener Bros. & Harts' clothing factory in Montreal was on Saturday last damaged by fire and water to the extent of $15,000 or $20,000. The fire was due to escaping gas. The loss is covered by insurance.

The Ontario Electrical Development Company has just let contracts for a new power-house at Niagara Falls to cost half a million dollars, and it will enter upon an extensive scheme of power development for the villages, towns and cities of western Ontario, besides the power to be delivered in Toronto. Arrangements are being made now for locating routes for cables to Brantford, Paris, Guelph, Galt, Preston, Berlin, Ayr and other places.

By-laws have been passed by the ratepayers of Regina, Assiniboia, authorizing the borrowing of $60,000 on debenture for the purchase of land and the erection of school buildings in that town. The advertisement sent us states that these debentures are to bear 4¾ per cent. interest; $56,000 of them are to run for thirty years, repayable in equal annual instalments, the remaining $4,000 being for a smaller school, built of wood, repayable in ten equal instalments.

The presidents of the coal-carrying railroads met in New York last week and decided to make the usual spring reduction of fifty cents per ton on the tide-water price of anthracite coal. This reduction will go into effect April 1st, and will make the price of anthracite coal at the shipping points $4.50 per ton. Beginning May 1st the wholesale price will be increased ten cents per ton per month until the figure of $5 is reached on September 1st, at which price it is expected coal will be sold during the winter.

When the present snow goes away, says a Quebec paper, the Quebec Railway, Light and Power Company intend to construct what will be one of the highest dams ever built in Canada. This dam will be 90 feet in height, 12 feet wide at the top, and 65 feet wide at the bottom. It is to be built at the foot of the Natural Steps on the Montmorency river. The construction of this dam will not only double the power of the company, but give them an enormous storage reservoir, containing over fifty million cubic feet of water to draw from in period of drought.

Tenders Wanted.

Tenders will be received by the undersigned up to **Saturday, April 15, 1905,** for the purchase of Debentures of the Town of Fort Frances, in the District of Rainy River, as follows: $20,000 for Municipal Buildings and Fire Protection at 5 per cent. for twenty years; interest paid annually.

Tenders may state for what amounts they would desire the respective Debentures confirming said aggregate sum to be drawn.

The highest or any tender not necessarily accepted.

F. H. WARNER,
Town Clerk.

Dated at Fort Frances this 15th day of March, 1905.

Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905,** for the purchase of Debentures of the said School District, issued in pursuance of a by-lay in that behalf, authorizing the raising of $56,000 for the purchase of ground and the erection thereon of a Solid Brick School, said Debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in thirty equal consecutive annual instalments.

Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905,** for the purchase of Debentures of the said School District, issued in pursuance of a by-law in that behalf, authorizing the raising of $4,000 for the purchase of ground and the erection thereon of a Frame School House, said debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in ten equal consecutive annual instalments.

The Strathroy and Western Counties Railway Co. will apply for power to extend their line from some point between Strathroy and St. Thomas to a point in or near Hamilton, passing through the city of London and the counties of Middlesex, Oxford, Brant and Wentworth and the several municipalities thereof. Application will also be made to change the name of the company and increase its capital and bonding.

On report of the Minister of Marine, the Richelieu and Ontario Navigation Company has received permission from the Ottawa Government to change the names of the undermentioned vessels, of the port of Montreal, as follows: The "Algerian" to the "Cornwall," "Bohemian" to "Prescott," "Canada" to "St. Irenee," "Cultivateur" to "Varennes," "Corsican" to "Picton," "Saguenay" to "Chicoutimi," "Virginia" to "Tadousac," "Spartan" to "Belleville." These steamers are certified by the steamboat inspectors to be seaworthy.

On Tuesday of last week was held in Montreal the annual general meeting of shareholders of the Canada Paper Co., Limited. The directors' report for the year was submitted. Reports showed that dividends for the year had been paid on preferred stock and a satisfactory balance carried forward. The following gentlemen were elected directors for the ensuing year: Sir Hugh Montagu Allan, Mr. H. S. Holt, Mr. Hugh Allan, Mr. Charles Hosmer, Mr. H. Markland Molson, Hon. Robert MacKay and Mr. John MacFarlane. At a subsequent meeting of the directors Sir Hugh Montagu Allan was elected president and Mr. H. S. Holt vice-president. Mr. F. J. Campbell was appointed general manager, and Mr. H. M. Thorne secretary-treasurer.

CATTLE INSURANCE.

The largest company in the world insuring against the death of cattle is to be found in Sweden, bearing the somewhat formidable (to English readers) name of "Skandinaviska Kreatursførsækringsbolaget." A few brief particulars in regard to this useful creation may, therefore, not be devoid of interest. From its fourteenth report, covering the period between July 1, 1903, and July 1, 1904, this company contracted new business to the value of 10,604,680 crowns upon horses, 13,417,290 crowns upon cattle, and 9,608,580 crowns for loss of milk. The claims amounted to 909,325 crowns. On June 30, 1904, it had insured 94,383 horses for 42,170,200 crowns and 140,855 horned beasts; against losses for milk it covered a capital of 9,608,580 crowns. The number of cattle insured rose to 235,236, which were covered by a capital of 72,230,080 crowns. This Swedish company has reason to congratulate itself upon its successful working.

this. The note was stopped twenty-three years ago."

Over twenty years back the note was stopped by a clerk then in the employ of one of the Provincial branches of the London and County Bank. It had been brought in by an employee of one the bank's clients in order to be paid into the client's account, with some loose change. By a strange oversight the clerk, after jotting down the number of the note and after counting the change, omitted to take the banknote. When he discovered his error note and messenger had disappeared. Neither was seen again. The clerk took counsel with a colleague at the counter, and for the sake of their own prospects the two young men determined to say nothing about the affair, but to bear the loss themselves. Each paid £5 to make good the loss and stopped the number. The man who presented the note for payment the other day had found it among the papers of his father, who recently died. The two clerks instrumental in stopping the note were traced, and, though both had left the employ of the London and County Bank long ago, each has received back his £5 after the lapse of twenty-three years.

⁂

A Winnipeg despatch says that the tender of the A. E. & Roy Barrett Company, of Seattle, has been accepted for the erection of the tourist Hotel Victoria for the Canadian Pacific Railway Company. The price is just under $500,000, and the work on the building is to be started in April, by which time the foundation will be completed.

TORONTO MARKETS.

Toronto, March 22, 1905.

Chemicals, Drugs, etc.—No change has taken place of any moment with local drug trade since last report, and a fairly good business is going on. Quinine is quite firm, and so is opium. Camphor is advancing. Iodine is held very firmly at the recent advances. Acetic and tartaric acids also are strong. In New York normal trade conditions are reported. In English chemical markets some degree of dullness is reported, especially in connection with the textile branches. The export trade with Canada and the United States, however, is reported to be in good condition.

Dry Goods.—All the indications for a good season's trade in general dry goods are distinctly good. Orders for all lines are arriving with a very satisfactory degree of rapidity. Prices keep quite firm for cotton goods, and particularly so for woolens and linens. The domestic dress goods trade seems to be in a flourishing condition, the demand for these goods being very keen, indeed.

Flour and Grain.—A somewhat brisker feeling is discernible in the flour trade, and ninety per cent. patents are held at $4.40 to $4.50 in buyers' bags, eastern or western freights. Millfeed retains its firmness, though no further upward movement has taken place. Oatmeal is a little upward in its tendency just now, owing to an improved demand in the States for the home-made product. A more active demand has sprung up for wheat, especially for the Ontario article. Some think it will advance. Corn is firm at an advance of 1 to 2c. Buckwheat is wanted. Other grains are nominally the same.

Hides and Skins.—No change has occurred in hides since last report, and the market is about as last reported. Tallow remains as before.

Groceries.—Wholesale grocers report there is an increasing demand from the country for general groceries. Sugars keep as before, but the feeling is still quite firm. A seasonable trade is going on in dried fruits, but nothing worthy of special comment calls for attention. Teas and coffees are a little on the dull side. Canned goods, especially corn and tomatoes, are quite strong, owing to their scarcity.

Live Stock.—While the offerings at the cattle market this week were rather scanty, the quality was poor, so that trade was by no means brisk. Prices for exporters held fairly firm, however. For butchers', all kinds seemed wanted to a certain extent, but choice were in very small receipt. Some good feeders were offered, and went early, with firm prices. The demand for sheep and lambs was good. Calves had an advancing tendency. Hogs are firm.

Provisions.—Butter is still in light receipt, and, the demand being very good, prices still seem to go up. Cheese is firm and unchanged in price. Eggs are steady at 17 to 18c.

Seeds.—A good trade is being done now in seeds, and prices keep firm. The shipments to the country are in full swing. Not much export enquiry is being experienced, the prices here being too high.

Leather.—A good active trade is reported throughout Ontario. In the North-West some complaint is heard respecting payments.

Wool.—It is too early yet to make quotations on new clip, which is hardly

PROMOTOR WANTED

like to make its appearance in the city market before three weeks from now. Regarding old clip, the prices are very strong, but merely nominal. No trade being done.

⁂

MONTREAL MARKETS.

Montreal, 22nd March, 1905.

Ashes.—Business has been slow for some weeks, but supplies are limited, and values are pretty steadily maintained. For No. 1 pots of good tare the quotation is about $5.45; seconds, $4.90 to $4.95. Pearls would readily bring about $7.50 per cental.

Cements and Firebricks.—There has been really little active development of business in cements as yet, though some enquiry is noted. Prices from store remain as they have been all winter; for spring importations quotations are a little higher than last year. There is quite a fair amount of business doing in firebricks at $18 to $23 per thousand, according to brand.

Dairy Products.—In the butter market the demand is dull, and prices are gradually easing off, the best grades of creamery now being quoted at 26 to 27c.; Western dairy and rolls, 21 to 22c. The Liverpool cable announces some advance in cheese. Local stocks are, however, now extremely light, and about 11¾c. would probably be required for any desirable goods.

Dry Goods.—Some improvement is perceived in city retail trade this week, the bright, sunny days and clear sidewalks after so much snow and slush bringing out shoppers in fair number. Stocks are also apparently moving off more freely in the country, and orders from travellers are being received in better volume. Collections are fair, inclining, if anything, to the slow side. The Canadian Colored Cotton Co. has issued a revised list showing about a 5 per cent. reduction in flannelettes, tickings, and other lines of woven colored goods. Further stiffening is reported in bright woolens, such as lustres, etc., while French dress goods are also firmer. English cotton manufacturers are said to have orders in hand sufficient to keep them busy for some time to come, and they show no signs of reducing prices. Silks manifest firmness, and it is said will be in great demand for next year.

Furs.—The London March sales are in progress this week, but definite results from them will not be known for a few days. In the meantime quotations for raw furs here remain as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $4.50 to $5.50 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $25 or more; coon, $2.50 for fine black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $2; short stripe, $1.65; long stripe, 60c.; broad stripe, 25c.

Groceries.—Rather more has been doing during the last week or so, as a good many merchants in the interior have been replenishing stocks before the final break-up of the winter roads. With regard to values, there is little new. Sugars remain just where they were, the factory quotations for standard granulated being $5.65, with yellows ranging up from $5.15. Molasses quotations from Barbadoes continue high, about 21c per gallon, equal to nearly 34c. laid down, but the local jobbing price from stock remains at 33c. for single puncheons, and 35½c. in barrels. The strong advance in Ceylon black teas is maintained, and Ceylon greens have also now advanced about a halfpenny.

Hides.—There has been an advance of a cent in calfskins since last report, No. 1 being now quoted at 14c. and No. 2 at 12c. the pound. Beef hides are unchanged at 9½c. per lb. for No. 1. For new lambskins 10c. is quoted, and for sheepskins $1.15 to $1.20 each.

Leather.—In leather the present movement is but a moderate one, but improved demand appears to be generally

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

looked for in the course of the next few weeks. Prices of sole continue very steady on the basis of 24c. for No. 2 manufacturers'. Black leathers are dull, but their prices are unchanged, best Western splits bringing 21c.; Quebec ditto, 15 to 17c.; grain, 12 to 13c.; harness, 30 to 31c.; pebble and buff, 11½ to 12c.

Metals and Hardware.—The situation is just about as described last week. Orders for hardware are fair for the time of year, and deliveries will be actively begun on the 1st prox., when spring freight rates go into effect. In heavy metals, apart from some good transactions with the railways, the movement of merchandise is not specially active. Quotations as last given will stand.

Oils, Paints and Glass.—Goods are now beginning to move out quite freely, and orders from travellers keep up well. For window glass there is an active demand, while stocks are low, and prices are very strongly held on the basis of $3.75 per 100 feet for first break, the lately advanced figures. Linseed oil is rather firmer, raw being quoted at 42 to 43c., according to quality; boiled, 45 to 46c., these figures being steadily adhered to. White lead is steady at $4.50 for pure.

MILLS AT CORNWALL

WANTED.

MANAGER FOR
Western Loan Company.

Well established loan company in Winnipeg, working on the old line permanent plan, is looking for a man to take the managership. Must be thoroughly familiar with financial matters and capable of handling office details. This is a splendid opportunity for the right man and full particulars may be obtained by addressing

H. W. WHITLA,
c/o McDonald, Haggart & Whitla,
Winnipeg, Man.

The Misses E. & K. Conway, dealers in dry goods and millinery in Halifax, advertise that they are closing out business.

At a joint meeting of the council and Board of Trade of Orillia, at which were present representatives of the James Bay Railway Company, it was decided to submit a by-law to the ratepayers, by which a bonus of $30,000 and a free right of way over all town property would be granted to the company as an inducement to divert their main line to the west side of Lake Couchiching and through Orillia. The right of way is said to be worth $10,000.

It is announced that the Hamilton Cataract Power Company has taken over control of the Hamilton, Grimsby and Beamsville Electric Railway. The directors of the latter company as elected at the annual meeting a few days ago are as follows: J. W. Nesbitt, K.C., president; John Dickenson, vice-president; J. R. Moodie, treasurer; Hon. J. M. Gibson, J. W. Sutherland, W. C. Hawkins, and John G. Gauld. George E. Waller is manager and secretary.

A Mr. C. K. Berry, who is said to represent some Boston capitalists, has approached the British Columbia Government, seeking half a million acres of agricultural land, on which it is proposed to establish 3,500 families in farming communities. According to a Victoria despatch of Wednesday last, the capitalists agree to improve the land, build and maintain roads, trails and bridges, and sell it to settlers, whom they hope to attract from Eastern Canada and the United States.

K. REESOR, Inspector
FRANK EDMAND, City Agent, Confederation Life Bldg.

A meeting of the creditors of G. B. Layton & Co., dry goods dealers at New Glasgow, was held there on March 11th. The creditors were chiefly Halifax and Montreal firms. Liabilities, $25,000; assets, $13,000. An offer was made of 35 cents on the dollar, payable in two, four and six months, secured. The meeting adjourned to consider the offer until March 25th. G. B. Layton was formerly in the dry goods business in New Glasgow, and was understood to have done fairly well. Then he went into the manufacture of a patent medicine, "K.D.C.", and advertised very extensively. Dropping that, he resumed dry goods a few years ago, with the result as noted.

* * *

UNITED STATES FINANCE.

Henry Clews & Co., New York, in their weekly letter dated March 18, 1905, said:

While time money continues easy call loans have shown a relatively sharp advance, owing mainly to the withdrawal of about $13,000,000 of Government funds from the depository banks. This, and the fact that preparations for April settlements are now in order, imparted a firmer tone to the money market and strengthened the impression that the surplus reserve would be almost, if not entirely, wiped out for a brief period. No permanent advance in money rates is to be anticipated; but this temporary hardening in rates was quite sufficient to check the advance in stocks, and to induce considerable irregularity in values, a condition that is likely to continue until bank reserves again begin to rise. The ease of money abroad is favorable to this centre, and any further advance here would be quickly counteracted by our bankers securing accommodation in London.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population [illegible] Greater New York, Chicago, Phila[illegible] [illegible]ton, Toronto, Montreal, Quebec [illegible] Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding t[illegible] of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian S[illegible] deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00.

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

WHOLESALE TRADE.

Taking wholesale trade for the first quarter of the present year, and speaking generally, it may be said to have proved satisfactory to the merchants concerned. The prosperity of the country, while perhaps not so exuberant as a year or eighteen months ago, still remains at a distinctly high pitch. People both in cities and rural communities have ample spending money, and they are using their opportunities. During the last few years, there has been a constantly increasing tendency to look carefully at the quality of things purchased, even though, as is natural, their cost be greater. This tendency now seems to have become crystallized into a habit, and now, comparing the average quality of wearing apparel, for example, with that which used to be bought five years ago, it would surprise many people to note the difference which exists. Another feature which may be said to characterize most lines of trading enterprise is the fewness of the failures. This, however, is not particularly marked as regards the present year, but characterizes equally the last two years. Speaking as a general rule, too, payments have been fair to good, though some complaints have been heard, more particularly among boot and shoe men with reference to slowness of remittances in the West. This is attributed partly to the disposition of farmers and others in the growing West to keep the settlement of their store accounts to a late day, while in the meantime they invest in additional lands. This, while a temptation perhaps difficult to resist in the present buoyant state of feeling natural to such a huge work of development as is going on there, is a condition which may easily be carried too far.

The Monetary Times has from time to time in the past been in the habit of noting particular features in several of the more prominent branches of trade, so it will not be necessary to go into any great detail in this place.

The movement in practically all branches of dry goods has been good. At the beginning of the winter, some slowness was experienced in sale of heavy woolens, but this, it is quite probable, was on account of considerable percentages of stocks having been held over from the winter of 1903-4 owing to its unprecedented severity and the impossibility of moving along the roads in many country districts. Ever since that time there has been a strongly advancing tendency in the values of woolen staple goods; and the retailers, fearing that delay would mean even greater advances, have been hurrying to make their purchases. In cotton staples, while the excitement attendant upon the "corner" a year or so ago, died down, the prices have not died down in as great a proportion as was anticipated by some. To-day values are fairly firm. Dress materials, millinery trimmings, fancy goods, are all items in which a very satisfactory trade has been done.

In groceries, the feature has been the long-continued strength of sugars, due to their statistical position in the chief producing countries. Latterly, there has been no very pronounced upward movement, but the feeling is still firm. Another item of interest in this trade has been canned goods, though of course speaking of the present year, nothing of a particularly new nature has developed, except perhaps the importing of small lots of tomatoes from across the line. In other groceries the business transacted has been about normal.

The hardware turnover has been satisfactory to the merchants so far as we can learn. With the opening of navigation a fresh impetus will no doubt be given, which will render wholesale houses extremely busy. Unless strikes or other untoward events interfere, the opening season should be a good one for building operations, and hardware merchants are getting their stocks in readiness accordingly. The rural end of the business too seems likely to be prosperous, especially in the West. In Ontario, where crops were not so abundant, the farmers are likely to be a little less enterprising in the matter of new building requirements and extensions. There is likely, however, to be, even from them, sufficient demand to give trade a steady character. In metals, the general tendency of most has been upward. Pig-iron has regained its strength, which was drooping a little towards the end of last year. Now however, that, and indeed all the structural metals, are quite firm.

Country produce has been very high-priced all winter, partly owing to the insufficient supplies on account of the difficulties of transport, the snow having been unusually deep. Butter has been almost phenomenally high-priced, while cheese, owing to the late demand by English dealers, has also been good property.

Hides, skins and leather have been in about the position which usually characterizes them at this time of the year. The situation of the last-mentioned, however, may be said to have improved.

In conclusion, all that is necessary to say is that the indications point towards a continuance of the present satisfactory state of things in the business world.

* * *

A SCHEMING MERCHANT.

The case of Hill, the St. Thomas merchant, found guilty by a jury last week of obtaining goods on false pretences, is one which should be dwelt upon. Mr. Hill was not an ordinary malefactor, not such a person at any rate as one would naturally think predisposed to fraud or likely to reach the prisoner's dock. He came of decent people, had been a school-teacher, stood well in the place in which he lived not only in commercial circles but in religious circles. In fact he was a class teacher in a church—the same church, by the way, in which Mr. Rowley, of the Elgin Loan Company, of unhappy memory, was similarly engaged.

This St. Thomas merchant could not have planned his frequent borrowings from trusting friends or plotted his purchases from too credulous wholesale merchants in Montreal and Toronto, but that his conscience must have told him that he was leading people astray. He had borrowed, as he admits, $23,000 or $25,000 from friends and relatives in 1903, and he owed a still larger sum, probably $38,000 or $39,000, in trade obligations in 1904. He made a specious plea of ignorance of his obligations. But he was informed by an accountant of the state of his affairs, and after being so informed he knew enough to cut a page out of his ledger, which page contained his merchandise account, so that it might not be evidence against him. He surely knew that his business was going behind.

The conclusion reached by the jury was the conclusion any man would reach who heard or read the evidence. Hill made false statements in order to get more credit. What he told his Montreal creditors we are not informed, but to his Toronto creditors he lied most profusely. The judge's charge disposes, quickly and neatly, of the plea made by Hill's counsel that the McKinnon claim was covered and that defendant had made no false representation on which that firm acted.

A villainous habit, that of making false statements of one's financial position in order to obtain credit, but it is as old as the St. Lawrence or the Lakes, and hundreds of times practised with impunity. Lest it may be pretended that want of knowledge of financing or of commercial accounts led this particular merchant into such a tangle, one of his creditors who is a practical book-keeper says he has rarely found among his customers a shrewder or more clever accountant than Hill.

And a curious, though not a novel notion—to distinguish between borrowed money and trade debts; that the first must be paid but the others, the wholesale merchants' claims, may go hang. These borrowings of Hill from relatives or friends were not put down in his bill-book or any other book because "he did not consider them trade debts." This sort of discrimination is swept away, however, by the Judge, who points out that all creditors have to be paid out of Hill's estate, and that "you cannot distinguish a debt when you come to pay it."

Judge Winchester's charge to the jury in J. B. Hill's case, which we reproduce in the main on another page, enforced the value in the business world of the old-fashioned virtue of honesty, which appears to be on the decline of late days. "In all commercial transactions," said he, "honesty is the only thing that men can rely upon between man and man, between firm and firm. If that is gone, then commercial life is gone entirely in our country. If we have not honesty between merchants, wholesale and retail men, then the whole fabric of our commercial enterprise is shaken. It depends upon the honesty, the truthfulness in dealings between man and man, to establish a proper commercial community. If that is gone, then good-bye to all honesty in dealings in other matters. That is the foundation of the whole of society."

True words, these, necessary to be spoken in days when truthfulness between man and man in commercial transactions is not so much the rule as it was in a more primitive state of mercantile procedure in this Canada of ours. We could wish, too, that modern competition between wholesale houses had not so largely relaxed the mutual confidence that ought to exist in a wholesale community. It has come about that "for fear of one another," so to speak, importing firms will not always take the firm attitude they ought towards customers whose soundness or bona-fides they have reason to suspect. "We might lose the account—and there is our neighbor so-and-so only too glad to take it up," is the argument occasionally used when a retailer asks something unreasonable or does something of questionable morality which ought not to be condoned.

A subscriber reminds us of Hill's religious professions and connections, adding that he actually obtained money from half a dozen of his church or Sunday-school class and put it into his business, thus adding them to the number of his creditors. This sort of thing is detestable. But this sort of characters exist. May there not be, however, an unconscious as well as a conscious hypocrisy, for all who display that sin are not Tartuffes. There are numbers of dissemblers in ordinary life less easy of detection, but not therefore less dangerous than the Pecksniffs and Chadbands. But it is a public duty, in the interest of morality, to expose the man who in commercial circles, makes merchandise of his knowledge of Scripture, or his familiarity with sacred things in order to entrap his friends or to cheat his creditors.

* * *

—A combination offer of practical helpfulness to all classes of business men is made on page 1319 of this issue, to which your attention is especially called.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for February, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.	Feb. 1905.	Jan. 1905.
Capital authorized	$100,546,666	$100,546,666
Capital paid up	81,431,491	80,378,420
Reserve Funds	54,711,209	54,194,407
Notes in circulation	$58,828,919	$58,021,075
Dominion and Provincial Government deposits	11,221,771	11,038,083
Public deposits on demand in Canada	123,932,727	128,962,627
Public deposits after notice	326,183,257	322,270,620
Deposits outside of Canada	38,826,889	39,470,656
Bank loans or deposits from other banks secured	1,254,585	1,104,292
Due to other banks in Canada	4,853,698	5,003,241
Due to Agencies or other banks in Great Britain	3,297,300	2,716,272
Due to other banks in foreign countries	1,244,514	1,511,299
Other liabilities	8,613,601	7,738,654
Total liabilities	$578,257,337	$577,836,895
ASSETS.		
Specie	$17,125,902	$17,796,556
Dominion notes	38,014,373	37,804,229
Deposits to secure note circulation	3,328,771	3,328,771
Notes and cheques on other banks	21,052,475	21,067,517
Loans to other banks, secured	1,274,584	1,085,854
Deposits with other banks in Canada	6,391,103	6,016,708
Due from Agencies or other banks in Great Britain	9,341,754	9,472,707
Due from other banks in foreign countries	19,910,524	20,173,572
Dominion or provincial Govt. debentures or stock	9,630,312	9,374,847
Other securities	56,006,560	56,562,600
Call and short loans on bonds and stocks in Canada	36,802,704	38,214,280
Call and short loans elsewhere	45,670,704	46,184,911
	$264,549,766	$267,082,552
Current Loans in Canada	414,233,873	412,901,073
Current Loans elsewhere	21,573,309	18,324,151
Loans to Dominion and Provincial Governments	2,000,481	1,948,922
Overdue debts	2,189,153	2,130,438
Real estate	680,107	667,370
Mortgages on real estate sold	762,757	768,024
Bank premises	10,285,958	10,256,826
Other assets	7,501,556	6,797,205
Total assets	$723,777,147	$720,876,763
Average amount of specie held during the month	17,584,285	17,512,748
Average Dominion notes held during the month	38,076,060	37,135,737
Greatest amount notes in circulation during month	59 396 303	64,031,382
Loans to directors or their firms	10,089,834	9,933,389

As is usually the case at this time of the year, the figures present few marked differences from those of the previous month. Paid-up capital, indeed, has increased from $80,378,000 to $81,431,000, and the Rest from $54,194,000 to $54,711,000, but this has been caused almost entirely by shareholders of the Canadian Bank of Commerce making payments for the $1,300,000 of new stock recently allotted to them. The paid-up capital of that bank has thus been increased during the month by $794,000, and the Rest by $317,000. The Traders Bank of Canada has added $194,000 to its paid-up capital, while one or two other banks have made small additions to their Rests.

With a regularity that is now acquiring almost the precision which attaches to the operation of a natural law, note circulation each year reaches its lowest point in January, and in February begins to show an increase. For the last five years the figures at the end of January have been as follows:

1901.	1902.	1903.	1904.	1905.
$45,025,306	$48,586,529	$55,040,987	$56,973,273	$58,021,075

The increase in February, 1905, is $807,000, as compared with $763,000 in February, 1904, and $706,000 in February, 1903.

If affairs this year follow the usual course, we may look for a further increase at the end of March, a decrease in April, and then an increase each month until October, when the maximum for the year will be reached. It is worth nothing that, with the circulation at its lowest point, several banks have very little available margin, and that almost as soon as expansion begins they will have to pay out the notes of other banks.

Public deposits in Canada, payable on demand, show a decrease of about $5,000,000, whilst those payable after notice have increased by some $4,000,000, showing a net decrease during the month in Canadian public deposits of about $1,000,000. Deposits outside of Canada fell off about $600,000. In each case the chief difference is in the figures of the Bank of Montreal, which show a reduction in Canadian deposits of about $1,700,000, and in deposits outside Canada of about $1,100,000. The public deposits held by the Bank of Montreal are $95,000,000, so that a reduction of $2,800,000 in any month has no special significance. In February, 1903, total public deposits were $402,827,000, and in February, 1904, $435,541,000, as compared with $488,943,000 now.

On the Assets side it may be noted that cash reserves are $55,000,000, or approximately 9.5 per cent. on total liabilities. In February, 1903, the ratio was 7.8 per cent., and in February, 1904, 9 per cent. This evidence of increased ability to meet immediately all demands is very satisfactory, but it must not be forgotten that cash held in Canada is only the first line of defence, and that for the larger banks at any rate, strength in Great Britain and in New York is quite as important. In this respect, the comparison with February, 1903, is as follows:

	Feb., 1903.	Feb., 1905.
Due from agencies or other banks outside Canada	$15,191,000	$29,252,000
Call and short loans outside Canada	44,668,000	45,671,000
	$59,859,000	$74,923,000

With $55,000,000 in actual cash, and $75,000,000 in assets held in available form outside Canada, the banks are well prepared to meet the demands which the expected activity in the West this summer will probably make upon them.

Current loans in Canada are $414,234,000, as against $412,901,000 last month, and $389,628,000 a year ago, while current loans elsewhere have increased during the month by $3,000,000, the increase being divided amongst practically all the banks which have current loans outside Canada.

On the whole, the Bank Returns indicate substantial growth, no undue expansion, an increasing tendency towards larger cash reserves, and ample resources to enable the banks to give all the facilities which the rapid development of the country may require.

An event of some interest has been the suspension of the Bank of Yarmouth, which took place on the 6th inst. It was a very small institution—in volume of business the smallest in the Dominion—with a paid-up capital of $300,000, a reserve fund on paper of $35,000, and total liabilities to the public of $384,494. Its suspension will have little effect outside of its own immediate district, but the bank's depositors and, still more, its shareholders, will feel it keenly. The failure was caused by the connection with the insolvent W. H. Redding Company, Limited, which owed it $500,000, and will pay probably not more than 10 cents on the dollar. The probable loss in this advance alone will eat up the bank's capital and rest of $335,000, and leave a deficiency of about $125,000 to be collected from the double liability of the shareholders. A reference to the list of share-holders, as on 31st December, 1903, shows that 2,273 shares, or 56 per cent. of the total stock, were held by women or by trustees. When shrinkage in the remaining assets is taken into account, it is evident that depositors will be lucky if they escape without loss. The amazing recklessness of the officials of a bank with a capital of $300,000, who, out of total advances of about $650,000, lent $500,000 to one concern, can hardly be too strongly condemned. The bank is now in the hands of a curator appointed by the Canadian Bankers' Association, who will doubtless do their whole duty, unpleasant though it may be.

The failure will probably strengthen the present tendency towards consolidation and the merging of the smaller banks in those of larger size. The purchase of the People's Bank of Halifax by the Bank of Montreal is the latest instance. The former bank has a paid-up capital of $1,000,000, a rest of $440,000, undivided profits apparently $80,000, and total liabilities of $4,883,000. It has 27 branches, almost all in the small towns and villages of Nova Scotia, New Brunswick and Quebec. The price paid is to be stock in the Bank of Montreal of the par value of $400,000, taken as worth 253, or $1,012,000, and cash, $138,000, thus making a total of $1,150,000 for what is on paper a surplus of assets over liabilities of $1,520,000. Estimating that the cash portion of the price will yield a return of 5 per cent., the shareholders of the bank will find their annual return cut down from $60,000 to $46,900, but they will have the consolation of knowing that both principal and interest are more secure, while an occasional bonus may sometimes come their way. We hear that the notice sent to the shareholders of the People's Bank of Halifax states that the directors have made the arrangement in consequence of impending losses and keen competition; and in view of this the shareholders will doubtless ratify the agreement without question. The transaction should be of benefit both to the country at large and to the banking fraternity.

In connection, apparently, with the purchase, the Bank of Montreal has given notice of application to Parliament for power to increase the number of its directors. This is a move in the right direction. There is no apparent reason why a bank should be restrained from having more than ten directors, while it is easy to see that banks like the Bank of Montreal or the Canadian Bank of Commerce, with branches all over the country, and important business connections in all the larger cities in Canada, as well as in New York and London, could legitimately avail themselves of the services of a considerably larger number.

For some time past there has been an agitation for action by the Government towards replacing with Canadian silver the large amount of American silver now in circulation throughout Canada. We observe with pleasure that in answer to Mr. Bickerdike, of Montreal, the Minister of Finance, speaking from his place in the House of Commons, recently said that "There was a large amount of American currency in circulation at par in Canada, and he was aware that in the United States Canadian silver was accepted only at a heavy discount. It was not the intention of the Government this session to prohibit the circulation of United States silver in Canada, but the Government hoped to be able to displace American coin by the substitution of Canadian silver."

OUT OF DATE LEGISLATION.

Time was, from ten to twenty-five years ago, when in various parts of Eastern Canada communities and municipalities were averse to the coming of commercial travellers from a distance into their midst. These messengers of commerce were not wanted; the retail merchants had bought their goods in Halifax, in Quebec, in Montreal, for scores of years, buying like goods from the same people in the same way; and they did not want any change. They were shy of these men travelling with samples, glib talkers, courteous visitors, persuasive negotiators. Of course they had beautiful merchandise and offered peculiar terms, but it was generally concluded by the municipal authorities that such free-and-easy gentlemen should not be encouraged, that in fact they should be discouraged, and therefore a tax was put upon them. They must not sell nor offer their wares without payment of a license, and a heavy license, too.

This course of procedure was frequent in Eastern Canada. It was the case in various parts of New Brunswick, in Fredericton in particular; it was universal in Prince Edward Island, when travelling salesmen from Montreal and even Toronto would dare invade the territory theretofore sacred to St. John and Halifax importers. It was strongly adhered to in the city of Quebec, which resented the idea that any importers save its own should venture to sell goods to the old-fashioned retailers of the Ancient Capital. And yet the cheery commercial traveller, like Autolycus in A Winter's Tale, pushed on his way, singing, (if he could sing),

> Come, buy of me; come buy, come buy;
> Buy, lads, or else your lasses cry.

Like their exemplar in Sicilia, these salesmen had "an open ear, a quick eye, a nimble hand," and they had samples to offer which to many of these localities were absolutely novel. And many a suit at law resulted, whose effect was always in the direction of enlarging the freedom of trade, in breaking down the barriers of old custom and prescript.

After an interval of years during which the idea of the freest possible commercial intercourse between the provinces of the Confederation of Canada has been growing in strength, it is not encouraging to find British Columbia about to place a tax on commercial travellers going into that province. A bill which has just passed its third reading by the Legislature and only needs the seal of the Lieutenant-Governor's approbation to become law, provides that commercial travellers doing business in British Columbia will be required to take out six months' licenses at $100 in the case of liquor and cigarmen, and $50 in other lines of merchandise. Manifestly, this measure must discourage the visits of such functionaries to the Pacific Province. Its purpose may be stated to be revenue—and we know that British Columbia is looking for novel sources of revenue—but it will hinder trade. If insisted upon, it will not prevent commercial salesmen from other provinces visiting the mineral province, but it will force the dwellers in that province to pay higher prices for their importations by the amount of taxes imposed.

Naturally, the wholesale merchants of other provinces are averse to such a measure as that proposed. And the commercial travellers oppose it with all their strength. Deputations to the Government at Ottawa from the various commercial travellers' associations from Winnipeg to the Maritime Provinces—there are 14,000 or 15,000 of them in all—went to Ottawa yesterday to request the repeal of such an act as is proposed to be passed by the Legislature at Victoria, as being in restraint of trade, and a violation of the British America Act. The Canadian Manufacturers' Association is actively opposed to such legislation, for at its annual convention of 1904 that body declared by resolution, "That during the coming year the subject of extra provincial legislation should receive special attention from the branches of this association, and an effort made to remove such obstacles to trade and to encourage the freest possible intercourse between the producers and consumers of the Province." And the Toronto Board of Trade passed on Wednesday the following resolution which reads: * * * ; And whereas the chief basis of a satisfactory union of the provinces of this Dominion is unrestricted and unhampered trade and intercourse between the people; and whereas the imposition of such a tax is a serious menace to trade; "Be it resolved, that the Dominion Government and the various boards of trade of this and other provinces and the Manufacturers' Association of Canada be urged to use their influence to have this act repealed."

* * *

CONFLAGRATIONS.

An occasional contributor who is interested in the subject of conflagrations, and had read the list of them published in our issue of 17th instant, sends us one of the publications of the National Board of Fire Underwriters of the United States dealing with the great burnings in the United States and Canada of $500,000 each and over since the beginning of 1866. In that year Portland, Maine, Jersey City and Chicago furnished a total loss of $12,500,000, the Portland fire yielding ten millions of this. Then in the next year a hotel fire in St. Louis caused $1,500,000 loss; 1868 witnessed general fires in Albany and Charleston, devouring three millions each; and in 1869 bonded whiskey warehouses in Philadelphia occasioned a $3,500,000 blaze. In September, 1870, the Drake block in Chicago burned, causing a loss of $2,500,000. October, 1871, witnessed the terrific conflagration in Chicago, where $165,000,000 worth of property was swept away, and in the same month the whole town of Manistee, Michigan, was burned down. In the following year was the great fire of Boston, where the property loss was $70,000,000. Since the year 1870 the conflagrations in the United States may be most conveniently grouped into a table, thus:—

Year.	Number of Fires.	Loss.
1871	2	$166,250,000
1872	1	70,000,000
1873	5	4,675,000
1874	3	6,000,000
1875	3	12,000,000
1876	2	2,250,135
1877	1	700,000
1879	2	3,298,707
1880	1	747,355
1881	2	1,461,588
1885	1	1,000,000
1886	8	6,821,005
1887	6	4,303,599
1888	9	6,804,703
1889	13	28,546,498
1890	2	1,284,977
1891	12	10,167,910
1892	10	11,858,709
1893	10	11,261,239
1894	8	5,546,572
1895	7	5.385.392
1896	7	6,198,170
1897	12	9,913.735
1898	12	8,906,205
1899	16	11,778,086
1900	16	16,866,515
1901	8	14,711,100
1902	7	10,610,035
1903	15	12,690,000
1904	6	56,550,000
	207	$534,587,135

The pre-eminence of 1904 in the period of thirty-three years since the great fires in Chicago and Boston is caused by the $50,000,000 destruction at Baltimore last year. In the few years immediately preceding, Jacksonville, Florida, with ten millions, and Paterson, New Jersey, with six millions ($5,817,305), helped to swell the ghastly figures. A supplementary table (incomplete), containing eight conflagrations in Canada since 1866, namely at Quebec (2), Ottawa (2), St. John, St. Hyacinthe, Montreal and Toronto adds $36,050,000 to the figure given at the foot of the table above and swells the destruction by conflagration to $570,637,135.

Adding the ordinary fires to conflagration losses in the United States from 1875 to 1903, the Chronicle Fire Tables make the property loss in those twenty-nine years $3,371,912,000, on which the insurance loss was $1,988,644,000, equal to 59 per cent. But the total is incomplete, for there requires to be added the fire loss of 1904 in the United States and Canada, which, according to the compilation of the New York Journal and Commercial Bulletin was $247,641,700. The aggregate is equal to ten million dollars a month for the past thirty years.

BANK OF BRITISH NORTH AMERICA.

The report and balance sheet of the British Bank were submitted at the meeting of 7th March in London, and appear to have given, as they ought, satisfaction to those assembled. The chairman must have been kept well informed of current affairs in Canada, or he could not have made so compendious a statement of commercial events and conditions as he has done. It well repays careful reading. Among the features of the balance sheet is an increase in deposits of £239,000, the savings bank department in Canada showing steadily growing favor. On the other hand, there is a heavy decline in bills payable, not because the volume of the bank's business is lessened, but because of the inactivity of business and the low rates for money in New York, where the bank is accustomed to lend large sums on call and short loans on collateral. Circulation shows a considerable advance on the £588,000 of twelve months before.

But the profits of the year were eight thousand pounds sterling greater than those of 1903, for where they were £88,000 in that year they were £96,000 last year. Of these, while £20,000 was added to reserve, £10,000 was placed to bank premises, on the provision of which a large sum has been spent, and necessarily spent. Most of this was in Winnipeg, where the bank has a really handsome building, Ottawa, British Columbia and the North-West. Those who know the conditions in the West will admit that the outlay was wise and necessary. Mr. Hoare seems to consider the purchase of Canadian wheat by United States millers last year a forerunner of much more extended transactions of the same kind. If they buy this wheat, mix it with their own and export the product, they interfere by so much with the future prospects of Canadian millers. But the Manitoban wheat-grower is not likely to take the flour-miller's view of the matter. His reference to British Columbia mining is in a measure hopeful, and mentions a possible amalgamation of interests in the Rossland camp.

OUR ST. JOHN LETTER.

Premier Tweedie made his budget speech at Fredericton a few days ago, and predicted a surplus of $26,500 on the year's operations. It is hardly to be expected that this result will be attained, but unless there are unexpected losses, say from unusually heavy freshets, or some epidemic, or catastrophe, the financial year of the Province should be a good one. The New Brunswick Premier figures his receipts at $884,200 and his expenditure at $867,675. The main source of our revenue is $491,360.96, subsidies from the Dominion Government, and $285,000 from territorial revenues. Liquor licenses are expected to yield $22,500, taxes on incorporated companies, $30,000, succession duties, $15,000, and fees from the Provincial Secretary's office, $13,000. Of expenditures the main items are: Public works, $223,784, and education, $214,794. The sum of $150,000 will be required to pay interest. The Provincial Hospital for the care of nervous diseases will require $57,764 for its upkeep, and there will be expenditures of greater or less amounts under a hundred different heads to use up the balance of the money. The Premier announced that this year and next upwards of $200,000 of debentures, bearing six per cent. interest, will fall due, and must be provided for. The Province has upwards of half a million of six per cent. debentures outstanding, and the re-issue of these at 3 per cent. will materially lighten the interest burden.

Considerable attention has been aroused here by the publication of a letter written by Sir Thomas Shaughnessy, president of the C.P.R., drawing attention to the inadequacy of the deep water terminals at St. John. Sir Thomas points out that at present the C.P.R. are compelled to send some of their steamers that should come to St. John elsewhere, because of the insufficient accommodation, and he states that there is not a wharf in the harbor large enough for the new fast liners his company are now building. Sir Thomas frankly admits that St. John is the natural winter outlet of the Canadian trade, and this makes most serious the position he so strongly deplores. The inference from his letter is that the Federal Government should do something to help in the equipment of the winter port to handle the trade that can be developed.

The Record Foundry and Machine Company, of Moncton, is reaching across the continent for business. This concern now has branches in Toronto, Montreal and Winnipeg, and at the present time Joshua Peters, manager of the business, is on the Pacific Coast, his intention being to establish the "Record" name in British Columbia.

The City of St. John is calling for tenders for extensive improvements to the water supply. The plans for the proposed work were prepared by Messrs. Snow & Barbour, of Boston, and the tenders will close on April 12th. The work is divided into four sections, as follows: 10,300 feet 33 inches wood-stave pipe line and necessary structures; 7,400 feet 39 inches reinforced concrete aqueduct; 7,500 feet 48 inches reinforced concrete aqueduct (part in tunnel; concrete masonry dam on Mispec river with head-works and gate-house. The work is to be finished by November.

The city of Fredericton and the town of Sussex are also considering improvements to their water supply. Fredericton gets its water from the St. John river, and there is an abundant supply, but when the river is low, there is much typhoid fever. One project now under discussion is to bore a number of artesian wells. Sussex has ordered a loan of $6,000 to provide a pumping plant.

Messrs. Henderson & Potts, of Halifax, have purchased from the James Robertson Co., of Montreal, their paint factory in this city, and are now installing new machinery and making preparations to increase greatly the output. The factory is a well located one, and a considerable development of its business, under the new management, is expected.

The Central Telephone Company gives promise of becoming quite a rival of the New Brunswick Telephone Company, which handles the Bell Company franchises in New Brunswick. The Central Company has a very liberal charter, and is rapidly extending its lines through the centre of the Province. It will open in St. John during the coming summer, and the people generally will be glad of the competition of two lines.

Linton Tingley, of Albert, Albert County, who was carrying on quite an extensive lumber business, has disappeared, and is believed to have gone to the States. He left men and teams working for him in the woods, and as these are owed considerable money, the loss or a portion of it will fall on poor people.

Mr. George Nixon, on St. Patrick's Day, celebrated fifty years in business as a dealer in wall paper in St. John. Mr. Nixon is still hale and hearty, and able to give attention to all the details of the business, which he has directed for a longer time than probably any other St. John merchant.

In the death this month of Mr. Charles F. Kinnear, the city of St. John lost one of its leading citizens. Mr. Kinnear was a retired merchant, but took a very active part in the work of the Board of Trade, and was prominent in various charitable and philanthropic organizations, particularly those under the direction of the Church of England. He was a liberal giver to many worthy objects, and was in all respects a good man.

The heavy snow falls along the coast of New Brunswick, and the light falls on the headwaters of the rivers, is giving the lumbermen much uneasiness. There is, indeed, something of a fear that unless we have unusually heavy spring rains there will be a light freshet, perhaps not strong enough to bring down the logs cut during the winter.

St. John, N.B., 28th March, 1905. * * *

DOMINION MARINE ASSOCIATION.

The Dominion Marine Association held their annual meeting in Ottawa on the 23rd inst, and discussed several matters of interest to the members. With regard to the proposal for the development of 1,100 horse-power from the waters of the Rapide Plat Canal at Morrisburg, the committee recommended that the Government be asked to withhold permission, as the utilization of the waters to the extent named might seriously interfere with the safe and convenient navigation of the canal by large vessels. Attention was drawn to the agreement which had been made for the free reciprocal inspection of vessels between the United States and Canada. The evident intention of the United States inspectors was said to be to enforce the new United States rules fully upon the Canadian steamers, subject to United States inspection, even in regard to equipment, which had heretofore passed United States inspection. The intercession of the Minister of Marine was asked on behalf of the Canadian vessels affected. The committee drew attention to the fact that the inspection fees and tonnage dues were left by the Act of 1903 still under the jurisdiction of the Governor-in-Council, and that no action had been taken towards their abolition. Irregularities in the weighing of grain at elevators were referred to, and measures taken to correct the same. The association had expressed to the Winnipeg Grain and Produce Exchange their desire to have responsibility for the weight of the cargo rest entirely on the elevator, with no interference, however, in the system of Government supervision of the weighing except in the case of loading vessels. The committee recommend that the owners of vessels carrying grain from Port Arthur and Fort William should enter into an agreement prohibiting the offering of any inducements to employees of any elevator to secure quicker despatch or advantage in loading, and that thereafter a deputation should wait upon the management of the C.P.R. and C.N.R. elevators to ask assistance in improving the conditions at the ports named; and that, if possible, vessel-owners should appoint one agent to act for all at these ports. The total membership represented in the association is 112,297 tons, of which 79,349 tons is steam and 32,949 tons other vessel property. The following officers were elected: President, J. A. Cuttle, Montreal Transportation Company; vice-presidents, H. C. Hammond and A. A. Wright, Toronto; Executive, C. F. Gildersleeve, Kingston; James H. Hall, Ottawa; H. W. Richardson, Kingston; C. J. Smith, Montreal; R. O. Mackay, Hamilton; D. Murphy, Ottawa; S. Crangle, Toronto; Capt. Thomas Donnelly, Kingston; Frank Plummer, Toronto; secretary-treasurer, Francis King, Kingston.

OLD TIME LAKE CRAFT.

Our papers under this caption have brought us half a dozen letters and applications for additional copies of the issues in which they appeared. Evidently the subject possesses interest for dwellers along the lower lakes and Detroit river, who can remember the craft and the scenes referred to. From the letters received, we select two for reproduction to-day. The first is from a Windsor merchant, Mr. Bartlet. We copy the concluding portion:

. . . I was so much interested by your articles on "Old-Time Lake Craft," that I cannot refrain from adding to them. You may easily imagine how they would appeal to me, as much to the manor born as yourself. What particularly stirred me was your description of the west-bound sailing vessels at the west end of the lake, which on a change to a fair wind came into the river in sometimes a vast, white cloud, so to speak. I have seen that sight several times, as a mere boy—and boy as I was, it was thrilling. The sound of the windlasses raising the anchor; the hoisting of the sails; the cloud of canvas; and the cheery voices of the sailors—it all made combination of sights and sounds never again to be witnessed or heard on the old Detroit river, or indeed anywhere else. . . There is something pathetic about it from this point of view, for the living eye-witnesses are passing away.

* * *

OLD TIME LAKE CRAFT.

Editor Monetary Times:

Dear Sir,—I have to thank you for sending me two copies of the Monetary Times, March 17th and March 24th, containing reminiscences, signed J. H., of the old steaming and sailing craft of Lakes Ontario and Erie. They lead me to indulge in memories of 1845 to 1850, which if you do not care to publish I shall yet not be offended.

I am not old enough to recall the "Walk-in-the-Water," which was the first steam paddle steamer to waken the echoes of Erie and scare the Indians early in last century, but I do remember the "Red Jacket," a very early lake boat, she was a low, side-wheel, low-pressure boat, having two masts rigged with canvas. She actually made seven miles an hour. Her cut-water was of the conventional sort, not straight up-and-down, but of a double curve, like a sailing vessel, or an early Cunarder.

The swiftest boat on Lake Erie, until the "London" came out, was the "Buffalo," an American built side-wheel, low-pressure, sliding-beam steamer. She used to race with the Canadian steamer "London," but was always beaten into Buffalo by one or two hours. This was the boat described by Sir Richard Bonnycastle, who calls her the "Thames," in mistake.

If you care to go to the Public Library, and look up a volume entitled "Canada and the Canadians in 1846," you may find an interesting forecast of the commercial features of Canada as Sir Richard judged them, almost sixty years ago. He describes Detroit of those days. Being a colonel of engineers, he busied himself making a sketch of a star fort, intended for the north end of Bois Blanc Island, opposite Amherstburg. His military eye perceived the importance of that position in case of possible hostilities, for the island is in British waters.

I remember, too, the steamer "Earl Cathcart," launched at Amherstburg in 1846. She was owned by a group of persons in that town, the brothers Park, John MacLeod, Thomas Paxton, and others. Her commander was Capt. Duncan, and she plied from the Bruce Mines to Montreal. When a little boy I made a trip on her from Detroit River to Kingston. She was laden that trip with copper ore from the north shore of Lake Huron. The "Cathcart" was a wooden boat with twin screws and one mast.

Such remembrances as are called forth by the papers of J. H. serve to bring back the days of comparatively small things in the marine history of the Great Lakes. And I venture to add my little tribute of praise to the enterprise of Canadians in their rivalry of the more numerous and wealthy Americans. Of late years our American friends have distanced us; but we ought not to forget the sturdy adventures of our fore-fathers half a century ago to keep pace with the rapid settlement of those distant days. We are making progress again in late years, I am glad to see, in steel shipbuilding this time.

By the way, did you notice among last week's telegraphic despatches one from Simcoe, Ont., telling of the death of a woman who acted the part of a heroine on a bitter November day of 1854. During the stormy, snowy night before, the schooner "Conductor," owned in Amherstburg, ran ashore on Long Point, Lake Erie. The waves washing over her deck and cabin, the crews took to the rigging. Mrs. Becker, who lived along the shore saw them, built fires on the sand and signalled them to swim. Then she waded into the raging water and helped the poor exhausted sailors to the fire. One by one made the attempt, till all were saved. For her bravery, the Government gave her a farm of 100 acres, and a purse of $1,000 was given her by Buffalo ship-owners. The New York Lifesaving Association decorated her with a handsome gold medal. She also received a letter of commendation from Queen Victoria. In the forty-nine years since this event happened, Captain Henry Hackett and his crew of six are all dead, I am told, but one—John Jones, who lives on Detroit River. It is a wonder none of them died of exhaustion on that fearful night. I have heard Captain E. P. Dorr, of Buffalo, tell the story of how that Amazonian woman, Abigail Becker, pulled them out of the water and half-carried them to the fire on the beach. She was a wonder, big in body and in heart.

DAVID KEMP.

Toronto, 27th March, 1905.

* * *

—A combination offer of practical helpfulness to all classes of business men is made on page 1319 of this issue, to which your attention is especially called.

* * *

—The Montreal Board of Trade is taking up in earnest the question of making Montreal a free national port, and will shortly send a deputation to Ottawa to confer with the Premier on the subject. The delegates will advocate primarily that Montreal be soon made a free port, and that until this is done the commercial bodies now represented on the Board of Harbor Commissioners shall continue there, and not be removed in accordance with recent suggestions. The commercial bodies now represented on the Harbor Board are the Board of Trade, the Chambre de Commerce, the Corn Exchange Association, and the shipping interests.

ELECTRIC FIRES.

There can be no question that electric fires multiply around us, says the Insurance Spectator, of London, Eng. A warning was published only the other day in a leading contemporary touching the very grave peril that now besets Oxford. Reference is made to the great danger of fire likely to occur at any moment owing to the fusion of the electric wires that have now unfortunately, we think, been installed in some of the oldest colleges where timber predominates, much of which is centuries old and liable to abrupt firing, simply from heat alone, while as we all know, wherever there is an electric installation there is the constant liability to the short circuit and other similar electric aberrations, whence easily issue the most serious fires.

It is not necessary to refer to the risk incurred in these ancient colleges through the extremely unwise introduction of electricity into them. A number of the most venerable colleges are centuries old, and it is very justly said that they are no better than mere match-wood, ready to blaze up directly a certain degree of heat is generated in their vicinity, and it may well be supposed that the destruction of the old colleges of Oxford would be very generally regarded as nothing less than a real national calamity. It seems to us that this warning has not been sounded too soon, and most decidedly every possible precaution should be insisted on to avert the danger of a total destruction, which might quite easily ensue, of the most venerable university in the world.

The fire underwriters are well aware of these fresh risks, but any way it is wise to anticipate trouble of this sort by taking, if practicable, such steps as shall render it impossible to eventuate, or, should it do so, such measures should be always ready as will neutralize the worst consequences of an unavoidable fatality.

Meanwhile, we do not hesitate to assert that Oxford is at the present moment in real danger of a calamity that would be regarded by the world as a common loss to all who value learning and venerate the past, whence, after all, we derive most of our intellectual possessions.

But why does the Spectator lay so much stress upon the risk of fire from electricity to college buildings, and make no mention of danger to wooden interiors from other causes of fire. A dozen years ago preparations were making one night for "a Conversat" in Toronto University. Flags and streamers and wreaths abounded—"lamps shone o'er fair women and brave men"—guests were arriving—music was swelling—when at the foot of a heavily-timbered stairway a tray full of kerosene lamps was overset. The oil flew over the varnished wood-work and took fire, flames blazed, and the hallways, upstairs and down filled with smoke. The fire brigade when it arrived found no adequate supply of water in the then too small four-inch water main, and three-fourths of the beautiful building was a prey to flames. Happily, the lighting scheme of the reconstructed building, electric though it is, affords no such chance for a second such fire. But there are other collegiate structures in Canada not free from similar risks.

* * *

FINANCIAL MATTERS.

Montreal Finance Committee has decided to advertise for tenders for a $300,000 loan for forty years, bearing 4 per cent. interest.

A branch of the Canadian Bank of Commerce was opened at Lethbridge, Alta., on the 28th inst. The bank has also purchased the private banking business of Cowdry Bros., Macleod, Alta., and opened a branch there on Monday last.

There has been a sensational rise in the value of Hudson's Bay shares since the beginning of the year, in continuance, it may be said, of the marked enhancement during the last two or three years. At the end of December, shares stood at 55¾, and in February, 1904, at 36. They now stand at 75.

The Ottawa city council will make application to the Legislature for power to raise by debenture $86,000 for additional land and new buildings for the Central Canada Exhibition. The desirability is felt of keeping the fair abreast of the times, and it is realized by the city that in order to accomplish that end the expenditures must be liberal and the accommodation and attractiveness of the first-class order.

A dispatch from London to the Toronto Globe says that some surprise was felt there at the decision of Rothschild & Sons to bring out £3,200,000 3 per cent. sterling bonds of the Grand Trunk Pacific at 95, especially after the Canadian Northern issue, which was offered on the same terms. A concession is made, however, in giving a full half-year's dividend at the beginning of October instead of interest on the instalments paid only.

Remarkable scenes took place in London in connection with the new Japanese loan. The amount allotted for issue in London was $150,000,000, and this was, it is said, over-subscribed at least ten times over within a few hours. The banking houses engaged in the distribution were crowded to a most remarkable degree. Even in Montreal, where it was not generally known that subscriptions would be received, there has been quite a rush for shares. The loan, which draws interest at 4½ per cent., is secured by a first lien on the tobacco monopoly revenues of Japan. The issue price is 87⅝ per cent.

The following is an item from a London financial paper: "Competition for banking business is now so keen that the manager of the branch bank which keeps the college accounts at one of our great universities, actually condescends to write to boys at Public Schools who have obtained scholarships offering them banking facilities when they come into residence!" Under the heading: "What is he in business for?" the Wall Street Journal reproduces the item and adds: "And this from a London financial daily paper! What is the banker in business for? Our contemporary sees nothing 'condescending' (hideous word) in money-lenders' circulars sent to the same source."

Respecting the expressed desire of Lord Strathcona to resign the presidency of the Bank of Montreal, we learn that the event, although probable, is not yet officially announced. The expectation is that Lord Strathcona will accept the honorary presidency and that Hon. Senator Sir George Drummond, vice-president for eighteen years, will become president. He is eminently fitted for the position. The list of presidents of the Bank of Montreal is as follows: John Gray, August 9th, 1817; Samuel Gerrard, June 5th, 1820; Horatio Gates, June 6th, 1826; John Molson, December, 1826; (minute book missing from 1826 to 1835); Hon. Peter McGill, 1835 to June 4th, 1860; T. B. Anderson, from June 4th, 1860, to November 5th, 1869; E. H. King, November 5th, 1869, to June 2nd, 1873; David Torrance, June 3rd, 1873, to January 29th, 1876; George Stephen now Lord Mount Stephen, from March 10th, 1876, to June 6th, 1881; C. F. Smithers, June 7th, 1881, to May, 1887; Sir Donald A. Smith, now Lord Strathcona and Mount Royal, May, 1887.

* * *

—A combination offer of practical helpfulness to all classes of business men is made on page 1319 of this issue, to which your attention is especially called.

* * *

—A telegram from Mexico City states that President Diaz has issued a decree for the reform of the monetary system, as authorized by Congress last December. The mints will be closed April 16th to the free coinage of silver, and the new monetary system will go into effect May 1st.

MINING ROADS IN WINTER.

We have read of the adventures of explorers in mountain regions; we have heard of the exposures and privations of a winter party with a guide; we have been told the sensations of a mining engineer or prospector when making his way alone to a spot on a distant steep mountain-side said to contain a mine or the possibilities of one. But it has never happened to us before to get the experiences of a lady who, when her husband came out from England to visit a partly developed mine in the Kootenay Country, of British Columbia, teased him to be allowed to go too. She got her wish, and she tells about the adventure thus, under date 13th March. She stipulates that places and persons are not to be named:—

"Here we are, up country, once more I have long looked forward to the trip here in winter. My friends in D—— laugh at me and say I am fairly romantic about mines on mountain tops. I did not attempt, however, to reach the mine itself, as the roads were too bad, but remained at Lone Log, a camp in the midst of nowhere. Since leaving N—— I really have had rather a varied and checkered career. We took train to Golden, and a gentleman drove in to meet us, a 90-mile drive is the only way of reaching this place in the winter.

"Well, we expected glorious sleighing, and were provided with sleigh, fur coats, and all winter belongings, but half way along, say forty miles out, spring met us on the way—there was a most sudden break up in the weather. We had to abandon our sleigh and borrow something on wheels, and finally got here,—Mr. Blank's house—just a fortnight ago, spent the night, and next morning drove on to a point twelve miles from here. The first six miles were fairly good going over bare roads, there we had to transfer to a sleigh,—we went over small snow-slides, mud-slides, and other roughnesses of a novel kind. From there the men went up, up, up, to the mine, and a hard time they had of it. There had been a snow-slide over the road, and men had gone up in the morning, to dig it out. Finally our men, four of them, abandoned the sledge and had to plough their way on foot through snow and darkness, reaching the mine at 11 p.m., seven hours going eight miles; wasn't that hard going. Pretty tired out they were when they finally arrived, 'far up the height,' as Mr. Excelsior puts it. At 9 o'clock a man from the mine telephoned to say the teamster with one horse had just arrived, that the other men had become played out on the way, and they were sending men to help them. Please imagine how I felt at such news as this! At 10 o'clock Mr. B—— telephoned he had taken the other horse and ridden up, and at 11 o'clock my husband rang me up, having just got in. I must say they sounded very cheery, and seemed none the worse next morning, except that they were stiff. Doesn't it seem wonderful to have a telephone up on the top of a mountain like that?

"I think mining a hard enough occupation at the best of times, and at this time of year it is an abomination. So risky and so terribly uncomfortable.

"I spent the whole long week at Lone Log alone with Mrs. Mac, who runs the camp, and how weary I got of the loneliness. It is very beautiful up there in the midst of mountains and pines, but I did long for some human life about. There was no one nearer than six miles. I thought at least the teamsters would be there. Added to it all, I got a bad cold, an attack of neuralgia, and at the last Mrs. Mac got ill, and then I was worried about her. Finally, on Monday, she went in to the doctor, and a teamster came out, so we kept each other company that day, but I did not mind that. I found him a splendid, manly fellow, and it was a relief to have him there and Mrs. Mac in town. That afternoon, we (the teamster, Albert and I) drove up to meet the folks coming down from the mine, and an exciting drive we had. The snow was very soft and deep, and the horses plunged about in it and got nearly crazed with fright at getting no foothold; it was pitiful to see them,—poor things. It took us over two hours to go three miles. I enjoyed the novel drive except that it was so hard on the horses. Nature was beautiful up there in the timber and the silence, with the deep snow. Finally we met our men and got back to camp about 7 p.m., and had to cook our own supper.

"It was amusing to see the men do house-work and then eat. Such colossal appetites as they had! Next morning after cooking breakfast and washing things up, we came down here, and here we must remain until Thursday, when, (D.V.), the stage comes to take us out. One place the stage stops at is called the 'Hog Ranch,' it has stopped the long ages down, and tho' Mr. B—— says there are no hogs there now,—only the man and his wife who keep the place—it will always and ever keep that name. The woman brings the 'grub' in, piles it on the table when one stops there for lunch, goes out of the room, saying, "If any man wants more let him squeal'—carrying out the metaphor well, you see. Our guide doesn't patronize that place, so we were spared hearing this on the way up, and stopped at a modest little place where they provided us fresh milk and eggs, and home-made bread and pies, of course—but things were nice.

"If we get home when we expect to, i.e., Sunday night, we shall have been away just a month—much longer than we expected to be, but the enforced week of idleness here, will do somebody that I know good. We had glorious spring weather when we first came in February. I picked fresh pansies in the garden here, but the last few days have been quite cold again, with quite a little snow this morning."

* * *

NORTH OF ENGLAND LETTER.

As Public Ownership is to be discussed in your columns it may not be inappropriate for me to cite a few facts in amplification of those given by Mr. Noble. Apart from any opinions one may hold on the subject, it has to be admitted that high local debts in England are not always associated with high rates. On the contrary, towns may be pointed to where debts are high and rates are low. Newcastle-on-Tyne has a debt of £33 per head, and its rate (excluding poor rate) is 5s. 7½d. in the pound. Now, in Norwich, where the debt is £3 13s. 4d. per head, the rate is 5s. In Edinburgh the debt is £9 14s. and the rate 2s. 8d. In West Ham, where the debt is £5 4s., the rate is the calamitously high one of 7s. 5½d. These indications will show how treacherous is generalization on the matter. A host of circumstances play around each case, and isolated instances give little ground for safe deductions. The town of Preston has been named as one in which rates are phenomenally high. Be it said that 1s. 7d. out of the 10s. named is for poor law purposes and 1s. 11¾d. is directly due to a somewhat courageous speculation in docks and dredging designed to make Preston a seaport.

Parsimony in the past is a partial cause of our high rates. In many an English town ratepayers have reason to curse the false economy and the evasions of responsibility perpetrated by an earlier generation. Another partial cause of the condition lies in the fact that we are made altruists against our wills, and are now paying for undertakings which will be presented as clear bonus to posterity. Our debts are all terminable ones, and are being wiped out fractionally from year to year by payments into sinking funds. And before fainting away under the shock of seeing the total of debts in print, one must give an eye to the very considerable assets. Some 38 per cent. of our local debts are represented on the other side of the balance sheet by waterworks, gas works, electricity works, tramways and markets. Street improvements account for 12 per cent., sewage systems another 12, parks or open spaces 3 per cent., and housing schemes 2 per cent. It is the case also that considerable payments are made by some municipal undertakings in relief of rates. In Carlisle 1s. 5d. in the pound is thus earned. That is an extreme instance. One can find towns in which trading leads to loss or to such trifling profits as are indistinguishable from none at all.

In Britain, "municipal trading," as it is called, has bitter enemies and injudicious friends, and their words are not always to be accepted as final. Much that is right is mingled with much that is wrong, in speech as well as in deed. But if any reader cares to call on me for the elucidation of any simple facts about England which may be of value in Cana-

dian application, some effort will be made to present the unvarnished truth.

Conceivably, some of these municipal matters may afford an interesting study for members of the Canadian Manufacturers' Association. Two hundred are to visit us in June, and very unjustifiably are going to dismiss Manchester, Bradford, Glasgow and the like centres with a single day's stay in each. The half dozen provincial cities thus far named are deserving of more attention, and the local hosts would be proud to have more time with their distinguished visitors. Socially, the C. M. A. delegates will find themselves unequivocally welcome. Whether local manufacturers will be in any haste to reveal their methods of work will depend somewhat on the effects of Canadian tariffs on particular industries. Our mill-owners are now less generous than aforetime in according permissions to view.

Mr. J. B. Jackson, Canada's Commercial Agent at Leeds, recommends woolen manufacturers to import from Yorkshire "heads of departments who are graduates from the Textile Schools." It is possible to overrate the cash value of technical school education. As a matter of fact, brilliant schoolmen in the textile industry have proven dismal failures in the complexities of competitive manufacturing. Graduation in the schools may be no drawback, but candour compels the assertion that it may be of no positive advantage. Safer guides are a manager's actual success and the diversity and completeness of his training in working life. To the wrong man technical education is of no service, and the right man gets his education either in the college or in the mill.

The same gentleman advises wealthy manufacturers to institute scholarships which shall enable the Canadian youth to take courses of study at the Yorkshire College. Not a word can be said against that proposal. But it will be worth the most elaborate care to weed out the undesirable among the applicants. The theoretician is at a discount in the factory, and the boy who has already established a title to proficiency and adaptability is the one who can make the best return to the Dominion for his free passage through the classes.

Boston shippers of apples are awakening to the fact that prices in Manchester are ruling higher than in Liverpool. During the season from 25c. to 75c. more a barrel have consistently been obtained for fruit of identically the same kinds. So soon as the news becomes general something like parity will be established by a new influx of consignments to this port. Considering that freight rates are the same, either to Liverpool docks or beyond them to Manchester via the Ship Canal, shippers have little to lose by experimenting in Manchester market, which does draw a very large congregation of buyers, and promises constantly to draw more.

Out at Waterfoot the other day one saw slippers, chiefly of felt, being made for Canada. Thick Congress shoes, Arctic cloth slippers and the like are simple to look at. The complexity of sub-division of their manufacture is amazing. Doubtless those imported seem cheap. What, then, are the coarse felt slippers for children at four cents per pair, less substantial discount? Yet the operatives are well paid as wages go here. Girls earn up to $5 and men to $10 a week in the slipper factories. Were the colonial markets all closed, one wonders where the 70,000 pairs per week made in this one factory alone would all be worn.

Canada is being talked up and written up still in financial circles. Her companion in argumentative prosperity is Argentina. It would seem that the ordinary investor is duly impressed with Canada's possibilities, and the time is by no means inopportune for asking for British capital for genuine enterprises. But our investors are not ignoring facts and figures. They are not in the mood for embracing wildcats, as some conspicuous failures in internal attempts at flotation have witnessed.

Apart from prospective improvements in Canadian trade the bulls are drawing attention to the huge growth of importation within the six past years. It says much for Canadian elasticity to find it recorded that in that time her external purchases have more than doubled. Such a development is impossible in the time in any of the older countries, and the swelling purchasing power it certifies to becomes a potent influence upon the man with money to invest.

NORTH COUNTRY.

Manchester, March 17th.

⁂

ANSWERS TO ENQUIRERS.

M. A., City.—The milreis of Brazil is stated as worth 2s. 3d. sterling, or about 55 cents; Exchange varies.

Bank Clerk, Rat Portage.—The total liabilities of the Canadian banks were at December last $587,918,063 apart from capital. And their assets were $729,915,962.

Manufacturer, St. John.—The company you enquire about has offices in the Merchants Bank building in Montreal; its name is the Mite-E-Motor Co., The directors are five in number: three of Montreal, one of Toronto, one of Watertown, N.Y. Of the Watertown man we know nothing; the Toronto man we find to be a mechanical engineer of small means; of the Montrealers, one is a stock broker who deals in unlisted securities, another used to be a jeweller and is now a promoter. Cannot advise you to buy any of the stock.

⁂

TRIAL OF J. B. HILL, MERCHANT, OF ST. THOMAS.

"In all commercial transactions honesty is the only thing that men can rely upon between man and man, between firm and firm. If that is gone, then commercial life is gone entirely in our country. If we have not honesty between merchants, wholesale and retail men, then the whole fabric of our commercial enterprise is shaken. It depends upon the honesty, the truthfulness in the dealings between man and man to establish a proper commercial community. If that is gone, then goodbye to all honesty in dealings in other matters. That is the foundation of the whole of society."

In such words did Judge Winchester comment upon the evidence given before the jury on the conclusion of the trial of J. B. Hill, of St. Thomas, at the General Sessions on Thursday of last week. After being out an hour and a half, the jury returned a verdict of guilty on the charge of obtaining goods under false pretences.

Reviewing the evidence, His Honor pointed out that Hill, as customary, came to Toronto in February, 1904, to give orders, bringing his milliner with him. Previous to that, in the fall of 1903, one of the travellers for the company had received an order from Mr. Hill for about $950 worth of goods.

Mr. Reid, one of the McKinnon firm, stated that he asked Hill when in Toronto how he was getting along, what his present position was. Hill told him it was just about the same as it was last year; there was not much improvement; that he had been taking stock and that he had a statement. Mr. Reid asked him then to let him have a statement. No goods had been sent up to this time. On the 4th of March Reid got the statement, upon receiving which he directed the goods to be sent, and on the 6th of March those goods were sent, and subsequently received by Mr. Hill, as entered in his own books.

Hill's Actual Position.

"The question is," continued His Honor, "what was the honest position of Mr. Hill at that time? Two or three months afterwards four of the largest creditors in Toronto met and

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal—The Quebec Bank.

discussed the position of Mr. Hill, and sent a bookkeeper or accountant over to look into his books. In June Mr. Lee, an accountant, went there; and in consideration of these matters, gentlemen, it is well to look into these small details, because they lead your minds to exactly what occurred and what was the motive in all these matters.

"Now, when Mr. Lee applied to Mr. Hill in St. Thomas to go over his books, Mr. Hill refused to allow him to go over them in his own office. Mr. Lee said: 'I will take the books over to the hotel.' He stated that Mr. Hill objected to his being seen around there. Mr. Lee did take two books—the bills payable book and the ledger—over to his hotel, and went over them that night, and returned early the next morning and told Mr. Hill that his statement of the 4th March was incorrect; that, instead of $19,000 being the amount of his indebtedness to his trade customers, it should have been $38,000 or $39,000. Mr. Hill did not object to that statement. He said: 'Well, then, if that is so, then the stock must be so much greater;' and he left it there.

A Ledger Page Cut Out.

"After that, gentlemen, one of the most important pages in that book was cut out by Mr. Hill, that is, the merchandise account, which would show merchandise on hand at the end of any month. What was it cut out for? He says there was some error in it, or it was blotted. Now, gentlemen, is this a story that is likely to appeal to your minds as an honest explanation of why that page was cut out? And it was cut out after he heard the statement made by Mr. Lee as to his position at that time. It is these small things that you have to consider in arriving at conclusions as to who is and who is not telling the truth in connection with these matters; because it is not when a man says 'I did not do it,' that you are to rely on the statement, or when a man says, 'I did do it,' but you are to find from the facts, from all that has taken place, whether it is likely that he did or that he did not do what he denies."

Owed $23,000 to Friends.

Dealing with Hill's own evidence, His Honor said: "He admits that he was a school teacher before taking up this business; and he must be a man of some education to be a school teacher. He goes into storekeeping in a small way, so small that he only had $100 of capital. He succeeds in building up a good business, and for that he is to be commended;; but, gentlemen, how is that built up? You have heard his statement of borrowing money right and left, from every relative and friend apparently that he could borrow it from. He gives you the names of many. In the year 1903 he had $23,000 or $25,000 borrowed from friends.

"These sums of money were not put in any book or in the bills payable book, because he considered them individual debts, not trade debts. He distinguishes them. But, gentlemen, you cannot distinguish a debt when you have to pay it. It has to come out of the assets belonging to Mr. Hill. And what were his assets? That business and that store. He had a branch, too; which is a part of the business. So all his assets were liable for that $25,000, just the same as they were liable for the McKinnon debt.

Knew of His Liabilities.

"At the time that he spoke to Mr. Reid, in February, or when he gave that statement to him in March, did he know about these liabilities? Why, gentlemen, he admits that he did. He says up to that time he had been borrowing, even that previous month he had been borrowing this money, and never put it in. He knew his liabilities.

"He admits that he was behind, going behind fast, and had gone behind considerably in 1903; and if you believe the evidence of Mr. Lee, he was behind $20,000 that year. Mr. Lee says that without considering this $25,000 of personal debts, which Mr. Hill says were not taken into account at all in this statement, there was over $20,000 of trade debts that he did not take into account in that statement of March, 1904.

"Now, it was stated by counsel for Mr. Hill that McKinnons have not suffered very much, and that there was no false representation upon which they acted, and they received more money than would cover this indebtedness. Counsel forgot to tell you, gentlemen, that at the time they received that $3,500 there was an indebtedness of $6,500 then due in addition to this $2,244—in addition to the amount that is set forth in the indictment. The amount as set forth in the indictment has never been paid—not one cent of it, gentlemen. That $3,500, as Mr. Reid says, went on the old indebtedness.

The Real Question.

"Now the question is this: Did Mr. Reid rely upon that statement as being truthful? He swears he did. If you believe his statement, then you must come to the conclusion that he would not have sent those goods had he not received that statement and relied upon it as being honest. This is what he says, and if you believe his statement, then you must believe that he did send those goods relying on the statement as being truthful. Now, if you come to the conclusion that that statement was made by Mr. Hill, knowing the position in which his business was, for the purpose of getting these goods, and they were sent relying on the truth of that statement, then you find him guilty of false pretences. That is a false pretence; that is obtaining goods under false pretences. If, however, you find that Mr. Hill did not make the statement dishonestly, for the purpose of getting those goods, then you should bring in a verdict of not guilty. Gentlemen, if you believe that, then is Mr. Hill in a position to say that that statement is an honest one? Why was that statement made, gentlemen?

"There is another way of looking at it, in order to weigh the evidence. Why was that statement made? It was made for the purpose of getting credit. He had had a line of credit for some years at the McKinnon Company, $4,000, provided he kept up his payments. He did not keep them up. He was behind, and that was the reason that Mr. Reid was careful about it."

⁂

CANADA IN FRANCE.

A correspondent of the Monetary Times, living in the South of France, tells us that with but little exception, ours is the only one among the papers he receives in which he finds any information about Canadian industrial or other shares, apparently because such are rarely dealt in in France. He says his Paris agent can tell him next to nothing of Canadian securities, other than Grand Trunks and Canadian Pacifics. And he asks where he is to look for a guide to quotations of such stocks on the Paris or Brussels market—since he is too far away to deal in them in Montreal?

We reply that among our foreign exchanges there is none save Le Portefeuille de l'Epargne, published every Sunday at 14 Rue de la Grange-Bateliere; (subscription five francs per year outside of France), which quotes Canadian securities. In the issue of 12th March of that journal, we find London quotations of several Canadian municipalities, e.g., Quebec, Montreal, St. John, St. Catharines; of ten Canadian banks; of several railways (among them, the Calgary and Edmonton, and the Victoria-Sydney), and industrials, including Crow's Nest Pass Coal, and Canadian General Electric, Montreal Telegraph, and Richelieu-Ontario Navigation, besides Nova Scotia Steel, Dominion Coal, and Dominion Iron and Steel, and a few British Columbia mines, such as Ymir and Le Roi.

Transactions in Canadian securities on the Paris Bourse, however, are few and far between. We can find in this Paris paper only Canadian four per cents., and Quebec 3s. of 1894, and 4½s. of 1880, quoted, and shares in the Crédit Fonciere Franco-Canadien. These last are priced at 415 and 481 francs, according as they are 3 or 3½ per cents. Among the "Sundry Mines" all over the world, whose shares are quoted, we note the West Canadian Collieries, given at 34 francs, and the Canadian-American Coal and Coke Co. at 23 francs—whatever and wherever these may be located. In the bourses of Lille, Lyons, Frankfort and Brussels, no Canadian securities of any sort appear in the lists. Among the "Valeurs Etrangères" appear Sao Paulo, and Mexican Power and Light.

But the present are days of comparatively small things, we believe, in Canadian Industrials. As this country develops and its really remarkable resources become known to peoples on the Continent of Europe, it may be reasonably expected that scientists and capitalists from France, Germany and Holland will pay relatively much greater attention to industrial investments here than has ever been done by England. The United States have already shown their faith in Canada's future by the investments and purchases they have made here, and there are many more millions of dollars still to come.

To Our Subscribers

MONETARY TIMES and the "BUSINESS MAN'S MAGAZINE AND BOOK-KEEPER." ═══ A PRACTICAL COMBINATION

The publishers of The Monetary Times take pleasure in announcing that they have arranged with the Book-Keeper Publishing Company, Limited, of Detroit, Mich., for a weekly copy of The Monetary Times and a monthly copy of the Business Man's Magazine and Book-Keeper, to be furnished at a combination rate of $2.50 per annum paid in advance. In addition, every subscriber under this arrangement will also receive, ABSOLUTELY FREE OF CHARGE, a copy of

BUSINESS SHORT CUTS

A handsomely bound book of 160 pages. Bound in art boards. Over a hundred ways of saving time. It contains the "boiled down" experience o a hundred successful business men. How to save ten minutes here and an hour there. How to do your daily work more easily. Worth ten dollars to any business man. Price $1.00. The BOOK-KEEPER PUBLISHING CO., Limited.

THE BUSINESS MAN'S MAGAZINE AND THE BOOK-KEEPER

The only magazine in the world for the busy man. Published monthly at Detroit, Mich. Over 200 pages of good solid business information each month.

Meetings

REPORT OF THE DIRECTORS
OF THE
Bank of British North America

PRESENTED TO THE PROPRIETORS AT THEIR SIXTY-NINTH YEARLY GENERAL MEETING.

The annual general meeting of the proprietors of the Bank of British North America was held on Tuesday, March 7th, at the office of the corporation, No. 5 Gracechurch Street, London, Mr. E. A. Hoare, presiding.

The Secretary (Mr. A. G. Wallis), having read the notice and the auditors' report.

The chairman said: Before making any reference to the balance-sheet which is in your hands to-day, I must say a few words respecting one paragraph in the report issued with the balance-sheet of June 30th last. We then said:—"The sum of £4,180 has been set aside out of the profits of the half-year to meet the depreciation in the bank's investment in Dominion of Canada bonds, which will hereafter stand in the books at 97." Having been obliged in December, 1903, to set aside out of profits the sum of £9,000 to provide for depreciation in our Consols, we felt that it was rather hard that this further appropriation in respect of our Canada bonds should be necessary; but you no doubt understood perfectly well that it was rendered necessary by market fluctuations alone, and that, as the quotation on the Stock Exchange had fallen, it was necessary for us to write down our investment to that level, although we are well aware that on its merits a Dominion of Canada bond is worth more to-day than it ever has been before. It is satisfactory to be able to add that a recovery in values has already taken place, and that our investment is to-day again worth par. I will now pass on, and make some observations on the balance-sheet to December 31st, 1904. Deposits and current accounts, compared with December, 1903, show an increase of £311,000; 77 per cent. of this increase is in the savings bank department, which is daily growing in favor in Canada. Bills payable and other liabilities show a decrease of £620,000. This decrease consists almost entirely in the bills payable, which are £550,000 less than at this time last year. This reduction does not signify any diminution of the bank's business generally, but it is the reflection of a long period of inactivity in New York, to which I shall have to refer again when I speak of our profits. Notes in circulation show an increase of £32,000 compared with this time last year. But here I must explain that the figures at December 31st do not represent in this or in any year the highest point of our circulation. It is in the months of October and November, when the harvest is being moved, that the circulation reaches its maximum, and by December 31st the ebb-tide has begun and made some progress.

Addition to Reserve Fund.

By an addition of £20,000 to our reserve fund the total is raised to £420,000. I would remind you that the whole of this sum has been saved out of profits, while the reserves of many of our friendly rivals have been largely augmented by the premiums obtained from the issue of new capital. On the other side of the account, cash and specie are £67,000 less than this time last year; but cash at call and short notice is £125,000 larger, so that the total under these two headings shows an increase of £57,000. The cash and specie is 37 per cent. of our immediate liabilities, while the two items together amount to 35 per cent. of our total liabilities to the public. Investments, so far as regards our British Government stocks, show no change, while our Dominion of Canada bonds, as already explained, now stand at 97 instead of 100. Other securities, at £133,000, show a decrease of £14,000. In Canada, as in the United Kingdom, the values of all high-class securities continued low during the half-year, but a strict revaluation of these securities shows that they stand in our books at less than actual values. Bills receivable, loans on security and other accounts show a decrease of £323,000 compared with this time last year; but I have nothing special to say respecting these figures, which are not due to any other cause than the ordinary fluctuations of our business.

New Bank Premises.

Bank premises show an increase of £21,000 during the year. Our actual expenditure has been £31,000, but, as you have seen, we have taken from the profits of the half-year the sum of £10,000 in reduction of this account. At December 31st, 1901, our premises account stood £120,000; so that in these three years we have spent £70,000. Had it been possible, we should gladly have avoided this large increase in the account, but I have no hesitation in saying that we had no choice if we were to retain our position in Canada. The bulk of the money has been spent in Winnipeg, and although I am myself responsible for urging upon my colleagues the necessity of a proper banking house in that city, I am going to add that it has been well spent. The site, which was purchased in October, 1902, is one of the best in the business part of the city, and it is worth a great deal more to-day than it was then. The building which we have erected upon it is not only well adapted to all our banking requirements, but is also an ornament to the city, which is rapidly increasing in importance, population and wealth, and if we had been influenced chiefly by motives of economy in this matter we should have made a great mistake. At Toronto we have carried out extensive internal alterations, whereby we not only secure first-class banking accommodation, but also earn a considerable rental. At Ottawa our building was right enough, but the situation was wrong, and it was necessary to make a change or to be forgotten, so we made the change, and this was the next heaviest item. Then we had to build a manager's residence at Winnipeg, where the demand for houses is so great that it is almost impossible for a married officer to obtain accommodation, even at an exorbitant rental. At Rosthern until quite lately we conducted our business in a little wooden shanty, of which I had a photograph taken when I was there in 1903. If you will come and look at a print of that photograph after the meeting you will thoroughly appreciate that it was not a leaning to extravagance which led us to purchase a modest brick building, where we might conduct our business in safety. The bank at Victoria has been practically rebuilt, and although I have not seen it, I believe it is now a thoroughly modernized and suitable building. There has been other expenditure at other branches, but nothing of importance. I have spoken at some length on this point, so that you may thoroughly understand our reasons for the present transfer of £10,000, and for further transfers which will have to be made in the future—not because there is not ample value, and more than ample value, in property, but because we do not wish to see this account remaining at so high a point.

Profits for Year £96,000.

Finally, I may point out that our profits this year, after making ample provision for all accounts which we consider to be in the least doubtful, amount to £96,000, exclusive of those sums which you so generously allow us to appropriate for the benefit of the staff, compared with £88,000 in 1903. We regard this as particularly satisfactory, because, as I have already stated, the year 1904 was one of inactivity in New York. As you are aware, we employ a large part of our resources at call and short notice in New York, and during 1904 the average rate for call money did not exceed 1½ per cent., and for time money 3 per cent. Such were the general conditions of the money market in New York, over which we have no control, and the result was that the contribution of profit from that office was largely reduced. That need not trouble you at all, for these conditions will not be permanent, and a return to greater activity will certainly be seen, although I am not going to venture to predict the date. In the meantime, we consider that it is eminently satisfactory under such circumstances to see a substantial increase of £8,000 in the total profits of the year, compared with those of 1903.

Industrial Conditions.

In general business the year 1904 was not without its vicissitudes. The winter 1903-4 was of exceptional severity, so that traffic by road and railway was only carried on under great difficulties and expense. This interfered with the shipment of produce and the distribution of merchandise, and also had a serious effect upon agriculture in Eastern Canada. The lumber industry did not enjoy so much prosperity as during recent years, chiefly owing to a diminished demand from the United Kingdom, which was only partly compensated for by the steady consumption of the United States. The dairying industry, which is of such growing importance in the East realized considerably less money for the producers than in 1903, and had it not been for the good harvest in the West, we should probably have seen a partial setback in the growing prosperity of the Dominion.

The Wheat Crop.

Naturally, the progress of the crops in Manitoba and the North-West Territories was watched by all in Canada and in the United Kingdom with anxiety, for the success or otherwise of the harvest in that great country is no longer a question of merely local interest. In certain parts of the country the crops were damaged by rust, and in consequence of this the grade of wheat was not so high as the hopes of the farmers had led them to anticipate. The crop was, however, bountiful, being estimated at sixty million bushels; while the inferiority in quality was more than made up by the higher price obtained, and it is estimated that the wheat alone will realize forty million dollars. The influx of settlers consequently continues, many still coming into the country from across the boundary, and bringing with them not only capital but valuable experience. New lands are being constantly taken up, while farmers already on the ground have been adding to their holdings. This is, perhaps a weak spot at the present time, for, encouraged by the success of past seasons, and seeing the price of land steadily advancing in value, no doubt many have been tempted to make larger purchases than their capital justifies. That the price of land should advance under the influence of a constant stream of settlers is only natural but there is reason to fear that the speculator has also contributed to this movement. and this is much to be regretted. for speculation of that sort actually retards the progress of the country. It is also noticeable that the number of commercial failures in Manitoba and the North-West Territories has increased. although the total of such liabilities has not increased in like proportion. It is difficult for us who remain at home, or perhaps pay an occasional visit to the West to realize the amount of self-restraint that is necessary in these western communities. if business is to be kept on a safe basis; the potentialities of the country are so immense. the genuine opportunities for extension are so frequent. and the very climate is so conducive to a sanguine temperament. But we are convinced that the true development of the country in the future is dependent upon the prudence of those who have the power of granting or withholding credit. and we fully recognize our own share of this responsibility.

The U.S. "Drawback."

No reference to the North-West would be complete without some mention of the new departure by the Government of the United States. with reference to the importation of wheat from Canada. Hitherto wheat has been subject to a duty of 25 per cent. There has been no alteration in the law but there is in existence a law by which the United States Treasury may permit a "drawback" of 90 per cent. of the duty paid on raw materials used in manufacturing articles intended for export only. In future wheat is to be included amongst such raw materials. I do not intend to wander on to the debatable ground of fiscal questions. but this action by the United States Treasury may have effects not at present contemplated. To the wheat grower in the West it must surely be beneficial. inasmuch as he will find a new market open to him where the price of his produce is. as a rule. higher than that to which he has been accustomed. Those who may wish to pursue this interesting subject further should refer to the Commercial supplement of the Times of February 6th and 20th. or to the Canadian Gazette of February 9th. Since the harvest the weather has been unusually favorable for farming operations. and I have seen it stated that the land already under plough for next season is 500.000 acres in excess of that at this time last year. and that a reasonable estimate of the land under wheat in 1905. is 4½ million acres.

Mining Industries.

Passing on westwards. the mining industries of British Columbia have shown considerable activity during 1904. and a rough estimate compiled by the Provincial Government values the mineral output at $19.775.000. This shows an increase of more than $2.000.000 over the production of 1902 and 1903. but just falls short of 1901, when the output reached $20,000.000.

This increased production has not. however, been accompanied by any better results for the shareholders in either the Canadian companies or those established in the United Kingdom, and in all alike. profits. where existing at all. have been meagre in the extreme. Efforts are now being made by influential persons in Canada and the United Kingdom. representing some of the principal companies in the Rossland Camp. to bring about an amalgamation of interests. and should these efforts meet with success there should be brighter days ere long. In the Yukon. on the other hand. the output of gold showed further diminution. barely reaching $10,000.000 in 1904. compared with $11.000.000 in the preceding year. The population of Dawson is also considerably less than it was a year ago: but this is by no means surprising, for in placer mining camps as the auriferous ground is worked out the miners move on to more attractive fields of labor; and so it has been in this case. the exodus to the goldfields of Tanana and Fairbanks. having been on a large scale. Apart from fresh discoveries that may be made. either of alluvial or quartz. the future of the camp appears to depend chiefly upon an adequate water supply, and I understand that efforts are being made towards the attainment of this object. Whatever may be the output for the future, it is interesting to look back on the results of the camp, since it first came prominently into notice seven years ago, for during this period the value of gold recovered has certainly not been less than £20,000,000. These figures must surely entitle it to rank amongst the wealthiest placer mining camps in the world. On the Pacific Coast the canning industry met with poor results, the catch being small. Last autumn our general manager visited England by invitation of the court, as there were matters which we desired to discuss with him personally. His visit was most valuable; we availed ourselves of the opportunity of frequent consultations with him, which we trust may be productive of good in the future.

A vote of thanks to the directors, general manager and staff was unanimously passed.

THE BANK OF BRITISH NORTH AMERICA.

Balance Sheet for the Half-Year Ending 31st December, 1904.

Dr.

To capital ... 20,000 shares of £50 each, fully paid.			$4,866,666 66
To reserve fund ...			2,044,000 00
To deposits and current accounts ...			17,887,704 44
To notes in circulation ...			3.017,607 30
To bills payable and other liabilities, including provision for contingencies ...			10,979,817 73
To rebate account ...			80,287 90
To liabilities on endorsements..		$1,122,256 57	
To profit and loss account—balance brought forward from 30th June, 1904 ...		176,817 12	
Dividend paid October, 1904		146,000 00	
		$ 30,817 12	
Net profit for the half-year ending this date, after deducting all current charges, and providing for bad and doubtful debts ...		298,527 83	
		$ 329,344 95	
Deduct:—			
Transferred to bank premises account.	$48,666 66		
Transferred to reserve fund ...	97,333 33		
Transferred to officers' widows' and orphans' fund	2,500 00		
Transferred to officers' pension fund	2,771 30		
		151,271 29	
Balance available for April dividend ..			178,073 66
			$39.054.157 69

Cr.

By cash and specie at bankers and in hand ...		$3,645,661 43	
By cash at call and short notice.		7,935,271 00	
			$11,580,932 43
By investments—			
Consols, £225,000 at 86 ...	$941,700 00		
National war loan, £50.000 at 90	219.000 00		
Exchequer bonds, £25.000 ...	119.461 46		
		1,280.161 46	
Dominion of Canada bonds, £140,000 at 97 ...		660,893 33	
Other securities ...		650.142 00	
			2,591.196 79
By bills receivable, loans on security, and other accounts ...			23.853.783 46
By bank premises, etc., in London, and at the branches ...			877.589 28
By deposit with Dominion Government required by Act of Parliament for security of general bank note of circulation			150,655 73
			$39.054.157 69

Note.—The latest monthly return received from Dawson City is that of the 30th November, 1904. and the figures of that return are introduced into this account. The balance of the transactions for December with that branch has been carried to a suspense account, pending the receipt of the December accounts.

We have examined the above balance sheet with the books in London, and the certified returns from the branches, and find it to present a true statement of the bank's affairs.

Edwin Waterhouse,
G. Sneath,
Auditors.

Of the firm of Price, Waterhouse & Co., Chartered Accountants.

London, 23rd February, 1905.

LIFE INSURANCE NOTES.

Mr. C. T. Gillespie, general manager for Canada of the Provident Savings Life Assurance Society of New York has been on a visit to Winnipeg, and has appointed Mr. John C. G. Armytage, of that city, manager for Manitoba and the Territories, with headquarters in Winnipeg.

In a paper read last week by Dr. E. M. Von Eberts before the Montreal Insurance Institute, that medical man made the recommendation to life underwriters that they should decline the applications of persons who had not been vaccinated, showing how smallpox fastens upon unvaccinated persons. He also presented some statistics taken from the experience of life assurance companies showing that total abstainers lived longer than persons who drank malt and spirituous liquors.

The Puget Sound Life Insurance Company of Seattle, the first corporation of its kind formed in that part of the United States, has filed articles of incorporation, says the Review. Offices have been opened on the second floor of the Alaska building in that city.

The validity of the suicide clause in an assessment insurance policy was affirmed last week by the Ohio Supreme Court. The suicide clause has now been sustained by all the Ohio courts.

A cable just received from Sydney, the principal office of the Mutual Life Association of Australasia, states that new business for the year 1904 amounted to £639,681 net, the total income was £308,580, the rate of interest realized £4.451 per cent., and the funds reached £1,868,774, an increase of over £100,000 on the figures at end of previous year.—Ins. Record, London.

According to a report prepared by Dr. Laberge, chief health officer of the city, the average yearly death rate from consumption in Montreal is nearly 700, and the total death rate is about 7,000. In the year 1900, the total deaths were 7,351; next year, 6,915; in 1902, 7,954, and in 1903 they were 6,895. The deaths in that city from consumption show a fairly steady decline, so that probably the efforts of the Anti-tuberculosis League are bearing some fruit. In 1900 there were 692 deaths from that dread cause; next year, 647; in 1902, 664, and in 1903 only 633.

At the annual meeting of the Massachusetts Grand Lodge of the Ancient Order of United Workmen, the other day, the Grand Master Workman submitted a recommendation looking to the appointment of a beneficiary commission, with power to employ a competent actuary to ascertain the standing and condition of the Order, devise a level graded rate of assessment, and report to the Executive Committee of the Order by the first of next December at the latest.

A startling event was the finding of the body of A. W. Murton, a well known life insurance agent, on Wednesday morning last, beside the G.T.R. tracks at the western entrance to High Park, Toronto. The wheels of a train evidently had passed over the head, and the legs were broken. It is supposed Mr. Murton fell off a train, and was run over and that the body afterwards was picked up by another train and thrown to the spot where it was found. Arthur W. Murton was born in Guelph about fifty years ago. From his earliest days he was interested in life insurance, and except for a short time, when he was manager of the Newmarket branch of the Federal Bank, he had always been in the employ of life insurance companies. For the past eighteen years he was with the Canada Life. Lately he had been employed as inspector of the various agencies in western Ontario. Although his headquarters were at Guelph, he resided in Toronto.

FIRE INSURANCE NOTES.

It was proposed at the Philadelphia March meeting of the Western Insurance Union to change the time of its semi-annual meeting from March to April, but this was defeated. The annual meeting will be held on the 20th September at Niagara Falls.

It has been explained to us that the dividend paid by the Standard Mutual Fire Insurance Company was for 1903, although it appeared in the 1904 statement, and therefore the strictures we passed upon the company for paying a dividend after the Toronto fire were not deserved.

The Rosario fire brigade has recently received a steam fire engine. It is to be hoped that it will share a better fate than its predecessor, which was supplied by the insurance companies, and was taken by the Governor of the Province for irrigation purposes on his estancia.—Review of River Plate.

It is stated that the safety plug was found in its proper position in the case of the exploded boiler, which killed fifty persons in a Brockton, Mass., shoe factory last week. Usually in cases of explosions this plug disappears. Its presence, it is stated, indicates that there was water in the boiler at the time of the explosion.

The United States Review tells of an occurrence which contains a warning. A girl in Scranton, Pennsylvania, was badly burned last Saturday, when she threw a smouldering match in a tray in which were some celluloid combs. The combs blazed up and set fire to her clothing. Her mother saved her from burning to death by wrapping carpet about her. This is but another instance of the celluloid hazard.

There are thirteen mutual fire insurance companies doing business in the Province of Quebec. The aggregate of their policies was $69,501,000 for 1904, as compared with $61,137,000 for 1903; assets amounted to $2,027,000, as against $1,753,000 in 1903; income was $509,141 last year against expenditure of $425,280, of which $223,886 was for losses. The Inspector of Insurance for that Province is Mr. A. O. Dostaler. His return is made up to the close of August in each year.

Nearly three hundred mutual fire insurance companies were represented at the tenth annual meeting of the National Association of Co-operative Mutual Insurance Companies of the United States, held in Chicago, one day this month. They ranged from the small town mutuals of the West to the factory mutuals of the East. President W. D. Forbes, of Des Moines, Iowa, reviewed the year and outlined the reforms that are now in progress. The mutual men report their business as growing rapidly because of the increased rates of stock companies, and that the tendency is toward better methods and the accumulation of reserves, so as to strengthen their indemnity.

Fire Marshal Davis, of Ohio, in a recent bulletin to the public, entitled: "Consider the Ash Pile," says: In Ohio, last year, 91 buildings were fired by hot ashes being put in wooden boxes or thrown against the siding of a house or shed. This figure does not include the fires from tobacco pipe ashes nor those caused by hot ashes falling from stoves or grates. The inspectors of this office find many wooden ash boxes in tenement houses; closets sometimes are occupied by an ash heap, and ash piles against wooden fences and out-houses are common. Ashes not hot enough to ignite the side of a wooden receptacle will char it. The charcoal thus formed is a tinder which will blaze if any greasy waste comes in contact with it while hot.

The new general manager of the Caledonia Insurance Company, of Edinburgh, Mr. Robert Chapman, who succeeded the late Mr. David Deuchar, about the beginning of the present year, has come to visit the United States and Canada, and incidentally to look over some of the agencies. He reached New York a fortnight ago or more, and is now on a visit to Canada after seeing Niagara Falls. Accompanying him, when he reached Toronto on Saturday last, were Mr. Charles Post, manager of the company for the United States, and Mr. Lansing Lewis, its general manager for Canada, and the party left this week for Ottawa and the East. Mr. Chapman is described to us by an insurance man, who has met him, as "a brisk and agreeable young man" (he is really about 45). He was formerly manager of the company's London branch.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 28th Feb., 1905.

		CAPITAL				LIABILITIES		
		Capital auth rized	Capital Subscribed.	Capital paid up	Amount of Rest or Reserve Fund.	Rate per cent. of last Dividend declared.	Notes in circulation.	Bal. due to Dom. Gov. after deducting advances.

J. M. COURTNEY,
Deputy Minister of Finance.

THE ROBB ENGINEERING COMPANY, LIMITED, OF AMHERST, N.S.

This is one of the industrial concerns of which the Maritime Provinces have just reason to be proud. Increasing business has compelled them to erect a new machine shop during the past summer in which to manufacture their famous Robb-Armstrong engines. This building was designed by the general superintendent of the company, Mr. A. G. Robb, and built by Messrs. Silliker & Co., Limited, of Amherst. It is 250 feet long by 100 feet wide, has a heavy stone foundation, the walls are of brick and the roof of mill construction, consisting of three-inch plank, carried by massive Southern pine rafters, spaced eight feet centres. The windows are carried as high as possible, and consist of panel openings, containing from six to nine sashes in each opening. Light is free, and in designing the new shop the Robb Engineering Company has endeavored to get their full share of it within the building. This is obtained by the use of 6,114 panes of 12 by 16 inch glass, equal to 8,152 square feet.

The building is constructed on the slow-burning principle, of very large timber, with very thick floors, consisting of three-inch spruce, overlaid with one inch of hard wood, which can be renewed as it wears. The ground floor is bedded on the earth, thoroughly tamped, over which is spread a layer of sand to the depth of about two inches, and next to the flooring is a layer of ordinary wood shavings, the combination almost entirely preserving the floor from rot. In other respects, such as the permanent interior whitewash, the fire risk has been reduced.

The building is heated by a fan system which utilizes the exhaust steam from the main engines. The air, being heated by passing over steam coils, is distributed over the shop through underground ducts and overhead pipes. The half of the building which forms the erecting floor for assembling heavy machinery will be served by an electric crane with a capacity of twenty-five tons and an auxiliary hoist of five tons.

The machinery of the entire works is to be driven by electricity supplied from a central power-unit, consisting of a Robb-Armstrong Corliss engine and Canadian General Electric dynamo, and is distributed by wiring to a number of Canadian Westinghouse and Bullock electric motors through the shops. Some of the larger tools have individual motors attached, and the medium and smaller ones will be grouped so that one motor will operate half a dozen or more machines. Economy has been observed in the interior arrangements. The new machine shop is so arranged that the castings come directly from the foundry into one side of the erecting floor, and are distributed by the electric crane to any part of the shop where they are to be machined or fitted, and finally returned to the erecting floor to be assembled and tested. A branch railway siding passes through one end of the shop for convenience in loading. Machinery to be loaded for shipment can be simply picked up by the crane from the testing department or any part of the shop and dropped on the cars. Such a modern building is a credit to any manufacturing establishment.

We have been privileged to see a copy of the company's report and balance sheet for 1904. Their sales for the year were $487,605, and the net profits $64,567. The amount available for dividend and reserve was equal to 17.45 on the capital of $250,000. Eight per cent. was declared, and the balance added to reserve, which is now $55,212. The company has $245,000 in plant, machinery and real estate; its stock-in-trade and patent rights are valued at $210,000, and the total assets are $615,000, against which are mortgage debentures $194,000 and bills payable and sundry creditors $93,168. The statement is a very clear one.

* * *

"It seems to be the fate of sawmills to be burned," says our St. John correspondent, adding, "and almost every summer some are destroyed." Only a few days ago, he states, the steam mill of W. W. Shaw, at Hartland, in Carleton County, was burned. The same mill was burned in June last, and Mr. Shaw had just got going again after rebuilding.

On Tuesday last, the city council of Woodstock appointed Frank Whetmore, of Brantford, chief of the Woodstock Fire Brigade, to succeed Chief Johnson.

* * *

—It is quite in line with what was contended in a recent Monetary Times article on the coal trade in the East of Canada, that we find officials of the P.W.A., as well as officials of the Cumberland Railway and Coal Company, freely admitting, according to a despatch of Wednesday 29th inst., that there is no possibility of averting a strike at Springhill. The company say: "We cannot compete in the coal markets unless the miners accept a reduction." On the other hand, the miners say: "We cannot accept the reduction, and if the company must economize, it must be done in some other way besides cutting.

* * *

—We welcome the appointment of Mr. E. D. Arnaud as Canadian Government Agent at Chicago, not only because the creation of such a port is a good move, but because the appointment has been given to a desirable man. This is the first appointment of the kind, but is not likely to be the last, and its object is the encouragement of commercial relations between the two countries, particularly between the Western part of America and the Dominion. Chicago was selected largely because of the Canadian grain trade with the United States. Mr. Arnaud is a banker, and was for some years manager of the Union Bank of Halifax, at Annapolis, Nova Scotia.

* * *

—Prof. Odlum, of Vancouver, says that to secure the future of Manitoba there must be an outlet for cattle, grain and other products by Hudson's Bay, and he predicts that the time is coming when on Hudson's Bay will be built the most gigantic elevators in the world, which will hold the grain over winter for the summer navigation at rates much cheaper than the long railway haul and steamboat by Montreal. The professor has made a study of the official reports of the Hudson's Bay Company covering a period of fifty-six years, and has come to the conclusion that the navigation of Hudson's Bay would average six months annually.

* * *

—It is not surprising that the commercial travellers of Canada are worked up in regard to the Act recently passed by the British Columbia Legislature imposing a tax on representatives of outside firms doing business in the Province, nor that the Commercial Travellers' Association should have decided to protest against such backward legislation to the Dominion Government. A deputation from that body, in alliance with one from the Western Travellers' Association, whose headquarters are at London, and with the Dominion Travellers' Association, whose headquarters are at Montreal, representing, in all, about 14,000 travellers, is to wait on the Minister of Trade and Commerce this week. It seems a curious commentary on the business methods of British Columbia, a Province which takes as much pride as any other western country in its "up-to-dateness," that any responsible party should even dream of such an anachronism as this proposed tax would be.

* * *

—There was on the 25th inst. a convention of the Canadian Furniture Manufacturers' Association in Guelph, the largest in the history of that body. It was resolved to call the association the Dominion Furniture Manufacturers' Association. Messrs. Jenkins and Hardy, Toronto, were elected secretary and treasurer respectively. The appointment of a president was left over until the next meeting. The association will meet in Guelph quarterly. The object of the association is to promote uniform terms and discounts. The Executive of the National Retail Furniture Dealers' Association, consisting of Messrs. John Hoodless, Hamilton, president; J. M. Struthers, Guelph, secretary; Wm. Trafford, London; G. A. Hall, Preston; H. L. Badett, Thomas Little, Galt; F. Walker, Hamilton. James Acton and W. B. Rogers, Toronto, conferred with the association regarding the settlement of certain grievances between the manufacturer and dealer, viz., the uniformity of finish, better castors and trimmings, transportation, dating, etc. Satisfactory agreements were reached.

TheSTANDARD TRUSTS COMPANY

J. T. GORDON, Esq., M.P.P., President.

CORRESPONDENCE INVITED.

Mercantile Summary.

R. Y. Henderson, cigar and tobacco merchant at Wiarton, has assigned to W. H. Spotton. Liabilities are estimated at about $600, and assets are nominally the same. The little business was established in June, 1902.

For some time Neil S. McLaughlin carried on an agricultural implement business at Brussels, Ont. Recently, however, he has shown financial weakness, and has just assigned to F. S. Scott.

The Montreal Gazette prints a special of Monday last from Victoria, stating that the British Columbia Legislature has unanimously adopted a resolution protesting against interference by the Dominion with the educational rights of the new Provinces.

D. Steinback, of Zurich, has assigned to J. T. Rickbeil after being in business as a general storekeeper for thirty years, during which period he has had a clear record. At one time he was in a fair position financially. For several years past, however, he has been gradually going behind, with the result recorded above.

The shipyards on the Pacific coast are quite busy on repair work. Bids were recently opened at San Francisco for remodelling the transport Dix. The bidders were: The Risdon Iron Works, $10,900; Union Iron Works, $10,930; W. A. Boole & Son, $11,900; Fulton Iron Works, $14,727; United Engineering Works, $17,000.—Marine Review.

During the week the Canadian Smelting Company at Trail, B.C., closed a contract for handling the output of Le Roi No. 2 Company, of Rossland. This plant is receiving large quantities of custom ore from all over southern British Columbia, besides handling the product of the Centre Star, War Eagle and Spitzee. When Le Roi No. 2 is added to these it will materially increase the tonnage treated at Trail. A new 250-ton furnace is being installed.

The annual meeting of the shareholders of the Nova Scotia Steel and Coal Company was held at New Glasgow on the 29th. The report of the directors, as already published, was adopted. R. E. Harris, K.C., Halifax, was elected president, in succession to the late John F. Stairs. The company's steel furnaces at Trenton will be removed to Sydney Mines this year, but there will be no reduction of the staff at Trenton, the other departments being extended.

The Monetary Times had a call, on Wednesday last, from Mr. Jas. Cox Fillan, of Dominica, British West Indies, some of whose communications we have printed. He is the owner of a large plantation in the West Indies, and is familiarly known as "the lime-juice-king of the Indies." Mr. Fillan is a member of the Legislature of Dominica, which is a Crown colony. He tells us that there is a strong and growing desire in the West Indies for confederation with Canada, which, they think, would increase their trade and add to their prosperity.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.
WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

A demand of assignment has been made upon André Labbé, general dealer, Chartierville, Que. In the spring of 1902 he was in trouble, and then settled with his creditors, some of them accepting 75 cents on time, and others 60 cents cash.

Mercantile Summary

Never has the Grand River been so high. The flume belonging to the Broomfield Mills near Fergus, Ont., was last week entirely swept away.

Gilbert Bros., of Seeley's Bay, Ont., who succeeded their father in the carriage-making business five or six years ago, have assigned.

The assignment is now noted of McEwen & Partridge, general dealers, St. Peter's Bay, P.E.I., who were last winter reported as offering 40 per cent. on liabilities of $10,000.

Meldrum Brothers, Limited, Montreal, have been granted a Dominion charter to carry on, with a capital stock of $250,000, a general cartage and forwarding, and coal and ice business.

An assignment has been made by James Morris, who has carried on a small cigar-making business at Montreal for the past three or four years under the style of the "H. H. Cigar Co." His indebtedness is figured at $6,000 to $7,000.

Telegraph linemen are supposed to be pretty well up-to-date sort of men, likely to achieve success in what they may attempt, but Victor Gauthier, who long followed the above occupation, and who went into hotelkeeping at Lachute, Que., three or four years ago, has had to put his affairs into the hands of the assignee.

Mr. J. H. Mayston, of Great Yarmouth, England, who is engaged extensively in fishing operations in the North Sea, desires information regarding the prospects of operating steam trawlers off the coast of the Maritime Provinces. He proposes, if feasible, to send over a fleet of steam trawlers, and to establish a fish-curing plant at some point.

Richard Shipley, in a moderate general store way at Bridgetown, N.S., has, through his attorney, made an offer of compromise to his creditors of 25 cents on the dollar. He has been much handicapped in business through being a cripple, as well as by recent illness, and is also reported to have been unfortunate in bad debts and endorsements.

The Ontario Government has granted a charter to the Walter Nicholls Motor Boat Company, Limited, Toronto, capital $25,000. The object of the company is to build, manufacture, buy, sell, let, to hire, trade and deal in boats, launches, vessels, motor vehicles, motors, engines, machinery and appliances, and the parts thereof, and motive power to operate the same. Among the charter members are Frederick Nicholls and A. Angstrom.

Abraham Fred, doing business in Montreal as a jobber in furs for the past eight years, under the style of A. Fred & Co,, has had two demands in insolvency served upon him as the outcome of proceedings which have been pending against him for some weeks past in the criminal court for complicity in the receiving of stolen goods, and a meeting of his creditors is called for the 3rd prox. Liabilities are estimated in the vicinity of $25,000.

Mercantile Summary.

A factory is being started in London, Ont., for the manufacture of cement blocks.

The voting on the by-laws granting a loan of $30,000 to the Canada Carriage Co. at Brockville, whose premises were destroyed by fire in January last, and a $1,000 site and exemption from taxation for ten years to the D. H. Burrell Co., of Little Falls, N.Y., took place on the 23rd, and both carried by large majorities.

The ratepayers of Brockville voted last week on two money by-laws, one to authorize the council to lend $30,000 to the Canada Carriage Company, whose works were destroyed by fire a few months ago; and the other to raise $1,000 to buy land for a site for the D. H. Burrell Company's factory, of Little Falls, N.Y., which will make dairy supplies. Both by-laws were adopted by large majorities.

A voluntary assignment has been made by Hormisdas Drainville, who began store-keeping at St. Barthelemi, Que., in the fall of 1903. He is a young man, who had no previous experience, and started on capital advanced by his father, a well-to-do farmer. He has been largely dependent upon a hired clerk in the management of the business, so that the present outcome of affairs is hardly surprising.

A bill has been introduced in the Nova Scotia Legislature to loan the Halifax and South-Western Railway Co. the sum of $1,075,000 with which to purchase the Yarmouth and Halifax and the Middleton and Victoria Beach Railway lines, and add them to the Mackenzie & Mann system of railroads. For the fifty miles of the Yarmouth and Halifax line they are to be loaned $13,500 per mile at 3½ per cent., and for the forty miles of the other road they are to be loaned $10,000 per mile at the same rate. The acquisition of the Yarmouth and Halifax gives Mackenzie and Mann a continuous line between Halifax and Yarmouth in the west, after they have built eighty-five miles from Liverpool to Barrington.

Dr. Ami, of the Geological Survey, is responsible for the statement that there is likely to be another Kimberley north of the Great Lakes. He is convinced that diamonds in quantity lie somewhere between there and Hudson's Bay. All surveying parties and explorers in the northern part of Ontario, he says, should be on the lookout for everything that will show where diamonds are to be found in "place." While in New York recently, Dr. Ami consulted Prof. G. F. Kunz, an expert in the United States Geological Survey, who is enthusiastic about the prospects of diamonds found in the States of Wisconsin, Illinois and Michigan. Two more specimens have been found lately. The finding of these two specimens in drift intensifies the interest in the matter, and goes to show further that diamonds exist in "place" in Canadian territory north of these States.

WORK AND PRICES RIGHT

GALVANIZING

ONT. WIND ENGINE & PUMP CO. LIMITED
TORONTO, ONT.

Mercantile Summary.

Albert Drolet, who began in the confectionery line in Quebec last May, is already reported as being in the hands of the assignee. He owes about $1,300.

The St. Lawrence Wagon Company, Limited, Montreal, is empowered, with a capital of $75,000, to manufacture and sell tools, wagons, motor cars, etc. James and William Meldrum, of Montreal, are interested.

The Martel-Stewart Company, Limited, Montreal, capital stock $45,000, has a charter to manufacture, sell and lease signs and advertising devices; also to manufacture or acquire electric power for illuminating purposes.

After much discussion and recrimination, Hamilton city council has awarded the contract for 15,000 barrels of cement to the Ithaca concern. The price was $1.55½. The Owen Sound company who tendered at $1.58, put up a big fight.

A fire in the finishing-room of the Durham furniture factory on the 23rd inst. completely destroyed it. A large stock of lumber was saved with difficulty, about $10,000 worth, indeed, being burnt. Total loss is estimated at $50,000.

E. N. Moyer Company, Limited, Toronto, capital stock $150,000, has a charter to manufacture and deal in store, school, office and church furniture. E. N. Moyer, of Toronto, and H. R. A. Moyer, of Halifax, are charter members.

A fire which broke out in Montreal in the premises of the Star Iron Company spread to those of the Standard Shirt Co., C. Howard Smith, paper manufacturer, the Filder Manufacturing Co., and H. Ouellet, gold and silver plater. The loss altogether was nearly $75,000, insured for about $47,000.

The Western Development Company, Toronto, capital $1,000,000, has acquired a Dominion charter, with the object of obtaining and working coal mines and producing petroleum, fire clay and gas; manufacturing lumber and cement and dealing in general merchandise. Robt. Armstrong and H. M. Asley are among the charter members.

The Upper South-West Miramichi Log-driving Company held their annual meeting in Fredericton, N.B., on the 21st inst. Directors were elected as follows: M. Welch, T. Lynch and E. Hutchison. At a subsequent meeting officers for the ensuing year were elected as follows: President, Michael Welch; secretary-treasurer, J. H. Barry.

Toronto's city engineer has made an estimate of the cost of a civic electric plant. The cost of installation of an underground system would be $638,000. The expense of operation would be $40 a lamp, and other charges would be interest and depreciation $38.30, and insurance $2 per lamp, making an aggregate annual cost of $80.30 per lamp, compared with $74.82, the cost of each light under the present agreement with the Toronto Electric Light Company. An overhead circuit would reduce the cost per lamp per annum to $71.30.

Mercantile Summary.

Prince Bros.' general store at Battleford, Sask., has been burned down at a loss of $30,000, partially covered by insurance.

D. Goyer, an old-time jeweller, of Ottawa, has fallen upon evil days. He has been in trade there some thirty-five years, but has been unable to keep up with the competition from younger men, and his business of late years has been very small. He would like to compromise at 50 cents.

The Railway Committee at Ottawa have passed upon the Brantford and Woodstock Railway Company's bill. This company proposes to construct and operate a railway from Brantford, through the townships of Brant, East Oxford and Blandford, to a point near Woodstock. It is intended to run a steam railway. The capital stock was placed at $500,000, and the head office is to be in Brantford. The length of road will be about twenty-eight miles.

A report from Leamington says that a well on the Wales farm, from a depth of 1,080 feet, shot up oil recently 75 feet above the derrick. Great trouble was experienced in capping, as the cap was blown off before the drillers could get a large enough lead pipe connected. The well is now said to be flowing at the rate of one barrel per minute. It is situated a mile and a half north of the Jackson gusher. It is believed that the discovery of this oil makes a refinery in the district a certainty.

There are reports of a large electrical power plant to be developed at Grand Falls, N.B., by a syndicate of New York, New England and Canadian capitalists, comprising the Electro-Manganese Company, B. E. Kingman, New York; Fred Sayles, Providence, and others. The plans are said to provide for an extensive electrical ferro-manganese reduction works, big pulp, paper and saw mills, power plant for the operation of international electrical trolley line and transmission of current for lighting and manufacturing along the St. John river to St. John city. The complete or approved figures of the estimates approximate between four and five million dollars. A deposit of $50,000 has been placed with the New Brunswick Government, which will be returned with interest if in five years the company shall have spent $3,000,000.

Tenders Wanted.

Tenders will be received by the undersigned up to **Saturday, April 15, 1905**, for the purchase of Debentures of the Town of Fort Frances, in the District of Rainy River, as follows: $20,000 for Municipal Buildings and Fire Protection at 5 per cent. for twenty years; interest paid annually.

Tenders may state for what amounts they would desire the respective Debentures confirming said aggregate sum to be drawn.

The highest or any tender not necessarily accepted.

F. H. WARNER,
Town Clerk.

Dated at Fort Frances this 15th day of March, 1905.

Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905**, for the purchase of Debentures of the said School District, issued in pursuance of a by-lay in that behalf, authorizing the raising of $56,000 for the purchase of ground and the erection thereon of a Solid Brick School, said Debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in thirty equal consecutive annual instalments.

Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905**, for the purchase of Debentures of the said School District, issued in pursuance of a by-law in that behalf, authorizing the raising of $4,000 for the purchase of ground and the erection thereon of a Frame School House, said debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in ten equal consecutive annual instalments.

ST. CATHARINES BOARD OF TRADE.

On the evening of Thursday, 23rd March the first annual banquet of the St. Catharines Board of Trade was held at the Welland House. Several presidents of other boards were present, among them President J. D. Allan, of the Toronto Board of Trade; President Kitson, of the Hamilton board; John White, president of the Woodstock Board of Trade; President Stauffer, of the Galt board, and President C. H. Mills, of the Berlin board. President Allan, of Toronto, replied to the toast "Canada," and dwelt mainly upon her commercial interests. President Kitson, of Hamilton, spoke to the toast of "Sister Cities." Mr. Frederic Nicholls, of the Niagara, St. Catharines and Toronto Railway Co., was to have been present, but was compelled by a pressure of other engagements to decline. The chair was occupied by Mr. R. B. Hamilton, president of the St. Catharines board.

—The following dialogue was overheard in a drug store:

Druggist (to little girl customer)—Did you say pills, miss?

Little Girl—Yes, sir, please.

Druggist—anti-bilious? Little Girl—No, sir, but uncle is.—Harper's Weekly.

—"Can I O U?" asked the new customer.

"No," answered the grocer. "I C. O. D."—Chicago News.

TORONTO MARKETS.

Toronto, March 30, 1905.

Chemicals, Drugs, etc.—Business continues fair, with a normal activity in country districts. This has shown considerable improvement since the roads in some sections began to mend. There is a very strong feeling in iodine owing to the position the Old Country makers are taking with regard to holding the supplies. Acetic and tartaric acids also are firmly held. A report from Manchester says the export trade with Canada and United States is quite brisk. In New York a certain degree of dullness is complained of in the export trade.

Dry Goods.—Trade continues good, with no new features but those which were referred to in last week's issue. Staples are all very firm, woolens particularly so. Linens, too, are firmly held. Dress goods are being ordered in satisfactorily large quantities. Travellers on the road report all the indications favorable for a good spring trade.

Flour and Grain.—Flour is a little on the dull side just now, though prices keep up fairly well. The ruling quotation for ninety per cent. patents is around $4.40. Oatmeal is a little firmer than has been the case for some time past. In wheat no very great change has occurred. Oats remain the same. Buckwheat and rye are scarce. No large amount of trade is going on.

Fruits and Vegetables.—The fruit trade is about normal for this time of the year. Semi-tropical fruit is in average supply, and prices keep up well.

Hides and Skins.—No change in prices has occurred since last report, and trade is dull. Tallow presents no feature of interest.

Groceries.—A steady market keeps up for sugars, though quotations are no higher. The general opinion, however, seems to be that a higher range of values than those prevailing to-day will ultimately come into force. The general trade is seasonably good. For dried fruits there is a continued good demand. Teas and coffees are quiet. Canned goods are held very firmly, and there is not likely to be any decline in strength in this item.

Leather.—While stocks are in fairly large compass, there is no prospect of coming lower prices, and some dealers believe the reverse will take place. Actual business transacted, however, is not extraordinarily large.

Live Stock.—With another light run business was again very brisk. Advanced prices were noted in some lines. Only a few exporters were offered, but these were sold out very early. The firmness extended to butchers' cattle as well. Stockers and feeders were in good demand. But few calves were offered. Briskness was shown in the demand for sheep and lambs.

Provisions.—Receipts of butter are still very light, owing to poor roads, but values remain unaltered. Cheese is firm at unchanged quotations. Eggs are not coming in very readily, but this is believed to be due to poor roads; and the production is no doubt increasing rapidly, which will shortly be manifested in lower prices. In hog products and smoked meats there is a fairly good trade going on.

Wool.—Old-clip price quotations remain as before—nominally so at any rate. New clip will not cut any figure for two or three weeks to come. Values are likely to be very firm, judging from the present state of the market and from reports from all textile centres.

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, March 29, 1905.

Ashes.—Though the present demand is limited, supplies coming forward are still more so, and values are steady at $5.40 to $5.50 for No. 1 pots; seconds, $4.90 to $5. There has been no business in pearls for some weeks; the last transaction was at $7.25.

Cements and Firebricks.—More interest is being manifested in cements, and the Government has just awarded contracts among Canadian manufacturers for some 20,000 barrels. Prices for spring arrivals of foreign cement have not yet been established. From store quotations are unaltered. Firebricks are moving out freely at $18 to $23, as to quality and lot.

Dairy Products.—Butter has again taken a firmer tone owing to the very light supplies coming forward, and sales of new milk creamery are reported at 27 to 28c.; fine held stock, 26c.; Western dairy, c.; rolls, c. In the cheese market no new features can be noted, and the volume of actual business is extremely small. Values, however, are very firm, about 12c. being the idea for any little good stock held here.

Furs.—We were in error last week in speaking of the London raw fur sales as being then in progress. They began on Monday, and no definite ideas as to results can yet be reached. Local receipts are now small, doubtless largely owing to the breaking up of the roads in the interior. We continue to quote: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6. as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $4.50 to $5.50 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $25 or more; coon, $2.50 for fine black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $2; short stripe, $1.65; long stripe, 60c.; broad stripe, 25c.

Dry Goods.—The weather this week has at last been of a decidedly spring-like character, and with the fast-disappearing snow the heart of the retailer rejoices, as his counters are well lined up with shoppers buying required seasonable goods. The break-up of the snow roads is interfering with the movements of travellers to off-rail points, but a fair number of outside buyers have been in the city the past ten days or so, and, on the whole, wholesale business is rather more active, with a better feeling prevailing, though collections continue rather on the slow side. Nearly every wholesale house in the city has quantities of goods on the "Parisian," now on the bottom in Halifax harbor. Most of these goods are urgently wanted for orders actually in hand, and the inconvenience will be generally felt.

Groceries.—Latest cables from Barbadoes announce a further stiffening in molasses quotations, 22c. being the figure now given, which means about 34½c. laid down here and as a consequence local jobbing quotations have been advanced 2c. to 35c. for single puncheons, and 37½c. for barrels. The sugar market has undergone no recent variation, and the factory price for standard granulated is steadily maintained at $5.65 in barrels. Refiners report the demand rather slack at present. A representative of the Pacific Coast Salmon Packers' Association has been in town this week calling on the trade, but prices for new pack will not be made for some weeks yet. At last some litle improvement in demand is noted for teas, and one leading broker reports sales aggregating about 2,000 packages of a general assortment during the past week, but at generally easy figures.

Hides.—The advance in calfskins noted last week is confirmed, and dealers generally are paying 14c. for No. 1 and 12c. for No. 2. No. 1 beef hides are unchanged at 9½c.; lambskins are quoted at 10c. still and sheepskins at $1.15 to $1.20.

Metals and Hardware.—The domestic pig iron men had a conference at the Windsor last week, and as a consequence it has been decided to advance prices 50 cents a ton. In other lines there is nothing specially new. Bar iron is steady at $1.75 to $1.80, and bar steel is rather firmer at $1.95 to $2. Nails, wire, etc., are unchanged. The plate market in Britain seems a shade easier, but local prices are steady; Canada plates are quoted at $2.45; tinplates of standard brand, $3.65 for cokes, and $3.90 for charcoal; galvanized sheets, $4.15; black sheets of 28 gauge, $2.20. Boiler plate and iron pipe remain at last quoted figures. The general run of metals are all steady to firm, copper quoting at 16¼c.; ingot tin, 32½c.; lead, $3.45; spelter, 6¾c.; antimony, 9½c.

Promotor Wanted.

Of first-class executive ability to handle an Industrial Proposition inviting a limited amount of capital, to co-operate with an American Manufacturing Concern about to locate in Canada, which shows a strong earning power. Present goods entirely imported.

Address, Box 138, Monetary Times.

Sale of Valuable Fishing and Cold Storage Plants, Buildings, Real Estate, Tugs, Sail Boats, Nets, Provisions, Merchandise and Fishing Privileges.

IN THE MATTER OF

The Ewing & Fryer Fish Co., LIMITED

SELKIRK, MANITOBA

Sealed tenders at a rate on the dollar will be received by the undersigned, at his office in the City of Winnipeg, until NOON ON WEDNESDAY, THE 12th DAY OF APRIL, 1905, for the assets of the above estate, amounting, as per inventory, to $49,914.46.

A marked cheque for 10 per cent. of the amount tendered must accompany each tender, which in the event of the successful tenderer not carrying out the terms of his tender, shall be forfeited to the estate.

Detailed statements of the assets to be sold can be seen at the office of the undersigned, or will be forwarded to any address on application.

Boats, tugs, and the plant generally have been put in perfect repair, and ice, nets and other supplies provided for, and the business is now in such a condition that the purchaser would be enabled to begin operations at once, and thereby obtain the benefits of the spring and summer fishing.

This presents an opportunity to any person or firm with capital of going into a business which is practically now a going concern, and where every provision has been made for active and immediate operation.

The highest nor any tender not necessarily accepted.

For further information or details, apply to the undersigned at his office in Winnipeg, or to Mr. W. W. Fryer, at the company's premises in Selkirk, Man.

Winnipeg, March 20th, 1905.

Oils, Paints and Glass.—Trade in these lines is quite brisk, and with spring freight rates coming into effect on April 1st, there will begin the active shipping out of quite a fair accumulation of orders. Linseed oil is a little firmer, and some houses profess to be now getting 44c. and 47c. for raw and boiled respectively in small lots, though the general quotation is a cent less. Turpentine is firmer at 77c. Glass is very strong at the late advance, with low stocks, and it is reported the leading importers of English glass are declining further orders at present.

* * *

THE SEVEN PRECEPTS.

Baron Kaneko, of Japan, tells in the New York World some of Gen. Oyama's characteristics. He also mentions the Seven Precepts laid down for his soldiery by the Emperor of Japan in 1882.

"In barracks the officers not only drill their men in the knowledge of these precepts, but they explain them in detail, illustrating their explanations with examples drawn from history. Deeds of Washington, Alexander, Caesar, Napoleon, Grant and the other men whose valor has made them famous are told to the men in order that they may know the precepts in their practical application as well as in theory.

"President Eliot, of Harvard University, asked me recently to explain to him the real reason for the personal valor of our soldiers. I told him it was due to the practice of these precepts. Here they are as I have translated them from the edict for President Eliot:

" '1. To be sincere and loyal and guard against untruthfulness.

" '2. To respect superiors, keep true to comrades and guard against lawlessness and insolence.

" '3. To obey the command of superiors, irrespective of its nature, and never to resist or disregard it.

" '4. To prize bravery and courage, and be diligent in the performance of duties, and guard against cowardice and timidity.

" '5. To boast not of brutal courage, and neither quarrel with nor insult others, which will incite general hatred.

" '6. To cultivate virtue and practise frugality, and guard against extravagance and effeminacy.

" '7. To prize reputation and honor, and guard against vulgarity and greed.'

"Truly, it is the practice of these that makes our Japanese soldiers what they are from the common infantryman up to the great Field Marshal Oyama."

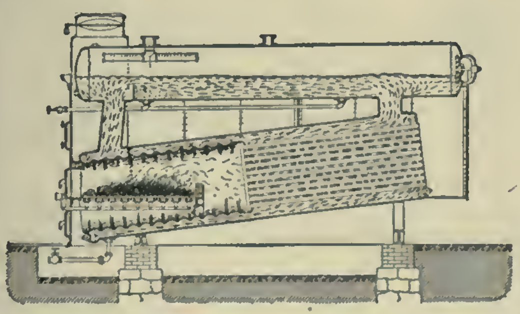
Reduce Your Coal Bill.



Your coal bill is a large item in your expense account, and if it could be reduced **ten per cent.** it would mean a large addition to your net profit.

A **Robb-Mumford** internally fired boiler will make a saving of at least **ten per cent.** over an externally fired boiler, and in some cases considerably more.

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

"Taste, sir," he said.

The biscuit was warm, crisp, rich; it was light, well salted, nutritious—a biscuit, in a word, of a peculiar excellence.

"This biscuit, sir, is made of flour of lentils," said the Chinaman. "You know lentils? Little green pellets, slightly flattened, like split peas. Lentils are considered the most nutritious of all the foods of the earth. This one lentil biscuit, sir, is equal in nourishing power to a pound and a half of roast beef."

He took from a tin a little cake.

"Again taste," he said.

The little cake was rich and good.

"It is made, sir, of the flour of almonds," said the cook. "Fresh, sweet almonds, ground into a white powder between two millstones. Such a flour is a finer thing than your flour of wheat, eh?"

Then he lifted a great lid and revealed some thirty or forty compartments, one filled with a pink flour, another with a yellow one, a third with a brown one, a fourth with a white, a fifth with a pale green, a sixth with a blue, and so on.

"All these are Chinese flours," he said. "In China, sir, we make over fifty kinds of flour. We make flour out of rice, out of peanuts, out of beans, out of potatoes, out of sweet potatoes, out of peas, out of cocoanuts, out of millet, out of pulse, out of oats, out of bananas—the fact is, sir, we make flour in China

WANTED.

MANAGER FOR
Western Loan Company.

Well established loan company in Winnipeg, working on the old line permanent plan, is looking for a man to take the managership. Must be thoroughly familiar with financial matters and capable of handling office details. This is a splendid opportunity for the right man and full particulars may be obtained by addressing

H. W. WHITLA,
c/o McDonald, Haggart & Whitla,
Winnipeg, Man.

Mercantile Summary.

Guelph city council has made a grant of ten acres of land, part of the city sewerage farm, to the Canada Glue Company, who will erect on it a factory at a cost of $30,000.

Talk is heard to-day, as it might have been a year ago or more, as to the possibility of amalgamating the Canadian Rubber Co., of Montreal; the Granby Rubber Co., of Granby, Que., and the Gutta Percha and Rubber Company, of Toronto. Details, however, are not forthcoming, nor is any immediate action likely.

Here is a modern application of economic ideas—however it may jar some of the old-fashioned fishermen of the New England coast: The Master Marine Association of Gloucester, composed of the skippers of fishing vessels, have decided to build a towboat to be used in towing their vessels in from sea with fares of fish and taking them out again.

The Northern Mines, Limited, is the name of a new company recently organized in Vancouver for the purpose of operating in the Atlin district. The company, which has a capital of $50,000, proposes to introduce new mining methods into the camp, viz., to mine by steam-shovel. Operations by this method have been carried on in the Yukon, where, it is understood, they have met with great success, but the steam-shovel will be a novelty in the Atlin camp. Operations will be begun on Spruce Creek.

The Temiskaming and Northern Ontario Railway Act now gives power to build a line from North Bay to Abittibi River, a distance of about 213 miles. When this legislation was passed, it was thought the line would cut the Grand Trunk Pacific at a point some distance south of the river. It now appears, however, that the original location is not suitable, the country to the south-west of Abittibi Lake being rough and mountainous. Accordingly, the location has been changed to the north of the lake, where the land is officially designated as "rolling clay." This will place the legal terminus on the Temiskaming Railway forty miles south of the G.T.P.

For a week before Sunday last the South Saskatchewan river had been rising, and cakes of ice floating down threatened the safety of the railway bridge of the C.P.R. at Saskatoon. Ice-jams were blown up, and every effort made to save the bridge, but on Monday last, the river being unusually turbulent, an immense flush of ice wiped out the centre of the structure, leaving only a portion at either side. The bridge destroyed was only a temporary one awaiting the construction of a larger one by the company this season. In the meantime another temporary one will be built, and the company has been preparing for the emergency. During the erection of this bridge passengers and baggage will be transferred by ferry as soon as the waters have subsided.

DIVIDEND NOTICE.

A dividend of 2 per cent. on the preference shares of this company, for the quarter ending March 31, 1905, has been declared, payable on April 15, 1905, to shareholders of record of March 31st. The transfer books of the Company will be closed from April 1st to April 5th, both days inclusive.

By order of the directors.

THOS. GREEN, Cashier.

That some attention should be paid to weather conditions when people are building houses is strongly proved by the fall of buildings in the States erected during hard frost. It is stated that the ninth partially completed building in New York to collapse since the thaw set in fell on Monday of last week. The structure was one of three five-story buildings nearing completion in First Avenue, near 101st Street. The freezing of mortar before it had time to settle is held responsible for these collapses.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00.

GROCERIES AND PROVISIONS.

The wholesale grocery trade has been distinctly dull this week, though this condition is believed to be due to the only moderate improvement in the state of the country roads, rather, than to any poverty of the consumptive demand. Payments by retailers continue to be fairly satisfactory. Prices are quite steady also. In sugar, the movement latterly has not been by any means heavy, though there is now visible a considerable improvement. There was an advance recently in Berlin granulated beet, so that now this product is within 5c. per cwt. of a parity with refined cane. The St. Lawrence Refinery advanced their price 5c. per cwt. in sympathy with the New York advance of 15c., but this has not been followed generally. Maple syrup is meeting with particularly good sale this year, perhaps on account of the efforts which are being made to keep up its standard of purity. Other syrups and molasses are without special feature. Stocks of the latter are in small compass.

The coffee market has been easier during the last two weeks, and the high rate of exchange for Brazilian money has perhaps restricted trading in this article. In teas the business transacted is of very fair volume, especially in Ceylons. Indians and Ceylons have advanced 1d. in the London market.

Canned goods of every description are very firm. Tomatoes of last year's crop are almost out of the market. With regard to the future for this article, opinions vary. It is known that growers have threatened to stop growing them if higher prices are not paid. In some quarters the canners have succeeded, so it is said, in placing all the orders necessary for tomatoes at 25c per bushel, while on the other hand, it is asserted that this will be a famine year. Canned asparagus has advanced 25c. per case. Canned fruits are coming now into greater demand every day, with the diminution of the supplies of fresh fruit.

Dried fruits are meeting with a normal demand for this season of the year. For prunes the enquiry is quite brisk. Stocks in the growers' hands and on the primary markets on the Pacific Coast are reported abnormally small, and it would not surprise the trade, were the whole crop to be cleared out. Apricots are very scarce, while the demand is very active. Raisins and sultanas are going well for this time of the year. Currants also are in fairly good request. Advices from Greece say that the results of the latest retention law have been so disappointing that an agitation has been raised to do away with all legislative restriction altogether.

The demand for fish, which has naturally thus far during Lent been very brisk, is now easing off. Fresh fish is now arriving in the usual quantities, and cod and halibut are beginning to be plentiful in the cities.

Eggs are coming into the Toronto market freely, and prices are declining daily. About 14 to 15c. would cover the present quotations. It is expected by some dealers that prices will be considerably lower this year than last. In the West, the egg trade is in a more or less demoralized condition. Owing to the very high prices realized there last spring, preparations were made on a very extensive scale in the following fall to put up large quantities for pickling and in cold storage. These eggs were bought in many instances for as high as 22c., and it is said they are in some cases selling as low as 10c. per dozen. A large amount of money is bound to be lost in any event, as now that fresh eggs are being received in volume, it is very difficult to dispose of held stock at any price. Dealers in the western provinces will certainly be extremely cautious buyers during the coming season. From Great Britain comes word that the dealers there feel very indisposed to offer more than 7s. per long hundred, a price at which it is practically impossible to obtain Canadian eggs, that is, unless the prices here go down to a very marked extent.

The receipts of butter in city markets are increasing. The market, however, continues very firm in both Montreal and Toronto, especially considering the season of the year at which we have now arrived. The dealers are buying cautiously, as they anticipate a drop at any time. It is likely, however, that the receipts will have to increase very decidedly before any marked decline can take place.

The cheese market continues firm, and prices are likely to remain at a high range until the new cheese comes forward. Stocks are believed to be light.

Great firmness is shown by the market for hog products of all kinds. Long clear bacon and lard are held particularly firmly, with a slight advance over last year's quotations. The supply of hogs available does not appear to be sufficient for the packers' requirements, and high prices are anticipated for some time to come. According to the Cincinnati Price-Current, the total number of hogs killed in commercial channels during the past twelve months has been exceeded only in a single instance, for the year ending March 1st, 1902, the number for the summer season in that year being 1,609,000 greater than for the past summer season, while the record for the winter season now closed exceeds the corresponding period of that year by 116,000. For the past year, says that journal, the total western packing represents 23,318,000 hogs, compared with 22,375,000 for the preceding year; 25,411,000 for the year of high record, ending March 1st, 1902, and compared with an annual average of 20,599,000 for ten years prior to the past year.

⁂

THE MARCH FIRE WASTE.

It would be a pleasing thing could we congratulate our readers on a very greatly lessened fire loss for the first three months of this year. But that is not possible. We may be thankful that March is no worse, but its fire record is two millions greater than the average of the last four years, while February and January were destructive.

The fire loss of the United States and Canada for the month of March, as shown by the "Journal of Commerce and Commercial Bulletin," makes a total of $14,715,400. The following table gives a comparison of the losses by months:—

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90.051,000	25,591,000
March	9,907,650	11,202,150	14,715,400
Total 3 months	$39.164,800	$123,043,350	$56,684,500
April	13,549,000	23,623,000	....
May	16,366,800	15,221,400	....
June	14,648,350	10,646,700	....
July	12,838,600	11,923,200	....
August	8,428,350	9,715,200	....
September	9.939,450	14,387,650	....
October	10,409,800	12,866,200	....
November	13,589,550	11,515,000	....
December	17,224,700	19,422,350	....
Total 12 months	$156,195,600	$252,364,050	....

The heavy fires recorded during the month of March were at Cedar Rapids, Brockton, and Connellsville. During the month there were 252 fires of a destructiveness, each, of $10,000 or more, in the States and Canada.

CANADA'S IMPORTS AND EXPORTS.

Gradually the information given by the Canadian Department of Trade and Commerce is being added to and improved. The monthly reports are a convenience to many, and the still more frequent bulletins from our trade agents abroad are welcomed by exporting merchants. In the December report we find, under the heading of General Commercial Information, a statement showing the values of the principal articles imported by Canada and exported from Canada for thirteen years past. We have taken these principal items for 1895—1900—and 1904, and compared them below; we venture to think they will be found interesting.

The total imports into Canada for the year 1895 were $106,205,062; in 1900 they were $181,325,075; in 1904, $251,337,490—a comfortable ratio of growth.

Exports from Canada totalled $109,313,484 in 1895; $183,237,555 in 1900; and $211,055,678 in 1904.

The principal items of import and export were:—

PRINCIPAL IMPORTS INTO CANADA.

	1895.	1900.	1904.
Cement	$257,847	$520,593	$985,222

Other goods	2,814,345	1,974,248	1,936,551
Total	$109,313,484	$183,237,555	$211,055,678

OUR IMPORTS.

Among these items of import a few attract attention from their rapid growth. For instance, we bought seven times as much electric apparatus in 1904 as we did in 1895, notwithstanding the increase in Canadian manufacture of such goods; the import of gutta percha and rubber goods is trebled, and that of cement doubled in ten years; precious stones ($1,217,514 last year) show a more remarkable growth of import than jewellery, ($876,841 last year), indicating the development of the lapidary's art in Canada.

The largest item of our imports by far is metals, minerals, and manufactures thereof, an item which is enlarged from $12,331,000 in 1895 to $51,839,000 in 1904. This marks a wonderful broadening of our constructive industries. Coal and coke have naturally gone up in the same period from $9,199,000 to $21,562,000. Then taking a group of textiles, and the materials for making them, we find that imports of cotton, flax, silk, wool, and manufactures thereof have risen from a total of $21,730,000 in 1895 to a total of $40,843,000 in 1904, every department of the four showing figures nearly or more than doubled. The increase in drugs, dyes and chemicals purchased bears an indication of advancement in our manufactures; the same with hides and skins. The doubling of purchases of spirits, wines, and fruits, when we have all three of our own, is perhaps rather a proof of the increase of the population than of any growth in luxurious habits among our people.

OUR EXPORTS.

Looking next at the exports of Canada, there are a few striking items. For example, metals and manufactures thereof exported, swelled from $4,254,000 in 1895 to no less than $34,826,000 last year. This is accounted for largely by our shipments of Yukon gold and British Columbia minerals, for up to 1897 the item did not much exceed $9,000,000; provisions, $46,472,000—doubled in ten years—including of course cheese, which is the largest item in the whole list of Canada's products exported; breadstuffs, $32,000,000 to-day where it was $13,000,000 ten years ago; fruits, five and a half millions' worth exported from this country in twelve months; sales of spirits and wines of Canadian production doubled in ten years. Of wood, one expects the export to be large, and of fish, for these are among our great natural possessions. Living animals, too, are a considerable item, and an accustomed one. Among manufactures, some of our readers will mark with approval the growth in carriages and carts exported, increased six times; in leather goods, in dyes and chemicals. But musical instruments do not keep up their usual export trade, nor unfortunately have woolen manufactures increased, but declined.

* * *

MONTREAL'S STREETS AND SEWERS.

We read in the Montreal papers that the city surveyor, Mr. Barlow, presented to the road committee of the council of that city a report on public works which he urgently recommended to be undertaken this year. Among his recommendations were: increasing the capacity of the Craig Street sewage pump, a new outlet for Delorimier Avenue sewer, a connection from the sewage farm with the Back River, a storm sewer for Sherbrooke Street, and safety valves to prevent floodings. Then there is a sewer outlet for Elgin Basin, and an enlargement of the sewer on Mount Royal Avenue recommended. These works, every one of which is needed, are estimated to cost $259,000. This sum is but part of the proposals of the city engineer, whose total suggested expenditure for the year, including cleaning streets, repairs to pavements, permanent sidewalks, grading and macadamizing, amounts to $592,000.

Now let it be observed that of these works which the city engineer recommends as desirable or essential in 1905, the cost of the sewage system is less than half the total. But what does the committee say about these most essential works for the sanitation of the city? We read: "It was the general opinion of the committee that the construction of new sewers and the pump-house must be left to the discretion of the Finance Committee, which means the question must be decided by the funds on hand." That is: the health of the inhabitants of the great city of Montreal must be subservient to the consideration whether a quarter million dollars can be afforded for a year's work in this most necessary direction! The Gazette tells us that, "The pump-house referred to has been recommended for years. It is intended to strengthen the city's pumping system during the high water season, when the sewage has to be pumped into the river. The two pumping stations now in use do well, but the city is growing."

Any one conversant with the municipal history of Montreal for the last twenty years can recall civic enterprises on which millions have been spent which are of less importance to the well-being of its inhabitants than the $592,000 recommended to be expended on works which intimately concern the general health and comfort. It is to be hoped that some member or members of the city council will have the courage to rise and say, what no member of the roads committee dared to say, that the money for these necessary works must be provided.

A resident of Montreal, Mr. R. D. McGibbon, in a letter to the press, dated 30th March, refers to the "miserable" and "disgusting" condition of the streets of Montreal, spring after spring, as a "disgrace to civilization." And he claims that "it is the duty of the city council and its servants to provide the taxpaying citizens with streets that are passable, and to see that the necessary taxation is imposed and properly expended." While declaring that it is futile to expect any relief from the incompetent civic authorities, he asks if it may not be possible that a united effort of the citizens generally would have some beneficial result!

"Either by the gradual removal of the snow during the winter, or by a concerted and vigorous effort early in the spring, this protracted season of impassable, reeking roadways could be avoided. If it is necessary that the citizens should be further taxed, in heaven's name let us be taxed! Anything is preferable, in my humble opinion, to these annual visitations so detrimental to the commercial interests of the city, and so prejudicial to the health of its inhabitants."

He proposes that a public meeting of citizens be convened to consider the question and to appoint a committee of leading citizens to see that something shall be *done*. We look with interest to the outcome of such a proposal, for it is discreditable to have it said that scores and hundreds of Montreal's citizens leave the city every spring to remain away until such time as the snow and filth of the streets are removed and the health of their families is no longer prejudiced thereby.

"CHEAP" LIFE ASSURANCE.

We have seen a copy of a letter signed Philip C. P. Kelly, general manager for Canada of the State Life Insurance Company of Indianapolis, dated 28th March, and offering cheap insurance in blocks of $12,500; $25,000; $37,500, or $50,000 under any one of three plans, viz.: Ordinary Life (continuous premiums), 20-Payment Life, or 20-Year Endowment. The rates quoted are so low as to cause one to doubt whether any company having a proper regard for its future solvency would offer them. We have made enquiry as to these rates and now present them, alongside of those of two respectable and strong old line companies, one Canadian, one American. The second column rates are for a $25,000 policy, ordinary life:—

Age.	State Life Ind. Annual Premium.	Rate per $1,000.	Canada Life.	Aetna Life.
30	$339 36	$13 57	$18 75	$19 14
35	391 02	15 64	21 70	22 23
40	458 92	18 36	25 60	26 28
45	550 20	22 01	30 90	31 63
50	674 94	27 00	38 15	38 83

By comparing the last three columns it will be seen that the new State Life company offers insurance at from 25 to 30 per cent. less than respectable companies of long standing can afford to do it for. This State Life is the company whose Advisory Board scheme of cheap insurance was condemned by United States insurance commissioners from Vermont to Ohio, and from Missouri to Tennessee. And it is the company which has just been adjudged by Chief Justice Meredith to pay back the amount of his premium on a $10,000 policy to an applicant in Hamilton.

No company, we consider, can do business successfully at such rates, and we venture to think that the smart people who offer them must have devised policy clauses "with a string to them," provisions, that is, that in case of death some rebate from the face of the policy would be made. Either this or some stipulation that would result in increasing the premium from the inadequate figures given. Besides, these special rates quoted by Mr. Kelly do not by any means agree with those of the State Life itself, as we find them in the Handy Guide of the Spectator Company. These last are much higher. This latest effort of the cunning State Life folks to boom business in Canada will not impose upon people who are well informed. And the people over here who take out $25,000 life policies are likely for the most part to take pains to inform themselves.

* * *

FIRE-PROOF AND NOT FIRE-PROOF.

What are called fire-proof buildings are sometimes not fire-proof. And it is often a simple thing that takes away their valuable character. For instance the walls, the floors and the roof may be built fire-proof, and yet the partitions, window-frames and doors, the decorations and the furnishings be of wood. This wooden finish takes away the fire-proof character. In Boston, the other day, the Congregational House was in its essential parts a fire-proof structure, yet a vulnerable place endangered the entire structure. And in Chicago, recently, the Stock Exchange building, considered in every way a strictly fireproof risk, was badly scorched from basement to the roof to the extent of $20,000, through an almost similar defect. In fact, the so-called fire-proof quality of this building was taken in part from it by the construction of a wooden flue, where a concrete flue with a vent at the top would have wholly avoided this danger, and even in a wooden flue a stop at each floor might have limited the fire to the floor on which it originated. Some particulars are given by the Argus, which we condense as under:

The building is of brick, stone and steel, eight stories in height, with basement and sub-basement, floors and partitions of terra cotta, and the whole is a good example of so-called fire-proof construction. The building is occupied mainly for miscellaneous offices, but there is a large book store on the lower floor and a printing office on the upper floor. A policeman saw the light of flames, in the seventh or eighth story window of this building and rang in an alarm. On reaching the building the firemen found fire in every story and the corridors full of smoke. Three 30-pair telephone cables (sixty wires each) came from the street through the basement and thence up, one cable going nearly to the top, the others stopping lower down, the wires branching and supplying telephones in the various offices. These cables were carried up through *hardwood varnished box*, about 5 by 16 inches square. The box ran from the basement to the top story through a tier of small offices just off the hallway near the main elevators and made a continuous flue through all the floors. There was no vent at the roof. This box was practically destroyed from top to bottom.

It is not known what caused the fire. The weight of evidence, says the Argus, indicates that the fire probably started on the seventh or eighth cable box, igniting the cable, with the result that burning pieces fell down through the flue, spreading the fire to all the floors. The wires in the telephone cable have rubber insulation with an outer winding of jute and tape, and when once well ignited burn freely and with much heat, thus accounting for the almost total destruction of the enclosing wooden box, and the spread of the fire to all the floors. The electric light wires for the building seem to have played no part in the fire, as they were entirely separate from the telephone wires, and were carried in iron conduits.

* * *

—It is many years since the proposal was made to bridge or tunnel the River Detroit, that fine stream which connects what are known as the lower lakes of the great American chain with the upper. Of late years, since the volume of lake traffic has become so enormous, the objection to any proposal made by the railways for a bridge at the city of Detroit has met with overwhelming opposition from steamboat and vessel masters and owners. A tunnel was proposed, some two miles above Amherstburg, when the Canada Southern Railway was first projected, about 1860, and the difficulties and delays of keeping up connection between Windsor and Detroit, between the Michigan Central, the Wabash and Canadian railways at that point have renewed interest in the project at various times since; but especially has the thick ice of the last two severe winters tried the patience and purse-strings of railway managers. We now learn that a force of Michigan Central engineers were last week busy in the Windsor yards, and as a tug was at the same time taking soundings in the river, it is believed that the best place at which to begin the tunnel under the Detroit River is being sought for. After the success of the Sarnia tunnel of the Grand Trunk and the relief it gave that system we may expect to see a Detroit tunnel ere many years have passed.

* * *

—It was to be expected that a stir would be created among the politicians at Ottawa by the letter of Hon. Mr. Rogers, of the Manitoba Government, exposing the Sbarretti incident. But if one looks away from that hot-bed of rhetoric, where party casuistry and inflamed language alternate, and talks with his neighbors, or reads the country papers, he will quickly find how strong and general is the sense of outrage at the conduct of the Papal ablegate. If this is a Protestant country, the spectacle of an emissary from Rome negotiating *directly* with ministers of the crown, and in effect promising them that by making legislative concessions to his faith they are likely to get an extension of their provincial boundaries, is an intolerable thing. The impudence of the proceeding is unsurpassed. We trust it is not too much to expect that Monsignor Sbarretti will hear, from the lips of one whose authority even he cannot deny, some such words as the King spoke to Pandulph in Act III, Scene I, of Shakespere's King John.

* * *

—Several large manufacturing concerns are said to be seeking factory sites in Toronto. Ashbridge's Marsh locations seem to be in particular favor, that is, would be, if a plentiful supply of water could be assured for that part. The city engineer figures the cost of bringing down a water main for the supply of such factories on the marsh would be at least $12,000. It will be well for the authorities of Toronto to treat such applicants as if they were welcome, and to meet their views as far as is possible. Do not let us have a repetition of the stupid municipal vanity and the stiff-necked folly of former years which deprived this city of extensive and most desirable industries. There is nothing peculiarly sacred about land in the outskirts of Toronto; though from the words and acts of certain of our city fathers one might imagine it was in some way hallowed, and not to be obtained for the most natural commercial purposes except on most onerous terms.

* * *

—Respecting the Government enquiry now being held into the telephone in Canada, we have ascertained by perusal of the full report of the evidence given by Mr. F. Dagger before the Parliamentary Committee that it is unjust to credit him, as the daily paper report from which we quoted credited him, with the statement that the rates in Canada and the United States are the highest in the world, and that they can easily be cut in two. The full statement as published referred only to the long distance charges, which it is well known are twice as high as the British rates, which in turn are much higher than German rates. We had no desire to mis-state Mr. Dagger's words, and we now correct what we said amiss in this particular.

* * *

—The election of Judge E. F. Dunne as mayor of Chicago is a triumph for the principle and practice of municipal ownership. Plans are being arranged in that city to bring out from Glasgow, Scotland, an expert on the question of municipal ownership of railways to advise on the best methods of procedure for bringing about the necessary changes in the American city.

ROYAL-VICTORIA LIFE.

An agreeable exhibit of the results of the business of the year last past is made by this company. Accumulated assets are more than doubled in six years; the annual income has gone up from $95,000 in 1900 to $150,000 in 1904; and the insurance in force, which in 1900 was a little more than two millions, is now in excess of four millions. There is an increase in payments to policyholders from $33,862 in 1903 to $42,604 last year; in policy reserves from $302,000 in 1903 to $368,000 last year; and in securities deposited with Government from $202,000 in 1903 to $268,000 at the close of last year. These creditable increases are concurrent with a decrease in expenses of management, to what extent we are not told, but the statement is a welcome one. These results, in the face of the sharp competition of the time in life assurance, ought to be encouraging to the management.

* * *

EXCELSIOR LIFE.

Some features of the year's business, as given in the resumé which we publish to-day, merit notice. The remainder of the authorized capital was disposed of during the year at the price of 150, and more could have been sold at the same price, we are told. This is a decided proof of confidence in the company's future. Other favorable features are the unusual rate of interest earned on the net assets, 6 1-3 per cent., the continued low death rate, and the increase in reserve fund. The total of insurance in force is now $7,646,000, an increase of 24 per cent. on the year. The Excelsior is nearly fifteen years in business, so that it can no longer be called a new company, and the extension of its sphere of operations gives rise to the hope of its steady and firm growth.

* * *

MATTERS IN SYDNEY, C.B.

Reports of progress and activity continue to emanate from Sydney and other Cape Breton establishments. The Nova Scotia Steel and Coal Company plans for a record summer, having already seven chartered steamers for the summer coal trade with St. Lawrence ports. It is expected that they will get out over a half a million tons of coal this season. The new colliery, Sydney No. 3, will be responsible for the greater part of this increase. The company expects to be making steel not later than June, when the open-hearthed furnaces are to be completed. An output of over 60,000 tons of pig is anticipated. Another battery of coke ovens, forty in number, will soon be in operation, making the daily production of coke 350 tons. The annual meeting of the company was held at New Glasgow on the 29th ult., and somewhat of a surprise was sprung on the public in the selection of a president to succeed the late John F. Stairs. It was generally anticipated that Senator James D. McGregor, vice-president of the company, would be the man selected. The choice of the shareholders, however, fell on Robert E. Harris, K.C., a prominent barrister of Halifax, and interested in many industrial and other enterprises. He is a director of the Acadia Sugar Refinery, of the Robb Engineering Company, the Royal Securities Corporation, the Eastern Trust Co., and the Trinidad Electric Co.

Business is active at the works of the Dominion Iron and Steel Company, at Sydney. It is said that the company earned $75,000 in January, which month was not particularly good in the steel trade; and this leads to great hopes as to what will be done when the company's rail mill is in good running order. This, by the way, may not be so soon as anticipated. The date looked forward to for some time was June, but some of the officials in Sydney intimate that it may be July or August. The mills are far from complete, and the machinery will have to be put in, which will take considerable time. The billet mill has been closed for repairs to the foundation, which has been found, I am told, to be sinking and out of plumb, and repairs will take two or three weeks. This will mean the closing of the rod mill also.

Captain J. A. Farquhar has been presenting a railway dry dock scheme to the council of North Sydney. It is estimated to cost $250,000, is to receive a Government bonus of 3 per cent., and he asks $2,500 a year, for twenty years, and freedom from taxes and water rates. This is bonusing on a liberal scale, to be sure. In addition, the Captain proposes to establish a complete modern wrecking plant at a cost of $140,000. The scheme will be submitted to a meeting of ratepayers.

A Toronto gas company is desirous of establishing a plant in Sydney. The company asks a thirty year franchise, and five years exemption from taxation on its site. The parties propose, I am told, to spend $30,000 in laying mains, etc. The proposition will be considered.

The A. C. Thompson, Hardware and Stove Manufacturing Co., Limited, held its annual meeting at Sydney last week, when the following officers were re-elected: President, A. C. Thompson; vice-president, Hiram Donkin; secretary-treasurer, W. S. Thompson. They gave out no further information.

It is stated that the Sydney rod mills are now supplying 85 per cent. of the iron rods used in Canada. Eleven of the thirteen nail factories in the Dominion now buy from these mills, the two exceptions being in Hamilton. The two mills in St. John use on an average 850 tons per month, worth about $27.50 per ton. The output of the Sydney mills is now about 150 tons a day of iron rods.

A Sydney fireman has patented a fire alarm box, which will discourage the ringing of false alarms of fire. It is large enough to hold a man, and the alarm can be sent only by the person getting into the box and closing the door, which automatically locks him in until released by a member of the department.

Sydney is to have a summer carnival during the first week in August, with $1,500 offered in prizes for water and other sports, races, etc.

* * *

FINANCIAL MATTERS.

The total revenue of the United Kingdom for the fiscal year ending March 31st last was $765,915,515, or $9,124,125 more than in the previous twelve months.

A bill for the prohibition of all bucket shops in the State of New York has been introduced in the Assembly at Albany. It prescribes a penalty of not less than six months' imprisonment for exhibiting stock quotations for transfers, purchases or sales on margins, and other fictitious stock transactions.

It is announced that the Ontario Government has decided to make a direct issue of bonds for $6,000,000 for the building and completing of the Temiskaming and Northern Ontario Railway. It is not known yet for certain whether, in order to connect with the Grand Trunk Pacific it will be necessary to extend the line beyond the present proposed terminus.

The city of Halifax is having an act passed by the Legislature to enable it to renew the consolidated bonds and stock, which mature within the next two years. The city authorities are also requesting an act to readjust the license and taxes paid by the Halifax Electric Tramway Co., which will considerably increase the amount paid by this company into the city's treasury.

Thompson & Barry is the name of a new stockbroking firm who have opened an office at 10 Jordan Street, Toronto. They will buy and sell stocks and bonds on commission. The firm comprises Robt. W. Thompson, who for a number of years has been a member of the firm of Robert Thompson & Co., and James W. Barry, who was connected for eleven years with Robt. Beatty & Co., stock brokers.

A letter from Halifax, dated 3rd April, says that arrangements for the merger between the Peoples Bank of Halifax and the Bank of Montreal are complete, only wanting the ratification of the shareholders. "It is not too much to say that there has been very widely expressed surprise and discontent here at the arrangement, which takes over the Peoples Bank shares at 115. Perhaps this is not unnatural considering the fact that a large proportion of those shares were bought at 140. and, indeed, have been quoted around that figure up to the time immediately preceding the announcement of the merger. Large blocks of them were held by prominent financial men here, who had not the slightest inkling, apparently, of the depreciation which was about to take place in them. But, after all, the deal will probably go through, it being concluded that the interests of the shareholders of the Peoples Bank will be best served by accepting the terms of the agreement."

The Grand Falls Power Company, which has just been granted a charter by the Dominion Government, and in which Sir W. Van Horne is interested, proposes to build and operate factories near the St. John river, in New Brunswick, for the manufacture of mechanical and ground wood pulp, sulphite, pulp, paper, cardboard, paper materials and lumber. Its capital stock is placed at $200,000. Among the other charter members are R. B. Angus and Ernest Alexander, of Montreal; H. H. McLean, of St. John, and F. R. Kimberley, of New York.

Newfoundland seems to be passing through a brighter period in its history. At the opening of the new Parliament on the 31st ult. a surplus of revenue for the current fiscal year was announced, besides which during the year there was a "favorable balance" of trade of over a million and a quarter dollars. Everything indicated the continuance of prosperity. The fisheries have brought large returns, and the prices have been the highest for years, except in the whale fisheries, over-production in which depressed prices. Mining and lumber have also shown good results.

The directors of the Dominion Coal Co. are, we understand, engaged in a plan for the reorganization of its finances. The principal features of the arrangement are that the company will issue $5,000,000 bonds and $3,000,000 preferred stock, and with the proceeds of these all the present bonds, preferred stock and indebtedness to the Dominion Iron and Steel Co. are to be paid up. In addition to the $5,000,000 there is proposed also $2,000,000 bonds, which will not be issued at present, but which are to be held in the treasury. It is intended that the $5,000,000 bonds should bear 5 per cent. interest, and be issued at par. It is understood that the new $3,000,000 issue of preferred stock shall bear 7 per cent., and will be redeemable at 120, while the present preferred, which bears 8 per cent., is redeemable at 115.

* * *

A BRANTFORD MAN ON BRANTFORD MEN IN THE FAR WEST

A description of a trip from the Lake Region to the Pacific Coast of Canada is almost sure to be attractive, especially if the person who reads it has been across the continent. There is so much of the natural features of the country worth describing, and then there are adventures and novelties and new faces every day, on every train. The Brantford Courier of last Saturday contains a letter written by Major J. S. Hamilton, of Brantford, descriptive of a trip he took last month to British Columbia, Washington, Oregon, and California. We cannot reproduce the letter, which occupies some five columns of the newspaper, but it is well worth while to accompany the Major on his round and make extracts here and there.

One thing becomes increasingly apparent as we pass in his company from Ontario to Manitoba, through the Territories to the mineral Province, and thence to the American States named, and this thing is that there are Brantford men in every corner of the North American continent. We do not need to insist further on this point at the moment—the narrative will presently make it clear. First, we note the traveller's arrival at Port Arthur and Fort William, of whose strivings in rivalry and whose expectations our readers have heard. Both towns are flourishing, says the Major, "and both are well boomed by land agents. On the street I had the pleasure of meeting So-and-So from Hamilton, and later Arthur Jones and Sergeant Sharp"—from Brantford, of course. Rat Portage next, bustling, as usual, with mining projects and actual saw mills, and the usual Brantford man at the station who accompanies our writer to Winnipeg.

Great changes visible, of course, at the capital of Manitoba: sky-scraping buildings on Main Street; Eaton's departmental store in steel skeleton; the C.P.R. hotel and station in progress; storehouses, warehouses, dwellings rising wherever the eye would rest. "Winnipeg now claims 120,000 population!" Among those who go to make up this handsome estimate the Major found and names ten former residents of the Telephone City—a banker, a major, several commercial managers and employees, a hotel keeper. Then he goes out by the Canadian Northern to Dauphin, and meets at the station a man from Brantford. Arriving at Portage la Prairie, in a fine wheat-growing section, "and taking the Brandon special we arrived at that prosperous town of 6,000 with a new club building costing $14,000, where I met the new B.B.N.A. manager, well known in Brantford." Next morning at 7.15 he meets at the station Mr. J. M. Nicoll, formerly G.T.R. agent at Brantford. Along here are Indians and settlers, horses, and cattle. Near Gull Lake is the first large herd, belonging to a company which has upon its ranches a total of 15,000 head.

Dunmore Junction passed, four hours on the Crow's Nest Pass branch railway brings the Ontario traveller in succession to Lethbridge, Fort MacLeod and Pincher Creek, in the Alberta country, at the last of which is located the agent for the Massey-Harris Co.—an acquaintance and a Brantford man we may infer. A word or two about Frank, where the great disaster of 1903 took place, and then Blairmore and Coleman, two newly sprung-up towns, are mentioned, at the latter of which an old Brantford boy, Oscar W. Benedict, is keeping a general store. Passing through Michel, "a typical mining town, the headquarters of the Crow's Nest Pass Coal Company, which has recently erected a fine large hotel." . . . An hour's run brings us to Fernie, "whose hundreds of coke ovens are in full blast, and whose appearance has been changed for the better as a result of the fire of last summer." The mayor, Mr. Fred Stark, a prosperous merchant, is a former sergeant in the Dufferin Rifles, and, of course, a Brantford man. In his description of Cranbrook the traveller dwells long enough on the place and its now principal industry, lumbering, to point out the depression which exists in this trade because of the admission into the Province of many millions of feet of Idaho and Washington lumber duty free. What the Western lumbermen want, to combat this, is a duty imposed of $2 per thousand.

Moyie and the St. Eugene mine, Proctor and Kootenay Landing, and all the fine stretch of scenery thereabout, embracing mountain, lake, and river, are described with a loving and admiring touch. And then Nelson strikes the Major's eye and heart, for there he finds "two Brantford boys," Charlie Benedict, storekeeper, and Herb Fullerton, traveller for a Vancouver house. Sixty-two miles to Rossland camp, via West Robson and Trail, and at this celebrated station of the renowned War Eagle and Leroi, behold three Brantford men, Mr. Craddock, and Messrs. Rowley and Lewar of the Bank of B.N.A. Slocan City and Silverton, New Denver and Nakusp, all well-known points in that mining district; then the picturesque Arrow Lakes and Arrowhead (where there are two large saw mills and a busy town has quickly grown up near them), and in an hour the main line of the C.P.R. is reached at Revelstoke. The "meeting of the waters" next morning at Lytton, the striking landscape at Yale, and by noon Vancouver is reached. Here are found Brantford boys galore—a merchant, a lawyer, an actor, a broker, a travelling salesman, another merchant, and then, before he put foot on the steamer to cross the Strait, Mr. Simpson, formerly of the B.B.N.A. at Brantford, and his wife. The man who is writing this notice of the Major's travels stops just here to rest his wrist and to wonder whether the B.B.N.A. branch at Brantford has been all these years a seminary for bankers to graduate at before they took their way to the Canadian North-West.

New Westminster has, it appears, among its other industries, a distillery, whose capacity is 2,000 gallons per day. Mr. Hamilton may be excused for making a note of this establishment, for it is all in the way of his business. Beautiful as Victoria is, it is more so in his eyes for the possession of half a dozen at least of Brantford men, two of them British Bank managers of Ontario memory, Mr. Oliver and Mr. Galletly. Seattle and Tacoma, in the State of Washington, are presently reached, then Portland, in Oregon, where the grounds are being made ready for the Exposition to be opened in June. His guide to these was a Brantford man, and at the Arlington Club he had a Brantford host. It surpasses belief, until one reads these daily notes, that there could be Brantford graduates enough to go round such an array of towns, Canadian and American. But their proven number justifies the honorable and reverend but always cheerful "Dave" Waterous, in his offer of a wager to the 170 members of the C. M. excursion of 1903 to the Coast, that there were more former residents of Brantford to the acre on the prairies and in the towns of our Great West than of any other city or town.

The charm of San Francisco on a bright day, with the thermometer at 80, must have been great to the indefatigable Major Hamilton, being whirled as he was in the automobile of Doctor John Stinson, "an old Brantford boy," through the streets and to Golden Gate Park. Through the Sierra Nevada mountains to Leray, in Utah, and Salt Lake City is reached, where "I met in the street Mr. Wm. Finlayson, of Brantford," and next day Mr. John McKenzie, foreman in the railway shops for some years, "who formerly lived in the East Ward." At Sioux City, Omaha, an old Brantford friend, Col. Ballachey, gave me lunch."

Finally, after all his wanderings, our observant and much-travelled Major reaches the sights and sounds of home, "the rolling, fertile fields of Norfolk and Brant counties and the Grand River, still ice-bound." There were, just as he had left them, the fine buildings of the Waterous Engine Works Co. on the right and the Massey-Harris Implement Works on the left. "They made me feel that Brantford compares favorably with the other cities I had visited." But his enthusiasm was floored with a dull thud when he beheld again "our antiquated town hall!" Recovering, he grasps his pen again to give this unequivocal tribute to his much-loved home: "After a trip of nearly seven thousand miles on both sides of the line, I saw no Province or State which in my judgment equalled Ontario, and few places I considered more desirable for a residence than Brantford."

* * *

FIRE INSURANCE NOTES.

Peterborough town council has passed the second reading of a by-law to raise $25,000 to build a new central fire hall, install a new fire alarm system, purchase a chemical engine, and generally place the fire system on a first-class footing. The people will vote on the by-law May 4th.

The monthly fire report issued by the Fire Alarm Department in Montreal shows that, compared with the corresponding period of last year, there was an increase of three fires, and, very fortunately for the fire brigade apparatus, considering the condition of the streets, a decrease of 22 runs. To extinguish the fires required the service of 81 streams, 64 hand extinguishers, and 11 fire engines, 7 incipient fires being put out with buckets.

Lectures on the following fire underwriting subjects are to be delivered before the Wharton School of Finance of the University of Pennsylvania during April: F. C. Oviatt, editor of the Philadelphia Intelligencer, "A Review of Fire Insurance," April 6th; Chas. A. Hexamer, "Rate Making in Fire Insurance," April 13th; Everett U. Crosby, "Fire Protection," April 20th; F. C. Oviatt, "Policy Contracts in Insurance," April 27th.

Universal regret is felt at the untimely death of Alex. W. Aitchison, chief of the Hamilton Fire Department, owing to a collision between his buggy and a chemical combination wagon, while driving to a fire on Wednesday last. The deceased fire chief, who was one of the best known on the continent, was born in Binghampton, N.Y., in 1850, but came to Hamilton with his parents in 1853. He was a member of the volunteer fire department in that city, and became one of the first paid firemen, having been appointed chief in 1879.

It is not long since the following, on the subject of adjustments, appeared in the New York Journal of Commerce: "A great deal of interest is being taken in the adjustment proposition in the West in view of the agitation for better co-operation. One company which has classified its loss reports for a year, covering 1,865 losses, finds that 286 losses adjusted for special agents cost on an average $24.11 each, while 355 settled by adjustment companies cost $8.47

each. Local agents settled 1,158 small losses at an average cost of $1.02 each, while independent adjusters handled 66 losses at an average cost of $13.33. The average for the entire number was $6.42."

* * *

LIFE ASSURANCE PARAGRAPHS.

In reply to Agent, London, who asks for a compendium relating to accident insurance in America, we would say that the Spectator Company, of New York, publishes "The Pocket Register of Accident Insurance for 1905," showing the condition and business of stock and assessment accident insurance companies operating in the United States. This chart is compiled from official reports, the figures covering the five years ending January 1, 1905.

Good risks are not always properly presented; an agent's oversight may reject his own applicant. If the papers as filed lack information deemed essential by the medical director, delay is inevitable, even though the risk is actually of the highest grade; and if this information is not secured, rating up or rejection will surely follow. The company takes risks on a scientific basis; it doesn't gamble. In coming to a conclusion, the medical department welcomes all the facts it can get; and in addition, the opinion of an agent who has proved the honesty and wisdom of his judgment, is always given great weight.—Fidelity Mutual Monthly Bulletin.

A decision by Chief Justice Meredith confirms the judgment of the county and divisional courts in the suit of Gordon S. Henderson, of Hamilton, against the State Life Insurance Co., of Indianapolis, the plaintiff claiming the amount of $351, a premium on a $10,000 insurance policy he had applied for. Before the company's medical men approved the issuing of the policy, Henderson decided to withdraw his application, and did so, demanding his money back. That company refused to pay it, and he sued to compel them to pay. The defendants appealed twice, and are finally adjudged to pay the premium back, Chief Justice Meredith holding that the policy was of no effect until it had been accepted by the holder.

A well-known and valuable life underwriter passed away when Jacob L. Greene died of apoplexy at Hartford last week. Col. Greene went to Hartford to reside in 1870, and had been president of the Connecticut Mutual Life Insurance Company since 1878. He had written many authoritative articles on financial topics. He was a graduate of Michigan University, and for a time before the civil war practised law in Michigan. He was a real colonel, not one of the so-called colonels who never smelt powder. He enlisted at the opening of the war as a private, but for meritorious conduct was promoted rapidly through many grades, reaching the rank of colonel. A Detroit man who knew him well says that he was "a gallant young lieutenant-colonel detached from the Seventh Michigan Cavalry, to which he belonged, to serve on Gen. Custer's Michigan Brigade."

—The winter pack of lobsters on the western coast of Nova Scotia is now estimated at 5,000 cases, compared with 9,000 to 10,000 cases on the average. The factories closed a month earlier than usual. It has been a poor season all through on account of the severe cold, etc.

* * *

—The arrival at Halifax of the Allan Line turbine steamship "Victorian," which had been looked forward to with keen interest, took place on the 1st after a voyage of seven days, twenty hours and some odd minutes from Moville, Ireland, by way of the northern route. No effort was made to effect a particularly fast passage; moreover, strong headwinds and rough seas rendered it a much slower one than would normally be the case. The turbine engines, all agree in stating, worked admirably, and there was a noticeable absence of vibration.

* * *

—There appeared to be every probability that the first of April would usher in a strike in the coal mines at Springhill, Nova Scotia, the property of the Cumberland Coal and Railway Company. The company employs 1,170 men, and claims to have operated last year at a loss. They announced some time ago that they would reduce wages 12 per cent. on March 1st. The men, through the Provincial Workmen's Association, announced that they would strike if this decision were adhered to, and would cease work on April 1st. After a series of conferences it has been agreed to have the whole subject open to discussion until May 16th. Official reports show that the average rate of pay throughout 1904 was $2.98 per day. The men claim to have lost much time since the first of the year through bad weather and poor markets. To the claim that the company has been operated at a loss last year, the men rejoin that large sums spent on the railroad and around the mines have been charged to current account instead of to capital. If a strike occurs it will affect business in the Province seriously, and particularly in Springhill.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, April 6th, 1905, as compared with those of the previous week:

	April 6.	March 30.
Montreal	$31,333,900	$22,746,371
Toronto	23,923,017	17,537,432
Winnipeg	3,934,115	3,620,079
Halifax	1,523,188	1,374,634
Hamilton	1,434,777	953,973
St. John	969,794	900,630
Vancouver	1,448,271	1,270,369
Victoria	442,371	578,331
Ottawa	1,699,463	1,303,185
Quebec	2,357,502	2,068,068
London	1,053,047	758,307
Total	$70,119,445	$53,111,379

The FIVE per cent. Debentures issued by this Company afford the following advantages:

The investment can be converted into cash at any time after two years by giving sixty days' notice.

The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.

The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.

The Debentures issued by the Company will be a first charge upon the assets.

AMERICANS FOR THE CANADIAN WEST.

The interest in Western Canada which has been so pronounced during the past two years among Americans of the State along the Mississippi, continues, and is even increasing. Letters to us during the week from Medicine Hat and Calgary refer to intelligence having been received of numbers of home-seekers or purchasers coming or to come in this spring from the States, probably from Kansas and Nebraska. And we have seen a newspaper statement that east of Regina, in the neighborhood of Wolseley and Grenfell, there would be a lot of Americans from Missouri settle presently, because at Hannibal, in that State, one real estate man had chartered two whole passenger cars to carry sixty farmers into that part of Southern Assiniboia. When we remember that the centre of Nebraska is at least 500 miles from the Canadian border, that portions of Kansas and Missouri are 700 to 900 miles distant, while Arkansas and Oklahoma are still farther away, it becomes apparent that residents of these States, now arranging in hundreds and thousands to remove to Canada, must either be possessed of land hunger or have conceived a tremendous admiration for our North-West.

Much detail is afforded as to the character of these prospective settlers in a special sent to the Toronto World by its travelling correspondent in South-western States, who signs "G. C. P." He shows that the people of the States, from Nebraska to Kansas, who are removing to Canada go there to raise wheat and to raise cattle, and are already accomplished farmers. The two States named, he says, produce to-day the finest of spring wheat, though much of their land was alkali desert twelve or twenty years ago. And he accounts for their present move in this way:

"It is because of their success in this region that thousands of these farmers are rushing into the Territories. They realize that the climatic conditions are very similar, and that the north country has the advantage of increased sunlight."

"Spring wheat is the great product of Kansas and Oklahoma, and it is to raise wheat that most of these new settlers are going into British North America. They are expert stock-raisers, too, but it is grain that has enabled them to make fortunes here, and they have studied the Canadian North-West, and appear convinced that the wheat and oats and barley Western Canada will send into the markets of the world within the next few years will make fortunes for every man engaged in the production of the food-product."

The correspondent says he found maps of Canada in many real estate offices in Omaha and Kansas City, and lots of Government and private company literature. "Regina Moose Jaw, Battleford, Prince Albert, Medicine Hat, Edmonton, Calgary, Macleod and High River are places heard on the streets of this city in front of these offices and at the central station as frequently as in Winnipeg. Many of these new settlers have friends in the north country, and probably the best advertising received is from the letters of these people who have gone into the country and been pleased with the result." And daily papers of Topeka and Hannibal contain certificates, so to speak, from Americans who have removed to the Canadian West two, three, five years ago, of their success and satisfaction in their new home. He says the traffic Canada-ward has opened earlier this spring than usual, and "'Jerry' Black,' the general passenger agent of the Atchison, Topeka & Santa Fe Railroad, told me that his reports for February showed 920 tickets through the Minneapolis gateway for Western Canadian points. Further, he said, Norton, Kan., a town of but 600, sent seventy persons over his line into Manitoba and the Territories during last month. . . . The Commoner, the paper established by William Jennings Bryan, told me to-day that Nebraska was sending 30,000 farmers into the Territories this year. At the Omaha stock yards I found hundreds of men buying animals last week to make the trip overland. Many of them [the men] balk at the heavy freight rates, and prefer to travel overland to the north, exactly as they reached Kansas and Nebraska and Illinois thirty years ago. . . . And I was told by E. L. Lomax, general passenger agent of the great Union Pacific, that he fought against 'this advertising a foreign country until my directors told me to stop, as the people wanted the information, and we might as well have the revenue as some of the other roads which were hauling the traffic north.'"

The explanation given by Governor Hoch, of Kansas, of the migration to Western Canada, was that the people of Kansas have the "travel fever," and he thought it useless to try and keep them at home. He added that land values had reached such a figure in Kansas that it was most natural for farmers to want to sell out and get "into the open," where land was cheaper.

* * *

METROPOLITAN LIFE ASSURANCE CO.

The business of this company is remarkable for its great extent, and this great extent is most largely by reason of the growth of the industrial branch. The company issues policies of $1,000 to $1,000,000 in its ordinary department, and industrial policies for smaller amounts on all insurable persons. Its policies, in the words of the company, "are plain business contracts, which tell their whole story upon their face, leave nothing to the imagination, borrow nothing from hope, require definite conditions, and make definite promises in dollars and cents." In the personnel of its chief officers and the high character of its management during these many years is found the secret of the very great confidence it commands.

The assets of the Metropolitan Life at the close of 1904 were $128,094,315. Its income for 1904 was $55,985,756, which is more by six million dollars than the income for 1903. It had the extraordinary number of 8,029,906 policies in force on January 1st, while the total amount paid to policy-holders and beneficiaries since the company's organization is $277,290,466.

The record of growth as shown by increase of assets from a little over two and a quarter million dollars in 1884 to more than one hundred and twenty-eight million in 1904 is remarkable. An interesting item is the one showing Canadian securities deposited with the Canadian Government to secure Canadian policy-holders. These aggregate $2,612,495.

A notion of the volume of the company's new business for 1904 may be got when we say that the total of its insurance written during the year—$436,570,349—is equal to an average of $1,426,700 per day.

* * *

EDMONTON AND ITS BOARD OF TRADE.

The annual meeting of the Edmonton Board of Trade was held on 23rd March, about 75 members being present. Mr. A. B. Campbell was elected president; Mr. A. T. Cushing, vice-president, and Mr. F. T. Fisher, secretary. A strong council was elected, consisting of Messrs. T. W. Lines, J. A. McDougall, G. R. F. Kirkpatrick, T. M. Turnbull, E. C. Pardee, J. B. Mercer, A. C. Fraser, J. H. Morris, C. W. Strathy, J. H. Gariepy, and Theo. Revillon. It was decided to open a permanent office, which will serve as a bureau of information for intending settlers or investors; and a vigorous campaign will be inaugurated to make known to those interested the great resources and opportunities of Central Alberta.

We are favored by the secretary with some facts and opinions about the neighborhood which deserve to be printed. Curiosity about that rich but distant portion of Canada is still rife, and anything about it from a trustworthy source cannot but be of interest to our readers. Says Mr. Fisher:

"While the great want of the West is farm settlers, Edmonton and the surrounding district offers opportunities to many others as well; and the secretary invites correspondence with manufacturers or others looking for the best thing there is in locations as well as from prospective settlers on the land.

"The business men of Edmonton, who are largely old-timers in the West, who know the whole country thoroughly, have great faith in the future of their city; and they speak with a faith born of knowledge. It is pointed out that Edmonton is about the centre of what is probably the largest

tract of almost uniformly high-grade farm lands to be found, practically in one block, anywhere in America. Add an unlimited supply of coal of high grade, a liberal supply of fine spruce timber, plenty of good water, every indication of enormous supplies of natural gas and oil, the finest climate east of the Rocky Mountains, and the fact that both the Canadian Northern and the Grand Trunk Pacific railways have repeatedly stated that Edmonton will soon have the best shipping facilities of any city between the Red river and the Pacific, and it would almost look as if the citizens have considerable grounds for their faith in their city.

"The fact that the Edmonton Board of Trade has a membership of 136, as compared with such places, for instance, as Vancouver, with 158 and Peterboro' with 74, as mentioned in a recent number of the Monetary Times, shows that the spirit of progress is abroad at the centre of the new Province of Alberta."

* * *

A GRUESOME REMINDER.

A reminder of one of the most dreadful catastrophes known in industrial Canada comes in the shape of a report of the disposition made of the relief fund for the sufferers by the explosion in the Springhill Mines, Cumberland County, Nova Scotia, in January, 1891. By this terrible accident 57 persons were made widows; the orphans and fatherless numbered 142, and dependents on those killed, 19. Funds flowed in to the extent of $138,000 from all parts of the world. During the administration of the fund 29 of the widows found husbands, three died and 25 remained. Nineteen of the orphans died, and all the children except six are now over the age limit laid down. Of the disposition of the relief fund for the Springhill sufferers, the Maritime Mining Record says: "After a lapse of fourteen years, the last money was paid lately of this big relief fund, and its administration closed with credit to those having oversight. During all these years Mr. A. H. McLeod, of the Cumberland Railway & Coal Company's staff, was the secretary, and to his prudent management is due much of the economical way in which the fund was administered. His work was not light, as the beneficiaries had wandered in the interval to many lands, to Great Britain and Ireland, the United States, Newfoundland and France, and, of course to Pictou, Cape Breton and other counties within the Province. And, though cheques were sent to all these places at intervals, not a penny went missing."

* * *

CANADIAN AND BRITISH LUMBER TRADE.

While considerable firmness continues to be felt in the lumber trade in Ontario, no feature worthy of special comment has developed since last report. Prices of pine are steady, and, as before indicated, one or two lines showed slight advances, but, as a rule, values hold very much as they were during the winter. There seems little probability, at any rate for some time to come, of any decline from the present high range of prices, stocks being as a rule in small compass, while the demand is likely to be at least normal. The building trades promise to be satisfactorily active during the year, so that, on the whole, the indications are that the lumber trade, in Ontario at any rate, will be good.

The latest report to hand from Farnworth & Jardine, timber merchants, Liverpool, says that the arrivals continue on a moderate scale, the deliveries have been fair, and stocks with few exceptions are not heavy. Values are stronger for some of the leading articles, and all round have been well maintained. In regard to Canadian woods, there have been no arrivals of pine. Of waney, there is no improvement in the demand; values rule firm; stocks are ample. There is only limited enquiry for square pine, and stocks are adequate; prices are steady. The stock of red pine is nearly exhausted, but the demand is nominal. The deliveries of oak logs show a little improvement, but stocks, although light, appear sufficient, and values are easier. Elm is in fair request, and prices rule high; stocks are low. There have been no arrivals of pine deals; the deliveries have been disappointing, but there is little change in values to report; stocks are too large. Red pine deals are dull of sale; stocks are ample.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The import to Liverpool and Manchester Canal during the past month shows an increase compared with corresponding month of last year, viz.; 3,350 standards, against 2,710 standards in 1904. The deliveries have been fairly satisfactory, and stocks show a further reduction, but moderation in consigning is still more desirable. There has been rather more enquiry, and recent sales have shown a little improvement. Pine deals are very dull of sale and stocks are heavy. Birch—Of logs from St. John, N.B., there has been an import of 8,000 cubic feet; the stocks are light; values are firmer. Planks have arrived in moderate quantities, and, as the deliveries have more than kept pace, the stock is low, and values rule steady.

Of British Columbian and Oregon pine there were no arrivals up to 1st March. The demand is very quiet, but prices are steady; stocks are heavy.

* * *

DEATH OF JAMES A. MATHEWSON.

A worthy man, who had in his day been prominent in commercial circles of Montreal, Mr. James A. Mathewson died in that city on Monday last, having reached the age of eighty-two. While he was well known in the wholesale quarter of the city, he was, perhaps, equally well known in benevolent circles and in connection with the Methodist Church. His grocery establishment was for very many years in the same spot on McGill Street, and his dwelling, with its voluminous verandahs, was long one of the show houses of Sherbrooke Street.

The deceased gentleman was senior member of J. A. Mathewson & Co., McGill Street, the partnership consisting of himself and his three sons, Messrs. W. B., S. J., and J. A. Mathewson, Jr. He left Strabane, Ireland, in 1833, for Montreal, in which city he may be said to have been continuously in business for sixty years. In 1834 his father established in St. Paul Street the wholesale house which has been continued since. After a parnership in the concern, he succeeded as its head on the death of his father.

We are told that besides the sons identified with him in business, Mr. Mathewson is survived by two others, Dr. G. H. Mathewson, of Montreal, and E. P. Mathewson, manager of the Anaconda Mining Company, in Montana. The family circle was a large one. We know that "the memory of the just is blessed"; and J. A. Mathewson was a just and kindly man.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal—The Quebec Bank.

It is interesting to note that farmers in the West are becoming more and more alive to the importance of local flour mills, and in many cases they are combining and forming companies to erect them. It is recognized that a much larger proportion of wheat than is desirable is being shipped out of the country, and that the interests of Canada would be conserved by retaining the raw material at home.

In a letter from a country dealer in the west of Ontario, the writer tells us: "I have been busy during the last week taking stock and figuring up our little business, which we find improving nicely, although we have three or four peddling wagons to contend with, which are a curse to a small business like ours. Still by close attention and honest dealing we manage to exist." There are more country dealers than this man who find peddlers' wagons interfere with store trade. But if they pay their license, where a license is exacted, it is not easy to get rid of their competition.

Seldom has there been so much activity in the Lancashire cotton mills as has reigned there since the lowering of the price of raw material. All the mills are busy, and there are orders for all the goods that can be produced for months ahead, but so strong is the demand, that it is said that thirty mills, with 3,000,000 spindles, are soon to be added to the manufacturing equipment of the district. The English cotton trade and industries subsidiary to it are said to give employment to at least a million persons, or a livelihood to perhaps 5,000,000. The prompt revival of the business on the removal of the embargo upon American cotton was due to Great Britain's hold on foreign trade. Of the average annual production of $450,000,000 in value of cotton goods, not more than $100,000,000 are consumed at home. The moment the mills could obtain sufficient material at a normal price they were ready to supply the reviving demand the world over.

In Boston, Mass., the volume of business transacted in the wool market continues of about the same proportions as previously noted, although manufacturers are, if anything, showing a little more interest in the situation. "There would be more business done if there was more wool here; but it would be difficult to transact a larger business in domestic wools, with supplies as restricted as they are at present. In domestic stock there are no very large lines of anything available." Many conclude that the new clip wools, when they become available at the seaboard, will be largely taken by consumers, assuming, of course, that the goods market is to continue in a favorable condition. One factor, it is believed, which will lead to a quick sale of the new wools, will be their excellent condition. Reports thus far received from the interior very generally indicate that the new wools will be of fully as light shrinkage as was the case last year, and, in some localities, of even lighter shrinkage.

Retailers in the United States are having their troubles in respect to the trading stamp nuisance in the same way that they are here. However, it seems to be decreasing in importance. The Dry Goods Economist, of New York, refers to the subject in this wise: For some time past signs have not been wanting that the more or less forced popularity of the trading stamp scheme was on the wane. One proof of this has been furnished by the apathy of retailers who were known to be opposed to the stamps. For several months past careful study of the daily papers of the country has failed to reveal any reports of the meetings of merchants for joint action against the stamps that at one time were so frequent. Efforts to obtain State legislation or city ordinances against the stamps have declined in similar manner. Apparently, so far as the great majority of retailers are concerned, the trading stamp proposition has at length become a negligible quantity. This condition may be attributed to various causes. The agreements on the part of merchants in various centres to discontinue the use of trading stamps have had something to do with their decline. A greater influence, however, has been exerted by the trading stamp companies themselves. It is a matter of common knowledge that in many instances they have not lived up to their professions in the matter of premiums, and that stamp collectors have been disappointed in the results obtained by their trouble and patience. The most potent adversary of the stamps, however, is a comparatively new arrival in the field, namely, the stamp broker or scalper.

Manufacturers of hosiery at Chemnitz are still very busy shipping spring goods, of which a great many are overdue. As importers are very anxious to get these as early as possible, mills are even running overtime. In plain goods orders were filled pretty promptly, but in lace hose delays are unavoidable. Manufacturers, however, endeavor to give each of their customers some goods to keep them going, as they are not in a position to deliver all of them at the time mentioned at the beginning of the season. New orders are not coming in very fast. In plain staple numbers importers are buying only what they must have for immediate use, anticipating lower prices before long. Unless the market becomes unusually active a drop in prices of plain cotton hose is almost sure to come, but it is hard to say now just to what extent yarns will be reduced. This is the only factor that can count in reductions, as wages will not go lower.

* * *

FOR GROCERS AND PROVISION DEALERS.

The Grocers' Wholesale Company, Limited, of Hamilton, is bringing an action against the Canadian Grocers' Company on the ground that the latter comprises ten large wholesale houses, who form a combine with the object of compelling the sugar refineries to sell only to them. The first-named company demand $100,000 for damages already sustained. Defendants ridicule the charges made.

In their Letters to Tom, the Grocer, the second of which we find in last week's Canadian Grocer, the G. E. Tuckett & Son Co. make a very good suggestion to enthusiastic but inexperienced buyers, thus:

"Dear Tom,—We think you need a word of warning. Young buyers are apt to over buy. The offer of an extra 10 per cent. discount on gross lots is a temptation, but it may be bad business to yield to it. If your business won't stand the safe purchase of more than a dozen, don't buy eleven dozen more just to reduce the price of one dozen by 10 per cent. We once knew a man who bought a gross of tubs this way. He sold most of them at a loss."

The Pure Food Exhibition, which is going on during this and next week at Massey Hall, Toronto, seems to be meeting with great success. The whole ground floor is devoted to the exhibition, and there are fifty or more stalls containing food of various kinds. At the opening ceremony, which took place on Monday, there was a large attendance, amongst those present being the Mayor, Ald. Vaughan, Ald. Church, Ald. McBride; Messrs. Hugh Blain, representing wholesale firms; G. Good, chairman of the Grocers' Section; J. H. Walker, vice-chairman; M. Moyer, second vice-chairman; F. C. Higgins, secretary; John Bond, treasurer; E. M. Trowern, general secretary Retail Merchants' Association, etc., etc.

* * *

—The Secretary of the Interior for the United States has set apart $1,300,000 from the reclamation fund for the purpose of beginning operations in connection with the Payette-Boise irrigation project in Idaho, and $1,000,000 for the same purpose in connection with the Milk River project in Montana. It is calculated that 370,000 acres will be reclaimed in Idaho and 325,000 in Montana, and the ultimate cost of the two enterprises is fixed at $11,000,0000 and $10,000,000, respectively. In the Milk River scheme an international question is involved, as a portion of that river from which it is proposed to divert water is in Canada. Many urgent petitions have come for relief from the situation in the Milk River valley, and the Secretary of the Interior has ordered steps to be taken to carry into effect the plans of the reclamation service for storing floods in St. Mary's lake. This will necessitate the diverting of the water of St. Mary's river over into the head of Milk river, and ultimately across the head waters of Milk river into the Marais, and again out of the Marais back into the Milk river in Montana, thus creating a great artificially regulated system of water supply south of the international boundary. It is expected that construction will be begun this season on the diversion of St. Mary's river into the head waters of Milk river, allowing the water to flow for a time through Canada back into the United States.

Mercantile Summary.

The Stark Telephone, Light and Power System, Toronto, held their annual meeting and re-elected the old directors. Hon. John Dryden was in the chair. A dividend for the six months ending July 1st, next, at the rate of 7 per cent. per annum, will be declared.

Messrs. J. S. Hamilton and W. G. Elliott, of Brantford; W. J. Aikens, of Dunnville, and others, are applying to the Ontario Legislature for incorporation, so as to authorize them to build an electric railroad to run from St. Catharines to Dunnville and Port Dover.

A fire, which started on the 31st ult., in a block occupied by A. Jahnke & Sons, undertakers, and J. C. Wanless, hardware, in Chatham, Ont., did some $20,000 worth of damage before it could be put out, and several people were only rescued with difficulty from death. The loss was partially covered by insurance.

It seems likely that the Canadian Northern and the Grand Trunk Pacific railways will join hands in the erection of a commodious union station in Winnipeg. Mr. Morse, general manager of the latter road, states that the terminal on the Pacific Coast has practically been decided on, and, provided that certain details are successfully carried out, it will be made public very shortly.

The Canadian Pacific Railway has kept up its reputation for swift construction, by the recent rebuilding of the bridge across the mighty Saskatchewan at Saskatoon. It was a masterly piece of work, huge gangs of men working day and night putting in the 29 new bents carried away by the turbulent spring floods. The task was completed last Sunday night, and three big freight trains crossed the bridge on Monday.

About March or April last year, G. Herman Bingham opened a men's furnishing store at Thessalon. On May 16th of that year a statement issued by him showed his position to be as follows: Assets, accounts, and bills receivable, $700; cash on hand and in bank, $1,200. No liabilities. However, his business since that time does not seem to have been conducted at much of a profit, for on Friday of last week he assigned.

The assignment is noted of M. J. Christie Co., general dealers at South Mountain, Ont. Christie failed in 1901, and was unable to get a settlement, the stock being bought in at 67 3-4 cents on the dollar by his wife, who has since been the legal proprietress, though the business has been entirely managed by her husband. He has died within the last few weeks, and she has now assigned. The liabilities are put at about $3.800.

The business record of Samuel Solomon, dealing in clothing at Mattawa, Ont., has been a brief one. He is a young man who formerly clerked for his father at Ottawa, and in May, 1903, started business at North Bay. A year later he removed to Mattawa, buying out the Montreal Clothing Store there, but a Montreal accountant was sent up a week or ten days ago to investigate his affairs with the result that his estate is being closed out.

Seventh Annual Statement of the

ROYAL-VICTORIA LIFE INSURANCE COMPANY.

The Annual Meeting was held at the Company's Head Office, Place d'Armes, Montreal, March 29th, 1905. The Report was unanimously adopted and the Directors retiring, Mr. James Crathern, Hon. L. J. Forget, Hon. Robert Mackay and Mr. David Burke, were re-elected for three years.

FINANCIAL STATEMENT, DECEMBER 31st, 1904.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The work of electrifying the Lulu Island Railway, Vancouver, British Columbia, in which there has been some hitch, is to be now proceeded with without further delay.

Foundations have just been completed for the new C.P.R. hotel at Victoria, B.C., which is to be one of the very finest in Canada. The contract for the superstructure alone amounts to half a million dollars.

With the establishment by the Dominion Government of wireless stations along the St. Lawrence, and by the De Forest Company of one at Ottawa, it should be possible shortly to send "wireless" messages from Toronto to Cape Race, or even further east.

The Midland Railway, between Windsor and Truro, recently purchased by the Dominion Atlantic for $1,500,000, is now again open. Owing to the snow blockade no trains have moved on it since January 25th. Nearly every foot of the road had to be shovelled out.

The threatened strike of the soft coal miners of Central Pennsylvania has been averted by the operators coming together in secret session and deciding to grant the demands of the men for a renewal of the wage scale in effect last year, which was based on a rate of 62c. per ton for pick-mining.

We have already mentioned the move made by Calgary towards an electric light plant. It is further mentioned among the arrangements of towns in Western Canada that Prince Albert is about to spend $160,000 in a system of sewerage, on sidewalks, and the provision of electric light. Indian Head, too, proposes to expend $140,000 in providing waterworks, fire protection, sewers and lighting.

Mr. J. R. Booth, of Ottawa, proposes to lease the Union Square, at the Chaudiere river for ninety-nine years, for the purpose of erecting a 3,000 horse-power steam plant for his paper mill. He has been using Union Square for some time past, but wants a more legitimate title. The plant he proposes to put up would cost about $250,000; eventually he will have to erect a sulphide mill, at a cost of $500,000; and the paper mills, when completed, will cost about $1,000,000. The committee of the City Council is in favor of making some arrangement satisfactory to Mr. Booth.

The annual meeting of the Montreal Steel Works, Limited, took place a few days ago, Mr. K. W. Blackwell in the chair. The annual report was deemed very satisfactory, and was adopted unanimously. In spite of the depression in the iron and steel industries during the early part of last year, the company's net earnings, available for dividend on the common stock, were equal to 15 per cent., or 30 per cent. on the price at which this stock was issued to the original shareholders. The old board of directors was re-elected.

Griffin & Company's packing house, at Winnipeg, was on the 29th ult., destroyed by fire at a loss of $35,000, covered by insurance.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

NOTICE—On and after Monday, the first of May next, this Bank will pay to its shareholders a dividend of three per cent. upon its capital for the six months ending on the 30th April next.

The transfer book will be closed from the 16th to the 30th April next, both days inclusive.

The annual meeting of the shareholders will take place at the banking-house, Lower Town, on Wednesday, the 17th May next, at three o'clock p.m.

The powers of attorney to vote must, to be valid, be deposited at the Bank five full days before that of the meeting, i.e. before three o'clock p.m., on Thursday, the 11th May next.

By order of the Board of Directors.

Quebec, 21st March, 1905. P. LAFRANCE, Manager.

COUNTIES Grey and Bruce collections made on commission, lands valued and sold, notices served. A general financial business transacted. Leading loan companies, lawyers and wholesale merchants given as references.
H. H. MILLER, Hanover.

The Grenfell Investment Co.
BANKERS
GRENFELL, N.W.T.
A General Banking and Financial Business transacted. Special attention given to collections on Neudorf, Hyde, Tiree, Mariahilf and Pheasant Forks.
JAS. YOUNG-THOMSON MGR.

There is a steady, indeed a rapid, increase in the mileage of electric railways in Michigan. According to a Detroit paper, there are now in that State 1,158 miles of single track. The capital of the various roads is stated at $34,000,000, their actual value being $45,000,000. The receipts last year for carrying passengers were $6,581,275.

The James Bay Railway Company have ordered 20,000 tons of English rails for deliveries ending in September, Canadian mills being unable to supply the quantity in such short notice. It is stated that the trains will be running to Parry Sound by September 1st, and to Sudbury by the New Year. A steamer service to Port Arthur will be inaugurated then until the road is completed to that point.

Mercantile Summary

A voluntary assignment has been made by A. Lafontaine & Co., general dealers, at Drummondville, Que. Lafontaine failed before in 1902, and has since done business under cover of his wife's name. His present liabilities are $3,400.

The Collingwood Shipbuilding Company has been reorganized under the same name as a company with a capital of $1,000,000, of which $350,000 is preferred, and $650,000 common. The new company's members are: Thomas Long, H. S. Osler, K.C.; William B. Raymond, Dalton Lally McCarthy, Britton Osler, Frank Ford, and others.

The Pure Food Show, held in Massey Hall for two weeks, from April 3rd to 15th, is under the auspices of the Grocers' Section of the Retail Merchants' Association of Canada. It is open from 1 p.m. to 11 p.m., every day. A share of the profits is given to the Sick Children's Hospital. That so good a cause is to be assisted out of the proceeds may induce even those to attend who are not attracted by the display itself. Mr. E. M. Trowern is the general secretary.

The number of motors in use ten years ago in manufacturing plants was very limited, but as the size of factories increased, the older forms of power transmission and machine-drive became more impractical, and electricity rapidly moved to the front. This increase in the applications of electric motors has so increased that it is difficult to name a single industry which does not use them. Orders for hundreds of these motors, we are told, both alternating and direct current, are received every week by the Westinghouse Electric and Manufacturing Company. Two companies at Alliance, Ohio, last week placed orders for a total of 120 crane motors varying from 1 to 100 horse-power.

On the 2nd inst. two serious fires broke out in Montreal. A large building occupied by Jos. Ward & Co., provisions; Loynachan & Scriver, commission merchants, and the Canadian Dairy was destroyed at a total loss of $45,000. The second fire, which broke out in a large building on Craig street, near Victoria Square, owned by D. C. McCaskill & Co., and occupied by a number of firms, was of a still more serious nature. The building was completely destroyed, at a loss of $20 000 to $25,000, and the following firms suffered: Canada truss factory, F. W. Gross, proprietor, loss, $1,500, insured; Buntin, Gillies & Co., wholesale paper dealers, loss, $5,000, insured; J. Cohen & Co., wholesale clothing, loss, $40,000, insured; Abbey Effervescent Salt Company, Limited, $10,000, fully insured; G. W. Dawson, die sinker and engraver, loss, $2,000, insured; N. Tourangeau & Co., manufacturers of trusses, loss, $2,000; L. E. & A. F. Waters, printers, loss, $7,000, insured; Royal Dye Works, loss, $3,000; Rice, Johnston & Gladwish, photo supplies, damage, $2,500, partially insured; Carter's Ink Company, damage, $1,500. In the latter fire, the water tower fell over at the beginning of the firemen's operations, and was damaged to the extent of a few hundred dollars.

Mercantile Summary.

The New Glasgow dry goods dealer, G. B. Layton & Co., whose failure has been already noted, is now offering his creditors 35 cents, cash, on liabilities of $23,000.

Lefaivre & Taschereau, accountants, Quebec, are in possession of the estate of L. P. Martin, general dealer at St. Helene de Kamouraska, Que. He has been reported slow pay for a considerable time past.

The Medicine Hat Woolen Mills Company, capitalized at $50,000, has applied to the council of that place for exemption from taxation for ten years, a loan of $15,000 to be repaid at the rate of $1,000 a year, and some other privileges.

We note the assignment of W. H. Wattman, carriagemaker at Perth, Ont. He was formerly a journeyman in Toronto, and began business in Perth last fall.——T. W. Tennant, who came from Cornwall, and started in the confectionery line at Prescott, Ont., about a year ago, has assigned.

It is stated that the Bellingham Bay and British Columbia Railway has been secured by Rockefeller interests, who will make it a part of the Chicago, Milwaukee and St. Paul system, and extend it to the coast. It is possible, also, that the White River and Pacific line will be extended from South Dakota, so as to connect with the first-named.

—A prominent Manitoban reached the Winnipeg depot of the C.P.R. in an inebriated condition, and asked for "a first-class ticket, please." "Where do you want to go?" said the ticket clerk, somewhat pointedly. There was a pause, while the inebriated one muggily reflected, and then he blandly and politely asked: "What trains have you?"—Commercial.

We learn from the Montreal Herald of a project to encourage immigration to Canada by establishing at New York a comprehensive exhibit showing the resources of the Dominion and its capabilities for yielding wealth to the energetic settler. Alongside this is to be an information bureau, where European immigrants on landing in New York can learn of the superior advantages the Dominion offers, and how to secure them. A company with this useful object in view is being formed, under the name of "The Canadian General Service and Colonization Company," to be incorporated. Mr. P. Poulin, of 242 St. James St., is one of the promoters.

A 75 per cent. compromise has been arranged by E. Denis, of Valleyfield, Que., doing business in dry goods, etc., under the style of Denis Freres, his wife being the registered owner on account of old troubles. Monsieur Denis has had a varied business experience. Originally he was in the general store line in St. Hyacinthe, Que., and afterwards moved to Montreal where he engaged in the flour trade. This venture did not "pan out" very well, and he then tried his hand at running a poolroom. He next went into the dry goods business in the eastern suburbs of Montreal, subsequently going to Lachute, where he failed in 1898, and since then has been located in Valleyfield. He has always seemed to live well.

Mercantile Summary.

A proposal is on foot in St. Lambert, a town across the river from Montreal, to supply the streets with electric lights.

Ottawa city council has unanimously expressed its opinion in favor of buying out the Consumers' Electric Company of that city for $200,000.

A despatch from the Soo, dated 3rd inst., speaks of the loading of the schooner "Agawa" with 6,500 tons of steel rails for the C.P.R. to be sent to Port Arthur.

Edmund Eaves, Limited, Montreal, has been incorporated with a capital of $90,000 for the purpose of making and dealing in clocks, watches, jewellery, fancy goods, etc.

The Pittsburg Gold Dredging Company, Limited, Peterboro, capital, $300,000, has been granted a Dominion charter. W. Hamilton and Matthew Smith, of Peterboro, are interested.

The Pacific Coal Co., a subsidiary company of the C.P.R., is putting in, at Bankhead, B.C., a 500-h.p. electric power plant, and a five-mile transmission line to give Banff and Bankhead electric light. The plant cost $60,000. The coal produced is a semi-anthracite.

It is announced that the annual convention of the Canadian Manufacturers' Association will be held in Quebec city, Monday to Wednesday, September 18th, 19th and 20th next. The Mayor of Quebec has offered the assembly room of the city in which to hold the convention.

Wright & Johnson's large warehouse, in Winnipeg, was on the 4th inst. badly damaged by fire. It was occupied by A. C. Parsons, wholesale produce; Colbert & Cameron, commission merchants; Canada Biscuit Co., Pulford & Leonard Drug Co., J. Boyd, wholesale crockery. The loss altogether amounts to about $10,000. On the same day, a fire at Belleville, Ont., in the McGinnis men's furnishing store, caused a loss of over $4,000; mostly insured.

For several years, G. R. Levagood was employed as a key-maker in the piano factory of Karn & Co., at Woodstock, and had accumulated a little means. Having made up his mind that he could manage his own business as a merchant and make it a success, he moved to Guelph and opened a piano store. Since that his path has been a little uneven. He seems to have spread out and invested too much of what little capital he had in assets of a nature not readily realized upon. The upshot is that on Friday last he assigned to the sheriff of the county.

A subscriber, who applies to us for a copy of a pamphlet on Transportation, written by George H. Dobson, of Sydney, does not appear to be aware that Mr. Dobson is dead. He died in January last. He had for years taken a keen interest in the proposed Canadian fast ocean service, and was well informed on the coal trade of Nova Scotia. He had been for a long period secretary of the Sydney Board of Trade, and was a most patriotic Canadian. We believe that S. B. can obtain a copy of the pamphlet he names by writing to A. & W. MacKinlay, stationers, Halifax.

Mercantile Summary.

The output of the Dominion Coal Company for the month of March was 228,765 tons from all properties, or 100,000 tons greater than in February.

—The Dymond Gas and Engine Co., Toronto, capital, $1,000,000, has been incorporated. R. J. Goudy, and John Dymond, of Toronto, are charter members.

Mrs. A. Lussier, keeping a small general store at Ste. Rosalie, Que., has been obliged to assign. Her husband was a farmer, who died about two years ago. His estate cleaned up about $2,000, which she decided to put into a store property and small stock. The above is the outcome.

By-laws were voted on in Morrisburg, Ont., on Friday last, one for developing a 1,100-h.p. plant and canal for electric power for factories, and the other to grant free power, light and water to a new tinplate and sheet industry. The by-laws carried by a large majority.

The Dominion Department of Marine and Fisheries has purchased the steel steamer "Seguin" from the Parry Sound Lumber Company, and will use her as a lighthouse supply boat. Her foredeck will be fitted with a powerful crane, strong enough to handle the largest gas buoy. The vessel measures 556 gross tons. She is 207 feet in length and 34 feet beam.

The report of the Calgary and Edmonton Railway Co., recently issued, states that land sales during the year amounted to 92,047 acres, realizing $414,455, against 129,975 acres in 1903, realizing $535,329. The total quantity sold to the end of last year was 493,048 acres, leaving unsold a balance of 306,431 acres. The profit for the year was £40,681, compared with £30,174 last year.

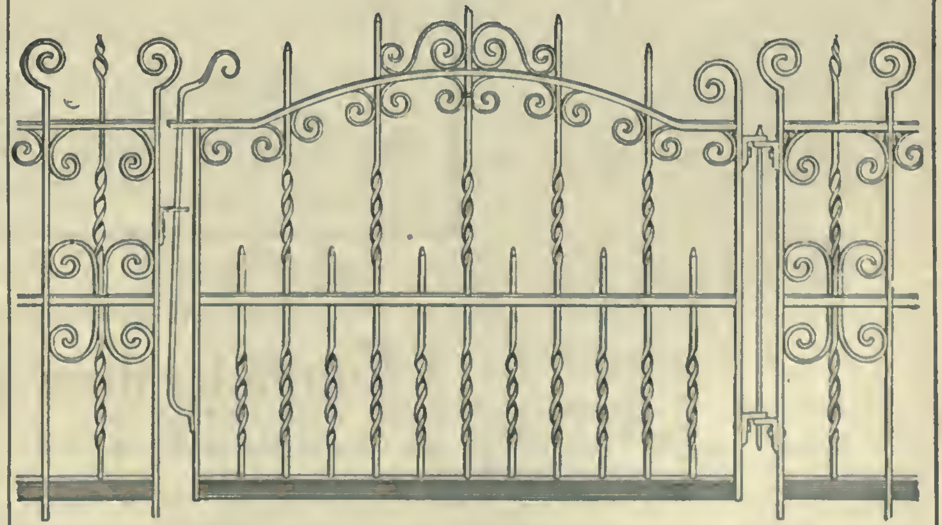
Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905,** for the purchase of Debentures of the said School District, issued in pursuance of a by-lay in that behalf, authorizing the raising of $56,000 for the purchase of ground and the erection thereon of a Solid Brick School, said Debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in thirty equal consecutive annual instalments.

Tenders for Debentures.

Sealed Tenders marked "Tenders for School Debentures," addressed to the Secretary of the Board of Trustees of the Regina Public School District No. 4, N.W.T., will be received up to and inclusive of **Monday, the 1st of May, 1905,** for the purchase of Debentures of the said School District, issued in pursuance of a by-law in that behalf, authorizing the raising of $4,000 for the purchase of ground and the erection thereon of a Frame School House, said debentures bearing interest at the rate of four and three-quarters per cent. per annum, and repayable in ten equal consecutive annual instalments.

WE MAKE IRON FENCES,



Fire Escapes, Wire Lockers,
Window Guards, And Specialties in Wire and Iron Work.

The Geo. B. Meadows, Toronto, Wire, Iron & Brass Works Co., Limited,
117 King Street West, Toronto, Ont.

A report from St. John, N.B., states that an English syndicate has offered £650,000 to the various owners for their oil fields in the province.

The Royal Screw, and Specialty Company, Montreal, capital, $40,000, will manufacture screws, bolts, tools, dies, etc. T. McS. Royall, and W. S. Leslie, of Montreal, are among the charter members.

It was not generally anticipated that the Cunard Steamship Company would pass its dividend, but this has been done. Its report was issued on Monday last. The profits total $401,065, and to these $375,000 is added from the reserve fund. A balance of $37,145 is carried forward. The report explains that the shrinkage was due to the rate war initiated by other lines, and the fact that the general trade was not good. It seems that the attack on the Cunard Company by the allied lines involved both them and the Cunard Company in great losses. Homeward cargoes were small, and rates unremunerative. Steerage passenger traffic increased, owing to the cut in rates, but the first-class traffic was below normal.

⁂

TORONTO MARKETS.

Toronto, April 6th, 1905.

Chemicals, Drugs, Etc.—While there is no feature of any particular moment to report, trade may be said to be pretty good, with prices as a rule quite firm. Opium is steady, but only little business is passing. Quinine, likewise, is steady, with only immediate requirements being attended to. Cardamon is advancing gradually. Menthol is lower than it was, and nux vomica is easier. Norwegian cod liver oil is meeting with fair enquiry. Cyanide of potash is higher. Carbolic acid is not quite so firm as it was. Bromides are a little on the scarce side. Generally speaking, the trade reports payments satisfactory.

Dry Goods.—Wholesalers are very busy with the sorting trade, which is distinctly good. Travellers have fall samples with them, and the prospects for this branch are quite satisfactory, but the chief centre of interest is certainly the replenishment of present-day and early-summer stocks. There is a strikingly larger demand for domestic dress goods, especially homespuns of a light weight. A very large business is being done in blankets and these are quite a feature in the woolen trade. Blankets are a line of goods in which the Canadian manufacturers are certainly able to take care of themselves. The price of raw wool may advance any day and this is causing country merchants to get in their stocks as soon as possible. Cotton staples are held firmly.

Flour and Grain.—The tendency of the flour market is towards easier conditions. Ninety per cent. patents sell around $4.40, in buyers' bags, Eastern or Western freights. Millfeed is still strong, the supplies being mostly taken up locally. Prices have made no further change since the recent advances. Oatmeal is fairly firm. Wheat continues unchanged, and there is but little export business. Peas are one or two cents higher. Rye is 2 to 3c. lower. Buckwheat is 2 to 3c. higher. Other grains remain the same.

Hardware.—Trade in ordinary hardware is quite active, both on city and on country account. The farmers generally seem in a prosperous position, while in the cities, building promises to be particularly brisk, with the result that all such goods as are usually required by the trades in question sell readily. In metals, the movement is quite good, though nothing, perhaps, beyond the normal. Just now the British iron market seems to be in an unsettled condition. Tin plates and galvanized iron are weak. Round steel bars, however, have advanced about 5s. per ton.

Hides and Skins.—The hide market is quite dull, and prices remain unchanged, though in Chicago business is fairly active. Calfskins and deerskins are steady, but unchanged in price.

Leather.—Efforts have been made to advance the prices of harness and some other grades of leather, and, while there cannot be said to be any tendency in the opposite direction, the full stocks on hand prevent any great success in the attempt.

Live Stock.—Prices for all kinds of stock at the market this week ruled steady and occasionally advances were recorded. The run of cattle was light, and the quality, generally speaking, poor, but, as noted, the demand was such as to keep up values. There can be little doubt

SWEET CAPORAL
CIGARETTES
STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

that, considering the market conditions in the Old Country, the prices here ruling are quite too high. One feature which seems to affect adversely the quality of offerings is the high price of grain, which causes farmers to sell it, and fatten their stock on the coarser and less valuable feeds. Choice exporters sold at $4.75 to $5.25, or more for extras. Not much butchers' cattle were sold to satisfy immediate demands. Not many stockers and feeders were shown, and all sold early at a brisk rate. Good milch cows sold well. Calves are becoming plentiful. Sheep and lambs are steady to firm.

Seeds.—Prices of red clover are higher, owing to the short supply. For some lots $8.50 is being paid. Some is being imported from Britain. Alsike and timothy are fairly plentiful.

Wool.—Some small quantities of new clip wool have arrived. Dealers here are paying for unwashed, 13 to 14c., or fraction of a cent less than prevailed at this time last year. It is as yet difficult to foretell how the market will go.

⁂

A BAD EXAMPLE.

There is a report that the Canadian Government is going to offer a bounty of $6 a ton on shipbuilding. This will strengthen the hearts of the ship subsidy grabbers in the United States. Time out of mind we have boasted our superiority to the rest of the world. Europe was effete and British North America was backward. We wanted none of their worn-out theories of Government and business. True enough, we have not been slow in rejecting many of their good features. But is is wonderful how prone we have been to adopt their absurdities. Among these are protective tariff and ship subsidies. The proposed Canadian shipbuilding bounty will appeal to the "standpatters" with all the force of a noble example.—Boston Post.

⁂

ODD NAMES FOR NEWSPAPERS.

The names of American newspapers are a study in nomenclature. In Arkansas are the Buzz Saw and the Back Log; California, the Condor, the Wasp and the Tomahawk; Colorado, the Rattler and Yesterday and To-day; Iowa, the Postal Card, the Unit, the Nucleus and the Firebrand; Kentucky, the Salt River Tiger, the Push, the Boomer; Missouri, the Missing Link, and the Cyclone; Nevada, the Rustler; Oklahoma rejoices in the Dinner Bell and the Plain People. South Dakota has a Plain Talker. In West Virginia is the Irrepressible. Missouri has the Crank and the Entering Wedge. Wyoming reads Bill Balon's Budget. — Philadelphia Ledger.

⁂

MONTREAL MARKETS.

Montreal, 5th April, 1905.

Ashes.—Receipts are practically nil at the moment, and as there is generally some demand for export, about the opening of navigation, quotations are pretty steadily maintained at $5.40 to $5.50 for No. 1 pots; seconds, $4.90 to $4.95; pearls, nominally, $7.25 to $7.50 per cental.

Dairy Products.—There is little of interest in the cheese situation. There are only one or two moderate lots of desirable quality here, and holders appear very firm in their ideas at 12 to 12¼c. Prices for new fodder cheese have not yet been established, and tentative offers of 10½ to 11c. are said to have been declined by factorymen. In butter there is rather an easier feeling with the advancing season, and about 28c. is now the limit for choice new milk creamery.

Furs.—The great London March sales, which have been in progress for the past ten days, will be completed to-morrow. Telegraphic reports have been conflicting in some respects, but it is established that there have been some very pronounced advances over prices of a year ago, such as from 50 to 60 per cent. in marten, 60 to 70 per cent. in mink, as well as marked advances in otter, lynx, silver fox, etc. More detailed information will be available next week. In the meantime, we quote:

Promotor Wanted.

Of first-class executive ability to handle an Industrial Proposition inviting a limited amount of capital, to co-operate with an American Manufacturing Concerg about to locate in Canada, which shows a strong earninn power. Present goods entirely imported.

Address, Box 138, Monetary Times.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies
ISSUED BY THE
CANADIAN CASUALTY and Boiler INSURANCE CO.
22-24 Adelaide St. East, TORONTO.
are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.
Full Information Freely Given.
A. C. C. DINNICK, Managing Director

NOW IS THE TIME
TO BUY AN

Design No. 301.
IRON FENCE
Neat and Ornamental.
A Necessity in Improving a Lawn.

Walnut, "	1 to 3 in.	00 00	05 00
Whitewood "	to 2 in.	35 00	40

Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $4.50 to $5.50 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $25 or more; coon, $2.50 for fine black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $2; short stripe, $1.65; long stripe, 60c.; broad stripe, 25c.

Hides.—Receipts of country hides are very light at present, probably largely due to the state of the country roads, and buyers' quotations are steady at 9½c. per lb. for No. 1, though quality is generally poor. Calfskins are steady at 14 and 12c. per lb. for Nos. 1 and 2, respectively. Lambskins will probably not be advanced till the first of next month, and are still quoted at 10c.; sheepskins, $1.20 each.

Dry Goods.—Business is rather more active. A good many letter orders are reported here, showing that country stocks are being fairly broken into, and city retailers are feeling the effects of more favorable weather, shoppers being more numerous. Remittances are fair for the season of the year. In goods of domestic manufacture, there is nothing new. British letters advise an advance in carpets of from 10 to 15 per cent. Merinos and other soft, clinging dress goods, which will be greatly in demand for fall wear, are firmer in price.

Groceries.—The molasses market has shown further strong advance, the cable now giving 24c. per gallon as first cost at the island, equal to a laid-down cost of 37 to 38c. Local stocks have rarely been so low, the total supply in first hands not being estimated to exceed 100 puncheons, and as jobbers have also very little in hand, prices are again advanced to 40c. per gallon for single puncheons. The sugar market is stronger. New York prices for refined went up 10c. a few days ago, and the St. Lawrence Refining Co. put up quotations 5c. a cental all around, thus making standard granulated $5.70, but the Canada Refinery people have not as yet followed suit. The demand is reported rather brisker. Further moderate transactions are reported in teas, and values, which have been so long depressed, are assuming a firmer tone.

Metals and Hardware.—The movement in these lines has received considerable of an impulse, now that spring freight rates are in effect, and shipments of both shelf and heavy goods are being actively made. In values there are few noteworthy changes. All the general metals, such as tin, lead, copper, etc., are steady at quotations of last week. There is some disposition to shade prices of Canada plates, etc., owing to a dull winter's trade, and near arrival of new stock, and $2.40 would now bring moderate lots. Black sheets, $2.15 to $2.20; galvanized sheets, $4.15 to $4.25; ternes, $6.50 to $6.75. Boiler plate remains at old figures; iron pipe, $4.12½ per 100 ft. for inch.

Oils, Paints and Glass.—The marked feature of the week is the phenomenal jump upwards of 10c. a gallon in turpentine, due to speculative manipulation of the market by the Standard Oil Co., and the jobbing price for single barrels is now 87c. per gallon. Linseed oil is now pretty generally held at 43 and 46c. for raw and boiled respectively. There is a firmer feeling in leads, and it appears to be expected in some quarters that an advance on the $4.50 figure for No. 1 pure may be shortly established; putty may also be advanced. Window glass stocks are low, and $3.75, firm, is quoted for Belgian per 100 feet first break. English is dearer. Paris green in bulk is quoted at 14c., and in pound packages at 15c.

Wool.—Importers complain that the demand is very slack, and with additional mills shutting down every little while, they do not look for material improvement in the near future. A little business is being done in Capes at 18 to 20c.; pulled, Australian, 37c.; good B.A., 39 to 42c.; domestic, pulled, 28 to 30c. per pound.

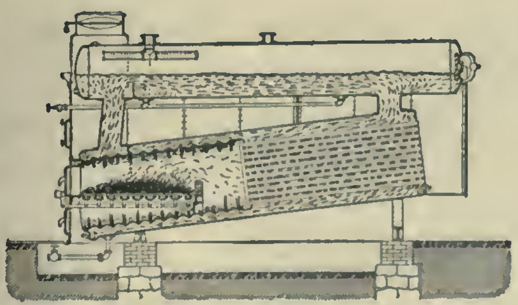
Reduce Your Coal Bill.



Your coal bill is a large item in your expense account, and if it could be reduced **ten per cent.** it would mean a large addition to your net profit.

A **Robb-Mumford** internally fired boiler will make a saving of at least **ten per cent.** over an externally fired boiler, and in some cases considerably more.

Managers and Underwriters.

The Hamburg-American Line of steamships is building a new vessel at Stettin, which will be fitted out with an invention by which it is expected to reduce the rolling of the ship at sea to a minimum. It consists of a massive balance wheel mounted in such a manner as to counteract the shifting of the centre of gravity of the ship. The invention hitherto has only been tested in connection with models, but the Hamburg-American officials are convinced of its utility. Naval engineers regard the invention as likely to be of the greatest use to warships in adding to the stability of the gun platforms.

Preparations are being made for an early opening of navigation on the Great Lakes. The report issued by the Weather Bureau of Detroit, on the 4th inst., stated that the ice had wasted rapidly during the previous week, and navigation was expected to open by about the 10th inst. At Collingwood, a stiff southeaster early this week sent all the ice up the bay out of sight, and since then a change to the southwest, from which there has been a gale blowing, has taken the ice over to the north shore, where it is breaking it up among the islands. As a consequence, the harbor is open, and at latest reports, many of the vessels had steam up. Navigation will be fully open at least three weeks ahead of last year. The rivers near Winnipeg are breaking up nicely, and the season promises to be one of the earliest in

WANTED

A secretary and chief rating officer. Must be experienced in various systems of schedule ratings, and the application of same; with a practical knowledge of insurance engineering and field work, and familiar with the executive work of Board offices.

Apply to
President Manitoba and North-West Fire Underwriters' Association,
Box 1,299, Winnipeg, Man.

WANTED.

MANAGER FOR
Western Loan Company.

Well established loan company in Winnipeg, working on the old line permanent plan, is looking for a man to take the managership. Must be thoroughly familiar with financial matters and capable of handling office details. This is a splendid opportunity for the right man and full particulars may be obtained by addressing

H. W. WHITLA,
c/o McDonald, Haggart & Whitla,
Winnipeg, Man.

the country's history. At Southampton, Ont., already two fish tugs have arrived from Port Elgin. The ice has all moved out from the vicinity of Owen Sound, and clear, open water is reported from outside Presque Island.

The annual meeting of the Starr Manufacturing Company, of Dartmouth, was held on March 22nd, and was a very satisfactory one. This company has announced a seven per cent. dividend on the past year's operations. During the thirty years it has been in existence making skates and other hardware, its career has been checkered, some years earning no dividends. The business is now expanding in the West, and the future seems bright.

—Since the publication of the Washington report of the number of bales of cotton baled, which puts it at 13,597,782, futures have advanced slightly, though the figure is much as had been expected. Reports from the Southern States show a reduction of about 19 per cent. in acreage, and of 20 per cent. in the use of fertilizers. As an indication of the prospects of cotton prices, no matter what the crop may be, it is stated that Lancashire manufacturers are more deeply under contract to-day than at the beginning of February. For China, especially, enormous contracts have been entered into between shippers and makers. Some special makes of shirtings, suitable for Shanghai, are engaged to the end of June, 1906. Shirtings for India also are sold in many quarters to the end of March next. Broadly speaking, producers of calico for export never were so strongly fortified with orders as at the present time.

⁂

THE EXCELSIOR LIFE INSURANCE COMPANY.

The annual meeting of this company was held at the head offices in the company's building in this city, on February 11th. The directors' report, which was unanimously adopted, shows a most satisfactory increase in each item of the company's business. During the year the balance of the authorized capital was disposed of at 150, the issue being largely over-subscribed for; the required amount was allotted and paid for within ten days. The amount of new insurance issued during the year was $2,238,157, an increase of 38 per cent. The amount of insurance in force at the end of the year was $7,646,798.35, an increase of $1,474,192.85, or 24 per cent. The income, excluding capital, was $283,397.61. The rate of interest realized on the mean net ledger assets was 6.33 per cent. The disbursements were $168,286.90, of which nearly $50,000 comprises payments to policyholders. The company's death rate for the year was 5.56, the revenue from interest alone being more than sufficient to pay death claims, the average annual rate since the company commenced business being the unparalleled low one of 3.54. The net assets are $840,352.16, the increase being $167,326.12, or 26 per cent. The company's investments have proved extremely satisfactory from the standpoint of both security and productiveness. The gross assets for security of policyholders, including uncalled capital, are $1,253,216.05, being an increase of $291,068.58. It is a well-known fact that the security afforded to policyholders by all regular Canadian companies is absolute, but taking the amount of the company's policy contracts into consideration, it will be seen that the extra security afforded its policyholders is unusually large. The reserve fund now totals $744,074.49, an increase of $139,726.12, or 23 per cent. The net surplus on policyholders' account is $88,141.56. The sphere of operations has been extended during the year. The company is now pushing for business and meeting with good success in every part of the Dominion. It is expected that the additional organization effected will result most advantageously to both shareholders and policyholders. The company attributes its continued success to its attractive plans of insurance and liberal policy contracts, coupled with its prominence in respect to those features of its business in which policyholders are most particularly interested. The directors' report was unanimously adopted.

The following gentlemen were re-elected directors of the company for the ensuing year: David Fasken, Esq., B.A., Toronto, president; S. J. Parker, Esq., Owen Sound, and Ruliff Grass, Esq., Toronto, vice-presidents; George Gooderham, Esq., Toronto; Thomas Long, Esq., Toronto; John Ferguson, Esq., M.A., M.D., Toronto; J. F. W. Ross, Esq., M.D., Toronto; W. J. McFarland, Esq., Toronto; Alexander Fasken, B.A., Toronto; George E. Weir, Esq., Dresden; W. F. B. Colter, Esq., L.D.S., Sarnia; William Harvey, Esq., B.L., Winnipeg; R. W. Gordon, Esq., Pembroke; Jos. Wright, Esq., Toronto; J. S. Knechtel, Esq., Hanover. The company have desirable openings for good men on their agency staff. Those interested will do well to communicate with the head office, Toronto.

MARITIME PROVINCE RAILWAYS.

Among this week's telegrams from Ottawa is one to the effect that an arrangement has been effected whereby the Intercolonial Railway will get running rights over the Canada Atlantic when that road passes into the control of the Grand Trunk. In this way the Intercolonial will have a port on Georgian Bay, and a summer route between the Canadian North-West and the seaboard. Such an arrangement would fulfil an ideal which has been in some people's minds for a year or two past, and would assuredly extend the importance and enormously increase the popularity of "The People's Railway." Whether it would yield a dividend, government management being continued, is a separate proposition upon which we offer no opinion.

The present is perhaps a convenient moment to glance at the railways in the east of the Dominion, especially those of Nova Scotia. A recent report by the Provincial Engineer gives the following as the railways under the control of the Province of Nova Scotia:—

	Miles.
Cumberland Railway and Coal Co...........	32
Cape Breton Railway Co....................	31
Canada Coal and Railway Co..............	12
Inverness Railway and Coal Co............	61
Midland Railway	58
Sydney and Louisburg Railway	39
Halifax and Yarmouth.......................	50
Halifax and Southwestern	96
Nova Scotia Steel and Coal Co. Railway....	12½
Total	391½

Every one of these lines, with the exception of the Sydney and Louisburg (which has competition from an electric tram-line), shows considerable increases in traffic. We hear that the Cape Breton Railway Company has been granted a subsidy of $5,000 per mile by the Nova Scotia Legislature to assist them in completing a line from St. Peter's to Louisburg on that island. The central branch of the Halifax and South-western, formerly the Nova Scotia Central, shows an increase in traffic returns of over fifty per cent. in the past ten years. Only one passenger was injured during the year, and that was by his own act. A bill recently introduced in the Nova Scotia Legislature is intended to enable the Halifax and South-Western Railway Co. (virtually the firm of Mackenzie & Mann), to purchase the Yarmouth and Halifax, and Middleton and Victoria Beach railways, and make them a part of the Halifax and South-Western system. The Government's proposal to loan a sum of $13,500 per mile on the Yarmouth and Halifax Railway, which runs from Yarmouth to Barrington, fifty miles, and $10,000 per mile on the Middleton and Victoria Beach, forty miles, has been carried through the House. In each case the sums are to be secured by a first mortgage on the road. When the section between Liverpool and Barrington is built, the system will consist of a trunk line all the way from Halifax to Yarmouth, along the south shore of Nova Scotia. A despatch of last week contained the statement that the entire bond issue of $20,000 a mile for the Nova Scotia Eastern Railway has been underwritten in London. The issue over the whole road is about $5,000,000.

Our St. John correspondence tells of the resolution passed by the Legislature of New Brunswick requesting the Dominion Government to purchase the New Brunswick Southern Railway, running from West St. John to St. Stephen. It is about eighty miles long, and when a bridge is built across the St. Croix River will be connected with American lines running to Boston and New York. It is stated that the line does not pay, and in winter little effort is made to keep it open. But it is delicately suggested that if it were bought, and added to the Intercolonial, it *might* pay—the Dominion Government, of course, taking all risks. Exactly. And the resolution also asks the Government at Ottawa to buy the Caraquet & Gulf Shore Railway, and add it also to the Intercolonial. Presumably that line does not pay either. Is this also the reason that the Ottawa Hercules should help the Provincial waggoners?

The railway men of Nova Scotia have had to contend with most trying conditions, imposed by the snow of February and March, our former advices have shown how serious was the blockade of traffic. All the railway lines in the Province have been open for some time now, according to our Halifax correspondence of Monday last, the Halifax and South-Western being about the last to push its way through the abnormal snow of the cruel winter. The effects of those enormous snow-drifts were felt, however, by others than railway men. "There will be thankfulness all over this Province," says our correspondent, "when the snow disappears and pasturage returns. The straits to which farmers are driven by the scarcity of hay are almost incredible. Although snow blockades no longer prevent hay from getting through by railway routes, there is now a scarcity of railway cars. At all events for some reason or another, there are large districts of the country which have received little relief, and the wretched cattle have actually been fed in some cases on the small branches of birch and other trees."

* * *

GRAPHITE DEVELOPMENT.

Receiving from Ottawa last week a description of properties containing graphite or plumbago on the Rideau Lakes, near Perth, in the County of Lanark, Ontario, we wished to have all information possible about this valuable deposit and therefore wrote to the director of the Ontario Bureau of Mines, Mr. Gibson, asking what he knew about the properties and the probable outcome of their working. The description forwarded to us said:—

> Up to quite recently, there were three separate graphite properties near Perth, the trio being owned by New York, Ottawa, Montreal and Toronto people. These properties had been developed to some extent when Mr. Rinaldo McConnell, of Ottawa, and his friends secured an interest in two of them and built a refinery, capable of treating ten tons a day. After running the plant for some time, it was found that to ensure complete success, a merger of all the properties would have to be effected. With this end in view, Mr. Bannell Sawyer, of the Corporation Trust Company, brought about the amalgamation of the different interests in the three properties in question, under the name of the Globe Refining Company, Limited. Mr. Rinaldo McConnell being president and manager of the new company; Messrs. George S. James, of Perth, is vice-president; J. E. H. Barnett, lumberman, of Renfrew, and Bannell Sawyer. are also directors, and Mr. F. A. Bapty, of Ottawa, is secretary, while Hon. R. A. Pyne, Provincial Minister of Ontario, and Mr. J. Lorne McDougall, of Ottawa, are also interested. The capital of the company is $300,000, there being 3,000 shares at $100. The first year's output of the new company has already been sold to Germany, at a figure estimated to net $150 a ton. The product is the finest flaked graphite, and is for the making of crucibles. The Ontario Government's officials have drilled the property, and the engineers estimate that 2,000,000 tons are blocked out.

The reply of Mr. Gibson to our enquiry is as under, and bears date 8th April: "Regarding the reported amalgamation of graphite interests near Perth, the paragraph concerning which states in brief that a graphite property, owned by Mr. Rinaldo McConnell, and two other properties, all situated near Perth, have been united under the name of The Globe Refining Company, Limited, of which Mr. McConnell is president and manager, Hon. R. A. Pyne, Minister of Education, and other parties named, being also interested:

"I am aware that Mr. McConnell, or rather The Globe Refining Company, of which he is president, owns a graphite mine and refining plant near Oliver's Ferry on the Rideau Canal, which is not far from Perth, and also that Hon. Mr. Pyne is interested in an adjoining property. I learn from Mr. Pyne, to whom I referred the matter, that some transaction of the kind reported has taken place, but he advises communication with * * * * Montreal, for definite particulars. The whereabouts of the third property is not indicated in the paragraph, but I understand it is situated near by.

"In reference to the concluding paragraph in the clipping, in which it is stated that the first year's output of the new company has all been sold to Germany at a figure estimated to net $150 a ton, I cannot corroborate this, as I have no knowledge of what has been done. The price mentioned would, no doubt, refer to the refined article, the best qualities of which, such as are used in crucible making, command a good figure. As to the Ontario Government's officials having drilled the property, this remark refers to Dr. Pyne's property, where one of the Government drills was engaged for some time. The drill showed up a large extent of graphite, but no estimate was ever made by the Bureau regarding the total quantity."

These properties we find are described in the report for 1903, of the Bureau of Mines—pages 26, 50, and 132,—and there is reference to the occurrence of the mineral in the Sudbury district on pages 258 and 284. The McConnell, or Oliver's Ferry, graphite mine was being worked as long ago as 1872, when a mill was erected. More modern works were since instituted for treating the ore, a small water-power on the River Tay being utilized, equal to treating say, twenty tons per day.

Mr. McConnell is the leading operator in Ontario graphite, having a short time ago leased the well-known Black Donald graphite mine at Whitefish Lake in Renfrew County, regarding which the Ontario Report has this to say: "A refinery on this property was completed last year, the motive power being electricity generated by a waterfall on the Madawaska River, some two miles away. The works have a capacity of 15 tons of crude ore per day. Flake graphite for crucible-making, is the leading product," [the amorphous kind is used for foundry facings, etc.]. * * * * "The ore body at the Black Donald mine is of unusual size and excellence of quality." "Work on the Allanhurst property in Denbigh Township [Addington County] began on the 19th November, 1902, and a small quantity of graphite was taken out before the close of the year." In the five years, 1899-1903, the total quantity of graphite produced in Ontario was 10,385 tons, valued at $101,713. The product of graphite in the United States in the year 1903 was 4,525,700 pounds, of refined crystalline graphite, of the value of $164,247, and 16,591 tons amorphous graphite worth $71,384.

* * *

CANADIAN BANKING PROFITS

In the Monetary Times of the 1st April, 1904, there was given a statement showing the profits and premiums earned and received by the Canadian banks during the year 1903, and the disposition made of them. The figures for 1904 are now to hand, and it is possible to make some interesting comparisons between the results of the two years. We give a similar table in to-day's issue. It should be noted that the figures given do not cover the clean period from 1st January to 31st December, 1904. The year-ends of the respective banks come at various dates; some early in the spring, quite a few in May, and most of the remainder in November and December. Several important banks, among which were the Bank of Montreal and the Bank of Commerce, recently changed their year-ends from the spring of the year to the fall. Their operations will therefore now cover the calendar year period more nearly than heretofore.

The statement contains all the going banks except two small concerns whose united assets amount to less than a million and a half. The Crown Bank is not included as it has not yet completed its first year. Results for the Bank of Yarmouth, which failed at the beginning of March, 1905, were not obtainable. Comparing the two years the first thing to be noticed is that the profits earned by the banks generally were very much the same in both instances. The increase, $650,000, must be considered as very moderate when it is remembered that the banks had at their command an average of some four millions new capital, five millions more in their reserve funds, and fifty-three millions more derived from deposits and circulation than they had in 1903. In comparing the 1904 profits of the individual banks with the results for the previous year, it is to be observed that the great majority show gains, but these gains are not as a rule important, while the increases in the resources wielded by the several banks are quite considerable. The Bank of Montreal's profits for 1904 were a quarter of a million less than for 1903, notwithstanding that the bank had nearly six millions more to work with in 1904. The falling off in this instance has been explained as due to the exceedingly low rates for call money in New York during the latter year. This era of cheap money came into contrast with the era of high rates that followed the upset in the securities markets at the end of 1902. This showing of the largest bank had a powerful influence on the general result. It will be remembered also that some industries in Eastern Canada were not in very flourishing condition in the year just past. The great dairy industry was under the cloud of low prices for cheese; the important lumber industry was depressed; the wheat crop of Ontario proved very discouraging; all was not well with the boot and shoe factories. These factors, no doubt, had something to do in making it more difficult for the banks to earn profits.

Another striking feature in the statement now presented is the great falling off in premiums received on new stock issues. Last year the banks received from this source no less than $5,099,376; this year they received but $591,380. Here, apparently, is convincing evidence that the movement to increase the country's banking capital, which has been in force for the last few years, is well nigh spent for the time being. It is true that there was in 1903 the specially large amount of $1,381,492 reported by the Bank of Montreal. But a glance at the records shows plainly enough that the drop in these premiums is due to the general inaction of the banks rather than to the absence of particularly large individual amounts.

Turning to the other side of the account, the dividends paid to stockholders increased roundly half a million, which represents distributions, chiefly at the former rates, on the new capital paid in. Additions to reserve funds are less by $4,139,558. The difference is accounted for, within a few hundred thousand dollars, by the decrease in the receipts as premiums on new stock referred to above.

There is a larger amount written off for depreciation of assets, premiums, etc.—$897,707 in 1894, as against $608,091 in 1893. The increase was caused chiefly by the revaluation of assets made by the new general manager of the Union Bank of Canada upon his coming into power.

The amounts contributed to pension funds, etc., shows a slight increase. New banks are forming these funds, and others which had already organized them are increasing their contributions. This is a highly gratifying feature. The statement showing the profits and how they were disposed of, follows.

H. M. P. Eckardt.

CANADIAN BANKS—DISPOSITION OF PROFITS, 1904.

A "HUMBUGGER" DISCREDITED.

At different dates during February and March we have had communications from Manchester and Birmingham telling of the injury done to Canada's reputation and to Canadian trade by the reckless statements and perfidious promises of the long notorious Gustavius W. Griffin, "Doctor" Griffin, as he styled himself. This dangerous man too long posed as the agent in the United Kingdom for one or two commercial journals in Montreal, which he falsely alleged to be subsidized by the Government of Canada. And we consider that the Canadian Government has not done its whole duty in the way of repudiating the man, for they might thereby have thrown suspicion upon the odious misrepresentations by which he secured advertisements in England for his journals. True, the Department of State disavowed him in December, 1902, in a letter replying to the Monetary Times. But this was not enough, for he had the hardihood to go on last year and the year before with his dirty work in the manufacturing cities of England, repeating his dishonest claims to recognition as a Government emissary.

Now we hear that Griffin having been pretty thoroughly exposed and discredited in Birmingham, has left that city. Our North of England correspondent, writing from Manchester on the 31st March, says: "The latest recorded adventure of the arch-charlatan 'Doctor' Griffin is his flight from Birmingham. That talented exponent of the humbugging art is under the suspicion of non-compliance with certain financial formalities which are customarily discharged before departure. His re-appearance in new places is being awaited by anxious friends." The cleverness of this plausible rascal is so great that it would compel one's admiration if the consequences were not so serious in affecting the good name of this country, and in arousing abroad suspicion of good faith among our merchants.

* * *

NOTES ON THE LIVE STOCK MARKET.

For some weeks past the number of cattle offered on the Toronto and, to some extent, on the Toronto Junction markets, has been becoming less and less than the requirements have warranted, and this refers particularly to animals of high grade. The cause of this, perhaps, is that farmers and ranchers in Ontario last year met with such a poor season for feedstuff, and have since had to pay such a high price for it that they have experienced great difficulty in keeping up stock to a reasonably high standard. As a consequence prices are ruling high, and this week there was an advance of about 25c. per cwt. for many kinds of animals. In some cases, indeed at the Union Stock Yards, the price for thoroughly good stock was as much as 35c. per cwt. in excess of the prices of last week.

At Tuesday's market the showing of exporters was of better grade than has been the case for some time. The best sold for as high as $5.50, but the generality went for $4.50, for $4.90, with choice around $5. The supply of butchers' cattle was not more than enough to supply all wants, although it was a fairly large one. The shortage which had prevailed previously, however, created quite a brisk demand, under which all offered sold speedily. At the Junction yards picked lots were sold for $5.25 to $5.40 per cwt., while in the Toronto market $5 was reached on more than one occasion. Medium lots sold at $4.50 to $4.90, while some common went as low as $3.

Not many stockers and feeders have been offered lately, and many of those which were only half good enough were taken as exporters, owing to the scarcity of the latter. Good short-keep feeders are quoted at a range of $4.50 to $5, with considerably less, of course, for second-raters. In one branch of the trade there has been an over-supply, namely, in calves. The run on Tuesday was so large that there was some difficulty in disposing of them. Prices dropped to an average of 3¾ to 5½c. per pound, or perhaps $2 to $6 a piece. Milch cows continued in good demand, and sell at $30 to $65 each, according to quality.

Considerable activity has been manifested in sheep and lambs. Exporters fetched $3.75 to $5.25 per cwt., while mixed were a trifle easier. No change has occurred in hogs since the advance a week or ten days ago. Selected fetch $6.25 per cwt.

The largest cattle exporting contract by one firm ever reported in Montreal went through a few days ago according to a dispatch from that city this week. Messrs. Armour & Co., of Chicago, have contracted for the entire space for cattle on all the Thomson Line vessels for the next twelve months. It is said Messrs. Swift & Morris, of Chicago, have secured considerable space on the C.P.R. vessels for the summer.

Mr. F. W. Hodson, the Live Stock Commissioner, has just returned from a visit to Fredericton. He reports that the New Brunswick Government have decided to hand over the live stock records of that Province to the Federal Department of Agriculture. The Government of Nova Scotia have already passed an Order-in-Council to the same effect. The Province of Quebec and the Holstein Association of Ontario have yet to enter the arrangement.

* * *

PRICES OF COMMODITIES.

The London Economist's total index number showing the average prices of ordinary commodities at the end of March last stood at 2,153, compared with 2,136 for the end of December. It is thus seen that the high range of prices which has prevailed for so long has been well maintained, and that indeed it has been improved upon slightly during the last quarter. The level has remained fairly steady since the end of June, 1904, at which time the Index Number stood at 2,130. A year ago it stood at 2,234, but at this time cotton, flax, and manufactures thereof, were at an inflated level. Generally speaking it may be said that the prices of raw materials are fully up to the average of the last four years which serves to show that demand is strong, and that supplies are being easily absorbed. In foodstuffs, the variations of prices, comparing the end of the first quarter of the present year with the same date of last year may be set forth as follows: Wheat, 30s. 9d. in 1905; 28s. 6d. in 1904: barley, 25s. 2d., and 22s. 9d, respectively; oats, 17s., and 16s. 7d.; prime beef, 4s. 4d., and 4s. 2d.; inferior beef 2s. 10d., and 2s. 2d.; mutton, 6s. 4d., and 5s. 10d.; West India sugar, 17s. 10d., and 14s. 9d.; tea, 3⅞d., and 4¾d. In metals a similar comparison shows that Cleveland pig was 49s. at the end of the first quarter of 1905, compared with 44s. at the same time last year; steel rails 100s. against 90s. Wallsend coal, 16s. and 16s. 6d. respectively. Among textiles, cotton (middling) was 4.24d. and 7.72d. at the respective dates: wool (unwashed, N.S.W.), 11d. and 8¾d.; jute, £18 3-16 and

£13½; flax, £31½ and £39; hemp, £41½ and £37½. Petroleum stood at 5d. and 6⅜d. respectively.

The make of pig-iron, says the Economist, has not been fully absorbed, but the market has not been weakened by this fact to any great extent, owing to the expectation of a demand arising from the United States. English wool has receded a little during the last two months from the very high position it occupied at the end of last year, but colonial grades maintain their price well, the supplies coming forward being readily absorbed. The price of tea continues very low, owing to the heavy supplies, or as contended by the producers, to the check on consumption due to the increased duty just imposed.

* * *

PROPOSED NEW TIMBER REGULATIONS.

A large deputation of holders of timber licenses in Ontario and others interested in lumber waited upon the Provincial Government last week to make suggestions regarding the more efficient protection and conservation of timber. One proposal worthy, it seems to us, of very careful consideration was that the Government should appoint inspectors to report upon the adaptability of localities situated within districts under timber licenses, and unless at least 10 per cent. of a township is suitable for cultivation, such lands should not be opened for settlement under the Free Grants and Homesteads Act, and if already open, should be withdrawn. Instead of granting a location certificate, the deputation suggested that the applicant should not be located, but should be allowed to merely enter upon the lands for the purpose of cutting and clearing and putting under cultivation the two or more acres prescribed by the regulations, building the house, and residing upon the lands, according to the requirements of the Act, and then, upon the expiration of six months, upon furnishing the department with valid proof of residence and improvement, and of his having complied with the provisions of the Act, he should receive his location. The further provision should be made that he is not to be allowed to cut timber except in the actual process of clearing for cultivation prior to the issue of his patent. The request was also made that the rights of licensees to cut timber other than pine, where it is included in the licenses, be not made to cease upon the location as at present, but be suspended from the time of the location, to be revived on abandonment or failure of the locatee to comply with the regulations. Attention was also drawn to the recent passing of a resolution by the Lumbermen's Association to the effect that in view of the loss of timber by fire, the newer and unexplored settlements of the country should be explored in advance of settlement.

* * *

MONTREAL LETTER.

At an adjourned meeting of the Montreal Harbor Board, held on Saturday last, a motion was carried favoring the rental of wharf space to the steamships at specified sums per foot frontage, and also the collection of a regular annual charge from the floating grain elevators and tugs, and space occupied on the harbor front by dealers in coal, lumbermen, etc. This decision, in the form of a motion, was rendered after a heated discussion of the question how the deficit as shown in the Harbor Master's report was to be met.

It was shown that the total revenue which would be raised in this way, would amount to something like $42,000; but the question was raised whether the rates had been arrived at fairly in proportion to all. Mr. Bickerdike, who proposed the motion, said that he thought it only fair that all interests utilizing the harbor should pay a share, and it was to be understood that only sufficient would be collected under the resolution to make up any deficiency which might exist. Several passages of arms occurred between Mr. Robert Reford and Mr. Bickerdike, during one of which Mr. Reford remarked: "You are going to kill the port altogether," to which Mr. Bickerdike replied: "I want make everybody who uses the port pay a little." Eventually as stated above, the motion was adopted, Mr. Reford and Mr. McFee dissenting.

This revenue scheme, however, is meeting with general condemnation in commercial circles, and on Change the matter has been the chief topic of discussion among the members. The shipping interests seem unanimous in their determination to oppose the tax. The St. Lawrence route, they contend, has been the most expensive in the North Atlantic, and to have additional fees placed on this port will, they say, prohibit many of them from sending their vessels here for cargoes.

Mr. W. T. Gear, president of the Montreal Board of Trade, when asked for his opinion on the determination of the Commission to impose these taxes, said: "Speaking for the Board of Trade, I consider it a retrograde movement, and it is not in accord with the status of the Dominion. Prior to 1888 tonnage dues were collected, but on the Government assuming the channel debt it was part of the agreement forced on the trust by the Federal authorities that tonnage dues be cancelled, and the imposition of these in another form will certainly affect the business of the port. In 1897, the Montreal Board of Trade advocated the freeing of the port of all dues, and thus making Montreal the national port of the Dominion. The progress that this city has made from a business standpoint owes its present prominence to to the shipping interests, and it appears to me that the taxing of what is Montreal's foundation is a suggestion that ought to be opposed by all citizens, without regard to politics."

Mr. Gear intimated that in all probability he would bring the matter before the council of the Board of Trade. The imposition of the tax on grain elevators and tugs has given the grain men ground for complaint, and a meeting of the Corn Exchange was called for Thursday of this week, to protest against any such action being carried out.

The Dominion immigration officials anticipate that the influx of immigrants to this country during the present year will create a new record, and judging by the figures the railways have published in this connection, these expectations may indeed be realized. Since the first of January last, 23,000 immigrants have arrived in Montreal from St. John, Halifax, and Portland. The majority of the immigrants have gone to Western points, some few hundred remaining in Montreal. As a general thing they were observed to be English-speaking people of good appearance. Of the foreign elements, Russia, Sweden, Norway, Germany, Italy, Belgium, and Hungary, were represented. Some idea of what activity the C.P.R., particularly, has employed to handle the crowds who came up from eastern ports over their line, may be gathered from the fact that on Monday of this week that company sent out an order over the entire system to rush 110 coaches to St. John to accommodate this week's arrivals of immigrants.

Once more the Canadian Freight Association has drawn the attention of shippers to the fact that the practice of false classification, false representation of the contents of packages, false reports of weights, etc., continues unabated. The association gave out, at the conclusion of their annual meeting at the Windsor Hotel, Montreal, on Thursday of last week, that they are determined to stamp out the evil, if not by moral suasion, at least by process of law. They point out, however, that as these practices not only deprive the railway companies of revenue to which they are justly entitled, but places shippers, who do not adopt such practices and who are averse to defying the law, at a most unfair disadvantage, it is hoped by the railway companies that it is only necessary to bring the matter to the attention of shippers to have the abuse entirely discontinued. It may be well to suggest to those interested in this connection that any attempt to secure the transportation of goods at less than the required tolls is liable to a penalty not exceeding one thousand dollars, or less than one hundred dollars.

Another branch of the City and District Bank is about to be established in this city. The property secured for the purpose is situate at the corner of Pine Ave. and St. Lawrence St. It is a new stone building, erected two years ago by Mr. G. Papineau, druggist, who occupies a portion of it with his own store. The whole ground floor is to be devoted to banking purposes, and the bank will be installed within a very few days.

Montreal, 12th April, 1905.

A HANDBOOK OF CANADA.

The Commercial Hand Book of Canada: Edited by Ernest Heaton, B.A. Oxon.—For some months the compiler of this book has been at work devising and arranging a hand book which should give information about Canada to traders and investors in Europe, and to persons abroad intending to settle in Canada. And from a glance at the proof-sheets—for the work is still in the press—he has succeeded in collating many facts and circumstances of the kind that people going into a new country most want to know. The first division of the book: "Hints to Traders," where it does not (how could it?) anticipate all enquiries likely to be made, by an Englishman for instance, or provide an answer for him, yet tells him where to go in London or the English big towns for information, refers him to Boards of Trade in Canada, of which a list is given, to mercantile agencies, to directories, to trade journals. Then coming to specific advice, Mr. Heaton gives some warnings as to advertising (which are by no means needless when we remember the way an unscrupulous canvasser for commercial journals, in Montreal, has swindled export merchants in English towns), as to trade marks and brands, as to the classes of goods Canadians use. Legal weights and measures are given, rates of exchange indicated, and suggestions made as to consignments. Rates of railway travel, commercial travellers' privileges and taxes, the duty on commercial samples—all these points are touched upon, not at great length, but sufficiently condensed.

The section entitled Canada's Progress gives statistics, recent and compact, respecting farm products, manufactures, minerals, our forests and fisheries; also our imports and exports, savings bank figures, clearing house returns, and, what is by no means usual, Ontario municipal statistics. The editor has made no splurge about the enormous extent of Canada, her great possibilities, her future vast importance, and for his forbearance in this particular one feels disposed to thank him, because we get a trifle too much of this, sometimes, in print.

An unusual feature and a valuable one is the list given on pages 20 to 24 of Useful Publications on Canada. These are for the most part Government publications, either of the Dominion or of the provinces, with foot-notes indicating where a certain blue book is of special interest to investors, to traders, to immigrants. The summaries made of treaties and special tariff, and of customs regulations, and the abridgement of commercial laws are valuable and must have cost the compiler great labor. The Customs Tariff of the Dominion is printed, which the editor tells us has been revised to date, and a number of tables are added, showing values of European foreign coins, exchange tables, etc. There are other features in the book which we have not room to notice. It is a very practical publication, not alone for the immigrant and foreign investor or trader, to whom it must prove of distinct value, but for the Canadian, and it is interesting to learn that it is to be published every year. Such books as this are needed in the present stage of Canada's development, and we shall be gratified to hear that a good distribution has been secured for this Commercial Hand-Book.

* * *

"THE MEDICAL ASPECT OF LIFE INSURANCE."

Editor Monetary Times,—

Sir,—Permit me to thank you for your kindness in calling my attention to an editorial which appeared in the "Review," of London, England, under the above heading, in the issue of March 3rd last. This editorial draws attention to the paper which I had the pleasure of reading before the Ontario Medical Association in June, 1904. It was one of a set of papers dealing with life insurance, and it fell to my lot to touch upon the selection of lives from the actuarial standpoint. In this paper I first referred to the influence of the plan on the acceptance of risks for a life insurance company, and then said as follows: "I must now refer to one investigation which will, no doubt, have an effect on the acceptance of risks, namely, what is known as the 'Specialized Mortality Investigation.' This is the experience of thirty-four Canadian and United States companies, upon ninety-eight special classes of risks, which was compiled by the Actuarial Society of America. . . As the result of the investigation of the mortality of the various classes is very interesting, I will now quote from the report of the Committee of Actuaries, who had charge of the investigation."

In spite of the paragraphs quoted above, the editor of the "Review" has given me credit for the Specialized Mortality Investigation, and he seems to infer that this refers to the experience of the company with which I am connected. I am sending the editor of the "Review" a copy of the original paper, as he may have made the mistake from having seen only the report of my paper which appeared in one of the insurance papers in the United States. Yours truly,

Percy C. H. Papps, Actuary.

Manufacturers Life Office,
Toronto, 10th April, 1905.

* * *

LAKE AND MARINE MATTERS.

It is believed that the coming season will be one of the busiest on record for the Canadian lake marine. Some 30,000,000 tons of iron ore have already been contracted for for delivery from Lake Superior to Lake Erie ports, and, while, of course, the proportion of Canadian ore is only a small part of the above quantity, it will prove a strong factor, because it will be carried almost entirely in Canadian bottoms. Marine men accept the condition of the steel trade as the basis of marine conditions on the Great Lakes. If the movement of iron ore is strong, a healthy condition all round follows inevitably. This year's iron ore delivery will exceed that of last year, according to contract figures, by over 6,000,000 tons. The Canadian tonnage is looked on now as being sufficient for all ordinary present requirements.

At a meeting of marine men two or three weeks ago in Toronto, the question came up of shortness in delivery of grain, through which, owing to the high prices of wheat, some serious losses have been incurred. It looks, however, as though no action will be taken in the matter, owing to the hesitancy on the part of several of those interested.

On Saturday last several vessels left Buffalo for the upper lakes, and the season may be said to have opened, though some little difficulty was experienced on account of pack ice. On Friday last the steamer "Modjeska" left Toronto for Hamilton with several passengers on board.

* * *

FINANCIAL ITEMS.

The Bank of Toronto has opened new branches at Galt and Brantford.

The Shawinigan Water Power Company, Montreal, is making an issue of $2,000,000 five per cent. consolidated first mortgage bonds, the price being 98.

T. W. Johns, cashier of the defunct Bank of Yarmouth, who was arrested at the outcome of the report of the curator, has been released on bail. The arrest followed on the report charging him with having made false monthly returns to the Government.

The bank rate in London has been reduced to 2½ per cent., the lowest in seven years. It looks as if at last the country is recovering from the strain imposed by the South African War, and great satisfaction is expressed in consequence.

Vancouver city council has awarded its entire recent issue of $175,000 worth of 4 per cent. debentures for waterworks extensions and school purposes to the Dominion Securities Corporation, at the very satisfactory rate of 98.78, the highest which has prevailed for some years.

At a meeting of the Ottawa Board of Trade, on Monday last, which was well attended, a resolution was adopted approving the action of the city council in applying to the Ontario Legislature for permission to issue debentures of $86,000 for new exhibition buildings and extension of the Central Canada Fair buildings in that city.

In Montreal, a curb stock market has been established. In New York and London, curb markets, that is, facilities for the purpose of buying and selling unlisted securities, have been in existence for some years. There is no initiation fee and no dues. At the opening on Monday last, a feature was the heavy demand for South American securities.

There have been reports in several daily newspapers of Montreal and Toronto stating that the Bank of Nova Scotia is about to establish agencies in Mexico. We have the best authority for saying that bank has no intention of extending in that direction. A branch of the bank of Nova Scotia will be established in Havana, Cuba, within a few weeks, and this may have lent color to the idea that Mexico was within the area of the bank's proposed extension.

Paul Leroy-Beaulieu, the French economist, throws some light on the much discussed question of where the gold output of the world has gone since 1890. He says that of the $2,800,000,000 (twenty-eight hundred millions), of gold shown this year in the reserves of the world's banks of issue, and in that of the United States Treasury, a little more than one-half has been accumulated since the great expansion in gold output, or since the above date.

The Quebec Government proposes to put a tax on stock exchange transactions. Such a step will be vehemently opposed by brokers, who claim that it would be ultra vires of a provincial Legislature. A similar proposal to tax transactions on the New York Exchange $2 per 100 shares, has just been pushed through the New York Legislature, but has evoked a storm of hostile criticism, it being held that such a tax is a tax on capital in motion, and that it will simply have the effect of driving business from New York to other cities.

A rather important judgment has just been delivered by Chief Justice Meredith regarding the payment of balance on stock purchased. John Jarvis subscribed for one share of stock, worth $25 in the now defunct Wiarton Beet Sugar Company, and paid a cash payment of 5 per cent. The balance was to be paid out of money withheld from his payments for beets delivered during the next five years. He delivered beets for two years, or thereabout, and then the concern collapsed, and Jarvis still owed $14.75. He claimed that he was not actually a shareholder until his agreement had been completed. Chief Justice Meredith in quite explicit terms confirms the judgment of the official referee to the effect that Jarvis became a shareholder immediately on the signing of the agreement. The failure of this sugar company caused personal loss to a large number of farmers in Grey and Bruce. Being a test case, the costs will be paid out of the company's estate.

FIRE INSURANCE NOTES.

At a meeting of the Toronto Board of Fire Underwriters, held yesterday, the resignation of the manager, Mr. McCuaig, was accepted.

The roof of John Norton's large farm-house, near Dover, N.H., was discovered on fire last week, and a total loss of house and outbuildings was threatened. The only available water supply was Mr. Norton's well, which contained but a few feet of water, so the fire-fighters, bursting in the heads of three barrels of hard cider in his cellar, applied that beverage by the pailful and the blaze was extinguished with a damage of only $100.

A fire in the Stock Exchange building, Chicago, a few days ago, says an exchange, brought to light defective and inadequate "stand-pipes," and placed in jeopardy life and property. In their efforts to extinguish the fire the firemen had access to the inside hydrants, but no water was available. Upon investigation a very faulty condition was discovered. On a number of floors it was found that connection between the main pipes and the elbows extending into the building had not been made.

The responsibility that rests upon the authorities of a growing city or town to keep pace with its growth in the matter of fire protection, drainage and light, is illustrated by the following from the Montreal Gazette: "The necessity for improvement in the fire protection accorded the West End of St. Catherine street requires no other illustration than the fact that it is the same to-day that it was twenty-five years ago. The property valuation of that district has more than doubled. The chances of a disastrous fire have more than quadrupled. It is time the matter was remedied. We cannot always be lucky."

We notice the new insurance brokerage firm of Irish & Maulson, with offices at 20 Toronto street, in this city. They represent the Sun Insurance Office, and the London and Lancashire Fire; the Dominion Guarantee Company, and the Employers' Liability Assurance Corporation. The members of the firm are Mark H. Irish, for years inspector of the Guardian Assurance Company, and Frank E. Maulson, late inspector of the Sun Fire Office. The long field and agency experience enjoyed by both these gentlemen should fit them to be of service to clients in the insurance business. They have many friends and we believe deserve them.

Like many other arrangements entered into in anticipation of fire breaking out fire-escapes are often allowed to become useless when they are most wanted. Under its heading of "Fire Protection," the Insurance Age for March has the following: "The lamentable fire at 105 Allen Street, with the loss of nineteen lives, shows that putting the Tenement House Commission in charge of the fire escapes has proved to be a vital mistake. As long as the fire department had charge of the fire escapes there was a sort of perfunctory inspection made, and a great many obstructions were removed. Now, the fire-escapes, particularly in the rear of tenements, are nearly all obstructed, and the large loss of life at this particular fire was clearly due to the fact that the fire escapes were practically impassable to the firemen, as well as to the tenants of the house. While very few of our readers know how "the other half live," they can readily imagine how easy it is for them *to die* when a fire breaks out at four o'clock in the morning in the basement of a crowded tenement, and immediately extends to the roof throughout the halls and staircases. With the fire-escapes encumbered with boxes, barrels, flower pots, beds, old furniture and rags, and with from three to seven people in a room, it can be readily seen that the chance of escape is small."

LIFE AND ACCIDENT ASSURANCE.

The Grim Reaper often rides in a reaping machine—the automobile or trolley.

"I'll let you know when I'm ready" has cost many a man the insurance he might have had if he had been ready when the agent was.

The Empire Accident and Surety Company has been granted a charter to transact in Canada the business of accident, sickness and guarantee insurance.

"I've got him skinned to death," remarked the banana peel, as the victim landed on his head on the sidewalk. These treacherous things do a pile of damage.—T.I.P.

Weren't you shocked, uncle, when you heard that Harry had died and left me a widow? asked the niece. And the uncle answered: Well, no. That's about all I ever expected he would leave you, for he had no life insurance.

"Fresh and active at fourscore, popular among his associates and the public, and turning in the applications right along," says the John Hancock Field, "Agent Hippolyte Gignac of the Lowell district lands this Osler business a good blow, smack in the solar plexus. On January 15th, Mr. Gignac completed his fourteenth year of service as an agent of the John Hancock at Lowell, during which time he has steadily produced business."

The organization or reorganization of surety companies and the extreme youthfulness of some of the presidents are incidents of the day, says the Insurance Press. Industrial accident insurance is proving attractive to an increasing number of companies. Credit insurance is another line that some of the older companies are disposed to take up. Other casualty companies are endeavoring to devise something entirely new.

A week ago, thirty-eight out of the fifty members of the board of directors of the Equitable Life Assurance Society assembled in the board-room and discussed the company's affairs. It is announced that those present unanimously decided to adopt the two years' mutualization plan announced several days ago. The statement is officially made that no resignations were tendered. Messrs. Cornelius N. Bliss and Chauncey M. Depew have declared that the meeting was absolutely harmonious.

At Ottawa, on Friday last, the following bills were read a third time and passed. Respecting the Century Life Insurance Company. To incorporate the Imperial Guarantee and Accident Insurance Company. Respecting the Grand Council of the Catholic Mutual Benefit Association of Canada. To incorporate the Annuity Company of Canada.

How vast is the work carried on by the Prudential Assurance Company of England will be understood when we mention that on December 31st last there were no fewer than 15,577,161 policies in force in the industrial branch, with an average duration of about ten and three-quarter years, while those in force in the ordinary branch numbered 742,147, giving a grand total of 16,319,308. The amounts assured are even more amazing. In the industrial branch the total has now reached £154,942,181, this amount of protection being bought by weekly premiums aggregating £118,958 per week, or £6,185,816 per annum. In the ordinary branch, which is now probably the most progressive, the sums assured, with bonuses, total £82,607,425, and produce a yearly premium income of £3,968,638.—Insurance Observer, London.

An American exchange has the following about the assessment organization bearing the more or less captivating title of the Modern Woodmen of the World—a kind of contrast, by the way to the Ancient Order of Foresters: It will be observed that the income of the Modern Woodmen in 1904 was $7,110,231, and the outgo $7,504,712. And this is assessmentism, whether the figures be large or small. It will be hard to find a better description of the insurance side of fraternalism than Dickens gives in "David Copperfield:" "My other piece of advice, Copperfield," said Mr. Micawber, "you know. Annual income twenty pounds, annual expenditure nineteen nineteen six, result happiness. Annual income twenty pounds, annual expenditure twenty pounds ought and six, result misery. The blossom is blighted, the leaf withered, the god of day goes down upon the dreary scene, and—and, in short, you are forever floored. As I am!"

* * *

TRADE NOTES.

A by-law has been passed in Essex, Ont., to grant a bonus of $5,000 to the Essex Canning and Preserving Company, Limited.

Cotton manufacturers sent a deputation to the Dominion Government last week to ask for an increase in the duties on cotton goods.

There was recently held in Montreal a meeting of men interested in the vinegar trade, a result of which was the decision to memorialize the Government to take action regarding the continued sale of acetic acid as vinegar, which is not only illegal, but detrimental to the health of the consumer. The consumption of this acid is still quite common in the Maritime Provinces.

It will come as a shock to many to learn that the consumption of malt and spirituous liquors in Canada for the year 1904 was 22 per cent. larger than the average consumption for the previous four years. Prosperity must have impelled us to drink, apparently. The yearly average from 1899 to 1903 was 2,843,106 gallons, while the consumption in the fiscal year 1903-04 was 3,481,287 gallons. The quantity of spirits manufactured in the Dominion in the last-named period was 5,678,153 proof gallons, against 4,063,603 gallons in the previous year. Of malt liquor, the quantity manufactured in Canada was 27,305,985 gallons, against 25,755,154 gallons in the preceding year. It is a redeeming feature, however, that notwithstanding the increase of last year, the proportionate quantity of spirits consumed to-day is less than that consumed some thirty years ago, when it ran up to nearly two gallons per capita. Last year it was less than one gallon per capita.

* * *

—The Japanese Government proposes to establish a large sawmill for the purpose of sawing timber from the Government forests, and this, if successful, will be followed by others in various parts of the Island. Mr. Alexander MacLean, the Canadian Commercial Agent, who is stationed at Yokohama, says this is a good opportunity for Canadian makers of sawmill machinery to try to introduce their articles into Japan. They are recommended by him to send their catalogues to the Director of the Forestry Bureau, care of the Department of Agriculture and Commerce, Ottawa.

* * *

—A new boat is being built for the Nova Scotia Steel and Coal Company for the purpose of extending the Ontario market for coal. The present ocean-going boats cannot pass Montreal. The new vessel is of the tubular type. Belt conveyors are to be used for unloading her, which work can be done at the rate of 400 tons per hour from a 3,000-ton boat. An estimate of the cost of carrying coal from Sydney to Toronto places it at $1.10 per ton. Great interest is being taken in this attempt to gain the Ontario market for Nova Scotia coal.

* * *

—The late Government of Ontario, that is, the Ross Government, passed an order-in-council allowing the Electrical Development Company, of Ontario, which is a subsidiary company of the Toronto and Niagara River Co., to develop 125,000 horse-power at Niagara Falls. The parties concerned now want power to develop 250,000 horse-power. The original rights were granted on condition that the company should pay $15,000 per annum for the location and the right to develop 10,000 horse-power. After that the rate should be $1 per horse-power for the next 10,000, 75 cents for the next 10,000, and 50 cents for the remainder up to 125,000. With this in view the company began work on a wheel-pit to accommodate twelve 10,000 horse-power turbines, and also built a tail-race tunnel under the river to discharge under the Falls. At the same time the wing dam was built in the rapids, an engineering feat of great skill, overcoming tremendous difficulties. The engineers realized that they could develop 250,000 horse-power as easily as 125,000, and this is the reason for the confirmation of the order-in-council, with the amended clauses.

* * *

—It was natural to expect, after what Mr. Justice Winchester said at the trial about the crooked proceedings of J. B. Hill, the St. Thomas merchant, that he would have imposed a severe sentence upon that curious individual, whom a jury found guilty of getting goods under false pretences. The judgment, however, was merely imprisonment for sixty days. From what was said by Hill at the trial, and from what we are told of his demeanor since, it is clear that the man's moral equipment is "built on the bias," so to speak. He boasted yesterday, we are told, that within six months—which is only three times sixty days—he will be back in St. Thomas doing a bigger business than ever! If he does, it will be to the lasting disgrace of the merchants and manufacturers of Canada who will trust him.

OUR HALIFAX LETTER.

Nothing has as yet been heard of the progress of the Lunenburg fishing fleet, which started out some weeks ago, much earlier than usual. Men, that is, sailor-fishermen, have been more plentiful this season than for years. Last year owners were almost reduced to press-gang tactics, and men had to be petted, coaxed and bonused before they would sign articles for the voyage. Now, however, owing to the high prices and the fact that the fleet is reduced by over twenty-five vessels, makes the probability of a larger catch and a larger share a great inducement. A large number of craft of from ten to seventeen tons each have been launched lately for the shore fisheries.

A colony of Welsh settlers, consisting of about 7,000 persons, now in Patagonia, is anxious to come to Nova Scotia, and the Halifax Board of Trade is in correspondence with them.

John H. Mayston, of Great Yarmouth, England, who operates a fleet of steam trawlers in the North Sea, has been in communication with the Board of Trade of Halifax, as to the prospects in Nova Scotia waters, and also for a fish-curing plant. The letter is being dealt with. He would at least be safe from Rojestvensky.

The Halifax Board of Trade has passed a resolution protesting against the proposal of the Province of British Columbia to tax commercial travellers from other Provinces.

A movement is on foot to establish a very large carriage factory in Amherst, N.S., the company to have a capital of two hundred thousand dollars.

One of the best known men in eastern Nova Scotia, W. L. P. McNeill, of New Glasgow, died last month. He was closely identified with the interests of New Glasgow, and had in operation the largest bridge-building plant in the Maritime Provinces.

So much has already appeared regarding the steamship "Victorian" and her turbines, that there is not much left to add. Her performance of over eight days from the Mersey to this port was, to tell the truth, discouraging, even for a first voyage, considering that the "Parisian," now laid up here as a result of a collision with the "Albano," made her maiden trip twenty-three years ago in seven days. The "Victorian" has not demonstrated that there is any advantage in the turbine engine so far as speed is concerned, whatever she may do in the future; but everyone who came across on her, and those who went around to St. John from this city, are unanimous in their praises of her wonderful freedom from vibration. Unless watching the shore, it is almost impossible to tell that the ship is moving. More is expected of her in the way of speed in the future, and as she is excellently prepared to carry perishable freight, her advent will be of great help to trade.

M. Neville, the lobster packer of this city, has recently purchased three or four lobster factories owned by Gray Bros., of Sambro, on the south shore of Halifax County. This concern now owns eleven factories from Port Matoun to Sable Island.

The bricklayers in the employ of the Dominion Iron and Steel Works, about one hundred in number, have demanded an increase of wages after the 15th of this month. They are at present receiving 38 cents an hour and demand 45 cents. Otherwise they will strike.

Halifax, Nova Scotia, 10th April, 1905.

* * *

ILL-ADVISED STOREKEEPERS.

The assignment of Ovide Lamothe, liquor dealer at St. Guillaume d'Upton, Que., between Sorel and Drummondville, is another example of the results most likely to follow from a man's attempting a business without any of the experience or other qualifications necessary to success. Lamothe was a farmer, and described as a very respectable man in his way of life, who a year ago sold off his farm, and with the proceeds invested in a license and a general stock of liquors. To-day his affairs are in the hands of the assignee, his farm and its proceeds gone. It is perplexing to the observer, this persistent desire of people to go into "storekeeping." So many try the game and fail at it that one would think the coming race would take warning. But whether through ignorance of the fate of their many predecessors or from wilful blindness to their lack of equipment for successful merchandising, or whether through having credit foolishly pressed upon them, they embark—to suffer shipwreck. Here is the case of a decent man, G. A. Fortin, of Sherrington, a village between Montreal and Rouse's Point, N.Y. For several years past he conducted a creamery and restaurant, apparently with fairly satisfactory results. Last summer he was unwise enough to engage in general storekeeping, without having any experience in the buying and handling of such a stock. The result is his assignment to a Montreal accountant already. We cite the cases of these two unfortunates and give them publicity in the hope that some people may be led to modify the desire to "get into business for himself," which seems of late to have afflicted many thousands more people than there was room for as storekeepers.

* * *

NEW BOARD OF TRADE.

A Board of Trade has been organized at Bear River, Annapolis County, Nova Scotia, with the following officers: President, V. T. Hardwick; vice-president, L. Ruggles; secretary-treasurer, W. G. Clarke; council, J. V. Thomas, Dr. L. J. Lovett, W. W. Clarke, J. A. Purdy; auditors, G. L. Tupper and Lewis Harris. An organization to be known as the Annapolis Valley Fruit Shippers' Association has been formed at Round Hill, N.S., and other branches are shortly to be added in Annapolis County.

* * *

DIRT IN THE AIR.

The annual general meeting of the Canadian section of the Society of Chemical Industry took place in Toronto on the 30th ult. The following officers were elected: Chairman, F. J. Smale, B.A., Ph.D.; vice-chairmen, W. H. Ellis, B. J. Harrington and A. McGill; honorary treasurer, M. J. Taylor; honorary secretary, Alfred Burton. Some interesting views were propounded regarding smoke consumption in large cities, views that will come rather with a shock to those who believe it to be worth even some sacrifice to be able to breathe pure air. Prof. Galbraith said that making tests by noting the time the black smoke is emitted from a chimney and then noting the grey smoke was not a proper way to test a smoke consumer. What the public complain about is the dirt, and dirt is thrown into the air even when there is no perceptible smoke. The so-called smoke consumers do not lessen the dirt at all. They distribute it evenly, so that it is imperceptible, and it does not come out in volume; but houses in the vicinity of places using smoke consumers are just as much troubled with dirt as those which do not use them. Where there is the combustion of coal there is sure to be dirt, and devices to prevent this were not successful. Whether this be absolutely true, we do not know, but it will certainly come as a disappointing statement from a scientific man. Another speaker took the ground that in a country like Canada there must be some industrial cities, and if Toronto is to be a manufacturing centre her citizens must forego a little of the conveniences which comes from living in the country. He did not think that Toronto was destined to be a purely residential city like Edinburgh, but that its growth and prosperity were dependent upon manufacturers, and while every effort should be made to abate the smoke nuisance, it could not be eliminated altogether.

LAKE TERMINUS OF THE GRAND TRUNK PACIFIC.

Arrangements have now been made for the location of lake terminals for the Grand Trunk Pacific Railroad. The result is looked on as a feather in the cap of Fort William, which will secure the railroad's Lake Superior terminal works and offices. The town will assist the railroad in securing 1,600 acres of land on Mission property from the Government. This Mission property includes Mount MacKay. The corporation are to deed the G.T.P. 1,300 feet of water frontage, on the Kaministiquia river, and give the railway a right of way 150 feet wide on James street. A cash bonus of $300,000 is to be made in three instalments. Upon the Grand Trunk Pacific spending $300,000 on their terminal docks and works on the Mission, the first

$100,000 to be paid; upon the expenditure of another $300,000 the town to pay over their second instalment, and when the G.T.P. have spent $500,000 more and have a train running into the terminals , the third instalment becomes due. An additional bonus of $50,000 is granted upon the G.T.P. building by 1908 a swing bridge across the river for railway traffic, electric street cars, wagons and pedestrians, the town also to have a perpetual right over the same bridge. The railroad is to be exempt from taxes for thirty years, except school taxes. The town will give the company rights to run over the several streets in the town. The company will erect extensive docks along the Kaministiquia river, above the C.P.R. docks, and intends to spend large sums on grain elevators, freight sheds, etc. The line will enter the town from the west, midway between the C.P.R. and the Canadian Northern.

THE LATE J. X. PERRAULT.

On Friday last there died in Montreal, Mr. J. X. Perrault. a man whose varied attainments and whose extraordinary energy enabled him to do much for his native Province of Quebec. He was born in the City of Quebec in May, 1836, and therefore was within a month of his seventieth year. The deceased gentleman in his early days studied classics in the Seminary at Quebec, then took a course of agriculture in Durham University, in the Royal College of Cirencester, England, and in the Ecole Nationale d'Agriculture of Grignan, France, where he graduated. Returning to Canada in 1857, he was appointed secretary of the Provincial Board of Agriculture, and of the Lower Canada Agricultural Association, and edited the Canadian Agriculturist and the Revue Agricole. In 1865 he was elected member of Parliament for Richelieu, and occupied that seat until the Confederation of the Provinces in 1867, a measure which he opposed, and was then defeated.

Mr. Perrault was in 1875 appointed secretary-treasurer to the Canadian Commission at the Philadelphia Universal Exhibition, and held a like office at the Paris Exhibition of 1877-78. He aided in the foundation of the Chambre de Commerce, and was delegate of that body at the Paris Exhibition of 1889, as well as a representative of Great Britain on the international jury, in the class of implements, horses and cattle.

Mr. Perrault was a delegate to the Congress of the Chambers of Commerce of the Empire, held in London, in 1893 and 1896. He was a Knight of the Legion of Honor, and an officer of Public Instruction of France. Mr. Perrault was the first to import Ayrshire cattle into the Province and Percheron stallions from France, and he was on the first steamer that ever ran to Rouen from Canada. Last year he was appointed secretary of the Transportation Commission, and a few weeks ago the St. Jean Baptiste Society unanimously appointed him its general president. He had written extensively on agricultural and political subjects.

Having strong pride of race, and believing firmly in the claims of the French-Canadians to social and commercial dominance in the Province, which he seemed to think particularly their own, Mr. Perrault could scarcely be called popular among the English folk in Montreal. He was tinctured with mediævalism, they thought, and sometimes termed a restless and intractable crank. But at the same time his vigor and versatility were admired, his public spirit respected. Unusual intelligence obtained him position after position of honor and responsibility, and it deserves to be said of him that he was, according to his lights, a patriotic and conscientious Canadian.

SHERBROOKE, QUE.

The city of Sherbrooke is growing steadily. A financial report of the municipality has been issued for 1904 and we learn that the population is now 18,064, an increase of 3,436 since the year 1894. The city debt amounts to $578,500. Value of real estate is $4,951,793; the value of properties exempt from municipal taxes, $314,500, and exempt from taxation, $1,105,217. The cost of managing the city's affairs was $43,864, not including the water department. There are 91 arc lights and 53 incandescent lamps in the city. Cost of electric lighting was $5,918 for the twelve months.

Sherbrooke has a fair share of wholesale trade, being in th centre of a rich and populous district; and possesses some extensive and well known manufactories. For example, suc extensive establishments as the Jenckes Machine Co. and th Canadian Rand and Drill Co.; the Paton Tweed Manufacturin Co. and the Lomas Woolen Mills; the Quebec Asbestos Co. an the Dominion Lime Co.; Mitchell & Co.'s fine hardware esta lishment and the Walter Blue clothing factory. There is in th city (or near it), a powder mill, producing the explosive wit the semi-Icelandic name of rack-a-rock; there are the Easter Townships brickyard, and several stone and marble work cigar factories, which use both Canadian and imported lea the Silver Spring brewery; the bobbin and spool factory of G. Thomson & Co. We have mentioned only a dozen, b there are scores worth mentioning.

It is stated that a majority of the city councillors a enamored of municipal ownership, and are resolved to buy o the Sherbrooke Power, Light and Heat Company. But th ratepayers generally are not so modern or so experimental their ideas for twice within a year they have declared at th polls against its purchase by the city. A majority of the cou cillors resolved, at a recent session, to notify the company th under a clause of their charter the city has the right to pu chase by arbitration on and after June next, and that it w demand the carrying out of this privilege. The company, ho ever, is determined to contest the city's claim in the courts. is a singular attitude for representatives of a city to assum that of taking proceedings in a direction the very opposite what their constituents have twice determined upon. If the persist, their action will be likely to lay the foundation for fine crop of lawsuits.

* * *

SOMETHING ABOUT DETROIT.

I saw that you published not long ago some statisti of the growth of Pittsburg. Now, why should you not, say to myself, be equally willing to print something abo Detroit, if it is sent to you. We are nearer your bailiwic and our citizens do more business with Canada than Pitt burg, or even than Buffalo or Cleveland.

This is an old city, but in the first half of the centu it did not grow fast, and up to 1860 had not reached a pop lation of more than 40,000 or 50,000. But after that it gre very fast, for people were coming west then. It was as shipping and shipbuilding point that Detroit was first know to fame. Wooden ships and steamers were built there f the traffic of the lakes. Now it is vastly more: it is a rai way centre for Canadian and Western railways; it is a man facturing centre, and it is bound to be one of the great b cities of the Western States.

It does not give an adequate idea of the very gre growth of Detroit's manufactures to quote census figure for these do not come beyond 1900, whereas enormous add tions have been made to our manufactures since that yea But I may say that where in 1880 the number of hands e ployed in manufactures was shown by the census to 16,000, in 1900 it was 45,000. And where in the first ye named the value of manufactured product was $30,000,00 it had reached $100,000,000 in 1900. To-day it is estimate that we have 55,000 workers and an output of $125,000,00 Detroit is one of the largest consumers of pig iron in th United States. Of course, we get the ore here readily fro

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal—The Quebec Bank.

the mines in the North Michigan peninsula, but we buy much pig iron besides what is smelted here. It is not easy to say which is our principal industry, there are so many. We make railway cars, and have done so for forty years, turning out 19,000 of them in 1903; also electric cars. Stove-making is another very large industry—we do not have to take a seat now behind Troy, Albany, or Buffalo in that line—4,400 hands produce $6,000,000 worth of stoves a year. Furnace and radiator making has been added of late years. Agricultural implements are made here in large quantity; so are waggons and carriages and automobiles. Where this is the case there must be a great consumption of malleable iron, and this city may be called a centre of that industry.

I have mentioned automobiles, and it is only fair to say that Detroit is the greatest entrepot for the production of these in the whole United States, if not in the world. This has come about almost entirely within the last five years. Estimates are made that between 9,000 and 10,000 of these handy machines were turned out of our fifteen or twenty factories in 1904, their total value being, perhaps, $10,000,000. Of course, gasoline engines are made here largely, too. We make varnish, furniture, musical instruments, boots and shoes, tobacco, pickles and preserves, and we have one of the largest drug and tincture making establishments in the world.

Nature has done much in placing this city in a favorable position in many respects. We are close upon a noble stream of pure running water, thirty feet deep and near a half mile wide. Our sanitary conditions are good, and our labor conditions unusually satisfactory, for there is much and varied skilled labor here. Within the last ten or a dozen years the situation of Detroit close to, almost, indeed, upon, a vast deposit of rock salt has been availed of, and factories of soda ash and caustic soda have arisen, as well as those for materials of which alkali is the basis. Coke and Portland cement are further products of very recent years. The volume of our wholesale trade is large in the neighboring States and in the Province of Ontario, for our merchants make the most of their position as convenient shippers by either rail or water. Bank clearings, which in 1894 were $288,000,000, had gone up by 1904 to $523,000,000.

Not wishing to load you up with statistics, which are not pleasant reading to everybody, I will shut them off and ask your attention to some other aspects of our city. We believe we have here 330,000 people, for the United States census gave us 285,704 of a population in 1904, and there have been 9,180 dwellings built within the city since then (costing $7,000,000), which, at five persons to a dwelling, means 46,000 more folks. No city has better, or, I believe, cheaper electric lighting than Detroit, and none is more freely supplied with water. The city is well governed, and our municipal taxes are only 15½ mills in the dollar, with a low public debt. We have good drainage and paving, and an excellent park and boulevard system, which, with the trees and grass plots which citizens take pleasure in maintaining around their dwellings, render this one of the most pleasing of cities to the eye.

Now, if I have not wearied you with too many particulars, I hope I have said enough to convince you that you good people of Toronto have in the city of Detroit one of the finest and friendliest of neighbor cities. We hear much of your progress and welfare from time to time, and I just thought I would devote this afternoon to doing a little justifiable blowing for our city.

CADILLAC.

Detroit, Mich., 8th April, 1905.

* * *

EMPLOYMENT BUREAU.

The Employers' Association of Toronto have established an employment bureau, the work of which is thus described:

"Without any cost whatever to the men, employees of all kinds could register for positions, and work would be found for them without the necessity of having to go from shop to shop and without the loss of time to themselves, and the consequent loss to the manufacturers of having the time of their firm or enquiry office taken up with applicants for whom they had no positions. The bureau would make a specialty of ascertaining what the current wages are, of differentiating between different classes of workmen, and classifying them into different degrees of proficiency, and ascertaining from former employers what their records have been with reference to skill, workmanship, etc. Vacancies for workmen reported from any of the firms would be filled by those registered on the unemployed list. It would be known at the central office exactly how the trade was supplied with men at any time. In case of shortages, the head office would endeavor to bring in just sufficient workmen to keep the trade supplied, and in case of a superabundance of men, would find them positions in other districts."

* * *

OUR ENGLISH LETTER.

Nobody doubts the imminence of a political upheaval; one only wonders how the tossed fragments will fall. Chamberlain has large control of the Conservative party machine. Balfour has the Parliamentary majority, and the Liberals, whose leader is still undetermined, have doubtless a latent majority of votes in the constituencies. It would be an impertinence to prophesy in these confused circumstances. One can say safely that the position of members who have shouted with Chamberlain, and now wish to sing with Balfour, is highly invidious. Their inconsistency must cost them votes. But if a Liberal Government is certain, a Conservative Opposition is its necessary corollary. When it comes to opposing, Chamberlain will be the most formidable figure on the Opposition benches. By more arts than one he will be enabled to advance the progress of his fiscal projects, and some interesting divisions will serve further to compromise the Conservative members, and to reduce the colonial preference proposals to a more practical shape.

A passage in an official journal notes a probable employment for commercial automobiles in Toronto. Electric motors are suggested for light parcel delivery and for heavy goods. They have not been thus used on this side the ocean. Electric broughams and 'buses are seen in London, and their silent and smooth running is admirable. For parcel delivery a few large stores employ petral motor vans, but the vehicles are used for their advertising value quite as much as because of any other consideration. Heavy motor waggons are driven by steam, and the perfect waggon has yet to be built. Many controllers of cheap and heavy cargo for road-transit are looking eagerly for cheaper power producers than the horse. In general, however, our manufacturers are agreed to wait for improvements. Gradients in different districts, the length of haul, and the weight of load are all factors of variable importance in individual cases. Though heavy waggons are seen about daily in our cities, their adoption is experimental, and overwhelmingly the chief haulier is still the faithful horse.

Mr. J. B. Jackson, the Canadian Agent at Leeds, made an announcement very pleasing to the Bradford Chamber of Commerce the other day. He described as "very favorable" the prospect of a reduction of the tariff upon worsted dress goods and linings. As these are not articles that Canadian mills make in any bulk, and as there is little likelihood of their being made advantageously in the future, the Bradford people ventured to suggest that 23 per cent. taxation should be sufficient. It is, perhaps, worth noting that these are precisely the classes of fabrics that Uncle Sam's formidable barriers fail to repel. In 1903 he took some $4,250,000 worth, and last year still more, and this despite a taxation which more than doubles the cost of the articles.

Speaking of the growth of local expenditure in this country, a stout Tory organ, a foe to many of the new-fangled notions of reform, attributes the general cause to "a growing sense of public duty and public requirements." The pronouncement will gain weight with all those who know the paper when it is explained that the authority is the Yorkshire Post.

A great ground landlord in Liverpool has incensed the insurance agency profession by calmly assuming its prerogatives. He informs all lease-holders that in future a certain fire office is to undertake the management of insurances upon the estate. He desires that henceforth all lessees shall cover their risks with this company, whether or not any clause in the lease compels them so to do. It is pointed out, amiably, that compliance will absolve tenants from the necessity of producing policies and renewal receipts on demand. And with forethought that is scarcely less than beautiful the landowner adds that the insurance may be made through the estate office. The leasehold tenure of land puts whole towns under the control of one individual, and one hereditary landowner in the north could transfer at least three million dollars worth of risk to his nominee if he so willed. What the Dukes of Bedford, Norfolk and Westminster, with their huge leasehold London estates, could do in the same way is enough to make an agent shiver to dream about.

Northampton bootmakers are now asking more money for their products. How successful the effort will be remains to be seen, but without some relief in this direction the year threatens to be a seriously bad one. Although there are promises of freer supplies of hides from the chief cattle-raising countries, these quantities are not available, and nobody dares to think that leather is in any imminent likelihood of cheapening. Even local inland markets have been invaded by agents buying hides for the United States. Our tanners are, therefore, in a more pitiable plight than the boot manufacturers to whom they sell.

No good impression has been created by the Australian jam-makers, whose packages are said to have been of short weight. The War Office, in peace time, is capable of the most egregious errors, and in war no limit can be set to its possibilities in bungling. It is said, moreover, that the Australians who contracted to supply the jam were seeking to buy a great weight of the fruit pulp in this country. The pulp was alleged to be wanted to improve the flavor of the Australian fruit. In all senses the transaction was a singular one, and under more expert control it would not have been Australia that was commissioned to supply preserves to the troops in South Africa.

* * *

OUR SAINT JOHN LETTER.

An English syndicate have secured control of the New Brunswick oil fields, and development work on a large scale is looked for as a result of the deal consummated a few days ago. Under the new arrangement all shareholders of the original company become shareholders with the English syndicate, receiving two shares of the par value of £1 each for each share they owned. The new company will have a capital of £650,000, and besides giving the two shares to each shareholder of the New Brunswick company, it will put in the treasury £100,000 in cash for immediate development work, and £100,000 in stock for future work. The sum of £10,000 has been put up as a forfeit that the bargain will be carried out. The great drawback in the past has been the lack of sufficient capital to enable the company to prosecute development work successfully. All this should now be changed, and if the oil fields are as extensive and as productive as the preliminary work seems to indicate, the future will be bright.

There is a prospect of the establishment within the Province of New Brunswick, in the very near future, of another large pulp and paper industry. George D. Bayles, president of the Bayles Pulp and Paper Company, of Binghampton, New York, and some of the directors of his company, were here within a few days on their return from an inspection of the lumber lands of the Wm. Richards Company, on the southwest Miramichi and Taxis rivers. They expressed themselves as thoroughly well satisfied, and it is known that negotiations for the purchase of the property are now well advanced. The headquarters of the company will probably be at Chatham.

An unusual condition of affairs has arisen in connection with the operation of the mines of the Imperial Coal Company, at Beersville, and of the Beersville Railway, running from the I.C.R. to the mines, six and a half miles. Each is owned by a different company, and there is trouble between them. The railway is not being opened, and as a consequence the mines not being worked. The matter was discussed in the Legislature a day or two ago, and the Government took authority to operate the railroad and to cancel the license of the coal company if work is not prosecuted. This is expected to solve the difficulty.

The Legislature, by a unanimous vote, has decided to ask the Dominion Government to purchase the New Brunswick Southern Railway. This line runs from West St. John to St. Stephen, and is owned by Russell Sage, the American millionaire. It is about eighty miles long, and when a bridge is built across the St. Croix river will have connection with American lines running to Boston and New York. Hon. Mr. Emmerson is known to favor the purchase of this line, as it will give the Intercolonial a good American connection and will open up for summer travel a splendid section of New Brunswick. At present the line does not pay, and in winter little effort is made to keep it open. That is the reason for the demand of the Legislature for Government ownership.

Apparently the city of St. John will have to pay a good round sum in damages to property-holders along the Mispec river before it can secure permission to take the water of Loch Lomond, the source of the river, for its new water service. Already it has been agreed to pay the Messrs. Mooney, who claim a water mill privilege, the sum of $15,000, and there are many others yet to be dealt with.

St. John made strenuous efforts to secure from the Legislature powers to grapple with the Street Railway Company, which has a very liberal franchise. The company escapes taxation on the ground that it is a railway, and the Legislature refused to alter this. It also refused power to the city to regulate the service and in fact knocked out all that the city asked. There was a very powerful lobby against the city, leading citizens who hold stock asking the Legislature to protect the widows and orphans who have invested in the company, on the strength of the powers it has.

Messrs. Magee's Sons, hatters and furriers of St. John, have just purchased the Y.M.C.A. building, and will remodel it for their wholesale and for warehouse purposes. The Y.M.C.A. is raising a fund of $60,000 to secure a new building, and as they now have upwards of $57,000, it may be taken for granted that the work of construction will be commenced at an early date. The old building sold for $19,000.

Some quite extensive municipal works will be carried out in New Brunswick during the coming year. The most important will be the new water system of St. John. A number of contractors from the United States are now here figuring on the plans. The city of Fredericton will make improvements in its water supply and will establish a system of sewerage. The village of Fairville, near St. John, will also establish a sewerage system. These are but a few of the works of this kind now in contemplation.

The Legislature of New Brunswick has granted a charter to a company to utilize the Grand Falls water power on the St. John river. The Parliament of Canada has chartered another company with the same purpose. The company chartered in New Brunswick, chiefly Americans, have put up a forfeit of $50,000, as a guarantee of good faith, and the Legislature intends to protect them and to fight the Canadian company, of which Sir Wm. Van Horne and Senator Proctor, of Vermont, are leading spirits. As one move in the game, a bill has been passed by the Legislature that no company chartered elsewhere can hold land in the Province, except on a warrant from the Governor-in-Council. This would seem to make secure the rights of the New Brunswick company.

St. John, N.B., 11th April, 1905. * * *

* * *

—These Western men are, for the most part, hustlers. At Rosthern, in Assiniboia, on the Canadian Pacific line to Prince Albert, they have a board of trade. This body is possessed of some enterprise and public spirit. They have conceived the idea that an experimental farm would be a good thing, educationally and otherwise for the people of that locality, and they are "pulling strings" to get one established in the neighborhood. Not only this, but they are enthusiasts in favor of good country roads, and are taking steps to have the roads of that part of the country improved.

Mercantile Summary.

We beg to announce that Mr. John Backus, Room 24, Fraser Building, St. Sacrament Street, Montreal, has been appointed general agent for The Monetary Times for the Province of Quebec. Mr. Backus is authorized to make advertising contracts, to take subscriptions, and to report proceedings of meetings for this journal.

The Monetary Times Printing Co. of Canada, Limited.

Thomas Robertson, President. James Hedley, Editor.
Edgar A. Wills, Business Manager.

The men employed at the Acadia Coal Company's mines, at Westville, N.S., on Monday last went out on strike. The trouble may spread to other properties of the company mentioned.

In the Okanagan Lake section of British Columbia, a real estate boom seems to be making itself felt. Large quantities of land have been sold to Eastern people, and is being set out with fruit trees.

The Quebec Board of Trade is agitating to have that port made a free port for shipping. It points out that Quebec is open for navigation eight months in the year, against only five months and a fraction for Montreal.

At the Enderby, B.C., coal mines, the present indications are very promising. A coal seam has been discovered 30 ft. below the surface twenty feet thick, and the mineral seems to be of good quality, burning readily, and giving forth a strong steady heat. It is quite possible that Enderby may yet supply fuel to the mining districts of the Similkameen, and that the Okanagan district may be known as a coal as well as a fruit country.

The British Columbia Electric Railway Co. have an arrangement with all their employees whereby one-third of the surplus earnings, after the payment of a 4 per cent. dividend, are divided each year equally among employees who have remained one year or more continuously in the company's employ. At the close of 1903, each employee's share was $35, and for 1904 the sum is expected to be larger. This bonus is secured by between 300 and 400 employees.

A meeting of the creditors of W. H. Redding & Sons, the failed boot and shoe firm of Yarmouth, was held last week. The assignees reported that they had received tenders as follows: For goods, 64 per cent. of inventory value of $6,345; for machinery, 12½ per cent. of $8,578; findings, 37½ per cent. of $3,005; stock, $750, inventoried at $1,254. The creditors being anxious to keep the industry in the county, if possible, advised the assignees not to accept tenders for the machinery for one month, in order to allow the purchase of the plant by local capital. The entire stock of goods has, we understand, been purchased by L. Higgins & Co., of Moncton.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

BANKERS.

From the following list our readers can ascertain the names and addresses of bankers who will undertake to transact a general agency and collection business in their respective localities:

MEAFORD—Grey County. C. H. JAY & CO'Y Bankers, Financiers and Canadian Express Co. Agents. Money to loan.

GEORGE F. JEWELL, F.C.A., Public Accountant and Auditor, Office, 361 Dundas Street, London, Ontario.

COUNTIES Grey and Bruce collections made on commission, lands valued and sold, notices served. A general financial business transacted. Leading loan companies, lawyers and wholesale merchants given as references.
H. H. MILLER, Hanover.

The Grenfell Investment Co.
BANKERS
GRENFELL, N.W.T.
A General Banking and Financial Business transacted. Special attention given to collections on Neudorf, Hyde, Tiree, Mariahilf and Pheasant Forks.
JAS. YOUNG-THOMSON MGR.

Mr. Sidney, the architect and designer of the Singer sewing machine works, now building in St. Johns, is supervising the construction of the factories in that Quebec town. Work on the plant is now in progress; but it is expected that much larger gangs of men will be employed in the course of a few days.

The steamship "Jacona," of the Thomson line, with a cargo of fruit from the Mediterranean, sailed last week from Sorrento, and she will be at the Gulf ready to ascend to Montreal, it is expected, as soon as the river is navigable. Her cargo consists of 28,698 boxes, and 4,194 half-boxes of fruit from Messina, and 12,699 packages from Sorrento.

Mercantile Summary

Lakefield ratepayers have granted a loan of $15,000 for fifteen years to the Lakefield Furniture Company.

Mrs. J. A. Lyons, in the millinery line at Grand Falls, N.B., has failed. She owes $2,700, and recently made an offer to her creditors of 35 cents on the dollar, but has since had to withdraw said offer.

The firm of Gatehouse & Co., dry goods dealers in Montreal, West End, are seeking a compromise arrangement at 30 cents in the dollar, instalments payable in one, two, and three months. Their liabilities are stated at about $6,000. One of the partners is said to have recently given up a position, worth $2,000 to $2,500, to take an interest in the firm, which, if true, is a hard case.

An offer of compromise at the rate of 40 cents on the dollar is made by Benjamin Rogers, who has long been a prominent general merchant at Alberton, P.E.I. Mr. Rogers has had a penchant for politics, to the detriment of his business, to which indiscretion his financial troubles are largely attributable. He was at one time Commissioner of Agriculture in the Island Ministry, and not long ago was spoken of as an aspirant to the Governorship of the Province. Mr. Rogers is said to owe $28,000, with estimated assets of $21,000 or perhaps slightly more.

The Grand Trunk and Canadian Pacific Railway Companies are both reported to be taking a hand in the movement for the improvement of country roads. It is proposed that a special "good roads" train shall be sent out through the districts most in need of better roads, from which expert advice will be given by means of lectures and literature. The theory upon which the officials are working is that a good road ensures the farmers contiguous to it the certainty of taking advantage of every demand of the market. Every spring and at other times when there has been a prolonged wet spell much grain is held back on account of the impassability of the roads. With dry weather comes a rush of business which taxes the ability of the railroads to secure cars, and a general congestion ensues.

A Temiskaming Mining Division has been created by the Ontario Government. It takes in the territory where the rich silver cobalt ores have been discovered, and also an area to the north. The head office of the division will be at Haileybury. The district is bounded on the east by Lake Temiskaming and the boundary line between Ontario and Quebec, as far north as Lake Abitibi. Thence the line runs to a point eight miles north of the outlet of the Abitibi River, due west to the Nipissing-Algoma boundary line, thence south on the boundary line, diverging east to Trout Lake, thence along the great northern bend of the Montreal river, following the river to the southern boundary of the township of Coleman. It then runs along the eastern boundary of the timber limit of Lumsden & Booth, thence along the 3rd and 4th concessions of Colerain township to Lake Temiskaming.

Mercantile Summary.

The Canadian Trenton Potteries Company, of St. Johns, P.Q., has been incorporated with a capital stock of $60,000. The promoters are from Trenton, N.J.

A firm of Copenhagen merchants tells the Canadian Government Office, in London, that they wish to correspond with packers of apples in barrels for export. The circular from the London Office, dated 31st March, states that a combination of Western Ontario apple growers having decided to pool their products for sale in Great Britain will be seeking to arrange with one or more firms to take a large quantity of barrels, packed and graded in good style.

At the annual meeting, in Montreal, last week, of the Canadian Freight Association, Mr. C. A. Jaques, of the Merchants' line of steamships, announced that his company will, at the opening of navigation, put on two vessels to operate between Montreal and Fort William, calling at Toronto, Hamilton, and whatever other lake ports offer freight. They will give a fortnightly service, which means that every two weeks a vessel will arrive at and leave Montreal, making similar time for Fort William. The two vessels will have a capacity of 2,500 tons of freight, and will compete with the Upper Lake steamers and the three railways eastward.

Continued efforts are being made by Prince Edward Islanders to induce the Dominion Government to unite their Island to the mainland by means of a submarine tunnel between Cape Traverse and Cape Tormentine. It is claimed that, according to the terms of Confederation, the Dominion Government is bound to maintain efficient communication and continuous connection with the railway system of the mainland. The cost of such an undertaking is estimated at $10,000,000, the interest on which, it is believed, would be easily saved by the improvement on the present unsatisfactory arrangements.

The annual report of the United States Steel Corporation for 1904 has been published. The gross earnings showed a decrease from the previous year of $92,167,000. However, with the decreasing operating and general expenses, depreciation and improvement deductions, and by passing the dividend on the common stock in January, the final surplus for the year showed a decrease of only $7,300,000. Through the conversion of the seven per cent. preferred stock into five per cent. bonds $5,184,000 was saved in dividend payments. In his report, President Corey said that the depression in the iron and steel trade, which, in common with all other lines of business, took place during the summer of 1903, continued until the late fall of 1904. In the latter part of the year 1904, there was a marked increase in the volume of business received, and this revival has continued. The tonnage of unfilled orders on the books on December 31st, 1904, was 4,696,203 tons of all kinds of manufactured products, in comparison with 1,325,123 tons at the close of 1903.

Mercantile Summary.

A large deputation from Northern Ontario waited on the Provincial Government the other day and asked that Nipissing be set aside as a mining district, and that a recorder be appointed.

We thank the Stovel Company, of Winnipeg, for a copy of their map of Manitoba in pocket form. It is engraved by this company by the wax process in eight colors, and shows every post office and railway station in the Province. The details are distinct, and the type matter legible. An alphabetical index enables the possessor to find any place on the map readily. This is one of a series comprising Manitoba, Assiniboia, Saskatchewan, and Alberta. We understand the price of these to be fifteen cents each.

The following patents have been granted by the United States Government to Canadians: Stamp affixing and cancelling machine, D. Carter and R. Mackerrow; hoe, Charles N. Choate; waxing-up tool for dental trial plates, Andrew May; casting, Frederick Cowden; metal shaping machine, William Ross; printing machine, J. A. Thompson; inserted-tooth saw, W. J. Cummings and S. Abernethy; apparatus for marking sunken vessels; Fred. W. Johnson; cattle guard, T. K. McQueen; bedstead construction, Alfred Taylor; mower and reaper, Jules Gagne; hydraulic motor for presses, William Ross; casting, Frederick Cowden.

The Grand Trunk Pacific Railway is said to have acquired large coal properties on the Telqua river in British Columbia. The coal is pronounced of the best. Of the twenty-six square miles acquired, one-half was the property of the Pacific Northern and Omineca Company, and the other half is reported to have been owned by F. Vernon, of Vancouver. It is said that the company will fully develop the property at once. An expert mining man says that in order to prepare property for the future the company will require to put two years' development work on the property, with a considerable force of men. That done the mines will be in shape to furnish coal immediately upon the railway coming through. It is reported that the coal company which will be formed subsidiary to the railway corporation will spend about $750,000 in development this coming year. The Pacific Northern & Omineca Railway charter is also said to have been acquired by the Grand Trunk Pacific. The two sections of the road from Kitimaat to Hazelton, approximating 135 miles in length, will, it is generally believed, become a part of the Grand Trunk Pacific. During construction days, says a British Columbia exchange, it will be the great artery for carrying supplies into the interior so that work may be carried on from Hazelton. Hazelton is recognized as likely to become a great centre in connection with the line. The main line will probably pass down the Bulkley Valley, or failing that, a branch will have to be built along that route to the coal fields recently acquired on the Telqua.

Mercantile Summary.

The Canada Launch Works, Toronto, has almost completed a trim auxiliary yawl for Mr. E. B. Greene, of Buffalo. She is 39 feet 6 inches over all, a beam of 11 feet and is equipped with a 6-h.p. gasolene motor.

Four years ago, J. P. Brennan went to Cape Breton from Alberton, P. E. Island, and engaged in the grocery and provision business at North Sydney. He gave credit freely, and not apparently being a good collector, has had to assign. He owes about $9,000, and possesses about $6,000 in more or less dubious book accounts, and $2,500 in stock and other assets.

On the 2nd inst., E. A. Morgan & Co.'s carriage factory, at Fredericton, N.B., was badly damaged by fire, which started in the paint shop. The loss was about $7,000, covered by insurance. About the same time a petition by the company to the local council for a bonus of $15,000 to enable them to enlarge their premises was rejected.

The value of the permits issued from the office of the building inspector, in Vancouver, during March, was $271,335, a record amount. April is one of the best months in the year, and the activity in building, says a local newspaper, promises to be better this season than in 1904. The permit for a $50,000 theatre will be a good starter for April.

The hotel owned by A. W. Dundas, G. S. Davidson's general store, Wm. Gibson's general merchandise establishment, and W. J. Hyde's implement warehouse, at Balgonie, Assa., were on the 7th inst. destroyed by fire. The losses are: Balgonie Hotel, $20,000, insured for $5,000; G. S. Davidson, $25,000, insurance $10,000; Wm. Gibson, $12,000, insurance, $3,000; W. J. Hyde, $15,000, insurance $4,000.

The Eastern Canadian Passenger Association held their annual meeting in Montreal a few days ago, and elected Mr. Thos. Henry, of the Richelieu and Ontario Navigation Co., chairman. The following were elected members of the Executive Committee: Messrs. G. T. Bell, general passenger and ticket agent of the G.T.R.; C. E. E. Ussher, general passenger agent of the C.P.R., and J. H. Walsh, general freight and passenger agent of the Quebec Central.

The result of the canvass by the New York Commercial Bulletin of the Canadian press with regard to reciprocity between this country and the United States, is now made known. In all, 238 papers replied, the total estimated circulation of which is 1,023,653 copies. Twenty of them favor reciprocal concessions. Six absolute free trade. Seven declare that the United States must reduce tariff duties for the benefit of Canada before Canada should even consider reciprocity. Ten are noncommittal. Ninety-four were too indifferent to express a definite opinion. One hundred and one newspapers specifically oppose lowering the present Canadian duties on American manufactures, no matter what inducements should be offered by the United States.

The gross earnings of the Toronto, Hamilton and Buffalo Railroad for the year ending June 30th, 1904, were $673,311, and the net earnings, $224,051. The total mileage is only 88 miles.

A few days ago there was a fire in Bedford, Que., near the Vermont line, which wiped out an appreciable portion of the business section of that place. The chief losers were: Mr. MacNamara, grocer and furniture dealer, loss, $3,000, partly insured; L. Gosselin, loss, $3,000, no insurance; Sheridan estate, building, $3,000, not insured.

The Provincial Grocers, Limited, wholesale dealers in groceries, in Toronto, was incorporated July 2nd, 1903, although active operations were not begun till February, 1904. The authorized capital stock is $250,000 in shares of the par value of $100 each. It has been exceedingly difficult to secure any definite statement from the management as to actual conditions. To what extent their capital is paid up is not known outside. Apparently, however, the progress made has not been very considerable, for last week the company assigned to C. N. Sutherland, and on Wednesday of this week an application was made for a winding-up order.

The Grand Trunk Railroad has now, it is stated, deposited part of the purchase price for the charter of the Pacific Northern and Omineca Railway, in British Columbia, with all the privileges and conditions attached thereto. It has also purchased 17,000 acres of coal lands in the Telkwa Valley. The company undertakes to expend $100,000 in developing the line before the 1st of May next year, and to complete it within two years from then. The route of the proposed road is from a point on Kitimaat Inlet to a point at or near Hazelton, on the Skeena river. The distance is something over 130 miles. The subsidy, which attaches to the Grand Trunk's purchase is $5,000 per mile of road, not exceeding 135 miles, which may be paid in cash, debentures or inscribed stock, as the Provincial Government may elect.

—The first annual meeting of the Canadian Westinghouse Company, Limited, took place on March 28th, at the general offices in Hamilton. The report for the year ending December 31st, 1904, was a satisfactory one in every particular. The company has only been organized fourteen months and during that time the profits were over $160,000, notwithstanding the fact that the company has not yet completed its new works. It commences the current year with unfilled orders on hand of approximately $560,000. The general balance sheet shows cash assets of $495,727.95, and the amount of accounts and bills receivable is shown at $462,967.47. The following directors were elected: Geo. Westinghouse, H. H. Westinghouse, Hon. J. M. Gibson, Frank H. Taylor, Warren Y. Soper, L. A. Osborne, T. Ahearn, Geo. C. Smith, C. F. Sise, and Paul J. Myler. At a subsequent meeting of the directors Mr. George Westinghouse was elected president; Mr. H. H. Westinghouse, first vice-president; Mr. Frank H. Taylor, second vice-president; Mr. Paul J. Myler, third vice-president and treasurer, and Mr. John H. Kerr, secretary.

A parcel of whalebone was shipped recently from Hudson Strait and realized in London £2,500 per ton.

A fire in the Pacific Bottling Works, at Vancouver, last week did damage to the extent of $5,000, which was covered by insurance.

Westmount (Montreal), council has a scheme for raising $250,000 for the improvement of its streets and sidewalks and the extension of its drainage system.

It is expected that the new line of steamers to ply between Canada and Mexican Gulf ports will begin operations next month. It is not yet decided whether or not the ships will call at Cuban ports.

A by-law has been passed in Perth, Ont., to grant a loan of $20,000 to Messrs. Winn & Co., boot and shoe manufacturers, of Milton, who will build in the former place a two-story factory to employ not less than 75 hands.

The Grand Trunk shops, at Stratford, have been closed for an indefinite period, to permit of repairs to the boilers, shafting, etc. One thousand men are thrown out of employment. It is stated that no labor trouble is in question. A telegram from Port Huron, Mich., says that the locomotive shops at that place have been closed down as an answer to the request of the employees for a wage increase of 2c. per hour.

A large number of parties interested in the Levis Railway Company, met in Quebec on Friday last for the purpose of appointing Mr. Arthur E. Scott, as sequestrator to the line. The petition in favor of such a course was supported by the bondholders, the Canadian Electric Co., and the creditors, while Mr. Belleau, K.C., asked the court to appoint Mr. H. H. Morse. It was agreed that Mr. H. H. Morse, for whose appointment as sequestrator another petition had been lodged, be appointed superintendent of the road.

⁂

TORONTO MARKETS.

Toronto, April 13th, 1905.

Chemicals, Drugs, Etc.—Not much business is going on for the moment in drugs, though prices on the whole keep fairly steady. In opium, however, some small concessions have been made to buyers, though the undertone to the market is still satisfactory. Quinine has dropped a couple of cents, rather unexpectedly. The demand for codliver oil has been slack for some little time, and prices are easier. Menthol is dull. Bromides, while low in price, are still in rather small stock. Glycerine remains about the same.

Dry Goods.—Travellers at present are largely employed with the fall trade. Coats and suitings seem to be already well enquired for. The sorting trade for spring goods is still satisfactory. The multiplicity of new designs, turned out by domestic makers, is having a good effect and Canadian-made goods are in request. In spite of the complaints of woolen manufacturers regarding the tariff, many of them seem unable to keep up with the requirements of their customers and deliveries in some lines are distinctly slow. Cotton staple goods are still quite firm in price.

Flour and Grain.—While $4.40 or $4.50 is still the ruling price for ninety per cent. patents, the trade being done is only of a nominal nature. Millfeed is very firm still. Wheat is a little easier on this market, and there seems to be a lull in operations just now. Other grains remain unaltered. In rolled oats no change has been made.

Groceries.—No further advance is to be noted in sugar prices, though the firmness continues. Molasses have an upward tendency. Except for the scarcity and consequent strength in canned vegetables, there is practically no feature worth making a note of.

Hardware.—The wholesalers are very busy preparing for the rush which all have anticipated in connection with the opening of navigation. For seasonable goods of all classes there is little doubt but that the demand will be fully up to average, and some expect even better. In metals the movement is quite satisfactory. No marked price changes have occurred since last report.

Hides and Skins.—No changes have occurred in regard to prices and business is on the dull side. In Chicago, there is still considerable strength shown, but it seems, so far, to have no effect here. Leather continues in the same position as last week, except that the price question seems a little more unsettled.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Provisions.—Receipts of butter have been much more plentiful, but, owing to the previous scarcity, prices remain practically unaffected. Cheese is firm at the recent advance. New cheese will, no doubt, make its appearance in quantity within a few days. Eggs are becoming easier daily, with 14½c. about the prevailing price at present. Maple syrup is more of a feature now, but genuine seems somewhat hard to obtain, in spite of the efforts to keep up its quality. While hogs are still high in price, no particular change of an upward nature seems to have taken place in products, though lard and smoked meats are all firm.

Seeds.—Red clover is still scarce and importations are being made from Great Britain and the United States. The demand here is good, and prices are a little higher. Alsike is easier than last week, while timothy remains the same.

Wool.—This is an inter-season period, and it is difficult to say much about price prospects. The new clip is becoming a little more plentiful, but not very much has come in yet.

* * *

MONTREAL MARKETS.

Montreal, 12th April, 1905.

Ashes.—There is comparatively no stock in the inspection stores, and buyers are maintaining their offers pretty steadily. No. 1 pots of good tare bring $5.50; seconds, $4.90 to $5; pearls would probably realize $7.25 to $7.50 per cental.

Cement and Firebricks.—Business in cements is picking up somewhat, there being a fair number of local sales in moderate lots; for firebricks there is quite a good demand. For delivery from store Belgian cement is quoted at $1.70 to $2.10; English, $2.05; American and Canadian, $2.30 to $2.40, less rebate allowed for package; firebricks, $18 to $23 per thousand.

Dairy Products.—The cheese market remains dull and without an interesting feature. For what limited stock of desirable quality there is here from 12 to 12¼c. is asked. In new fodder cheese there is practically nothing doing as yet. For butter there is a steady demand, with choice new milk creamery quoted at [illegible] to 25c.; choice rolls, 21 to 23c. per pound.

Dry Goods.—General collections may be called fair, if the state of the country roads be taken into account, and several leading houses report from 75 to 78 per cent. of customers' paper provided for on the 4th instant. The main proportion of spring business is now over, and travellers are already turning their attention to fall stuff, a certain number of them being now at home having their samples revised. City retail business is good on bright seasonable days. With regard to values of textiles, nothing new is reported.

Furs.—Complete reports of the London March sales, which closed on the 7th inst., give the following corrected results. Advances are shown in most lines of American furs as compared with last March as follows: Winter and black rats, 20 per cent. higher; fall ditto, 35 per cent. higher; skunk, 25 per cent. higher; mink, 65 per cent. higher; marten, 55 per cent. higher; silver fox, 60 per cent. higher; blue fox, 70 per cent. higher; white fox, 15 per cent. higher; otter, 45 per cent. higher; sea otter, 70 per cent. higher; lynx, 50 per cent. higher; fisher, 25 per cent. higher; bear, 20 per cent. higher; wolverine, 40 per cent. higher; badger, 15 per cent. higher. Cross fox and coon sold at same figures as last March, and spring rats the same as last January. The declines in prices as compared with last March were: Opossum, 25 per cent. lower; red fox, 15 per cent.; grey fox, 20 per cent.; wolf, 50 per cent. Australian furs, including opossum, wallaby, wombat and kangaroo all sold 15 per cent. higher than last January. Copper Island salted seal sold 32½ per cent. higher than in March, 1904.

Groceries.—Travellers find much difficulty in reaching some interior points, owing to the bad state of the roads, but, taking things as a whole, the volume of trade shows improvement. Collections may be termed just about fair. The sugar market continues somewhat unsettled. one refinery holding to their advance of last week to $5.70 for standard granulated, but the other company has made no change, and, on the whole, it is thought the prospects are for an easier market. Molasses is very firmly held at the late advance, 40c. per gallon being the figure for single puncheons. Dried fruits show very little movement, but prices hold pretty steady, and of California raisins there is but a light supply. Canned goods remain very firm, standard brands of tomatoes being quoted at $1.30, and corn at $1.20. There has been a revision of the terms under which woodenware has been sold by manufacturers by which buyers are entitled to the discount on lots of $20 or over, instead of on car lots only as heretofore.

Promotor Wanted.

Of first-class executive ability to handle an Industrial Proposition inviting a limited amount of capital, to co-operate with an American Manufacturing Concerg about to locate in Canada, which shows a strong earninn power. Present goods entirely imported.

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. G. C. DINNICK, Managing Director

Hides.—There is a comparatively small amount of killing being done just now, so that supplies of beef hides are light, and, though the quality is poor, buyers maintain their quotations at 9½c. per lb. for No. 1. Lambskins are yet unchanged at 10c. each; calfskins steady at 14c. for No. 1, and 12c. for No. 2 per pound.

Metals and Hardware.—The movement shows further increase in all lines. In quotations no important changes are noted. Summerlee pig iron, No. 2 selected, is offered, to arrive by first incoming steamers, at $18.50 to $18.75. Domestic brands are quoted at about $19. The Londonderry furnace is shut down for relining. Bars remain at $1.75 to $1.80. Canada plates are easier at $2.35; galvanized Canadas, $3.90 for fifty-twos; tinplates, galvanized sheets. etc., are without change. Ingot tin is firmer at 33½c.; spelter, easier at $6.50; antimony, 9½c.; lead, $3.45; copper, 16¼c. per pound.

Oils, Paints and Glass.—Business continues active. At last linseed oil has made a substantial advance, and raw is now quoted at 46c., and boiled at 49c. in an ordinary jobbing way. Leads ground in oil are also firmer, as was anticipated last week, and some houses are quoting $4.75 steady for pure white lead for ordinary lots. Putty is unchanged at $1.40 in bulk. Window glass is firm at the advanced prices.

* * *

IRON AND STEEL INDUSTRY.

The iron and steel industry may be said to be in a generally satisfactory condition. According to the Iron Age, the tonnage booked by the steel companies of the United States is enormous, the total of the United States Steel Corporation being now the largest on record. In some

branches the congestion is such that an effort has been made to purchase material in the open market. It is reported that the Steel Corporation has tried to buy 50,000 tons from outside plate makers without success. Reports from the structural trade are encouraging. The leading interest has about 600,000 tons on the books, and specifications are coming in more freely. In some branches consumers have booked so heavily for their requirements with leading makers at lower prices that independent mills find it difficult to secure customers. On the other hand, the largest producers are somewhat nervous over the volume of business offering, and fear that importations from abroad on an uncomfortable scale may become necessary later on. Production is going on at a tremendous rate, and the breaking of past records of output by individual mills and furnaces is a frequent occurrence. "With a continuance of the prosperity now being enjoyed by the iron and steel industry, the Canadian steel enterprises, which were affected by the marked depression through which the industry has passed, may be expected to share in the era of prosperity." In fact, for some time past, there has been little ground for complaint, so far as Canadian business is concerned.

* * *

WINNIPEG.

A real estate dealer of Winnipeg, Mr. Orde, who was in Eastern Canada last week, quoted some figures respecting real estate in the Western city to show the increase in prices of city real estate. First he claims 85,000 population for Winnipeg. Values of residential property have advanced forty per cent. in two years. Property on Main street, that sold for $3 a foot in 1903, cannot be purchased to-day for $12. The Bank of British North America purchased a lot opposite the Post Office on Main street, in 1902, for $14 a foot, and he would not say what it was worth to-day, as Eastern people would not believe him. "What we want in our city," continued Mr. Orde, "is a greater degree of public spirit. We want men who will tell the world what we have and what we are. . . To-day there is not a vacant house or store in Winnipeg." Then he tells the story of the Cauchon block, built in 1882, at the time of the boom, at a cost of, perhaps, $100,000, and which ruined its first owner, the then Lieut.-Governor Cauchon. This building was sold last year to McLaren Bros. for $125,000, and is now one of the finest hotels in the country.

GOOD CITIZENSHIP.

Every man should carry insurance, and should carry it early in life. Then the load is light, and no salary is so small that a portion of it cannot, and ought not, to be laid aside for so worthy a purpose. The man who has no one dependent upon him, just as much as the man who has. For if he is not a man of family he is no

man at all if he does not ultimately plan to be. Should his plans thus miscarry, there are even then few really better, safer, long line investments than a good life insurance policy. The holding of such an investment makes a man a better citizen in every way; gives him something more than a hireling's interest in the world of affairs; makes of him something more than a social parasite to be blown off by the first adverse gale and be trodden under the leaden heel of fate.—Toledo Times.

⁂

FAKE ADVERTISING.

At the recent annual meeting of the Western Canada Press Association, Messrs. Macklin and Dunlop were selected as a committee to draft a resolution covering "fake" advertising. Their resolution was as follows:

"This association views with gratification the rapidly increasing knowledge on the part of general advertisers, of what constitutes good advertising. The growing practice of merchants and general advertisers, more particularly in Western Canada, of concentrating their advertising appropriations in legitimate daily and weekly publications is commended and can be taken as evidence that the advertiser is beginning to recognize more and more every day that advertising is as essential to the prosperity of his business as a store in which to display his goods, and he appreciates the necessity of exercising the same business prudence in buying advertising space as would be employed in the purchase of goods. The association records its pleasure at the marked decrease in Western Canada, of advertising fake schemes, and believes that if the individual members of this body would inaugurate in their respective districts educational campaigns on advertising, it would result to the benefit of the legitimate publisher, and to very great advantage and saving to the general advertiser."—Trade Gazette, Calgary.

⁂

MANUFACTURERS' ASSOCIATION.

The Nova Scotia branch of the Canadian Manufacturers' Association passed on Monday last unanimously a resolution expressing the conviction that the interests of the Canadian people can best be served, and a strong national sentiment be fostered by keeping the trade of the country as far as possible in Canadian channels. The resolution proceeds: "Whereas, a large portion of the goods imported into Canada now enter via foreign ports, and are carried over foreign railway line, therefore cooperation is asked from the Canadian Manufacturers' Association, the various boards of trade and other representative bodies, in pressing upon the Dominion Government the desirability of so framing the tariff that there shall be a customs preference on all goods which enter Canada direct from the country of their origin, also on all goods entered at Canadian ports when carried in British shipping."

⁂

ORIGIN OF MAPLE SUGAR.

Here is a prose epic, an extravaganza, a legend—call it what you will, that somehow reminds one of Charles Lamb's celebrated Essay upon Roast Pig. We find it in Wednesday's Montreal Gazette:

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits guaranteed and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

You Need Go No Further

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg. Vancouver

Established 1882
THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

Maple syrup was discovered by a woman's carelessness, so the legend runs.

Once on a time—springtime, long ago—an Indian squaw was cooking venison.

There were no game laws in those days.

While the fire burned, and the meat cooked, the squaw dozed.

She awoke to find the meat burned.

Rushing to a dripping maple tree, nearby, she seized a moccasin, filled it with the dripping juice of the tree and threw it on the burning meat.

The result was a cake of pure maple sugar.

The husband ate and howled for more.

Trying to provide it, she discovered maple sugar.

That was once on a time, springtime long ago, before brown sugar was so cheap.

⁂

Caven Langstroth, of French Village, King's County, is erecting a saw and grist mill at Quispamsis.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

THE FUR TRADE.

Reports of the last month's fur sales in London are now to hand, and tell of further advances and considerable excitement in the trade. There is, however, room for considerable misconception on the point of these advances. Many of the holders of furs seem to imagine that prices on some lines have advanced anywhere from 25 to 80 per cent. upon former quotations, whereas, on the other hand, the fact is that the prices realized at these last sales were the same as, or only a little more than, those which were being actually given a month or two ago. Be this as it may, it is hardly too much to say that the range of values at present prevailing for furs is at a dangerously high level.

The primary cause, no doubt, is the unsettled state of things in Russia. The markets in that country are practically paralyzed; there is no certainty of obtaining goods ordered; the unrest of the operatives is such as to preclude the idea of systematic attention to business; the railroads are disorganized owing to the need for cars for the war. Goods coming by way of Warsaw, a great distributing centre for such as are exported from the country, are subject to the most unreasonable delays, and the result is that all ordinary business is at an almost complete standstill. One example of this may be seen in the movement of astrachans and squirrels, which are obtained and dressed almost exclusively in Russia. The operatives in these lines of goods have practically ceased work and there are no offerings. One special difficulty is experienced in this country in regard to fur-lined cloaks. Last year was the first in which there was any marked demand for this class of stuff, and consumers seem to appreciate them highly. But the query arises, will they continue to show this appreciation in the face of the excessive prices which are bound to prevail? When the difficulties became acute in Russia, Germany jumped into the breach and tried to create a big trade in the goods referred to. The employees in the latter country, however, seeing the strong demand for their services, refused to work unless their wages were very materially increased. However popular may be this kind of fur garment, the consumption is likely to be restricted through this cause.

At the recent sales, in otter there was a general advance of about 45 per cent. compared with March, 1904. Red fox realized about the same, though for the better grades there was an upward tendency. Mink realized no less than 80 per cent. more than it did last year. Skunk was 30 per cent. above, seal was as a rule higher, the advance ranging from 15 to 30 per cent. The only exception was Cape of Good Hope, which declined, owing to a lack of demand from Russia, its chief consuming field. Beavers fetched 10 per cent. above the prices of last January, and Australian opossum 15 per cent. above. American opossum was about the same as in January. Wombat and wallaby were 25 and 20 per cent. higher, respectively.

No conservative fur dealer feels in the mood to prophesy the course of events. They frankly state they do not know the probable course of events. But, seeing that everything points in the direction of small supplies and high prices, with little chance for mitigation for a year at any rate, buyers can hardly be acting wrongly in stocking up with their moderate and normal requirements now, without delay.

⁂

SHOE AND LEATHER TRADE.

The chief question which now troubles the boot and shoe manufacturer is the one of prices, and this has been something of a thorn in the side for months past. The cost of leather, which in its turn depends on the cost of hides, has been high for a long time past. In fact, hides and skins are to-day at least a cent per pound dearer than they were a year ago, this must necessarily make the position of boot manufacturers a hard and unprofitable one unless they raise prices, too. In some cases this has been done, and quotations for boots and shoes have been made to range 10 or 25 cents per pair higher, but no general understanding has been reached with this end in view, and even when the advance has been made it has not been adhered to. It looks, however, as if something of the sort will have to be done—either that, or the quality of the production will have to suffer.

Somewhat contrary to general expectations, the spring trade, so far as the manufacturer and wholesale dealer are concerned, has been distinctly good. The retailers have been seized with the idea that prices would surely advance before long, and they have taken the opportunity to lay in stocks of fairly large compass before the rise should be accomplished. The movement of the stocks thus laid in, however, has so far not been brisk, probably owing to the continued lateness of the season.

Styles of shoes for the coming summer show no remarkable new developments. At the same time there are several comparatively new features of a minor nature particularly in the better grades of men's wear. Wide, or rather medium toes are still the most popular, though indication is visible in certain quarters of a return of favor to the narrow toes of a few years ago. It is likely, however, that this feature will be kept within very moderate limits. Little doubt exists as to the return to popularity of the tan. Most stocks, while not including any large proportion of this useful line, yet show that retailers believe their customers' thoughts still turn to it in moderate measure. Canvas shoes promise to be worn to some extent despite their disadvantages as to poor wearing quality and liability to soiling.

Travellers are now carrying full lines of fall samples of boots and shoes, and according to reports received by their respective houses, the prospects for a good season's trade are encouraging. Collections are not particularly good, but are perhaps equal to what is usual at this period of the year.

Salesmen for rubber manufacturing concerns say that an increasing trade is likely to be the experience, even under the existing conditions of high values. Some dealers seem to have believed that discounts would have been increased, but under the circumstances, it is really difficult to imagine why they should not be lowered. Crude rubber is higher than ever; the best Para costing $1.32 per pound in New York. The extraordinary development of the various industries using this material has brought about what almost constitutes a rubber famine, and—at any rate, until the various planting enterprises get more fully under way—it appears quite likely that this position of things will remain very much as it is now, if indeed it does not become worse.

The leather market still remains in a somewhat unsettled condition. Everyone recognizes that by right prices should go up considerably, seeing the high cost of hides and labor, but it is apparently impossible to render this palpable to all the tanners concerned, and so, while the tendency of prices is strongly upward, there is no concerted action in this direction and complaint ends in complaint.

COAL FOR ONTARIO.

According to the report of the Department of Mines, Nova Scotia, the revenue received from royalties, rentals and leases in the year 1904, amounted to the large sum of $585,252.91. The amount refunded to the iron and steel companies for fuel consumed in their industries was $26,114.10, leaving a net income of $559,138.81.

This is a highly satisfactory condition of the coal trade for Nova Scotia, but how is it with Ontario? This Province is not a coal producer, but it is by much the largest consumer of any in the Dominion. Nova Scotia furnishes its own supply of bituminous coal, New Brunswick and Prince Edward Island draw cheaply from the same source, while Quebec has the advantage of low freight by the St. Lawrence from Cape Breton; supplemented by the Intercolonial Railway. Manitoba has the lignites of the Souris and other coal-fields. The North-West of Canada possesses inexhaustible supplies in the well-known coal fields of Lethbridge and Edmonton, with the territory between, besides the collieries at Frank. British Columbia is rich in the great deposits of the Crow's Nest Pass and other equally valuable fields which outcrop on the flanks of the Rockies. The well-developed collieries of Nanaimo and Wellington, on Vancouver Island, furnish an ample supply for the Pacific Coast. But where does Ontario stand amid all this limitless wealth of her sister provinces? Poor, in comparison—absolutely barren of such fuel resources. Therefore she must look abroad for this necessary of life and power. Her natural supply is from across the border, in the United States, where the coal can be bought at the pit's mouth for a dollar a ton. But when she is compelled by necessity to do this, her sister provinces look out from amid their opulence, and say: "Oh no, you must not do so, or if you do we shall penalize you to the extent of sixty cents a ton on every ton of coal you import." Is this fair?

The imports of bituminous coal into Canada in the fiscal year ending June, 1904, amounted to 4,252,333 tons, almost all of which was for consumption in this province of Ontario. The tax was therefore a heavy one. It is an invidious impost on our manufacturers, and a heavy burden on transportation. The farmers made efforts last season to have the freights reduced, and a reasonable way of doing this would be to have working costs of transportation lowered.

A glaring anomaly exists in the present tariff. Anthracite coal and coke are on the free list, but bituminous coal, the raw material from which the coke is manufactured, is subject to a duty of sixty cents a ton. If coal could be imported free, the coke could be manufactured here in by-product coking ovens, the gas and other products of which would yield a good profit; but this under present conditions is financially impossible, because the coal duty would neutralize the profits.

We have no desire to discuss the matter in any narrow provincial spirit, but in justice to the industrial and transportation interests of this province, the amelioration in some manner of these burdensome conditions, is worthy of serious consideration.

The cost of coal in Nova Scotia is too high. When the Dominion Coal Company was organized, one of the great advantages promised was to be a reduction in costs. The consolidation of all the active collieries in Cape Breton, with one exception, was to result, we were told, in the lessening of general expenses in management and sales; and by the introduction of new machinery, great economies were to be effected in coal cutting and surface handling. Neither one nor other of these desirable results has been achieved, but we are informed upon good authority that costs are now twenty-five to thirty per cent. higher than what they were when collieries were operated by the original owners. The Maritime Record has estimated that in Cumberland County the leading colliery's costs are approximately two dollars a ton on coal shipped, but this is quite conceivable, for the same authority has stated that the average wages of coal hewers is $3.06 a day.

It is evident, therefore, that Nova Scotia coal cannot be delivered in this Ontario market and compete with Ohio coal, even with the advantage of sixty cents a ton protective duty. The Engineering and Mining Journal quotes 95c. to $1 at Ohio collieries for run-of-mine. Moreover for steam purposes Nova Scotia coal is not regarded of equal grade, but for gas-producing purposes it is better suited. Extended markets are not to be obtained by relying upon protective duties or Government assistance, but rather by improved methods and reduction of costs in every possible way.

⁂

TROPICAL PRODUCTS AND BRITISH CROWN COLONIES.

We often hear of the Crown Colonies of Great Britain, without taking pains to ascertain what or where these colonies are. Some day soon we purpose giving a list of them, and some statistics about them; but meanwhile intend only to notice an illuminative paper read before the Royal Colonial Institute in London on 14th March, entitled, "The Crown Colonies and Places." The author is Sir Charles Bruce, G.C.M.G., an old and able servant of the crown, who after being librarian of the British Museum, held important posts in British Guiana and in the Mauritius. He shows at great length—the paper occupies 43 pages of the Journal of the Institute—what the effect of British colonial policy has thus far been; the extent and variety of climate of the crown colonies; "of what good are they?" and how shall we treat them to accomplish their best development?

These crown colonies are scattered literally all over the world, from Ceylon and Hong Kong in Asia, to Gambia and Mauritius in Africa, to Honduras and the West India Islands in America, Fiji and New Guinea in Australasia. They comprise, besides the 2,334,000 square miles of territory in Africa, 125,987 miles in Asia, 116,650 in America, 97,975 in Australasia, 3,702 in Europe—a total of 2,678,330 square miles with a population apart altogether from Canada, India, and Australia proper of more than thirty-six millions. A great deal of this enormous territory lies within the tropics; and as a vast share of the products of the earth used for foods or the raw materials of manufacture come from the tropics, it is the object of Sir Charles Bruce and the able men who commented upon his lecture to get British public men and capitalists to develop cultivation in these vast districts to the best advantage, and to enhance the resources of the British Empire.

We proceed to give, in a desultory way, not having room for the extended arguments advanced, some kernels of fact from the paper as well as from the discussion which it evoked. Sugar is an article of tropical produce of enormous consumption, which is increasing yearly. More of it can be grown in tropical Britain. The world's consumption of cocoa rose from 64,507,000 kilos (142,000,000 pounds) in 1894 to 127,355,000 kilos (280,181,000 pounds) in 1903 practically doubled. Consider the importance of cotton, in which it is said ten millions of the population of Great Britain are directly or indirectly interested. Sir Charles goes so far as to say that "it seems to be certain that under a proper system of organization British colonies and protectorates can produce all the cotton required to afford the United Kingdom an adequate and stable supply." Another tropical product of very marked importance is rubber, the variety of uses for which in commerce and the arts is growing at a great rate. British people at home and abroad have been experimenting with rubber planting. Sir W. Thistleton-Dyer said at this meeting that as long ago as 1876 he brought the first Para rubber plants from Brazil to Ceylon and Singapore; and "already it has been shown that the rubber tree will grow on the Gold Coast of Africa with as much facility as in Brazil." And the important fact was communicated by Prof. Wyndham Dunstan that Para rubber seeds have been sent for examination to Kew Gardens and the Imperial Institute, and found to contain 40 per cent. of oil which promises to be of much commercial value. By the way, it is a circumstance worthy of notice that there are about 160 men from Kew Botanical Gardens serving in four distant quarters of the world as curators, experimenters, etc. So that England cannot be said to have done or to be doing nothing towards increasing the products of the soil in her dominions.

Stress was laid by one of the gentlemen present at the meeting, Mr. Benjamin Kidd, upon the fact brought out in the paper that all the great self-governing colonies of Britain are in the temperate regions while the crown colonies are in the tropics. And, added Mr. Kidd, the natural channels of trade in the world are between the tropics and the temperate regions. Referring to tropical products, this speaker mentioned cotton, tea, cocoa, india rubber, rice, sugar, tobacco, maize, fruits, oils; while those countries have also hides, gold and other metals. He insisted upon the vital importance the tropics are going to possess in the future, and consequently the important part the crown colonies will play. Referring to rice, so largely grown in India, "a third of the human race at present live upon rice." And Sir W. H. Treacher made it known that the Federated Malay States, which grow rubber largely, yield seven-tenths of the metallic tin produced in the world.

Passing by, regretfully, the fiscal considerations mentioned in the discussion and some suggestions as to labor in the tropics, we have only space to-day to mention what was said, among other sensible things, by the chairman of the evening, the Duke of Marlborough. "Turning to the question of health, it is clearly impossible to develop our tropical and sub-tropical colonies as we could wish unless we remove the disabilities which till recently have existed in the shape of malaria and other tropical illnesses. * * * * The London and the Liverpool schools of Tropical Medicine have done much to mitigate the terrible diseases which lay low so many of our countrymen in the West African colonies." The Duke, who is colonial under-secretary in the present cabinet, expressed his resolve to encourage industrial and technical, not merely clerical, training among the natives of crown colonies—agriculture and manual training is what they want, not to be taught to be clerks or teachers. And he paid warm tribute to the services of Sir Daniel Morris in this direction in the West Indies. Britain wants, said he, just such another man to give advice to the cotton experts now planting in West Africa; "to place at the disposal of those developing that and other countries the benefits of experience and scientific research. It is by the combination of these two kinds of knowledge, the scientific and the practical, that we are likely to achieve the most successful and fruitful result."

* * *

INSURANCE IN CANADA.

On Monday evening last was laid upon the table of the House of Commons at Ottawa an abstract of insurance business done in Canada last year. According to a telegraphed summary of fire business the total fire insurance in all companies is $1,218,853,253; the premiums received during the year were $13,174,819, and the losses paid $14,111,200, a showing anything but favorable to the companies, since the outgo exceeds the income by nearly a million. But then it was a conflagration year, as the Baltimore, Rochester, and Toronto fires attest.

The Canadian fire underwriting companies received a total of $2,688,703 in premiums, and paid out $2,581,200 in losses. Thirteen United States companies received $2,144,941 in premiums and paid out $2,365,140 in losses, a loss of $220,199,000. Twenty-nine British companies received $8,341,175 in premiums and paid out $9,164,855, a loss of $823,680 on the year.

In life underwriting the results of 1904 are much more pleasing to contemplate. The gain on the new business of 1904 as compared with 1903 is equal to about seven per cent. The business written last year was $98,306,102 as compared with $91,567,000 in the previous year. The aggregate of insurance in force in 1903 was $548,443,000, while last year it totalled up $587,873,767, an increase of $39,430,707. The total premiums received were $19,969,324, an increase of $1,729,059. The claims paid, including matured endowments, totalled $8,518,839. Such figures—which we give in advance of the receipt of the summary itself, for we write on Wednesday—are evidence of the steady growth of the life assurance habit on the part of Canadians. They prove that our people are as awake as the rest of the world to the advantage of life assurance.

* * *

TORONTO'S GREAT CONFLAGRATION.

Wednesday last, the 19th of April, was the first anniversary of the great conflagration in which so great a proportion of Toronto's wholesale business section was destroyed. The energy with which the city's merchants took hold of the situation at that time, indeed, long before the embers of that destructive fire were cold, has had its results, and now, it may be said that, with the exception of the tract of land covered with brick and mortar ruins on the south side of Front Street, which after long and exasperating delay, was expropriated for railroad use, the devastated area has been practically rebuilt. A pleasing feature in this connection which strikes the eye, is the superiority of the new buildings to the old. And this is even more strikingly the case in the interiors than on the exteriors, owing to the very sensible desire of the owners to have a property which will be something of a good insurance risk, and not liable to be swept away like a pack of cards. Whether all the buildings which have been erected are of such a fire-proof nature as intended is another point of view into which we need not enter at this writing. There are some cheap structures, but for the most part the new buildings are worthy ones.

A walk through the burnt district to-day reveals a very large number of reconstructed, or rather absolutely new buildings. Along Wellington West from Bay Street, close by where the fire began, one notes the Empire block, a handsome $100,000 building, occupied by E. & S. Currie. The corner of Bay and Wellington is occupied as of yore, by the W. R. Brock Co., but on a much larger and more substantial scale, erected indeed with skill and forethought. Other buildings are for Brown Bros., Suckling's, A. Ansley & Co., Goulding Co., J. W. Cowan Co. Going eastward, there is the four-storey building of Kilgour Bros., an excellent piece of work, and one for A. Bradshaw & Sons. On Front Street, west of Bay, two publishers' buildings are noticed, those of W. J. Gage & Co., and Copp, Clark & Co., which are not only handsome but durable. On Bay between King and Front, not very much vacant space is left. New buildings include those for Jessop & Sons, Westwood & Co., Mark Fisher & Co., E. J. Dignum, Gordon Mackay & Co. The last-mentioned is a good specimen of substantial construction. A. A. Allan & Co.'s new fur warehouse will be ready for occupation in a few weeks, and nothing stronger or more fire-defying can easily be found. The Merchants' Dyeing & Finishing Co. have built a very sensible row on York Street. H. S. Howland Sons & Co. have a fine edifice on Front Street West. The Office Specialty Mfg. Co.'s new premises are an airy delight in themselves. The Merchants' Union Company have practically finished their new premises on Wellington Street West, while Warwick Bros. & Rutter have a new and extensive factory on King West.

It is a tribute to the promptness and enterprise of the proprietors, as well as to the experienced skill of our architects and builders, that the twelve or fourteen acres of commercial Toronto have been so soon covered with generally worthy buildings. We have done better in this respect than Baltimore, which according to a New York insurance journal, has permitted some very unworthy buildings to be erected on its burned area.

* * *

A TRADES' UNION MULCTED IN DAMAGES.

One does not wonder, upon reading the evidence, that Mr. Justice Anglin charged the jury strongly against the defendants in the case of the Gurney Foundry Company versus McGlassan, at St. Catharines, last week. The suit was to recover $5,000 damages each from John A. McGlassan, president, and P. O. Gorman, secretary, of the local Plumbers' and Steamfitters' Association, and from the presidents and secretaries of half a dozen other local unions. Also $10,000 from the unions collectively, and for an injunction to restrain the defendants from further interfering with the company's agents and boycotting the company's goods. It was clearly proven that the Gurney Company's products were boycotted by the unions because the Gurney people had dared to employ non-union men, as well as union men. The company's sales in St. Catharines were, in consequence of this boycott, reduced from $6,000 a year to $1,600. Labor unions elsewhere were also asked to boycott Gurney heating apparatus. Builders were warned that they must not put in Gurney heating furnaces under penalty of being boycotted and having labor troubles of their own. A Toronto steamfitter went to St. Catharines to do some work; he put in a Gurney furnace, went back to Toronto and was fined $25 by his union. Still further, a firm of shoe merchants in St. Catharines were threatened with being placed on an unfair list of the unions if they did not cancel a contract for a Gurney furnace. And, therefore, they cancelled the contract.

Such interferences with the freedom of trade were commented upon by the judge as showing that the labor unions had an iron hand under the pretended velvet glove. They had resolved that the Gurneys must be punished because four years ago they had determined to make theirs an open shop. The jury were out only an hour when they brought in a verdict of $1,500 against the trades unions as a whole. The Gurney Company is to be congratulated on the outcome of this trial, in which both judge and jury showed unmistakably their aversion to such unrighteous and revengeful tactics as those employed by the trades unions. It is made additionally manifest by the evidence in this case that labor unions should be compelled to seek incorporation in order that the public may be protected from their illegal acts. Furthermore, it shows the vileness of the damnable system of boycotting, and every man who loves fair play in business should rejoice to see it crushed out.

⁂

THE TRADE WITH AUSTRALASIA.

It is a very interesting resumé of trade conditions in Victoria, South Australia, West Australia, and Tasmania, which we find in the latest report to the Department of Trade and Commerce, by Mr. D. H. Ross, who is located at Melbourne. Since the first of the year, he says, business throughout the Commonwealth has been upon a satisfactory scale, and the volume of trade done by the large importing houses has been well maintained. Agricultural and dairy produce has been moving freely, and good prices are being realized. The outlook is regarded as much more promising than it was, and a continuance of steady improvement during the next few months seems to be assured. That is to say, this is Mr. Ross's opinion. That of our correspondent in Sydney is much less optimistic, judging from his latest letters to hand.

Comment is made by Mr. Ross on the purchases of Australian butter for Canadian consumption. He says:—"Since the receipt of cable advices that the Continent, United States and Canada are buying Australian butter in London at £5-3-0 ($25.16) per 112 lbs., every effort is being made to increase the exports from Melbourne, and other ports. This business is being fostered by cheap storage freights, which have recently been reduced ¼d. (½ cent) per lb. from principal Australian ports to London. The freights hitherto ruling have been in the vicinity of ¾d. (1½ cents) per lb., and the reduction means an extra profit to the producer. Choice Victorian butter is now selling in London at from 102s. to 104s. ($24.81 to $25.30) per 112 lbs., with a market likely to improve. If the cables are correct it will be interesting to know how much Australian butter is finding its way—owing to the shortage in local supplies—to eastern Canada and the United States. Small quantities have, from time to time, been shipped to Vancouver."

The cargo brought forward by the Canadian-Australian steamers from Vancouver, and delivered in Melbourne in January and February, included 7,435 cases salmon, 509 half barrels salt fish, 45 cases rubber goods, 62 bales rubber hose, 43 packages cottons, 6 cases flannelette, 8 cases shirtings, 7 cases iron chairs, 7 cases bicycle sundries, 9 cases corsets, 8 cases incubators, 9 cases implements, 5 cases fittings, 8 cases heaters, 32 cases paper, 2 cases silk goods, and 33 cases sundries. Vancouver shipments for South Australia, Western Australia and Tasmania are not included in the above list. Some large shipments of Canadian breakfast-foods, says Mr. Ross, are coming forward to Melbourne, Adelaide, and other Australian ports. The local agents have taken hold of this line with considerable energy, and an increasing trade is looked for.

⁂

AN ADVANCED SETTLEMENT SCHEME.

There is no doubt that the rapid settling up of Northern Ontario will be of vital importance to the future commercial position of old Ontario. Almost any thing in reason, therefore, is likely to be taken into favor that promises some ready means for the carrying out of that object. The Sault Ste. Marie Board of Trade fully recognizes the importance of the objects involved, and is ready to go or rather to recommend great lengths in order to attain them. It proposes that the Ontario and Dominion Governments should aid bona-fide settlers of British origin by granting them a loan of $1,000 each, to be advanced from time to time according as the clearing of lands proceeds, to be repaid, with interest at 5 per cent. per annum, within ten years. The great clay belt of Northern Ontario contains, we understand, over 16,000,000 acres of land, ten times as much as is under wheat in the whole Province now, and this great area, with the completion of the proposed new railways, will be rendered accessible to the general settler. Some plan to bring the land and the settler together will meet with ready sympathy, for it is becoming understood what an enormous deal depends upon the populating of Canada with the right sort of men and women.

⁂

—Two hundred and fourteen millions of dollars is a tolerable sum for Canada to have expended on railways and canals in the last thirty years. From a return laid before Parliament a week ago we learn that this aggregate has been spent since 1873, up to February, 1905, in the manner following: Building and equipping railways, $88,310,791; subsidizing railways, $59,287,995; constructing and equipping canals, $66,966,699. The total of these reaches $214,565,485. The following areas of land have been granted as subsidies for railway construction:—Ontario, 4,551,747 acres; Manitoba, 9,124,524 acres; North-West Territories, 13,970,076 acres; British Columbia, 12,923,007 acres. Total, 30,569,345 acres. And there is still some land to spare.

TORONTO INSURANCE INSTITUTE.

The annual examinations of the Insurance Institute of Toronto will commence on the 25th of the present month, and will continue until the 29th. It is understood that some fifty candidates have sent in their names for these examinations—an indication of the excellent educational work which this Institute is doing amongst the insurance clerks of this city. It is only some four or five years ago since the Institute was founded, and already it has thoroughly justified its existence by the very valuable papers which its members have contributed, by the excellent educational course laid down, and the annual examinations.

⁂

ACTUARIAL EXAMINATIONS.

The annual examinations of candidates for the Institute of Actuaries of Great Britain were held in Montreal, Ottawa and Toronto on the 14th, 15th and 17th instant, under the supervision of T. B. Macaulay, F.I.A., A. K. Blackadar, F.I.A., and T. Bradshaw, F.I.A. In Toronto twenty-seven students presented themselves, a larger number than it is believed ever came up at this centre before. The examinations in Part II. and Part III. occupied three sessions of three hours each, instead of two sessions of four hours each as heretofore, the same number of questions, however, being proposed. The papers were prepared under the supervision of the Council of the Institute in London, England, and the sealed answers were despatched to that body for examination. The results will be known probably towards the close of June.

⁂

PHOENIX ASSURANCE COMPANY, LIMITED.

This staunch British company, which has been doing business in Canada for a century, has recently issued its 122nd annual report. The size of the totals, which are given in pounds sterling, not dollars, illustrate the great dimensions its business has attained. In 1904 the company took in premiums £1,448,370, and paid out in losses and expenses £1,442,646—an experience very unusual as far as losses go, and caused mainly by the great fires at Baltimore and Toronto in that year. The result of the year's working, including interest, provision for unexpired risks, and balance brought forward from the last account, and allowing for interim dividend, leaves a balance at the credit of profit and loss of £229,608, out of which the directors propose a final dividend of 23s. per share, to be paid on April 29th, making 35s. per share for the year. The financial position of the company on December 31st last year was as under: Capital paid up, £268,880; reserve for unexpired risks, £579,428; investment reserve, £35,415; general reserve fund, £648,790; balance at credit of profit and loss account, £229,608. The capital subscribed but not called up amounts to £2,419,920, or more than one hundred and twenty millions of dollars.

⁂

FIRE INSURANCE MATTERS.

A pleasing circumstance came to our knowledge a few days ago concerning the retirement of Mr. R. N. Gooch from the agency in Toronto of the North British & Mercantile Insurance Company. The Canadian manager of that office, Mr. Randall Davidson, Mr. H. W. Evans, the former partner of Mr. Gooch, and Mr. Macdonald, the secretary, united to present Mr. Gooch with a handsome loving cup. It is not only a beautiful piece of work, artistically considered, but it is a happy voucher for the regard entertained for the recipient by those with whom he had for years been most closely associated.

An insurance manager in Montreal, in acknowledging receipt of some slips sent him from this office containing our list of conflagrations, recently copied into the Gazette, says: "I beg to thank you for your letter, and also printed slips under separate cover giving a detail of important conflagrations during the century. It is a startling list, and will, as you say, be rather surprising information to even intelligent people, who have a faculty of not remembering the many disastrous catastrophes that have occurred on this continent. Such people are, however, ever ready to blame the underwriters for charging what they please to term exorbitant rates intended to cover this very hazard."

⁂

LIFE ASSURANCE MATTERS.

Preparation for contingencies lessens the effect of any hardships that may come. Imitate the foresight of the Japanese. Carry life insurance for emergency's sake and misfortune's necessity.—Union Mutual.

In the month of March the Montreal branch of the New York Life Insurance Company wrote $465,000 of insurance. This speaks well for the agents. The record above noted was made in the company's diamond jubilee contest.

Two papers were read before the Institute of Actuaries of Great Britain in London, England, on the 17th inst., the first, "Social Conditions Affecting Widows' and Orphans' Pension Funds," by Mr. S. J. H. W. Allin, F.I.A., of the Mutual Life Insurance Company of New York; the second, "On the Importance and Practicability of a Standard Classification of Impaired Lives," by S. W. Carruthers, M.D., medical officer of the Mutual Life Insurance Company of New York. Both are practical papers, and will be read with much interest by members of the profession.

Everyone who knew him sorrows for the death of Bloomfield J. Miller, the accomplished and kindly vice-president and actuary of the Mutual Benefit Life. He was born in Newark, N.J., in 1849. Entering the service of the Mutual Benefit Life in 1867 when seventeen years of age, he continued with the company up to the time of his death, advancing steadily in its service from a junior clerkship to its vice-presidency.

At Ottawa last week the bill to incorporate the Western Life Insurance Company was again taken up for consideration by the Committee on Banking and Finance. Provision is made that the holders shall elect a certain number of directors. There was a difference of view as to whether the policy-holders' directors should be shareholders. It was decided that the policy-holders' choice should not be limited. The bill was then ordered to be reported.

A competition was instituted by the Travelers Insurance Company, of Hartford, in January, to last six months, to see what agent should secure most business, paid up. This competition is now more than half over, and from the company's published records of the 10th of April it appears that the lead for Canada is held by Messrs. Lukis, Stewart & Co., of this city, who are agents for the Travelers in Montreal.

It is interesting to learn, from a letter written to the editor of Life Echoes, the Canada Life's monthly, that attention paid to small policies may be just as well expended as to large ones. Here is the experience of Mr. G. W. Ames, of Wiarton, in this direction: "Dear Sir,—Having been successful in winning the gold watch in Class 1, offered for competition by Mr. H. E. Gates, it may be of interest to you to learn that of the amount written by me 55 per cent. of the applications were for $1,000 each, thus demonstrating that it does not do to neglect the small assurer. I have also found for years past that the intelligent, systematic distribution of Life Echoes and other literature sent out by the company has a good educative effect, my plan being to read carefully everything of this nature received, and to mark in blue pencil anything which I think will appeal most strongly to the prospective assurer. Another thing which assists very much in conserving old business and aids in getting new, is taking time to give old policy-holders all the information desired as to their own policies and the position and prospects of the company."

In France, remarkable progress has been made in the last few years as regards mutual insurance against the mortality of cattle. The Government of that country has given subventions to agricultural mutual insurance companies. Without doubt, however, the most remarkable progress has been made during the last three years (1902-1905), due to the efforts of the Minister of Agriculture, who has spared no pains in developing agricultural insurance. For example: Upon December 31, 1897, there were about 1,484 agricultural mutual insurance companies in France; in 1898, however, 110 more sprang into being; in 1899, 341; and in the next five years 2,825. So that, says the Insurance Record, there were no fewer than 4,820 combinations on October 31, 1904, insuring a capital of 250,048,217 francs, against 69,971,253 francs at December 31, 1897. These combines are divided as follows: Against mortality of cattle, 4,719; against hail, 16; against fire, 83; against accidents, 2. These 4,820 associations represented, at October 31, 1904, a personnel of 265,015 members as against 117,862 at December 31, 1897.

* * *

WESTERN BANK OF CANADA.

Several years ago we had occasion to remark of the conduct of this bank that modest and steady progress characterized it, and that its affairs had been consistently looked after. This may still be said. The bank has now held its twenty-third yearly meeting. The assets have risen to $5,162,653, and the net earnings to $78,836, which is equal to more than 16 per cent. on the average capital. Out of these earnings $32,500 has been carried to rest account, and $15,297 carried forward. The rest amounts now to $250,000, which is equal to one-half the paid capital, a gratifying fact and one which has an immediate bearing upon its earning power. Circulation increased $34,640 in the year, and deposits are swelled to $3,800,000. Out of total assets of $5,162,000, those immediately available amount to $1,928,208, and the current discounts are $3,128,041. The losses of the bank, the report tells us, were small, and its position, we infer, is a comfortable one.

* * *

CANADIAN WOODS IN BRITAIN.

Among the most important avenues of information upon the condition of the market for Canadian woods in the United Kingdom is the monthly circular of Farnworth & Jardine, of Liverpool. Their 1st April letter tells us that the arrivals of wood-laden vessels at that port in March were 7,770 tons' register, which is much less than in the preceding March; and the aggregate tonnage from Canada for the three months of 1905 was 67,979 tons, as compared with 70,693 tons. for the like period of 1904.

Business during March was generally quiet. Enquiry for almost all sorts was slack, and the sales disappointing. Stocks at that port are, as a rule, moderate and values steady, with, however, "an upward tendency for some of the leading articles." For Canadian waney pine timber the enquiry has been slow, stocks being ample and values unchanged; square is lax of movement, and prices much as before. Very limited enquiry exists for red pine, which is light supply. Oak logs were dull and weaker, with stocks light. For elm, there was fair enquiry, and stocks small; values rule high. Pine Deals.—There has been no import, the demand continues slow, but partly owing to auction sales of salvage stock, etc., the deliveries show some improvement; stocks are still too large; there is little change in value to report. Red Pine Deals.—Dull demand, stocks ample; values rule low.

Of New Brunswick and Nova Scotia spruce and pine deals, the import to Liverpool and Manchester Canal during the past month was about the same as that of the previous month, viz., 3,520 standards, against 3,350 standards for February; the deliveries have been steady and stocks are now reduced to a moderate compass. There has been more enquiry and recent arrivals by the liners have realized better prices. Pine deals are very dull of sale and stocks are too large.

The import of birch logs has been chiefly from St. John, N.B.; there has been more enquiry and stocks are light; values are firmer. Planks have arrived more freely, but go largely direct into consumption; the stock is still moderate and values rule steady.

Turning to pitch pine from the United States, the arrivals during the past month have been nine vessels, 8,121 tons, against two vessels, 1,115 tons, during the same period last year. Hewn.—The import has been light; moderate consumption and first-class wood continues in fair demand. Sawn has been imported freely; the stock has increased somewhat, but is still moderate; values are maintained. Deals and boards have been imported on a large scale; the stock is heavy.

No arrivals are recorded of British Columbian and Oregon pine. The deliveries have been fair, but stocks are large; prices steady.

* * *

FOR GROCERS AND PROVISION DEALERS.

Mr. A. W. Donly, Canadian commercial agent in Mexico, points out the good market which exists in that country for Canadian winter apples, when properly selected and packed. Each fruit should be wrapped separately in tissue paper.

The Ottawa Cold Stores, Limited, is the name of a company which has just received an Ontario charter authorizing it to do business as refrigerators, wharfingers, forwarding agents, etc., and to produce, buy and deal in dairy products, etc. W. E. and A. E. Matthews, J. Angus Macpherson, all of Ottawa, are prominent members of the concern.

A company has been organized by F. Talcott, S. E. Masten and others, of Bloomfield, Ont., under the name of the Farmers' Canning Company, of Bloomfield, Ont., to can fruit, vegetables, poultry, etc., manufacture jam, pickles, etc., dry and evaporate all kinds of fruit and vegetables, to cultivate and produce such commodities, and carry on a cold storage and warehouse business.

* * *

DRY GOODS NOTES.

The woolen mills of J. Walshaw & Son at Bolton, Ont., were on the 16th inst. totally destroyed by fire. The loss is estimated at between $40,000 and $50,000, covered by insurance.

Mr. D. F. Smith, secretary-treasurer of the Montreal Cotton Company, died in Valleyfield, Que., on the 16th after an illness of only a few days. He had occupied the position for many years.

The Victoria Clothing and Overall Company, of Victoriaville, Que., capital stock $40,000, has received letters of incorporation from the Quebec Legislature. It will make and deal in tweed and cotton goods. P. Tourigny and C. Thibault, both of Victoriaville, are charter members.

Business in the Belfast linen market shows steady improvement, and there is a somewhat increased demand for most classes of goods. Rates continue much as before. Shipping trade shows an increase. There is a substantial improvement in the orders from the United States. Canadian trade is expanding, Australasian demand is fair, and continental business quiet. Business on home account is hardly up to the mark.

The Lancashire cotton mill owners have agreed to an advance in wages at the rate of 5 per cent., to take effect after July 8th. The leaders of the operatives, who represented fully 300.000 work people, contended that the prosperity existing in the cotton manufacturing trade at the present time justified them in asking for the advance, and they pointed out that contracts for the delivery of goods at future dates had been made on the basis that an advance would be granted. The employers did not deny that considerable improvement in trade had taken place since the new crop came in, but urged that the application was premature, and that heavy losses had to be recovered. After a long deliberation the advance mentioned above was agreed to, with an understanding that the question of a further advance of 2½ per cent. would be considered in January next.

As regards the raw silk market, weakness has developed to a certain extent in the market, especially in Yokohama, where prices are materially lower than last quoted. The prospect, however, of any further decline seems to be offset by the fact that comparatively small supplies of silk of inferior quality are held in primary markets. A certain amount of new silk is available, but it is evident that dealers are not prepared to commence negotiations on the new crop at present prices. From all advices which can be obtained it is evident that when new silk comes on the market the ideas of reelers will be substantially higher than at the present, based on old silk of indifferent quality.—Dry Goods Economist.

The New York Dry Goods Economist says that a fair demand continues on general lines of both coarse and fine counts, and the indifference of spinners to offers in the slightest degree below the market is a feature of the situation which is of continued importance. Dealers admit it is very difficult to secure many counts, especially for early delivery, and those numbers which are in special demand are not to be had for some time to come. The raw material situation gives added strength to the contention of the spinners to hold for higher prices, and in certain instances this determination has resulted in securing higher levels, especially where early deliveries are wanted. There continues to be more or less discrepancy in the matter of quotations.

* * *

In the last eleven years there have been 17,461 post-office burglaries in the United States, an average of 1,572 per month, or more than fifty every day.

* * *

—Mr. J. D. Allan, president of the Toronto Board of Trade, and a gentleman who knows probably more about Russia than anyone else in Canada, will deliver an address on the industrial expansion of that country before the Peterborough Board of Trade on the 9th prox.

* * *

The voluntary retirement of Mr. Daniel Miller from the management of the Toronto branch of the Merchants Bank of Canada has become public. Mr. Miller, who has been in the employ of the Merchants for thirty-seven years, came to Canada in 1866 from Gloucestershire, England, and two years later joined the staff of the Merchants Bank in Toronto, and since then has been constantly in its employ. After serving in various staff positions in the Galt and Montreal offices, he became manager of the branch at Lindsay, and subsequently at Ingersoll, Owen Sound and Winnipeg, in which last-named place he served nine years. In 1898 he came back to Toronto as manager here. Mr. Miller is a careful and experienced banker, and stands high in the estimation of all who know him. His successor, so far as we are aware, has not been chosen.

* * *

WESTERN BANK OF CANADA.

The twenty-third annual meeting of the shareholders of the Western Bank of Canada was held at the head office of the bank, Oshawa, on Wednesday, April 12th, 1905.

The following shareholders were present: John Cowan, W. F. Cowan, J. A. Gibson, R. S. Hamlin, C. W. Scott, Thos. Miller, Dr. McIntosh, Thos. Paterson, W. W. Tamblyn, R. Foster, W. H. Williams, T. H. McMillan, Hy. Swan, Jno. McLaughlin, and others.

The president occupied the chair, and Mr. T. H. McMillan acted as secretary to the meeting.

The following report and statement were submitted:

Report.

The directors have pleasure in submitting the twenty-third annual report for the year ending on the 28th of February, 1905.

The business of the bank has continued active and progressive. The net profits of the year have amounted to $78,836.36, or about 16¼ per cent. upon the average paid-up capital of the bank, which, added to the balance carried forward from the previous year of $2,887.70, amounts to $81,724.06.

Out of this sum two half-yearly dividends of 3½ per cent. each have been paid, absorbing $33,924.81; $32,500 carried to the Rest account, and $15,299.25 carried forward to the credit of profit and loss.

The deposits of the bank have increased $527 032.25, and the circulation $34,640, and the gross assets $718,148.85 over the previous year. The losses of the year were small.

The Rest account of the bank now stands at $250,000, which is equal to 50 per cent. of the paid-up capital.

The agencies of the bank have been recently inspected, and were found in a satisfactory condition.

John Cowan,
President.

Oshawa, April 12th, 1905.

STATEMENT OF PROFITS FOR THE YEAR ENDING 28th OF FEBRUARY, 1905.

Balance at credit of profit and loss account on the 28th of Feb., 1904	$2,887 70
Net profits of the year	78,836 36
	$81,724 06
To dividend, No. 44	$16,424 81
To dividend, No. 45	17,500 00
Transferred to Rest account	32,500 00
Carried to credit of profit and loss account	15,299 25
	$81,724 06

STATEMENT OF ASSETS AND LIABILITIES ON THE 28th DAY OF FEBRUARY, 1905.

Liabilities.

Capital account	$ 500,000 00
Rest account	250,000 00
Notes in circulation	441,875 00
Deposits with interest	3,868,669 69
Due to dividend No. 45	17,500 00
Due to Royal Bank of Scotland	69,309 74
Profit and loss account	15,299 25
	$5,162,653 68

Assets.

Specie	$ 33 337 53
Legals	26,548 00
Notes and cheques of other banks	36,535 66
Due from other banks in Canada	960,027 03
Due from banks in foreign countries	19,138 34
Deposit with Dominion Government to secure note circulation	22,304 81
Dominion, provincial, municipal and other debentures	830,316 94
Assets readily convertible	$1,928,208 31
Bills discounted current	3,128,041 08
Past due bills (fully secured)	36,474 81
Real estate	12,085 44
Mortgages on real estate	12,368 15
Banking premises	25,878 84
Office, safes and furniture	19,597 05
	$5,162,653 68

T. H. McMillan, Cashier.

It was moved by the chairman, and seconded by Mr. Hamlin, that the report as read be adopted, printed and circulated among the shareholders. Carried.

Mr. Foster, seconded by Mr. Swan, moved that the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors of the bank for the manner in which they have conducted the affairs of the bank during the past year. Carried.

Mr. W. W. Tamblyn, seconded by Mr. Miller, moved that the thanks of the shareholders be given to the cashier and other officers of the bank for their attention to the interests of the bank. Carried.

Dr. McIntosh, seconded by Mr. Gibson, moved that this meeting do now proceed to elect, by ballot, seven directors to fill the place of those retiring, and that Messrs. C. W. Scott and John McLaughlin be scrutineers for said election, and that the poll remain open for one hour to receive the votes of the shareholders, but that should five minutes elapse at any time without a vote being taken, the poll shall be declared closed, and that the scrutineers be paid $4 each for their services. Carried.

The scrutineers reported the following gentlemen as having received the unanimous vote of the shareholders, viz.: John Cowan, Esq.; R. S. Hamlin, Esq.; W. F. Cowan, Esq.; Dr. McIntosh, W. F. Allen, Esq.; T. Paterson, Esq., and J. A. Gibson, who were duly elected directors for the ensuing year. A vote of thanks was then tendered to the chairman for his able conduct in the chair, and the meeting then adjourned.

At a subsequent meeting of the new board, John Cowan, Esq., was unanimously elected president, and R. S. Hamlin, Esq., vice-president.

NORTH BRITISH AND MERCANTILE FIRE.

In the course of thirty-three years there has been paid out by one fire insurance company for conflagration losses in America $6,715,786. This company is the North British and Mercantile. The list of these fires given below includes Chicago, St. John, Baltimore and Toronto; and it is noticeable that besides paying losses of more than two millions of dollars to the Chicago sufferers this company subscribed a thousand pounds in cash for their relief. At the time of the Ottawa and Hull fire, five years ago, the company gave $2,500 to the sufferers:

N. B. & M. Co.'s Losses in Conflagrations.

Fire	1871	$2,330,000	Losses paid in Chicago.
			($5,000 subscribed to sufferers).
"	1872	742,000	Losses paid in Boston.
"	1877	940,000	" " St. John, N.B.
"	1892	208,921	" " St. John, Nfld.
"	1895	50,000	" " Toronto.
"	1897	55,779	" " Windsor, N.S.
"	1898	78,180	" " New Westminster, B.C.
"	1899	17,000	" " St. Raymond, P.Q.
"	1900	259,906	" " Ottawa and Hull.
			($2,500 subscribed to sufferers.)
"	1901	620,000	Losses paid in Montreal.
"	1902	13,000	" " St. Hyacinthe, P.Q.
"	1903	30,000	" " Ottawa.
"	1904	1,000,000	" " Baltimore.
"	1904	377,000	" " Toronto.

There were other minor conflagrations in towns of Bathurst, N.B., Casselman, Buckingham, Garthby, and South Indian, P.Q., Shediac and Buctouche, N.B. This old company is able to boast that it has paid, since its founding a hundred years ago, $120,000.000 for losses. It has been enabled to meet its obligations by reason of the financial reserves built up out of business spread over the greater part of the world.

BOOKS RECEIVED.

Trust Companies.—We acknowledge, with thanks, the receipt of a publication of over a hundred pages, entitled: "Advantages of the Trust Company," with especial reference to the Union Trust Company, of Detroit, Mich. The book is by no means a mere write-up for this enterprising concern, as may be judged from the chapter-headings of some of the subjects treated, which are as follows. The Scope of the Trust Company, Investments in Bonds, Administration of Estates, Making a Will, Of Guardians, Abstracts of Title and Policies of Guaranty, and all these subjects, so far as we can judge, are treated of intelligently and fairly. A great many people, at one time or another in their lives, have property, large or small, which they wish to have cared for in an efficient manner. A trust company's efficiency and its superiority to personal trusteeship or executorship needs no argument. This book aims to give information as to the way in which such important functions are carried on. The Union Trust Company's pamphlet is an admirable piece of book-making; so well does the clear type suit the beautiful paper that it lures one to read.

⁂

PROVIDENT SAVINGS LIFE ASSURANCE SOCIETY.

This society was founded thirty years ago, and has built up a large business. Its last annual statement exhibits total assets of $8,037,404. The income from premiums last year was $3,659,297; and from all other sources, $712,423; a total of $4,371,721. During the same twelve months of 1904 the Provident Savings Society paid to policyholders for death claims, matured endowments and annuities, $1,470,953; for surrender values, $240,103, and in dividends and various other payments, $269,172. Its insurance in force was slightly more than one hundred million dollars, in 44,817 policies. Since organization the Provident Savings has, we are told, returned

---

The Third Annual Meeting

of the Shareholders of

The Henderson Roller Bearing Manufacturing Co.

LIMITED

The above meeting was held in Lodge Room No. 2, in the Temple Building on Wednesday, the 12th inst., at two o'clock.

Upwards of one hundred shareholders were present, and a most enthusiastic and satisfactory meeting was held.

The report of the Directors was presented by the President, Mr. Albert Ogden.

The Financial Report was read by Mr. R. I. Henderson, the Manager.

In moving the adoption of the combined reports, Mr. Albert Ogden, in a pointed and practical address, set forth the progress and prospects of the Company in a manner which proved to be very satisfactory to the shareholders.

Dr. A. D. Watson, Vice-President, seconded the resolution in an address which showed his thorough, practical knowledge of the affairs of the Company and the hopeful outlook for the future.

Many of the shareholders, for the purpose of gaining information, availed themselves of the privilege of asking questions, which added very much to the interest of the meeting, and the answers which were given by the President, the Secretary, and the Manager were perfectly satisfactory to the shareholders. The report was then unanimously adopted.

A resolution of the shareholders was unanimously carried, expressing appreciation of the board, and many complimentary remarks were made concerning the past, and bright hopes expressed with reference to the future.

The Honorable A. G. Blair, the General Counsel and Managing Director of the Toronto Roller Bearing Company, Limited, who is also a shareholder in the Henderson Roller Bearing Manufacturing Company, Limited, was very cordially received by the shareholders, and in a forceful and practical address emphasized the great value of the bearings in connection with both steam and electric railways, as well as for all other forms of journals.

He complimented the company on the magnificent progress that had been made in the introduction of the bearings in the various lines in which they are being used, and in this connection referred to the difficulties experienced by Westinghouse in having his appliance introduced on the railways, but now all over the continent the Westinghouse air brakes were in use.

He made particular reference to visits which he had made to Montreal and Chicago in connection with the application of the bearings to the leading railroads, and stated that the highest officials and the chief mechanical authorities had stated that the HENDERSON ROLLER BEARING was the best that has ever come under their observation, and were willing in each case to prove its merits on their system. He expressed his unqualified confidence in the merits of the bearings, and his belief that the future was full of promise for the Company.

The following Directors were elected on ballot being taken: Albert Ogden, Toronto; A. D. Watson, Toronto; D. B. Simpson, K.C., Bowmanville; A. E. Henderson, Toronto; R. I. Henderson, Toronto; R. J. Whitla, Winnipeg; John Ferguson, Toronto; E. Lemon, Owen Sound; Hugh Waddell, Peterborough. Whitford Vandusen, Toronto Junction; John L. Gibb, St. Catharines; William Breese, Chatsworth; Hugh John Macdonald, Winnipeg; G. F. Marter, Toronto.

Immediately at the close of the shareholders' meeting the Directors met for organization, when the following officers were appointed: President, Albert Ogden; 1st Vice-President, A. D. Watson; 2nd Vice-President, D. B. Simpson, K.C.; Secretary and Treasurer, A. E. Henderson; Manager, R. I. Henderson.

to its policyholders or now holds for their benefit over $32,000,000.

These figures show that the business of the company is a sound as well as a large one. The career of the Provident Life has been creditable, and it has been the means of introducing forms of policy and other novel features which have with the lapse of years become familiar. The president, Mr. Scott, has shown unusual tact in his position, and is besides imbued with the spirit of work. He and the other officers have got together a field force who have rolled in an aggregate of business to be proud of.

* * *

BANKING AND FINANCIAL.

We are told that the Sovereign Bank of Canada will open a branch in London, Ont., on the 1st of May. Premises on Dundas Street have been secured, and Mr. F. E. Karn, of the Exeter branch, is to be in charge of the branch.

The Bank of Toronto directors will increase the paid-up capital stock $500,000, which will be allotted June 1st to holders of May 31st at a rate of one new to six old at a premium of 100 per cent.

In Three Rivers, Que., an addition is being made to the office of the Hochelaga Bank, which required more room to accommodate its growing business. The building when completed will be much more handsome and convenient.

A somewhat long discussion took place at the capital a week ago, when the Banking and Commerce Committee of the House of Commons considered the bill of the Huron and Erie Loan and Savings Company. The bill proposed to increase the company's powers of borrowing and receiving deposits to the standard of the Ontario law. The bill was amended to preserve the rights of existing debenture holders.

There are stirrings here and there, whether on the part of enthusiasts who consider more new banks necessary, or of speculators who think they can always sell a charter if they do not use it, towards the foundation of new Canadian banks. At Ottawa last week the promoters of the Farmers' Bank of Canada asked that the time for its organization to be extended for a year from 18th July. Mr. Fielding, the report says, "seemed unwilling," but the bill giving the time desired was ordered to be reported. But when the bill came up respecting the Northern Bank, and proposing to extend for a year the time for organization, the extension being the second asked for. Mr. Fielding objected to the bill on the ground that it involved a bad principle, and that it was not well to encourage men to seek charters for banks which they had not made arrangements to put into operation. The committee ordered the bill to be reported, but reduced the time in which its provisions could be availed of to six months from June 15th.

Negro Bank a Success.—The first report of the American Trust and Savings Bank, of Jackson, Miss., was recently made public. The bank was opened last October. Every share of the stock is owned by negroes, and every one of the officers and employees is colored. No white man has anything to do with the bank, and the funds deposited therein are the savings of negroes in and about Jackson. In the three months in which the bank has been in operation funds to the amount of $64,000 have been handled. The loan department has been judiciously managed, and as a result the dividend declared for the first quarter amounted to twenty-two per cent. of the capital. The negroes of Jackson are proud of this institution, and the officers report that its establishment caused a large increase in the savings of the members of that race. The officers of the bank are confident that as they have no competition they will be able to increase the percentage of earnings during the next three months.—New York Bankers' Magazine.

In answer to "Telier," London, who asks us for the address of the American Institute of Bank Clerks, we believe New York to be the headquarters. There is a New York Chapter of the Institute, 32 Waverley Place, at the March session of which addresses were given by Thomas F. Woodlock, editor of the "Wall Street Journal," on "Securities, Values and Prices;" by J. C. Martine, of the National City Bank, on "Character of Banking Credit;" by Mellon Wicks, of the Mount Morris Bank, on "The Imperial German Bank;" and by N. D. Alling, of the Nassau Bank, on "Negotiation Paper." This week we learn from the Bankers' Magazine that arrangements are being made for the third annual convention of the American Institute of Bank Clerks to be held in Minneapolis, July 20th to 22nd. A. M. Barrett, of New York, is chairman of the Convention Committee; O. H. Richards, of Minneapolis, chairman of Committee on Speakers; A. H. Cooley, of Hartford, chairman of Committee on Papers; E. E. Kehew, of Pittsburg, chairman of Committee on Programme; G. K. Wadsworth, of Chicago, chairman of Committee on Transportation; F. R. Dooley, of Washington, chairman of Convention Press Committee.

A NEW LIGHT ON LIFE ASSURANCE.

BY A WORKING MAN.

"Not drink, mate! did you say?"

"Yes, Dick, that is what I said."

"But surely, man, you don't mean I should give up drink altogether? It can't harm me. You've known me all my life, and you can't say that you have ever seen me the worse for drink; not you nor any other man, and it's ten years now since I began to take a glass occasionally."

"Quite right; I've never seen you the worse for drink, nor do I think any other man has, but for all that I say stop drinking. You know up to the last five years I had an occasional drink like you; cost me, perhaps, 10s. per week in drink for myself and shouting now and again for a friend. I never noticed that 10s. for I was getting £5 a week. I thought it a very moderate sum to spend on pleasure, but it was this way I came to stop: I have a lot of little ones, you know—eight of them. God bless them and their mother! When there were only five, my wife said to me one night, 'Harry, dear, I wish we could manage to give our boys a good education; but as we have a large family I am afraid we might not manage it.'"

"Well, I got thinking it over in my mind. Roy was five at the time, the twins were three and a half, Jess two, and Ted here was just born. Well, I wanted badly to give the wife a surprise of some sort to please her. I thought, now if I could only manage to do something for the lads' education it will please her more than anything else. Talked it over with a friend, telling him what I would like. 'Well, look here, Harry,' he said, 'there is one good way.' 'Ah, what is that?' 'Well, my way. Insure your life to draw it at forty or forty-five. Give your wife the policy.' 'But, man, if she will have to pay it out of my wages, how will that surprise her?' 'Pay it out of your wages? No, man, no such thing. Do it this way, as I did: drop the drink and tobacco; put that money into your policy.' I thought for a bit. It was not the first time I had thought of the money I wasted in drink and tobacco, but it was hard to stop. I tried to stop, once or twice, when I saw the wife alter a bonnet instead of buying a new one for herself, so that the little ones might have something special. Well, at last I said, 'Dick, you have shown me a good example.' So off we went to the agent who insured him, and I took out a policy for £300, to be drawn at fifty. That is five years ago, and what I spent on drink and tobacco easily paid it. Well, wasn't the

wife happy when I told her; the tears ran down her cheeks for joy. 'Oh, Harry,' she said, 'our children will be able to get a good education now; with what we have saved and with what my father gave me, we shall easily do till the insurance is due; and so now my lads and girls by helping themselves a little can get a first-class education.' Now, my friend, you have listened very carefully to my story, and you know it is true."

"Yes, Harry, you are right. And as I have a young family growing up, I don't think I can do better than follow your example and provide for them in the same way."—Insurance Spectator, London.

* * *

OCEAN, ACCIDENT AND GUARANTEE CORPORATION, LIMITED.

Looking back for a few years, and comparing the 1904 statement of this company with that, say, of 1900, a considerable change is observable, and it is in the main a change for the better. Of course, the totals of the business show growth in some directions, but not in others; this was to be expected, because in part of natural increment. But a large number of employees' liability claims have been settled during the year, as was done the year before, and, while the outgo for this purpose has been great, there is the satisfaction of seeing now a marked reduction of the amount needed to be reserved for claims outstanding. The company has a good advisory board in the Dominion, and we are told that the Canadian business of the company is growing in a satisfactory way.

The company's premium income last year amounted to the large sum of $5,304,485, which was supplemented by $148,000 for interest, dividend, rents, etc. Then there had been brought over from 1903 as a provision for liability on unexpired risks $1,756,000. This liability is reduced per the present statement to $1,725,000. There has been paid out during the year for compensation and incidental expenses, $3,360,810; for management expenses, travelling, etc., $1,161,580; for commissions, $948,985. In the balance sheet the largest item among assets consists of American railway mortgage gold bonds, $1,268,050, next to this being freehold and leasehold premises, $1,104,955; British and colonial railway stocks, colonial stocks, etc., the aggregate being $6,689,945, of which the large sum of $5,263,000 is in the shape of reserves. These figures must prove convincing to the many policyholders of the company.

* * *

EMPLOYMENT AND THE UNIONS.

The annual report of the United States Department of Labor for the year ending September last, which has just been issued, shows a diminution in employment, due partly to lessened industrial activity and partly to the frequency of strikes and lockouts. The proportion of working-time lost during the year was 20 1-5 per cent., compared with 14 per cent. in 1903 and 13 1-5 per cent. in 1902. This is attributed both to a decrease in the number employed and to a reduction in working time for those employed. The latter averaged for the twelve months ending with last September 269 days, against 278 in the previous year, 308 days being reckoned as the full working time of a year. Rates of wages are said to have been "generally maintained in 1904 at the high level they reached in 1903," though a few reductions are reported. Earnings were smaller than for three or four years previous "on account of the increased irregularity of employment." Probably employment would have been less irregular if there had been some concession in wages.

Another point brought out by the report is the decline in the membership of trades unions. There can be little doubt that these bodies are gradually undermining their position with the general public owing to their policy of the "closed shop." In spite of this, the commissioner who prepared the report in question seems to have considerable sympathy with the unionist methods, for he says: "The public has seen (from the experience in the great coal strike)," he says, "that a union shop may be a truly open shop, so long as the union itself is open to all competent workmen, whereas the non-union shop in which every workman is compelled to drive a bargain single-handed with the employer becomes more often than not a sweat-shop." Surely to this, however, may be replied that an open shop is not necessarily opposed to the best traditions of unionism. The unions have still a great work ahead of them in raising the competency of their members, so that to be a member of a union in any trade shall mean extra reliability, and, therefore, a preference on the employer's part as against non-unionists who have no such certificate of merit. This is the only way that, eventually, employers will "recognize" the unions; it is the way, too, in which the public will favor them; and, therefore, is the only way along this line that success can be hoped for by their leaders. It is a pity that the latter are so long in seeing this important point.

* * *

In the month just closed there was a very heavy increase in the record of incorporations in the Eastern States. The capitalization of companies with a capital of $1,000,000 or over amounted to $192,645,000, or $94,000,000 ahead of the February figures, and more than $109,000,000 in excess of the amount in March last year. Three large combinations are included in the returns—the American Smelting Exploration Company with a capital of $49,000,000, organized to absorb all the properties of the Guggenheim Exploration Company and other plants now in process of being acquired; the General Pneumatic Transit Company with $30,000,000, which has for its object the taking over of several kindred concerns, and the Consolidated Lithograph Company with $7,000,000, the so-called Lithograph Trust. The American Ice Securities Company with $20,000,000, which is to acquire the charter and assets of the American Ice Company in line with the reorganization plan, also filed incorporation papers.

* * *

The London Review learns that the Belgian Government has laid before the Parliament of the Grand Duchy of Luxemburg, a draft law to extend to certain specified industries the privileges accorded by the law of April 5th, 1902, as to the compulsory insurance of workmen against accidents. Amongst the trades mentioned are textile manufacturers, paper-making, tanning, lime-kilns, the joinery and wheelwright trades, etc. The extension is to apply to all industrial concerns which are run on profitable lines, though no mention is made as to agriculture or commerce. The insurance contracts now in force can be renounced within the period of one year, an indemnity being granted for those contracts dated prior to January 1st, 1904. The compensation to be paid to the assured is not in any case to exceed 15 per cent. of the value of the annual premiums at the time of their falling due, which must not exceed five years from the time of the taking over of the contracts.

* * *

For the half-year ending December 31st last, the gross receipts of the Grand Trunk Railway amounted to £3,129,814, compared with £3,138,468 for the corresponding half of 1903. The working expenses amounted to £2,205,091, or 70.45 per cent., against £2,214,084, or 70.55 per cent., leaving net traffic receipts of £924,723, against £924,384. The total revenue receipts amounted to £1,031,453, against £1,012,255. After the payment of dividends, already announced, which will be payable on the 28th inst., £6,619 will remain to be carried forward. The passenger receipts increased by £56,234, but general freight and live stock decreased £65,810. Maintenance of way and structures increased £23,358, taxes, £11,842, but maintenance equipment decreased £3,716. The expenditure in conducting transportation, £38,765, and general expenses, £1,712. The actual expenditures on capital account amounted to £239,001, comprising £65,107 for new works, £153,311 for double track, and £20,582 for land purchased. The gross receipts of the Grand Trunk Western amounted to £522,280, a decrease of £58,404. The working expenses amounted to £444,173, a decrease of £54,398, leaving a net profit of £78,107, a decrease of £4,006. After deducting net revenue charges there was a net revenue debit of £4,637, as compared with a credit for 1903 of £2,191.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Calgary and Edmonton Land Company held a meeting in London, Eng., this week and declared a dividend of 2s. 6d. per share. The debenture debt has all been repaid.

Several large freight steamers, controlled by Toronto navigation companies, which have been wintering at Midland, Owen Sound, and Kingston, have left for Duluth to load ore.

George Mackenzie has just completed a four hundred mile walk through one of the roughest sections of northern British Columbia. He states that he discovered a coal area of remarkable richness within easy distance of the projected route of the Grand Trunk Pacific.

The Northern Sulphite Mills of Canada, Limited, Sturgeon Falls, capital, $500,000, has been granted an Ontario charter to manufacture and deal in all kinds of timber and wood pulp, as well as by-products. F. Ford, and Britton Osler, of Toronto, represent the company.

John Agnew, Limited, Brantford, have received an Ontario charter, empowering them to deal in trunks, valises, footwear and leather and rubber goods, and to take over the business now conducted by John Agnew, in Brantford and Woodstock. Capital is placed at $50,000.

The William Gray & Sons Company, Limited, of Chatham, have received authority from the Dominion Government to increase their capital stock to $500,000, and to organize at any place in Canada joint stock companies for manufacturing carriages, wagons, sleighs and other vehicles.

The Ottawa and New York Railway Co. has moved its shops from Santa Clara, N.Y., to Ottawa, and has closed those at the former place. Hereafter all the cars and equipment needed to be repaired for the line will be attended to at Ottawa, and a considerable staff is now engaged at that work.

The Buster Brown Gas and Oil Company of Ontario, Limited, of Windsor, Ont., capital, $500,000, has been incorporated by the Ontario Government. It will produce gas and oil. Among the provisional directors are Garrett Smith Brown, of Detroit, Mich., and J. W. Hanna, of Windsor.

We note in the Montreal papers that the Ogilvie Flour Mills Company, Limited, has purchased the entire site between Mill St. and the Lachine Canal, in that city, formerly occupied by the Pillow, Hersey Co., recently absorbed by the Montreal Rolling Mills Co. It is understood that additional machinery is being placed in the Royal Mill, which will increase the capacity of this one mill to over 5,000 barrels daily, so that Montreal will have the largest flour mill in the British Empire. Large additions to the power facilities of the Glenora Mills, at St. Gabriel Locks, have already been decided on and by May 1st the capacity of these mills is expected to be increased by at least 1,000 barrels a day.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

The Sovereign Bank of Canada

DIVIDEND NOTICE

Notice is hereby given that a Dividend of one and one-quarter (1¼) per cent for the current quarter, being at the rate of five (5) per cent. per annum, on the paid-up capital stock of this Bank, has been declared, and that the same will be payable at the Head Office and at the Branches on and after MONDAY, THE 15th DAY OF MAY NEXT.

The transfer books will be closed from the 1st to the 13th, prox., both days inclusive.

By order of the Board,
D. M. STEWART,
2nd Vice-President and General Manager.

Toronto, 11th April, 1905.

BANKERS.

From the following list our readers can ascertain the names and addresses of bankers who will undertake to transact a general agency and collection business in their respective localities:

MEAFORD—Grey County. C. H. JAY & CO'Y Bankers, Financiers and Canadian Express Co. Agents. Money to loan.

GEORGE F. JEWELL, F.C.A., Public Accountant and Auditor, Office, 361 Dundas Street, London, Ontario.

COUNTIES Grey and Bruce collections made on commission, lands valued and sold, notices served. A general financial business transacted. Leading loan companies, lawyers and wholesale merchants given as references.
H. H. MILLER, Hanover.

The Grenfell Investment Co.
BANKERS
GRENFELL, N.W.T.
A General Banking and Financial Business transacted. Special attention given to collections on Neudorf, Hyde, Tiree, Mariahilf and Pheasant Forks.
JAS. YOUNG-THOMSON MGR.

The Lake Huron Copper Mining Company, Thessalon, capital, $500,000, has been granted an Ontario charter. It will do mining, milling, reduction and development operations.

The Canadian Pacific Railway, to replace its elevator "B," in Fort William, destroyed by fire, is building a new elevator, which is to be one of the most rapid in its action in the world, i.e., capable of handling three-quarters of a million bushels in twenty hours. Of course, the efficiency of the elevator to do what is demanded of it depends upon the ability of the railway to supply cars; the company is constructing a yard about a mile distant, from which the cars may be supplied as rapidly as needed.

Mercantile Summary

J. B. Gateman & Company's pearl button factory, at Berlin, Ont., was on the 16th inst. partially destroyed by fire at a loss of nearly $4,000.

A movement is on foot in Brantford, Ont., to purchase the plant of the local Electric Lighting and Operating Company, whose franchise expires shortly.

The Lake St. John Railway Company has secured English capital for the purpose of continuing the line to Port Lanay in James Bay, which from the present terminus at Roberval is a distance of about 400 miles.

The coal and wood business now carried on in Hamilton and other Ontario cities by Thomas Myles' Sons, will be taken over by a company recently incorporated under that name of which the authorized capital is $170,000.

The quantity of wheat at present stored in the railway elevators at Fort William and Port Arthur, is stated to be about equal to that at the opening of navigation last season, namely, about 5,000,000 bushels. This will not be moved by Canadian freighters until the middle of next month.

J. McO. Mackie, David Yuile, and others, of Montreal, have been granted letters patent from the Dominion Government, authorizing them to acquire the property of the Laurie Engine Co., of Montreal, and carry on a general manufacturing and engineering business, also to build and repair ships, dredges, and dock appliances, bridges, etc. It will carry on business under the name of the Laurie Engine Co., with a capital stock of $250,000.

If it is given power to do so by the city, the Bell Telephone Co. intends, we learn from a Montreal paper, to put three miles of their pole lines in Montreal underground the coming summer. They purpose placing their conduits on St. Catharine St., Papineau Ave., St. Francois Xavier St., St. Antoine St., Drake St., Wellington St., St. Matthew, Dorchester and Sherbrooke streets. The longest stretch will be on St. Catharine St., from Seaver St. to the east city limit, one mile.

Being interviewed on the subject of lead smelting in the Kootenay district of British Columbia, Mr. J. J. Campbell, of the Hall Mining and Smelting Company, says: "We have ore in sight for at least six weeks for one stack. I feel reasonably sure that there will be enough to keep us going indefinitely. I further expect that there will be such an improvement in the next few months as will justify us in blowing in the other furnace. The St. Eugene is, of course, our mainstay. At its present rate of output it can supply the Hall Mines and the Trail smelters for some time. By the end of June the payment of the Dominion Government bounty on lead exported from Canada will cease. . . But from the present indications, I should say that the outlook is fairly good, and I see no reason to apprehend any necessity of closing down.

Business Men
going to England on the Manufacturers' Association Trip should make it a point to see our stock of
Steamer Trunks
We carry no less than twenty-five different qualities in all lengths. If you live out of Toronto, Catalogue "M" illustrates the principal lines we make, also shows many other articles that will make the trip more pleasant. ∴ We pay express charges in Ontario.

Mercantile Summary.

The Lakefield Furniture and Manufacturing Company, Limited, has received an Ontario charter. Its capital stock is placed at $125,000. J. F. Lillicrap and E. R. Tate, of Lakefield, are provisional directors. They will do a general lumbering business, also as machinists and foundrymen.

The Continuous Steel Rail Company, Toronto, capital, $500,000, has been incorporated by the Ontario Government. It will buy useful inventions in steel rails and car wheels, and manufacture these and railway supplies. F. B. Allan, Toronto, is a provisional director.

The Quebec and St. Maurice Industrial Company is applying to the Quebec Legislature for power to purchase and develop water powers, build dams, at La Tuque and elsewhere in the Province, purchase land, operate timber limits, run paper and saw-mills, etc. The capital is $2,000,000.

On Monday last, at the rooms of the Institute of Chartered Accountants, Toronto, an instructive lecture was delivered by O. M. Hudson, C.A., of the firm of Vigeon & Hudson, chartered accountants, on the subject of "Journal Entries." The speaker's remarks favored definite rules for the use of the journal, particularly in connection with self-balancing ledgers.

The Dominion Government has granted a charter to "Universal Motor Manufacturers, Limited," Montreal, having a capital stock of $500,000. It will take over the assets of the Universal Spring Motor Company, Toronto, and acquire the manufacturing business of F. H. Leonard, Jr., of Montreal. It will also acquire and deal in other motor and power devices and engage in a general electric and mechanical engineering business. H. R. Harmer, of Toronto, and F. H. Leonard, Jr., Montreal, are charter members.

A welcome item, to those who take an interest in Canada's industrial development, is that which came on Tuesday from Collingwood about wire nails produced in that town. The steamer "Haddington," managed by Capt. J. T. Mathews, of Toronto, leaves that port for Port Arthur and Duluth, carrying about 1,000 tons of wire nails made at the Imperial Steel and Wire Company's works, in Collingwood, and consigned on the order of Lewis Brothers, Montreal. The consignment will require thirty cars to take it to Winnipeg.

The suggestion is made that the Temiskaming and Northern Ontario Railway be run by electricity, and the commissioners are said to be looking into the idea. Water-power for the generating of the electricity needed to run the road exists in superabundance along the entire length of the 200 miles built or under construction. On the Montreal and Blanche Rivers and at the outlet of the Abitibi Lake into the river of that name there are in proximity to the line splendid water-powers. If the line should be extended eventually to James' Bay, which would make it about 400 miles in length, it is said that the same conditions regarding water-powers would be found to hold good.

Mercantile Summary.

The St. Eugene Mine, Kootenay district, B.C., produced, milled, and shipped, last month, 3,700 tons of concentrates.

The Northern Elevator Company will erect a large flour mill in Winnipeg, at an estimated cost of $200,000, the capacity to be 3,000 barrels per day.

The bondholders of the Kingston, Ont., Street Railway offer to sell the road to the city for $125,000. No steps have been taken in the matter, however, and the price is considered altogether too high.

The Sherbrooke Power, Light and Heat Company held a special meeting two or three days ago for the purpose of taking definite action regarding the offer by the city to take over its plant under an arbitration. Finally it was decided to offer the plant to the city for $233,000.

Shipments of ore from the Rossland, B.C., district last week were as follows: Le Roi, 2,059 tons; Centre Star, 1,643 tons; War Eagle, 1,170 tons; Le Roi, No. 2 (milled), 400 tons; Le Roi, No. 2, 120 tons; Jumbo, 100 tons; Spitzee, 270 tons. Total for the week, 5,753 tons, and for the year, 102,357 tons.

The half-yearly meeting of the Grand Trunk Railway Company was held in London, England, on the 13th inst. Sir Charles Rivers Wilson said that the company were determined to fight the attempt of the Province of Ontario to increase the taxes of the company, an attempt which he considered most unfair, considering how much the company had done for Ontario. It was stated that the construction of the Lake Superior branch of the G.T.P. will commence in June and that of the Prairie branch in July. A resolution authorizing the reduction of the number of directors to ten was carried. The retiring directors, Sir Charles Rivers Wilson, Clutton and Brock, were re-elected, also Auditor William Ramsay, of Montreal.

The third annual meeting of the Henderson Roller Bearing Manufacturing Company, Limited, was held in Toronto on the 12th inst, Mr. Albert Ogden, the president, in the chair. The Hon. A. G. Blair, managing director of the Toronto Roller Bearing Company, Limited, who is also a shareholder in the former, emphasized the great value of the bearings in connection with both steam and electric railways. The following directors were elected: Albert Ogden, Toronto; A. D. Watson, Toronto; D. B. Simpson, K.C., Bowmanville; A. E. Henderson, Toronto; R. I. Henderson, Toronto; R. J. Whitla, Winnipeg; John Ferguson, Toronto; E. Lemon, Owen Sound; Hugh Waddell, Peterboro; Whitford Vandusen, Toronto Junction; John L. Gibb, St. Catharines; Wm. Breese, Chatsworth; Hugh John Macdonald, Winnipeg; G. F. Marter, Toronto. Afterwards the following officers were appointed: President, Albert Ogden; first vice-president, A. D. Watson; second vice-president, D. B. Simpson, K.C.; secretary and treasurer, A. E. Henderson; manager, R. I. Henderson.

PORT ARTHUR & FORT WILLIAM.
Post Office Address, — — Port Arthur, Ont

A large amount of preliminary work has been done for the work of construction by the Oriental Power and Pulp Company of their proposed large pulp mill at Swanson Bay in northern British Columbia. It will be begun next month. The mill will have a capacity of 100 tons of paper per day.

A New York Tribune despatch of 13th inst. says that a great combination of iron and steel manufacturing companies of Great Britain, Germany, France and other European countries is being organized, which will be antagonistic to the United States Steel Corporation. Practically the entire world's output of steel and iron products will be manufactured by the two rival combinations. The steel interests represented by Charles M. Schwab, it is said, are to be allied with the new European combination.

The Hamilton Spectator is opposed to the nationalization of the port of Montreal. Canada, outside of Montreal, it asserts, doesn't care a penny whether the head of navigation is at Montreal or Quebec. If the Spectator will turn up its files at the time of the Montreal 'longshoremen's strike in Montreal, in May, 1903, and notice how the curtailment of the shipping facilities at Montreal affected the price of produce in Western Ontario, it will find therein proof of what a cheap harbor at Montreal means to Canada.—Montreal Gazette.

Mercantile Summary.

A Paris telegram of last Saturday says that the porcelain factories at Limoges have decided to shut down because of the demands of the workers. About 20,000 workmen are, therefore, idle.

The James Bay Railway Company has agreed to run its main line between Toronto and Sudbury through Orillia, in return for a bonus from the town of $30,000 and a right-of-way through it.

The Merchants' Line will place two steamers on the route between Montreal and Fort William, calling at Toronto and Hamilton and other lake ports. They will each have a carrying capacity of 2,500 tons.

A cable of Monday last states that the Caledon Shipbuilding Company, of Dundee, has received an order from a Hamilton, Ont., firm for the construction of a 3,000-ton steamer, built specially for the trade of the Great Lakes.

The Railroad Committee of the Dominion Parliament has granted the Hamilton, Galt and Berlin Electric Railway Company an extension of two years for the beginning of the construction of the line, but insist that it be completed and in operation in four years. The road will be built direct from Hamilton to Guelph in accordance with the desire of the former city.

The Allan Line's second turbine steamship, the "Virginian," arrived in Halifax on the 14th inst., after a very successful voyage from Moville. The passage was made in six days, 21 hours and 34 minutes. She lengthened her course some 300 miles in order to avoid icebergs. The turbine engines are reported to have worked magnificently, with an entire absence of vibration.

The American Furniture Co's factory, Oxford, N.S., was destroyed by fire on the 13th inst., most of the stock, however, being saved. Loss, $20,000; insured for about half. The town's electric light plant, adjoining, was also destroyed. On the same day, the Pelford Lumber Company's saw-mill at Prince Albert, Sask., was also destroyed at a loss of $10,000; covered by insurance.

The Government ice-breaking steamer, "Montcalm," last week became caught in the ice at Cap Rouge, a few miles west of Quebec harbor. The boat has received a severe shaking up by her winter work in running up against the Chaudiere and Cap Rouge ice formation, and a large number of the plate rivets are loose. It is believed, however, that no very severe damage has been done.

Four hundred and ninety doctors have assembled this week in Atlanta, Georgia, in an anti-tuberculosis congress. There are representatives from nearly every part of the United States east of the Rocky Mountains, besides several prominent representatives from European centres. The subject of the Great White Plague is one of great moment, and it is much to be hoped that the interchange of view may throw more light upon the best means of combatting this dreadful scourge.

D. W. ALEXANDER, Gen. Mgr.

CANADA

CANADA LIFE BLDG.,

TORONTO.

The Robb Engineering Company have received an order from Calgary for a 350-h.p. cross compound Corliss engine for use in that city's electric lighting plant

A meeting of shareholders in the Windsor Hotel, Montreal, has been called to ratify a decision of the directors to enlarge the hotel, at a cost of about a million dollars. It has been arranged that the hotel will be ten stories, or 130 feet from sidewalk to cornice. Mr. W. S. Weldon, manager of the Windsor, leaves shortly for the States with two or three of the directors to visit the most extensive and up-to-date hotels, with a view to making the new Windsor one of the finest on the American continent. It is hoped that work may be begun on the extension by the end of May.

The Lethbridge, Assa., Electric Company are enlarging their plant, and have ordered a 350-h.p. engine and two 125-h.p. boilers from the Robb Engineering Company, Amherst, N.S.

J. D. Sowerby & Company, of Oak Bay Mills, P.Q., are rebuilding their saw-mill, which was burned last year. They have ordered a 150-h.p. engine and a heavy rotary saw-mill from the Robb Engineering Company, Amherst.

Toronto capitalists, so it is said, are interested in the scheme of a new and modern hotel for London, Ont., which most travellers will agree is desirable. The proposed hotel will cost $200,000 or more, but all the capital secured to date is less than $100,000.

A few days ago, the Political Economy Club, of Montreal, met and dined, after which function there was read a paper by Mr. Seargent P. Stearns on "Alexander Hamilton." The paper dealt with the life and political activity of Hamilton, who though born in the West Indies, acquired most of his fame in the United States, to which country he moved in 1772. Mr. Stearns then traced Hamilton's steps as a lawyer, as secretary of the treasury, in the Washington Cabinet, and as leader of the Federalist Party in the United States.

* * *

TORONTO MARKETS.

Toronto, April 19th, 1905.

Chemicals, Drugs, Etc.—Not much change has occurred in the local drug trade since last report. Opium has regained its firmness, however. Quinine is holding its own at the recent recession. Clove, anise and cassia oils are a little easier. Sulphur has advanced somewhat. Camphor is very strong. Cream of tartar is firm.

Dry Goods.—Trade has been more than usually active during the past week, due perhaps to the near approach of Easter. The wholesalers are doing a brisk sorting trade, particularly in millinery. There has been a heavy demand for whitewear goods. Shirt waist materials are particularly called for. Tailors' suitings are also in brisk request, and those of rather better than average quality are the ones in greatest favor. Carpets, curtains, and other house furnishings have all experienced a good movement.

Flour and Grain.—Trading in flour is on the quiet side. Ninety per cent. patents sell for $4.35 to $4.45 in buyers' bags, east or west. There is still a marked scarcity in bran and shorts. Rolled oats have made no appreciable change in their position. Wheat is in about the same condition as flour, so far as business is concerned, it is very quiet, and the divergence between the views of buyers and sellers continues. No change in prices has occurred since last quotations.

Groceries.—Sugars continue very firm, but no further advance has taken place. The movement is barely average. General trade is about normal, and in country districts has shown some improvement.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Molasses is quite firm. Prices for dried fruits hold steady though at the moment no great volume of trade is passing. Tomatoes and corn, among vegetables, are very scarce and strong in price.

Hardware.—Prices keep quite steady. A good brisk season's trade is looked for. There is scarcely any feature worthy of special comment. Building hardware is in good demand, and the prospects all round look bright. In the metal branch, reports concerning iron and steel are very good, and would appear even to be improving. Prices, however, seem to be keeping up well, with no tendency towards undue inflation.

Live Stock.—Prices for many lines of butchers and exporters' animals advanced 10 to 25c. per cwt. at last market owing to the scanty supplies. The quality of offerings is about as stated in last report —not as good as it should be.

Hides and Skins.—There is little appreciable change to record this week, and trade continues dull. Prices remain fairly steady. Tallow is dull, but prices nominally remain the same.

Provisions.—The market for butter is becoming easier on account of the freer receipts. Firmness is still the rule in cheese. Arrivals of eggs now are quite large, but prices keep steady at 14 to 15c. Heavy lots of potatoes have been coming into this market for the last few days and prices are easier. Smoked meats and hog products are still firm.

Seeds.—There is quite a scarcity of some lines of seeds, notably clover, and prices rule high. Alsike and timothy are unchanged.

Wool.—Prices at present are merely nominal, pending the receipt in quantity of the new clip.

MONTREAL MARKETS.

Montreal, 19th April, 1905.

Ashes.—Business at the moment is quite stagnant in this line, there being as yet no demand for export by first outgoing steamers. Values, however, hold quite steady, $5.50 being quoted for first quality of pots of good tares; seconds, $4.95 to $5; pearls, $7.25 to $7.50 per cental.

Cements and Firebricks.—Enquiry for cement is increasing, and a fair aggregate of moderate orders is reported. We quote from store as follows: Belgian cement, $1.70 to $2.10; English, $2.05; American and Canadian, $2.30 to $2.40, less rebate allowed for packing. Prices for imported cement will be a little lower than the above figures for delivery from wharf, after opening of navigation. Firebricks are moving quite freely at $18 to $23 per thousand.

Dairy Products.—Supplies of new butter are quite light, and though prices are lower than a week ago, still choice new milk creamery realizes about 24c.; rolls in small packages, 21 to 23c.; there is a decided scarcity of dairy. Liverpool cables on cheese show a firmer market, but business on spot is of a very limited character, and what trifling stock there is here, is held at 12½c. for finest white, and 12 to 12¼c. for colored.

Groceries.—Little of special interest has developed in this line of merchandise since a week ago. Some increase in the distribution is noted, but collections as a whole are only fair. The sugar market inclines to easiness, with no special activity in the demand from jobbers. The St. Lawrence Refining Co. has withdrawn its recent advance of 5c., in which the Canada Refining Co. did not follow, and both companies are now quoting $5.65 for standard granulated in barrels, with $5.15 the lowest quotation for yellows. A Barbados cable of yesterday quotes 24c. for new molasses, a figure which means a laid down cost getting close to 40c. It is said very few orders have been placed so far for this market. In other lines of groceries there is nothing new.

Dry Goods.—City retail Easter trade has thus far been disappointing. Chill northerly winds have been prevalent, suggesting the taking of the winter furs out of the moth bags again, and many would-be

Remarkable Growth.

On December 31st, 1894, the Government Reserve held by the Manufacturers Life was $628,429.00.

On December 31st, 1904, it had amounted to $5,255,077.00 — certainly magnificent progress.

It pays to insure in a prosperous Company like this one.

AGENCIES THROUGHOUT CANADA.

shoppers have elected to stay at home alongside the radiator and await pleasanter weather conditions. A few warm, spring-like days would no doubt help retail dry goods matters greatly, for trade has been good on such seasonable days as we have had. Wholesale merchants report sorting business just fair, with travellers selling a moderate proportion of fall goods. Cashmeres are said to be selling freely, and some large orders are being placed for these goods with American manufacturers. English cottons remain very steady with the mills well employed on orders in hand.

Hides.—The market is without a change of any kind. Receipts of beef hides continue to rule light, and quotations are steady on the basis of 9½c. per lb. for No. 1. For No. 1 calfskins 14c. per lb, is paid, and 12c. for No. 2. Lambskins, 10c. each and sheepskins $1.20 each.

Leather.—Manufacturers are comparatively light buyers of leather just now. Prices of sole are very steadily maintained, No. 2 manufacturers being quoted at 24 to 24½c., and No. 1 oak slaughter at 28 to 29c. Western splits are quoted at 20 to 21c., but are little asked for, and are said to be slow of sale just now in England, where there has generally been a very fair outlet. Quebec splits are quoted at 16 to 17c.; heavy buff, 12½c.; pebble, 11½c. to 12c.; glove grain, 11½c.; Scotch grain, heavy, 15c.; harness, 30 to 31c. Sheepskins are again advanced ¼c. a foot.

Boots and Shoes.—The present time is between seasons for manufacturers of boots and shoes; the spring trade being over, and their travelling salesmen getting ready their fall samples, and indeed getting out with them. The volume of trade has been fairly good and prices, as a rule, maintained.

Metals and Hardware.—The demand in these lines is of a fairly satisfactory volume on the whole, although business in pig iron is not brisk at the moment. No. 1 Summerlee, for delivery from wharf on opening of navigation, is quoted at $19; No. 2, ditto, $18.50; No. 1 Middlesboro, $17.50; No. 3 Middlesboro, $17.25 domestic brands for spot delivery continue to range about $19. There has been no recent change in bars, wire or nails. Tinplates are steady at $3.65 for cokes, and $3.90 for charcoals of standard brands; black sheets, $2.15; Canadas, $2.35; galvanized sheets, $4.25; Ternes, $6.50. The general run of metals remain as last quoted.

Oils, Paints and Glass.—The advance in linseed oil is maintained, boiled selling at 49c. for ordinary jobbing lots, and raw at 46c. Turpentine is again stronger at 90 cents per gallon in single barrels. Ground white lead is stiffer, $4.75 being now asked for strictly pure; putty, $1.35 to $1.40, in bulk; in bladders, $1.60 to $1.65, window glass firm at $3.75 per 100 ft. first break.

* * *

A grocer of Lorette, Que., F. A. Bedard, has made an assignment to V. E. Paradis, accountant at Quebec. Last fall he compromised liabilities of about $1,000 at 40 cents.

L. N. Desrosier, general merchant, of Sandy Bay, on the Gulf of St. Lawrence, below Quebec, whose embarrassment we lately noted, as the result of his being burned out some weeks ago, with insufficient insurance, has arranged with his creditors for a settlement at 50 cents on the dollar. His liabilities are stated at about $13,500.

An assignment has been made by Henry O'Brien, a Montreal painter. The statement of his liabilities filed with the assignee includes his wife's dower claim for $10,000, and totals $16,000.

On demand, an assignment has been made by Hess & Blainpoix, who are said to have come from Alsace, in 1902, and started business in Montreal, as agents for certain French and German manufacturers of dry goods, smallwares, etc. Their affairs are expected to turn out very poorly.

Recently we noted the failure of G. A. Perry, doing a general store business at Dalhousie Station, Que., under cover of his wife's name, owing to former troubles. He is now said to have negotiated successfully with his creditors for a compromise arrangement at 50 cents on the dollar.

We note the assignment, at Cobden, Ont., of J. E. Ross, formerly a clerk in that town, who in 1900 bought out the general store business of R. Burton. An overliberality in the matter of retail credits is assigned as the main cause of his difficulties, and during the past year ro so he has shown signs of financial strain, with suits appearing against him at times.

The failure is reported of Joseph Lapointe, who has been a general storekeeper, at La Macaza, in the Labelle district, north of Montreal. He was formerly a farmer, and is said to have started business three or four years ago on a capital of $70, but he apparently had no difficulty in getting rather liberal credits. He himself has trusted his neighbors freely, and the largest item of his present assets is said to be book accounts.

A demand of assignment has been made upon Clovis Arcand, for the past twenty-five years a carriage-maker at Portneuf, on the St. Lawrence, near Quebec. Of late years he has also done considerable in a lumbering way, and has thus become much spread out, with the result that he has fallen behind in payments, and been sued from time to time. He recently claimed to have a surplus of some $25,000 but an investigation into his affairs now being made by an accountant will no doubt result in a very different showing.

LIQUIDATION DEFINED.

"Flannagan," sez I, "what do they mane be liquidatin'?"

"That's a fie-nancial terrum," sez Clarence, "that's used be uz min iv money. I'll thry and luminate you, Malachy," sez he. "Whin uz fie-nanciers starts a company, dy'e mind, we put in a gallon iv wather to a pint iv copper, like you wor mixin' limonade; and we sell it to suckers for pure copper. Suckers, Malachy, loves wather, and they'll give up money any time for a chance to dive in it. That's organization. Bimeby a lot iv new suckers wants to get in, but ther isn't room for thim all. Thin we make a hole in the bottom iv the company's tank, and out goes the wather and the suckers is left gaspin' high and dhry. That's what's called liquid-atin'. Whin its all over, we mind the hole in the tank, fill 'er up with wather agen, put in the suckers—the new crop—and start agen. That's what we call reorg'nizin'. Man alive, Malachy, fie-nance is as aisy as pickin' feathers off chickens; 'tis more high-tuned than bank robbery and safer than safe blowin'. As the poet sez: "The sheep for the wolves, the suckers for the wather, the wather for the fie-nancier." Jawn D. is a great fie-nancier."—Malachy Brogan in open letter to the Hon. Jawn D. Rocyfeller, of Poverty Hollow, Wall Street.

AN EDITOR'S FEELINGS.

The editor's heart swells up with gratitude and his throat chokes with emotion, like an old cow with a turnip in her throat. The big world is, after all, a happy one, and as we gaze from the window of our editorial monastery at the sun-kissed landscape, sweet visions of milk and honey, humming birds and molasses, brick cheese and ambrosial nectar, dance before our astonished vision like a calf in front of a circus procession. Last Saturday one of our subscribers came into the office and paid, in cold cash and in cold blood, three years' arrearages and two years in advance.

P.S.—There are several hundred more subscribers whose subscriptions are still due, and we want to be made to rejoice even more.—Smith's Falls News.

⁂

THERE ARE OTHERS.

The St. Thomas affair is but a surface ripple indicating the moral sewage that lies at the bottom of much of present day business methods. Unfortunately, the majority of the people who thus prey upon the community remain uncaught; when once in a while, however, the coils close upon one of them, honest people cannot but express the most profound satisfaction. There are, no doubt, many crooked failures that are never ventilated in court, because of the very great difficulty and risk attendant upon following up cases of this kind. A few more determined creditors like those in the Hill failure will have a wholesome effect. We understand there is a similar case in the East just now. Let us hope the good work of ferreting out knavery in business will go on.—Can. Shoe and Leather Journal.

⁂

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co. say in their letter dated New York, April 8, 1905:

Another week of uncertainty has gone. The prevailing undertone of the stock market has been strong; but what with the disposition to realize shown in certain quarters, and what with recent stock market developments, the public mind appears somewhat confused as to the interpretation of current events. Our railroads have been wonderfully favored by national prosperity. In spite of the great increase of facilities made in the last two or three years, our principal systems still find themselves overtaxed with traffic, and with every probability of its continuance for months to come. Both agriculture and industry are also enjoying much prosperity. In every part of the country trade is showing increased activity, and the volume of business reported exceeds even the unprecedented volume of the last two years. The course of the money market will be watched with exceptional interest. In all probability the period of extreme ease has passed. Bank reserves, being exceptionally low, will be apt to rise during the next few months unless the declared intention of the Government to withdraw its deposits should interfere. Secretary Shaw is likely to conduct these operations with as little effect upon the money market as possible; but the heavy drain of new issues upon our surplus capital, the activity of business and the possibility of gold exports in connection with our subscription to the Japanese loan, as well as the fact that our foreign trade balance is not satisfactory, all point to the possibility of considerable future gold shipments. Our exports of merchandise are making less and less favorable comparisons with the last four or five years, while our importations are steadily increasing, thus diminishing the trade balance. Fortunately, money continues very easy abroad, especially in London, while both British and European investors are showing an increased disposition to invest in American securities, which are among the safest and most profitable which they can find in spite of present high prices.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits guaranteed and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

WOOL, AND THE TEXTILE SITUATION.

While a few small lots of unwashed wool have made their appearance on the local market, the supply of new clip can hardly be expected to begin in earnest for a month or six weeks yet, according to weather. The range of values promises to be quite high, though perhaps not quite so high as has been anticipated by some of the country dealers. Indeed, were the prices which will prevail to be so extreme as some people imagine, a sure result would be such a noticeable restriction in consumption, as would surely in its turn bring down values more nearly to a normal level. The woolen market is one, however, which has such wide ramifications in all parts of the world, and in which the centres are so closely inter-related that its position abroad is just about as important as the local one. We shall therefore attempt to give a rapid survey of the conditions which exist elsewhere, as far as can be judged by various trade reports and correspondents' advices to their several papers.

In the first place, Helmuth, Schwartze & Co., the expert London statisticians, discover that although there was a certain shortage in the wool production of the world last year—indeed, so far as the number of bales is concerned, the shortage was just as large as was then computed,—the size of the bales in grease, as marketed by the grower, was much larger than usual, so that the actual curtailment of the production in cleaned wool was all told, not more than 3 per cent. Now the high prices which have been realized during the last few months are a direct result of a supposed shortage of very much more than this. Again, the supply from Australia last year was very large, so that the final result is that the supply of clean scoured wool in sight for the present year is practically about the same as it was in 1903. This is of course a feature which will do much to affect the trend of events in future.

Another noteworthy feature is that, in spite of a rising scale of values at the London sales, the receipts in the United States of foreign wool have been very large, to such an extent indeed that the prices of the same dropped considerably lower than those of domestic brands. This applied more particularly to mediums, the coarser grades still holding their position, as has been noted before in these columns. However, this large importation into the United States of foreign wools during the first quarter of the present year has caused a distinct depression in prices, and this almost inevitably must bring a downward pressure to bear upon prices of the new clip wool in Canada.

In Boston, a more optimistic feeling seems to hold. The market continues quite strong with a fair buying movement in progress. The manufacturers report that they are satisfactorily busy, and that their machinery is well supplied, though they make complaint as to the narrow margin of profit. Cheap lots are few and far between, and are snapped up quickly. The worsted mills are the chief buyers, especially for foreign and pulled wools. Higher prices are anticipated by the chief buyers for the next London wool sales.

The Bradford market continues quiet, and less wool is changing hands than is usual at this time of the year. The consumption of merino has, however, shown an increasing tendency for some time past. The coarser grades of crossbred colonial wools, and non-lustrous home-grown wools of a similar character are holding their position without much change, but a noteworthy and somewhat unsatisfactory feature of this section of trade is that combed wools and worsted yarns are proportionately much cheaper than the wool in its raw state.

It will be seen from the above how difficult it is to arrive at a satisfactorily clear idea of how the general market for wool is likely to move.

In regard to cotton, the movement towards a clear understanding of the general position of the market is almost equally tardy. Owing to the largeness of the last cotton crop, prices are, of course, very much lower than they were last year. But every now and then a determined effort appears to be made to "boost" values up to the old level, or at any rate as near to it as possible, and these spasmodic bull attempts do not fail to keep merchants as well as manufacturers "guessing." Goods made of the staple keep up their prices well in Canadian markets, but then this is not to be wondered at, seeing that manufacturers here lagged in their raising of those prices when the raw material would have warranted such a policy. The high values, too, caused a falling off in consumption which is only now being rectified. The trade throughout the country recognizes the truth of this and the strength of the manufacturers' position, and so orders continue to come in in ample volume.

⁂

ANOTHER HINT TO CANADIAN EXPORTERS.

Among the things which, according to business men in other countries, Canadian export merchants have yet largely to learn, is the importance of paying attention to details, such as putting up products, packing them, branding them, shipping them, in certain ways, according to the taste or habit of the market for which they are destined. A paragraph headed "Canada's Careless Shipping" appears in the last official report of the Birmingham Agent for Canada. Speaking of carelessly shipped butter that official says: "One can hardly understand the dealers of Great Britain, who purchase such enormous quantities, paying so much attention to minor matters; but it is the small things that count in Great Britain. All countries *except the United States and Canada* pay special attention to these small matters." The lack of uniformity in quality of Canadian butter is a sad drawback; in two or three successive shipments there would be, it is complained, differences in salting, in color, and in other points. This sort of thing disconcerts the British trader who wants uniformity in quality, and above all things wants regularity in shipping—which is what he cannot depend upon in butter shipment from Canada. "Ireland and Denmark ship all the year round, and their monthly product is about equal." This Canada is unable to do; the summer product suffers from the heat, especially from being sometimes landed on hot English docks. Retailers over here have quite commonly refrigerators; but in England it is rare to find a retail grocer who has such a thing. Then another point, Canadians ought always to brand their bacon "Canadian," which would help to distinguish our pea-fed product from the soft and corn-fed article. We are told, too, that there is such a thing to-day as sentiment in favor of Canada among business people in the United Kingdom. Here is what Mr. Ball says of it: "I cannot too strongly recommend the Canadians to brand their packages 'Canadian.' There is a wonderful feeling prevalent here towards Canadian goods, and the British, if they knew, would much prefer buying Canadian products, but in the retail stores, everything seems to be sold as 'American.'" The April letter of the Leeds agent likewise gives some instructive pointers about the co-operative dairies of Denmark, their methods of packing, branding and shipping butter.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for March, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

Canadian Bank Statement.

Greatest amount notes in circulation during month	61,206,767	59,396,303
Loans to directors or their firms	10,007,294	10,089,831

The figures representing the total liabilities and assets of the chartered banks for the month of March usually show an increase over those for the preceding month, and those for March, 1905, form no exception to the general rule. The increase this year is, however, somewhat less than in 1904 or 1903, although more than in 1902, the increase in total liabilities in March of each of the last four years being as follows:

	1905.	1904.	1903.	1902.
March	$586,643,000	$535,249,000	$497,750,000	$440,496,000
February ...	577,836,000	519,287,000	486,232,000	438,035,000
Increase ...	$8,807,000	$15,962,000	$11,518,000	$2,461,000
Percentage of increase	1.3	3.	2.3	.56

Circulation this year shows a slight falling off as compared with February. This is a most unusual feature, but it may no doubt be accounted for partly by the early spring in Western Canada, which has checked the bringing of produce to market and enabled the farmers to get to work on the land earlier than usual, and partly by the stagnation in business in the Maritime Provinces, caused by the extremely severe winter which has been experienced there.

Public deposits in Canada show a substantial increase in March, but not quite so great as in 1904. In 1905 the increase is $5,823,000, as against $7,144,000 in 1904, $5,374,000 in 1903, and a decrease in 1902 of $1,951,000. From year to year the increase in deposits shows no sign of falling off. The total public deposits in Canada at the end of March of each of the last five years were:

1901	$300,679,000
1902	331,910,000
1903	372,055,000
1904	404,398,000
1905	455,939,000

representing an increase in four years of 50 per cent.

Deposits outside Canada show an increase of about $1,500,000 during the month, but are slightly less than on 31st March, 1904. During the year the Royal Bank of Canada has increased its deposits outside of Canada by about $5,000,000, chiefly the result, no doubt, of the extension of its business in Cuba, but this has been offset by a reduction of about the same amount in the figures of the Bank of Montreal.

On the assets side the banks continue to show increased resources in balances due from agencies and other banks outside Canada. In February these balances amounted to $29,252,000, while by March they had risen to $31,845,000, nearly double the level at which they stood two years ago. Securities show little change, while call loans have increased by about $1,000,000.

The figures which are perhaps of most interest to the Canadian business world are those which represent "Current Loans in Canada," and just at present they are worthy of some little study. During the last five years the figures for the end of March each year have been:—

		Increase.
1901	$280,041,000	....
1902	300,066,000	$20,025,000
1903	346,293,000	46,227,000
1904	403,566,000	57,273,000
1905	422,351,000	18,785,000

It will be observed that the increase during the twelve months ending 31st ult., was the smallest shown in the last four years, not only proportionately, but absolutely; that it was only one-third of the increase in the year ending 31st March, 1904, and considerably less than half that in the year ending 31st March, 1903.

Compare now the last two years, month by month:

	1903-04.		Increase or Decrease.
February	$331,646,000		......
March	346,292,000	+	$14,646,000
April	353,170,000	+	6,878,000
May	358,063,000	+	4,893,000
June	363,329,000	+	5,266,000
July	363,586,000	+	257,000
August	368,641,000	+	5,055,000
September	373,633,000	+	4,992,000
October	380,823,000	+	7,190,000
November	380,688,000	—	135,000
December	384,419,000	+	3,731,000
January	384,754,000	+	335,000
February	389,627,000	+	4,873,000
March	403,566,000	+	13,939,000

	1904-05.		Increase or Decrease.
February	$389,627,000		......
March	403,566,000	+	$13,939,000
April	409,196,000	+	5,630,000
May	409,210,000	+	14,000
June	413,392,000	+	4,182,000
July	414,096,000	+	704,000
August	408,240,000	—	5,856,000
September	412,197,000	+	3,957,000
October	416,344,000	+	4,147,000
November	415,297,000	—	1,047,000
December	413,779,000	—	1,518,000
January	412,901,000	—	878,000
February	414,233,000	+	1,332,000
March	422,351,000	+	8,118,000

With the unimportant exception of July the increase each month in 1904-5 has been considerably smaller than in the corresponding month the preceding year, and in the only month in which a decrease is shown in both years that decrease is larger in 1904-5; whilst in the latter year a considerable decrease is shown in months which in the previous year exhibited a substantial increase. The falling off, or the slower increase, is fairly continuous throughout the year.

As we know, 1904 was in many respects a disappointment. It opened up with the most severe winter on record. Crops, generally speaking, were poor; the butter and cheese industries were less profitable than usual; the cattle trade, as a whole, was bad, and lumbering showed a somewhat lessened prosperity. Exports fell off to a very considerable extent. On the other hand, the higher price for wheat partially compensated the West for the smaller yield, immigration was large, and manufacturing was apparently prosperous, but on the whole, the advance made in 1904 was distinctly less than in 1903. Thanks to the West, "times were good," but not as good as they had been. In these facts may doubtless be found the cause of the smaller increase in the current loans of the chartered banks. So far as can be foreseen, the prospects for the current year are exceptionally good, and there is no reason why we may not expect to see in 1905 progress as great as that made in 1903.

The mania for obtaining charters for banks shows no signs of abating, although the experience of those who acquired charters in recent years is not very encouraging. In the sessions of 1902, 1903, and 1904 the following charters were granted, of which the Metropolitan Bank and the Crown Bank of Canada are the only ones which have gone into operation:

Securities Bank of Canada, Toronto.
Crown Bank of Canada, Toronto.
Metropolitan Bank, Toronto.
Alliance Bank of Canada, Halifax.

Bank of Winnipeg, Winnipeg.
Citizens Bank of Canada, Toronto.
City and County Bank of Canada, Ottawa.
Home Bank of Canada, Toronto.
Northern Bank, Winnipeg.
Pacific Bank of Canada, Victoria.
Sterling Bank of Canada, London.
Farmers' Bank of Canada, Toronto.

The present session is bringing the usual applications, the latest to appear being that of the Monarch Bank of Canada, which has modestly asked that a capital of $10,000,000 may be authorized.

It is time that some change was made in the regulations under which bank charters can be obtained. At present five or more apparently respectable people sign a petition asking to be incorporated as a bank; they pay the necessary fees, amounting to some $200, and engage a lawyer to see the bill through Parliament. The charter is then granted as a matter of course, although the incorporators may not know where they are going to obtain a single dollar of the capital.

When in the old days there was need for additional banking facilities, the people who wanted a bank got together and subscribed the necessary capital, and then went to Parliament and asked for a charter. Now it is open to a promoter who wishes to earn a commission by obtaining stock subscriptions, or a bank official in a hurry to be a General Manager, to obtain a charter in the hope of being able, by hook or by crook, to get the necessary minimum of capital subscribed and paid up. This is clearly all wrong. The banks in Canada are specially chartered by Act of Parliament to perform certain important functions in the commercial life of the country. They are given valuable privileges and are charged with responsible duties. Under these circumstances it is obvious that a charter should not be granted unless there is substantial *prima facie* evidence of the need for a bank, and of the willingness of responsible persons to pay up the necessary capital. After a bank has obtained its charter, and before it can go into operation, at least $500,000 of capital must be subscribed, of which $250,000 must be paid up and deposited with the Minister of Finance. The matter could very easily be put on a proper footing if the subscribed and paid up capital was required to be obtained *before* the charter was granted, instead of after. It would then be open to anyone to endeavor to obtain subscriptions for the stock of a new bank, but it would be necessary for him, when going to Parliament for a charter, to take with him a list of stockholders whose total subscriptions were at least $500,000, and a certificate from the Minister of Finance that $250,000 had been deposited with him. A rule of this kind would not stand in the way of the establishment of a bank for which any need could be shown, but it would prevent the obtaining of charters on speculation.

A charter lapses after the expiration of one year from its date, unless in the meantime it has been extended by Parliament, and application was made a week or two ago for a second extension of twelve months for the Northern Bank. It is satisfactory to see that the Minister of Finance made a protest against the practice of granting charters to persons who were not ready to put them into operation. If the Government would definitely announce that it would oppose the extension of the charter of any bank which was not in operation within one year from the date of incorporation, the first step towards reform would have been taken.

FIRE INSURANCE IN CANADA.

The experience of fire underwriting companies in Canada of late years has been a varied one. At the close of 1902 they had the great and unusual satisfaction of finding the results of that year to have been the low fire loss of 39.25 per cent., which was much less than for many years, while in the next year the losses were only 50.94 per cent. of the premiums. But 1904 witnessed the conflagration in Toronto, and that of Baltimore in the States, where prominent Canadian companies were involved, which caused the losses to exceed the premiums received in the proportion of $14,195,884 to $13,174,819, which means an outgo of $107.75 to an income of $100, to say nothing of commissions to agents and expenses of conducting the business.

Before proceeding to analyze the figures of the last year given in the Abstract Statements of Insurance Companies in Canada for the calendar year 1904, received last week from the Insurance Superintendent at Ottawa, and reproduced in to-day's issue on page 1424, it may be instructive to go back some years and trace the growth of the business done. We have selected six years, 1874, 1884, 1894, 1902, 1903, and 1904 to illustrate this growth, and give the premiums received, the amount of insurance at risk, and the losses incurred, and the ratio of loss to the amount of premium. The growth in thirty years has been marked, for the amount of property covered by insurance has quadrupled in that time:

Year.	Premiums.	Amount. at risk.	Losses.	Per cent. loss.
1874	$3,522,703	$306,844,219	$1,925,159	62.76
1884	4,980,128	605,507,789	3,245,323	53.59
1894	6,711,369	836,067,202	4,589,363	68.38
1902	10,597,084	1,075,263,168	4,288,562	39.26
1903	11,384,762	1,140,453,716	5,799,279	50.94
1904	13,174,819	1,218,853,254	14,195,884	107.75

The number of companies reporting to Ottawa was practically the same as in several preceding years, namely, 10 Canadian, 19 British, and 9 American—thirty-eight in all, an addition being made since 1903 of one Canadian company, the Montreal-Canada. One United States company, the German-American, has been also added to the list, but its transactions have not added to the totals of either premiums or losses, its advent being too late in the year. The number of British companies is the same, and they continue to do the largest share of the business, more indeed than the other companies combined. A table will show the proportions of the transactions of each group for the year 1904:

	Net cash premiums.	Amount at risk.	Losses incurred.
Canadian companies....	$2,688,703	$300,865,599	$2,619,633
British companies......	8,341,175	745,022,261	9,204,133
American companies....	2,144,941	172,965,394	2,372,118
Total, 1904	$13,174,819	$1,218,853,254	$14,111,200

We see, from this table, that the British and American companies fared the worst, for while the conflagrations and other fire waste of the year made the losses of all the companies together 107.75 per cent., the American lost $110.59 for every hundred dollars received in premiums, the British $110.34, and the Canadian only $97.43.

The whole amount written was distributed among the three groups of companies as under: nearly one-quarter of the $1,218,553,000 at risk was written by the

Canadian companies; not far from two-thirds by the British, and only one-seventh by the American. The exact proportions were: Canadian, 24.68; British, 61.13; American, 14.19 per cent.

* * *

TREE CULTURE IN THE NORTH-WEST.

It is stated by W. E. Stewart, Dominion Superintendent of Forestry, that there are no less than 899,000,000 acres of timber lands in the North-West of Canada. This is of great importance, inasmuch as the chief part of the growth is spruce, which wood is so valuable for pulp. In the timbered districts, a system of fire ranging has been established for Dominion lands similar to those in Ontario and Quebec, the co-operation of the Hudson's Bay Co. has been secured, and the result has been a great benefit and protection for Dominion timber. In view of the early construction of the Grand Trunk Pacific Railway, Mr. Stewart asks that an increased vote be given for forestry work during the next few years. The annual distribution of trees among farmers in the North-West has increased from 58,800 in 1901 to 1,800,000 trees in 1904, and this year it is likely to be 2,000,000. There are 1,120 settlers on the list to receive trees during the present year. Inspectors reported last year that of 5,247,700 young trees which have been distributed, 87 per cent. were growing, and in some districts the percentage was more than this. It is the opinion of those who have discussed the subject from the point of view of men who have studied the subject that there should be established in the Canadian North-West nurseries at various points, where may be grown young trees suitable for shelter belts.

* * *

INSPIRING WORDS FOR CANADA.

Different persons who have observed with some care the public utterances of the present Governor-General since his coming amongst us have been struck with their statesman-like character and charmed with their diction. The address he delivered on Monday evening last at the Toronto Club was not less worthy in both respects than any that had preceded it. Speaking of the increasing use by the Japanese navy and army of what they term "European food," that is bread and butter, which are replacing rice as foodstuffs for that nation, and of the facilities Canada has for supplying this want, His Excellency referred to the apparently immeasurable market thus opened for trade with the Orient. "We are on the eve of a growing demand for flour and wheat which will expand to enormous dimensions, first from Japan and later on from the great continent of which Japan is only the porch." That he has appreciation for the efforts that Canada has made towards self-development and world-trade is clear from the conclusion of his paragraph about the open door kept in Asia by the British fleet: "That you should have reclaimed so large a part of this mighty continent from the wilderness, and by your spirited railway and steamship enterprise been able to make Canada the natural route between England and Japan and between England and her great Australian colonies; that you should have given the lead in your preferential tariffs, in your preferential postal arrangements and your cable subsidies, with the object of binding the component parts of the empire closer together, is to have done much, and to have given a lead of which any people may reasonably be proud."

Quite evidently his knowledge of Japan is considerable, and his admiration for her hardly less great. He speaks of that empire as the land not only of the rising but of the risen sun, whose inhabitants have gleaned straws of knowledge from all parts of the earth, and have brought the Russian Goliath to his knees in the dust. And he has faith in the ability of Canadians, those "men of the Northern Zone," as our own Khan has sung them, to prevail in their own internal up-building, and in a future struggle for a large share of Pacific trade. But, Lord Grey reminds us, "it is well that we should guard against the danger of allowing the vulgarity of the swollen head to blunt the edge of our efficiency." In stating that he had been reminded frequently by our press, [he did not say, as the World reporter unfortunately got it, "reminded frequently by your Premier"] that a Governor-General should not interfere in our affairs, he nevertheless expressed the hope that the clash of race and creed conflict shall never be heard in Canada, and furthermore declared his conviction that "in the complete union between the two great races lies the secret and strength of your future." His Excellency concluded an admirable address with an earnest appeal to Canadians to "add to the great blessing of material wealth with which Providence and your own energies and the British Empire have endowed you, the still greater blessing which comes from the high average standard of noble and disinterested citizenship."

* * *

GRAIN SPECULATION AGAIN.

As in the case of Mr. Sully's "corner" in cotton a year or two ago, the more recent attempt on the part of the "Gates crowd" to raise prices to a fictitious level for May wheat has come to a disastrous end. Fortunately, the results of the latter attempt are not so far-reaching for evil as in the case of cotton, for the latter, besides being grown practically all in one restricted area, is a necessity for, perhaps, the largest manufacturing industry in the world. Wheat, on the other hand, is a staple growth of such a wide diversity of countries that a shortage can never be so great proportionately as in cotton. The chief sufferers in the present collapse are, generally speaking, the operators who were trying to engineer the deal, together with the more or less "outside" followers, who are always open to a gamble. The average price of May wheat for the last two months has been $1.15 per bushel. Saturday's crash brought it down to $1.05; since then 98½ cents has been taken, and the end apparently is not yet. The prime manipulators of this defeat of the corner have been the Armours, who, we suppose, with trustworthy agents knowing the West very thoroughly, have been in a better situation to gauge the real statistical position of wheat than the bull factors. The latter appear, as is quite frequently the case, to have miscalculated the ratio of supply and demand. As usual with the operators with whom "corners" are favorites, they forgot that any abnormal rise in price would be sure to bring about such a restriction in demand as would in its turn react on the price. Another thing to be remembered is that the higher the price the more pressure will be brought to bear on what may be called the hidden sources of supply. In any event, with such an elastic commodity as wheat the almost sure result to all but a very few manipulators who *happen* to be on the right side at the right moment, is ruin or disastrous loss. And meanwhile the whole system of exchange and option trading, in which there are indubitably great conveniences, and even benefit, is called into doubt and passes under suspicion.

The whole effect of such business operations as the one described is to shake to its foundations not only one market, but to unsettle all lines of finance, commerce and industry. Take, for example, the case of the bank president in Milwaukee who came to ruin through this cause. Little doubt exists, for instance, that the break in the New York stock market this week has been due largely to the slump in Chicago wheat. Perhaps values of the stocks affected had been allowed to become unsafely high, but that does not affect our statement that all such "rigging of the market" as has been indulged in lately by speculators in wheat has a strong tendency to cripple business and industrial prosperity. The course of the stock markets is only an indication.

* * *

STANDARD LIFE ASSURANCE CO.

Another yearly exhibit, the seventy-ninth, has been made by the Standard Life Assurance Company of Edinburgh, and the figures are handsome ones, as is to be expected of this old and strong concern. The company wrote new business exceeding eleven millions of dollars, and the total of its assurance in force at the 15th November last was $137,022,289. The company's revenue from premiums and interest amounted to $6,965,338, against which the claims by death were $3,530,844. The accumulated funds of the Standard at the close of its last fiscal year (November 15th), showed the striking aggregate of $55,094,925. Turning for a moment to the Canadian business of the company, for 1904, we find it to have been, by the Ottawa Superintendent's report, 872 new policies assuring $1,693,094, which was more than all other British life companies in Canada put together, and its net amount in force was $21.961,310. The Standard took in Canada in 1904 no less than $784,736 in premiums.

* * *

THE EQUITABLE LIFE'S AFFAIRS.

The unfortunate wrangle which has been going on between parties in the directorate and the management of the Equitable Life Insurance Society of the United States is one which must cause both pain and anxiety to all interested in life assurance. For it is not only the Equitable's business and repute which are affected by it, but the whole beneficent system of life assurance suffers injury in the esteem of numbers of persons who say: "This, we have been taught to believe one of the great companies; and yet we hear of its enormous funds being manipulated for the benefit of an inside clique, and here is Mr. Hyde paying back $60,000, which he says is profit on transactions with Equitable's funds." These are things in which he nor any one else but the policyholders had properly a right to profit. There must be, and we are glad to see that there is to be, enquiry into the real state of affairs. Nothing else will satisfy the public. A company with half a million policies out, representing fourteen or fifteen hundred millions, cannot permit suspicion of the integrity of its management any more than doubt of its financial soundness. Canadians have an interest in this company, for they hold 11,400 of its policies for twenty-three millions of dollars, and some two millions ($1,840,260) of its funds are deposited at Ottawa for the protection of Canadian policyholders.

A feature of the situation is the attitude of the agents of the Equitable in this controversy. In the management there appears to be an Alexander faction and a Hyde faction, president versus vice-president. But the agents of the society form a sort of third party. They come to New York to the number of one or two hundred, and at an excited meeting call upon Mr. Hyde, the vice-president, to resign. One might naturally wish to ask what they have to do with making such demand. And this is what Mr. Hyde does ask. But there is no denying the force of a united body of life assurance agents, who have done and can do so much to make or mar a great company's business. It was a significant concession to the power of the agents to find Mr. Tarbell, one of the vice-presidents, offering them an allowance of $4 per $1,000 insurance to compensate them for the trouble that this embroglio at headquarters is bound to give them. But we did not expect to find such a strong and important company making any such offer, apparently for the sake of conciliation.

* * *

OUR AUSTRALIAN LETTER.

The trade returns of New Zealand for 1905 show a reaction from the upward growth of the past nine years. The imports are shown to be £13,283,717, and exports, £14,748,348. This is an increase of imports of £500,242, and a decrease of exports of £262,030, as compared with the figures for 1903. There is still a comfortable surplus of nearly a million and a half of exports, but as it requires about two millions sterling to meet interest on public and private indebtedness, over and above receipts from abroad, New Zealand went a half million to the bad on the twelvemonth; so there are some stirrings of heart over the change. Next year there is likely to be some recovery in the exports, but not much, and a diminution of imports which will straighten matters up a little. New Zealand has a progressive Government which believes in borrowing and developing, and that policy must needs be followed by heavy importations.

The trade of Australia shows the opposite state of things. An immense surplus of exports over imports. The figures for two years are:

	1903.	1904.
Imports	£38,835,682	£36,956,419
Exports	49,730,164	57,544,859

The only state whose trade with different countries has not yet been compiled is New South Wales. With the principal countries the trade figures were:

N.S.W. Imports from Leading Countries.

	1903.	1904.		
United Kingdom	£6,651,820	£7,867,877	Inc..	£1,216,057
United States	2,779,590	1,579,345	Dec.	1,200,245
New Zealand	1,001,300	862,452	Dec.	138,848
Germany	811,950	819,267	Inc.	7,317
India and Ceylon ...	426,903	613,304	Inc.	186,401
Belgium	78,649	279,861	Inc.	201,212
Japan	127,474	182,912	Inc.	55,438
Hong-Kong & China.	184,029	137,432	Dec.	46,597
Canada	212,039	129,054	Dec.	82,985

It will be seen that there was a striking decline in the imports from the United States, the Argentine, New Zealand and Canada, due to the cessation of the demand for foodstuffs, and a large increase of the trade with the United Kingdom and the tea countries. Otherwise the trade was unchanged, except that with Belgium and France, which was due to transhipments of French goods in Belgium owing to the Marseilles strikes. Canada also failed to send timber and some fish, so that manufacturers in spite of disappointments must have fairly held their own.

Trade is brightening a little though the rainfall has been very irregular, particularly in New South Wales and Queensland. Last year it was generally much below the average. There is yet time for falls that will produce a good harvest.

In New Zealand trade is rather quieter and money scarcer. It may not pull up this year, but will soon unless there should be unexpected circumstances.

The city of Melbourne is gaining on Sydney as a distributing point for Australia and a manufacturing centre. This was not unexpected from the greater activity of its business men and greater freedom from industrial troubles to be found in Melbourne.

The Labor Party in Victoria is in opposition, but is a powerful opposition. It has apparently made a dead set on Mr. Tait, the Commissioner of Railways, who came from Canada, but so long as the present Government retains office he will get on, though he may be worried.

The "Miowera" has had to refuse some passengers this trip. all her space being filled. So are the next two steamers, which shows the need of better boats for the line during the Canadian summer at least. Many of those going to settle in Canada are people from the United Kingdom, who came here while friends went to Canada. The representations of the latter have led to the change of residence. The Government of Queensland and Western Australia are offering practically free grant lands. These are nearer than Canada. and the enquiries from farmers for information about Canada have diminished, and a majority of those going this month are skilled mechanics, though some want to settle on the land as soon as they are able to do so.

Sydney, New South Wales, F. W.
20th March, 1905.

* * *

SAO PAULO LIGHT AND POWER CO.

The enterprise of the capitalists, mainly Canadian, who established this important concern at the Brazilian city of Sao Paulo, the seaport of which is the well known coffee port of Santos, is meeting with encouraging success. The gross earning of the Tramway, Light and Power Company, which was $749,000 in 1901, has grown to $1,419,000, in 1904, while the expenses are lowered from $486,000 to $477,000, and the number of customers for lighting is trebled. The company's report, of which we publish a condensation, says with respect to 1905, so far: "From reports now in hand for the first three months of 1905, it appears that further remarkable increases are being realized. The gross earnings for these months show an increase of over $80,000, and the net income for each of said months is as follows: January, $101,500; February, $94,100; March, $103,000, a total of $298,600, equivalent to 12 1-3 per cent. on the capital, and an increase of $52,000 over the corresponding period of a year ago."

* * *

BANKING AND FINANCIAL.

The Royal Bank of Canada, which recently opened a branch at Vernon, in the Okanagan Valley, is said to intend opening at New Westminster and also at Mount Pleasant, in the district of Vancouver.

In making the announcement that Mr. Henry Kavanagh, K.C., of the late firm of Messrs. Branchaud & Kavanagh, in Montreal, has been appointed solicitor to the Trust and Loan Company of Canada, vice the late Mr. A. Branchaud, K.C., the Montreal Gazette remarks that the solicitorship of this company has now been continuously in the hands of one law firm or a member identified with the same, since its establishment in Montreal just 52 years ago.

The issues of the current year on the London market in new loans and new companies are unusually large thus far in 1904. They amounted, at 15th April, to £83,646,000, when at a like period of last year they were only £27,468,000. In the year 1902, however, there was a greater activity, since the issues went up to £81,529,000. Taking full calendar years, the variation since 1899 has been considerable. The issues in that year amounted to £165,500,000, which was an advance of 20 per cent. over the preceding; in the succeeding years they were £159,000,000; £153,000,000; £108,000,000, and £123,000,000. It deserves to be noted that among the issues which make 1905 bulk so largely thus far is one of £10,000,000 in exchequer bonds. The next largest amount of the week is £410,966 in Shawinigan Water and Power 5 per cent. bonds at 98.

The Canadian Gazette, of London, England, has the following about a banker's retirement: "Mr. Alexander Lang, who since January, 1903, has been the manager of the Bank of Montreal in London, has been obliged by ill-health to retire, for the present, from active business. All the bank's friends and a large circle of Anglo-Canadians will be at one in hoping that the contemplated rest and change will restore Mr. Lang to sufficient health to enable him to resume his career.

It became known on Monday last that Frank G. Bigelow, president of the First National Bank of Milwaukee, had been speculating with funds of the bank, and had lost a million and a half. He has made restitution to the extent of $300,000. The money was lost in the recent crash in the wheat market. But here follows what is enough to make one curse afresh the temptations and snares of the bucket shop or the speculative market. "He admitted that he had falsified the books of the bank to cover up the defalcation," and the assistant cashier has been removed, charged with being a party to falsifying figures in the bank's books to assist in covering up this defalcation of his superior officer. Unhappy wretches, both; the one trying to make millions where he was only worth paltry hundreds of thousands—the other risking his present position and his future reputation and usefulness in consenting to a lie.

Descriptions, more or less definite, have appeared in two Montreal dailies of new structures for banking purposes to be erected on St. James Street, in that city, by various banks. It is there stated to be the intention of the Bank of Commerce authorities to erect, probably in 1906, an extensive and handsome building on the Temple site, to be occupied in part, the ground floor at any rate, as offices of that bank. No such sky-scraping building as some of those recently built or projected on this narrow thoroughfare, but a stately, pillared structure of three stories, with Corinthian or Ionic columns, having a frontage of 110 feet, so say "those who have seen the plans" (drawn by a Toronto firm of architects, whose names are given), and to cost about $1,500,000. As to the Bank of Toronto, whose recent purchase of the Wilder property next their office has given it a frontage of 90 feet on St. James Street, that bank is credited with the intention of erecting a building of eight or ten stories. Then the Eastern Townships Bank "may" (this is the reporter speaking) move into the Metropolitan building a year hence, awaiting their own new building, probably of eight or ten stories, on which $300,000 is to be expended. The Royal Bank and the Light and Power Co., too, it is suggested, are debating new structures. We have enquired of the Bank of Commerce about its new building so circumstantially described, and the reply of the secretary is that "the reporter quoted has a lively imagination. . . . Nothing at all has been decided in the matter. The talk about 'those who have seen the plans' is pure moonshine." The Bank of Toronto informs us that the only portion of the story about their supposed intentions is the fact that they have bought some land on St. James Street in self-defence. No new building has even been discussed. From the Eastern Townships Bank there has not been time for a reply. But we have said enough to show how fine a story can be made out of a slender basis of fact. Both the newspapers quoted from are very respectable journals, one of them a particularly careful one. It is possible that some person or persons interested in booming real property on St. James Street has got hold of a clever reporter, who constructed out of his vivid imagination a whole row of tall buildings near Victoria Square.

A young lady recently presented a check for $500 at one of the large banking institutions and requested immediate payment. "But I don't know you," objected the cashier, doubtfully. "Oh, don't be silly," remarked the young lady in a business-like way; "give me the money. I don't know you either."

* * *

—The Montreal immigration officers claim that this year they are experiencing the greatest invasion of new comers they have ever known. They come by way of Halifax, St. John, and New York. A large proportion are Englishmen, ranging in age from 17 to 62 years, and the Montreal newspapers speak highly of their character and general appearance.

INSURANCE MATTERS.

The town of Morris, Manitoba, has just bought a chemical engine as an addition to its fire-fighting equipment.

We learn from Montreal that the Liverpool & London & Globe Insurance Company celebrated the occasion of the opening of their new building in London, Eng., on April 12th by a banquet at the Hotel Cecil. Mr. Richard Hobson was in the chair.

A capital illustration of the effect of fire upon unprotected iron work was afforded by the partial burning last week of the train shed of the new Wabash railway station at Pittsburg. Although the fire was comparatively slight sufficient heat was generated to so bend several of the large supporting girders as to compel their removal. It is estimated that the loss will amount to 20 per cent. of the insurance, although that figure may be increased should it develop that additional structural work was in any way weakened. But $35,000 of insurance is carried upon the station and train sheds, without a co-insurance clause, so that companies interested will pay rather heavily for last week's blaze.—Chronicle.

Reform must come soon now in English insurance law, says our Manchester correspondent. Feeling has been deeply stirred by the collapse of the Nelson Assurance Tea swindle. That company is in compulsory liquidation, and its assets in various parts of the country are being put to auction. The British Widows' Assurance Co., another snare for tea-buying wives, has also been declared insolvent. A mushroom crop of bond investment companies has accumulated, and the variation of their terms suggests that no highly scientific principles guide their progress. It is proposed to hold a Parliamentary enquiry into the soundness of these schemes, and the effect will be no doubt to kill or cure the deficients. Ill weeds notoriously thrive apace, and if sound insurance is to maintain its place in popular regard some steps must be taken to check the alarming spread of noxious and illusory schemes which misuse the name of thrift.

Referring to the announcement that after five months' consideration the Mutual Reserve Fund Life Association of New York has generously decided to pay £684 on a claim for £1,000, under the certificate of membership numbered 94,592, the London Review says: "This reduced settlement is made under the old game of assessment on policyholders for mortuary calls. The insured, during his lifetime, paid all the assessments called for, yet they deducted a large sum upon his death. Payments which began at £21 10s. rose in ten years to nearly treble that amount. In fact, in the Mutual Reserve Fund you literally do not know where you are. . . . We are in the same boat as our excellent contemporary, the Insurance and Financial Gazette, of Ireland, in regard to the Mutual Reserve. We have denounced it from first to last. We have, in a Pickwickian sense, cursed it up hill and down dale, and whether the Association does or does not say this is because it is not advertised in the Review matters not a row of pins. We always said it was a fungus, and like a fungus will perish. We always said it had legal justification for all it did, that people did not read the endorsements of the policy, and that the policy-holders did not know what they were doing. Mr. Harper and Mr. Burnham once talked to us for about half an hour in the usual silly style about building a brick wall across the office and separating the banking from the insurance business; we believe Mr. Sheppard Homans was quoted on this point. But we were obdurate, and things remained as they were."

* * *

—The Montreal papers are full of news items concerning the opening of St. Lawrence navigation, which now may be said to be in full swing. Several gulf steamers have already arrived, including the "Gaspesien" and the "Campana." The river above Quebec is now free from ice. The Allan steamer "Ionian," the first mail boat of the season for Montreal, has sailed from Moville. Her passenger list numbers 1,289, of whom 1,025 are immigrants.

—Figures illustrating the remarkable expansion of the city of Winnipeg are wired this week from that city as follows: Number of permits to erect buildings thus far in 1905 was 325; and the number of buildings, 716. In 1904 the number of permits to 25th April was 309, and the number of buildings, 464. The value of the new buildings up to 25th April, 1905, is given as $2,184,400, where at the same date in 1904 it was $1,598,550.

* * *

—According to a despatch from Fredericton on Monday the lumbermen of St. John river are depressed by the poor prospect of getting their logs out of the woods. There have been no rains this spring, and the thaw has been so gradual that there was no freshet for "stream-driving." Unless heavy rains come this week millions of logs will be "hung-up" in the streams, and the mills will be short of logs for the season's sawing at a time when the good price of pine makes mill owners desirous to cut all they can.

* * *

—The Toronto Railway Company has been fined $2,500 without appeal, for maintaining a common nuisance by operating their cars in a negligent manner and not having them fitted with suitable fenders. The judgment is a result of the death of Mrs. Eliza Ward, at the corner of Avenue Road and Dupont street, last June, through the backing of a car. The defence urged that as there was a fender on the car (in front!) all legal obligations had been complied with. A strange defence to be urged by a great corporation.

* * *

FOR GROCERS AND PROVISION DEALERS.

The British Columbia Rice Mills have started up operations in Victoria, and are grinding some five tons of rice per day for domestic consumption and export.

The Lake of the Woods Milling Company is reported to be making preparations for the erection of a flour mill in Montreal with a capacity of at least 4,500 barrels per day. Its plans include, too, the building of a number of additional elevators in the West.

The Provincial Fruit, Flower and Honey Show, for which the Department of Agriculture makes a grant of $1,000, will this year be held again in Toronto. It will be augmented by an exhibit provided by the Provincial Vegetable Growers' Association. The date on which it is to be held, which will be in November, has not been fixed yet.

The Ontario Sugar Company held their annual meeting in Toronto last week, and elected directors as follows: Hugh Blain, Robert Jaffray, Michael McLaughlin and W. J. Gage, of Toronto; E. T. Carrington and W. B. Rouse, Bay City; E. W. B. Snider, St. Jacobs; W. Smythe and J. C. Breithaupt, Berlin. The outlook for the beet sugar industry in Waterloo County was described as good, and the company has 800 acres of beets under contract more than at this period last year.

A WESTERN BOARD OF TRADE.

Those rustling Western people can show, and do show, examples to the folks in the East, who, though they may know just as much as the Western folk, are slower of translating their knowledge into action. For example, we recollect having heard from boards of trade in the East some suggestions as to practical development work on the part of such bodies; that is, the volunteering of someone, or the procuring of someone, by the board of a town or city to do work other than clerical work for the good of the town. And this has been done, though only rarely—for the work of our boards of trade is often narrow and too much hedged in by precedent. But here is the Board of Trade of Moose Jaw, in Assiniboia, west of Regina. In addition to their president, treasurer, and council, they have appointed an officer, designated a commissioner, whose business it is to make a weekly report to the board as to what commercial or industrial openings or needs there are in the town, and to take note of anything which transpires that may be to the benefit of its community. We are permitted to give to-day some extracts from a recent report of that gentleman, Mr. Hugh McKellar, bearing date April, 1905. It exhibits the restless, sanguine Western spirit:

"In looking over a few of the retail business houses in Moose Jaw I was surprised to find that there was no wholesale grocery house in the city. Goods have to be ordered ten days or two weeks before their arrival. It is necessary, therefore, for merchants to carry large stocks, and, even with the greatest precaution, a grocer may run completely out of some lines before the new supply ordered reaches him. Surely there is an opening here for an enterprising wholesale grocery man. Winnipeg will not always be the base of supplies for the new Provinces of Saskatchewan and Alberta. Train loads of goods will, in the near future, come right through Winnipeg, without breaking bulk, with extra cost of handling. The new Provinces will soon each double the population of Manitoba, new trading or business centres will be established nearer the place of consumption than Winnipeg is.

"Moose Jaw, the railway centre on the main line of the C.P.R., in the new Province of Saskatchewan, the terminus of the Soo line, where, as a divisional point, permanent improvements are being added from year to year, is naturally the place to attract wholesale houses to establish themselves. It is not necessary to enlarge on the subject. Business men can readily understand the proposition. I have only referred to a wholesale grocery. There are openings for other kinds of business just as well. I understand that the Massey-Harris Company is ready to establish a distributing warehouse here as soon as the switch railway line is put down and necessary property secured. The city has wisely reserved a block of lots on the proposed switch, to be given to wholesale houses that first establish themselves here.

"When we read Dr. Bryce's History of Winnipeg, and realize that within the past twenty-five years—in the lifetime of the present heads of wholesale houses—business has so increased, that from small establishments we have now those massive warehouses in the centre of Winnipeg, surely it is no risk for others to venture going west with the wave of settlement, and grow up with the new Provinces, as did Winnipeg wholesale houses."

* * *

DETROIT BOARD OF COMMERCE.

At a recent meeting of the Detroit Board of Commerce, the prevailing sentiment in the United States in favor of putting the responsibility of office upon the young and enthusiastic business men, rather than upon men of greater years and experience, was once more exemplified. It became necessary at that meeting to elect officers for the ensuing year; and the president, two vice-presidents, treasurer and secretary were chosen from among the younger members of the Board. These functionaries range in age from the twenties, in which class figures the secretary, to the thirties and forties, which periods of age embrace the other officers. Mr. C. F. Bielman, the president, is an energetic man of 46, well known in transportation circles. Mr. John N. Bagley, first vice-president, is a prominent manufacturer, and recently treasurer of the Board. Mr. George M. Black, who holds the office of second vice-president, a former resident of Toronto and of Windsor, Ont., is auditor of the estate of the late Senator McMillan. Mr. H. C. Potter, Jr., the treasurer, is vice-president of the State Savings Bank. And Mr. Starr Cadwallader has been made secretary in succession to Ryerson Ritchie, who has been chosen secretary of the new Chicago commercial body. We learn from the Detroit Tribune that "in connection with the election Director Black did an extremely graceful thing. The first vote for president was between him and Mr. Bielman. Mr. Black at once arose and pleaded his already large responsibilities as an excuse for non-acceptance of the honor."

* * *

PARRSBORO BOARD OF TRADE.

At a meeting of the Board of Trade of Parrsboro, Nova Scotia, held recently, Mr. E. Gillespie was elected president of the body, and Harvey MacAloney secretary-treasurer. The board appears to be principally concerned with railway business just at present.

* * *

AMHERST, NOVA SCOTIA.

The town of Amherst, N.S., is one of the best all-around towns in the Maritime Provinces. It has become noted for the number of successful enterprises which have been started there. It is in a good district, and its manufacturing facilities are first-class. Its great drawback has been the poor nature and equipment of its hotels, which have caused commercial men and others to make their stay in the town as brief as possible. Recently the hotelkeepers of the place were fined for selling liquor without license, and in an attempt at retaliation closed their houses to the public, as was noticed in our columns. Travellers have since that time been entertained at boarding houses and private homes of Amherst. Now, the mayor of Amherst is advertising in the name of the town for a capable hotel man who has ten to fifteen thousand dollars to invest in a hotel there. The balance of the capital necessary will be raised by Amherst people. The move is a necessary one. No town can get along in these days without hotels. We hear, further, that a number of capitalists in Amherst are organizing a company with a capital of $250,000 to start a carriage factory, taking over the business of A. S. Fillmore and the Canadian patents of the Hillcoat Bearing Co.

* * *

OUR HALIFAX LETTER.

There has been a heavy falling off in apple exports from Nova Scotia this year. From Halifax up to April 1st the exports of 1905 were 359,021 barrels, against 523,245 barrels last year. The general opinion seems to be that the shippers in this Province have been holding their apples back for better prices. For some time apples were almost impossible to get in this market. Then they suddenly became plentiful again, and exports recommenced. While the crop of apples in this Province last season was considerably damaged, which affected its quality, it was generally understood that the quantity was large. In this case there must be a quantity of apples still in the hands of the growers.

The Provincial Government has decided to extend its aid to the farmers of Nova Scotia in order that they may secure seed grain on easy terms. As already mentioned, the hay and grain crops in many counties of the Province were almost complete failures. The farmers have had to expend what ready money they had for fodder during the past winter, and in order to make it possible for them to secure seed now the Government will empower municipalities to borrow money on the request of districts to buy

the seed required. The price of the seed becomes a lien on the land of the purchaser. The loan must be paid in two years.

The pipe foundry at Londonderry iron mines has been re-opened, and the blast furnace will begin operations about the middle of May. The heavy snow of the past winter has interfered seriously with the operations of the company, but it is believed that the experimental stage is now passed, and success is assured.

After years of farcical operation under the Halifax liquor license law the Provincial Legislature has at length made a change. The law has been that no liquor might be consumed on the premises where sold, and no one might buy less than a quart! In a city where there are 120 licensed premises there was, of course, no attempt made to keep such a law, and it was also broken flagrantly in regard to selling on Sundays and after the legal hours. The new Act does away with the above-mentioned ridiculous clauses, and further provides that the hours shall be 7 a.m. to 9 p.m. on Saturdays, and 7 a.m. to 10 p.m. on all other days excepting Sundays, when no liquor shall be sold except to guests to be consumed at meals in the public dining-room between 1 and 3 and between 5 and 7 o'clock in the afternoon. License fees have also been increased considerably, hotels of seventy-five rooms or over paying $500; shops, $200; wholesale licenses, $500. Unless the new laws are enforced by the Halifax police it is probable that the Legislature will appoint a commission to deal with the matter. The better class of liquor dealers show a desire to have the new law observed. The new laws will mean about double the revenue to the city now received from this source.

A bill to tax the Halifax Tramway Company four per cent. on its gross earnings has been killed in Committee in Council after passing in the Lower House. This was due chiefly to an error in the bill. The tram company now pays on its tram earnings, but not on its lighting earnings, although the city formerly derived a revenue from the lighting company, which has since been amalgamated with the tram company.

The labor trouble at Springhill had scarcely been arranged when another and more violent disturbance broke out at the coal mines at the Acadia mine, Westville, Pictou county, where the men have been out for a couple of weeks now. The trouble arose over a dispute between a stableman and a manager regarding the cleaning of a horse. The manager discharged the man, and the man's lodge of the Provincial Workmen's Association ordered a strike. It need hardly be said that there is not much sympathy with the men who go on strike for a cause such as this. Should the engineers and fanmen be called out, the matter would become serious, as the mine would probably fill with water and be ruined.

The secretary of the Sydney Board of Trade has received a communication from a large shipbuilding concern at Bath, Maine, relative to the prospects for starting a plant and drydock at Sydney.

Extensive alterations have been going on at the Dominion Coal Co.'s mines, and the coming summer the entire seven pits will be working in full swing. All the bankheads have been lowered several feet to secure larger coal. A great deal of new machinery has been installed, and shearing will be much employed instead of blasting. The company's fleet will consist of fifteen large steamers.

Pretty nearly all the boards of trade in the Maritime Provinces have considered and endorsed the proposal from Prince Edward Island that a tunnel should be built between that island and the mainland. It is considered perfectly feasible, and undoubtedly necessary.

⁂

HALIFAX BOARD OF TRADE.

At the quarterly meeting of the Halifax Board of Trade on April 11th, the last meeting in the old quarters, which the board has occupied for over twenty years, was held. The president, James Hall, reviewed some of the work done in the past three months, which has already been touched on from time to time in this correspondence. Since the first of February fifty-two new members have joined. The Retail Merchants' Committee is now organizing a Merchants' Week, to be held during the Musical Festival, from May 13th to 20th. The members, at the conclusion of the business meeting, the last in the old rooms, joined hands and sang "Auld Lang Syne" in hearty fashion. The board is now in the new rooms, above the I.C.R. ticket offices, on Hollis Street. The rooms have been constructed especially for the occupancy of the Board of Trade, and are admirably fitted and furnished. The new quarters will undoubtedly give a great impetus to the work of the board, which, since the "Forward Movement" has been started, has vastly increased in usefulness, popularity and membership.

⁂

GUELPH BOARD OF TRADE.

The annual meeting of the Board of Trade of Guelph, took place on the 18th inst., the attendance of members being quite satisfactory. The old officers were re-elected, as follows: G. B. Ryan, president; J. W. Lyon, vice-president; James Watt, secretary-treasurer. The question of advertising the city for manufacturing and other requirements came up and was fully discussed, and a committee was appointed to take the matter in hand more earnestly. It was resolved, as the city's contract with the Bell Telephone Company expires next July, that it was not expedient for the contract to be renewed, seeing that a committee of the Dominion Parliament is now enquiring into all the facts connected with telephone ownership, operation, cost of service, etc., and that other cities are finding out the advantages of municipal ownership. The secretary-treasurer's report showed that a very satisfactory degree of interest had been shown by Guelph business men during the year in the meetings of the Board. He stated, too, that the Board's efforts on behalf of better efficiency in the railroad freight service had been rewarded frequently by success.

⁂

PRESTON BOARD OF TRADE.

The first annual meeting of the Board of Trade of Preston, Ont., took place on the 17th inst., the chairman being Mr. George Pattinson, M.P.P. Some encouraging reports were read and adopted. The officers elected for the ensuing year are as follows: President, George Pattinson, M.P.P.; vice-president, C. Dolph; secretary, A. D. Pringle; treasurer, Frank Moss. The council is composed of F. Clare, C. E. Yates, S. J. Cherry, F. Moss, C. R. Hanning, Otta Homuth, Z. A. Hall, J. K. Hall, and H. J. Kindson. The various committees of the Board were re-elected.

⁂

NAPANEE BOARD OF TRADE.

Napanee business men have felt for some time past the necessity for organizing some body, the duty of which will be to look after the commercial interests of the town. Therefore, they met together on the 10th instant for the

purpose of forming a Board of Trade. Many subjects of local interest were discussed at the meeting, and eventually the following officers were elected for the first year: President, John W. Robinson; first vice-president, J. L. Boyes; second vice-president, J. L. Madill; third vice-president, F. E. VanLuven; secretary-treasurer, W. T. Waller.

* * *

WINDSOR BOARD OF TRADE.

A complimentary banquet was given to the Ontario Minister of Public Works, Hon. J. O. Reaume, by the Windsor Board of Trade on Monday last, which was attended by a hundred guests from various parts of Essex County. A present was made to Dr. Reaume of a handsome silver set. The presentation of the set was made by E. G. Henderson, while the address was read by W. C. Kennedy, secretary of the Board of Trade. Mr. G. V. J. Greenhill, president of the Board of Trade, presided, and among those present were Hon. R. F. Sutherland, Speaker of the House of Commons; Hon. Adam Beck, A. H. Clarke, M.P.; Mayor E. S. Wigle, Louis Wigle, ex-M.P.; Robert Henry, ex-M.P., and representatives of all professions in the city of Windsor.

* * *

LAND VALUES IN WINNIPEG.

Referring to our comments on the statements made by Mr. Orde, of Winnipeg, as to land values in Winnipeg, a correspondent in that city sends us some particulars as under: "The Bank of British North America property cost $1,500 a foot in 1902, and would bring over $2,800 a foot to-day. Only last week the Bank of Commerce bought 25 feet just north of their present premises on Main Street, directly opposite the Bank of British North America, and paid $2,800 a foot for it, according to the newspaper; and property on the B.N.A. side of the street is now worth 25 per cent. more." We may explain that Mr. Orde, in speaking to the reporter of a Montreal daily quoted prices per square foot, as is the custom of real estate dealers in that city, instead of per foot front, which latter method our Winnipeg correspondent uses. Perhaps Winnipeg business men, especially real estate dealers, may believe in the reality of such values for land, and even in their increase. And they would doubtless resent being told by any one from "the slow-going East" that they are excessive. But it ought not to offend any thinking man to be reminded that there has been a "boom" in Winnipeg before to-day, and that many promising fortunes were lost by it.

* * *

THE SAO PAULO TRAMWAY, LIGHT AND POWER CO., LIMITED.

Report of Fourth Annual Meeting, held Tuesday, April 25th, 1905.

Your directors beg to submit to the shareholders their annual report, together with the financial statement for the year ending 31st day of December, 1904.

The gross earnings of the company during the year amounted to $1,419,338.50, as compared with $1,303,175.10 for the previous year, an increase of $116,163.34.

The net income, after deducting all expenses and fixed charges, amounted to $648,000.66, which, compared with $612,543.33, in 1903, shows an increase of $35,457.33.

Out of the net profits there have been declared and paid one quarterly dividend of one and one-half per cent. at the rate of six per cent. per annum, and three quarterly dividends of two per cent. each at the rate of eight per cent. per annum, aggregating $520,027.44, leaving the sum of $127,973.22 surplus to be carried forward.

The total expenditure on capital account during the year amounted to $605,405.37.

STATISTICAL STATEMENT.

Earnings and expenses converted into Canadian currency at average rate of remittances each year:

Correct. J. M. Smith, Secretary-treasurer.

President's Remarks.

In moving the adoption of this, the fourth annual report of the company, I do so with much pleasure. I am sure it is gratifying to all shareholders that the business for the year has shown such increase over previous years as is recorded in this report.

It will be noticed that in the short space of four years the gross earnings of the company have increased 100 per cent. The net earnings are now nearly $200,000 over the gross earnings of 1901, and 260 per cent. greater than the net earnings for that year.

From reports now in hand for the first three months of 1905, it appears that further remarkable increases are being realized. The gross earnings for these months show an increase of over $80,000, and the net income for each of said months is as follows: January, $101,500; February, $94,100; March, $103,000, a total of $298,600, equivalent to 12 1-3 per cent. on the capital, and an increase of $52,000 over the corresponding period of a year ago.

The power department is steadily increasing. At the present time we have on order fifty motors of varying sizes, aggregating 596-h.p., and our representatives at Sao Paulo are confident of steady increase in the lighting department.

I therefore have much pleasure in moving, seconded by Mr. E. R. Wood, the adoption of this report. Respectfully submitted,

Wm. Mackenzie,
Toronto, 25th April, 1905. President.

IMPROVEMENTS MADE DURING THE YEAR.

Among the many improvements made during the year were the following:

About 300 linear feet of breakwater and retaining wall were constructed along the river banks during the year, and a number of improvements were made at Parnahyba, the site of the hydraulic plant.

In the city there was erected for light and power purposes thirteen miles of primary and twelve and one-half miles of secondary wires. The increase in the number of lamps installed during the year was considerable, while the income from power business amounts to 35 per cent. more than in 1903.

The condition of the city is being improved right along, while all the large expenditures made by the city are provided for out of ordinary revenue, which speaks well for the administration of the city.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

A boot and shoe dealer, named J. F. Neary, at Kentville, Nova Scotia, is reported as offering his creditors 50 cents on the dollar.

J. D. Ross, carrying a limited stock of groceries at Sayabec, in Rimouski county, Que., has put his affairs into the hands of Lefebvre & Taschereau, assignees, Quebec.

The firm of C. Dignard & Co., manufacturers of biscuits, etc., Montreal, whose failure we noted some weeks ago, are now offering 25 cents on the dollar, cash. The liabilities reach somewhere about $60,000.

A company is said to be in course of formation in Montreal with a capital of ten or more millions for the purpose of building from 300 to 500 elevators in different parts of the North-West Territories. They are to be of the most modern type.

The Ottawa Stone Company has been formed with a capital of $30,000, to make and deal in cement, lime, crushed stone, etc. The parties are Honore Robillard and Thos. G. Brigham, lime dealers; Wm. Earl Hayes and Polk J. Delaney, bookkeepers, all of Ottawa.

Five years ago Chas. Thibault began keeping a general store at Ste. Anne des Monts, Que., with some little experience as a merchant, but a limited capital. Latterly he has shown signs of financial strain, and at a meeting of his creditors, held in Quebec last week, he made an offer to them of 75 cents on the dollar, which he has since amended to 60 cents. His liabilities are reported at about $4,500; assets not stated.

Wallot's Block in Valleyfield, Que., was on the 20th inst. destroyed by fire. The principal sufferers were N. Wallot, book and stationery store; La Salisberry, job printing shop; Macdonald & Robb's flour and feed store, Bell Telephone and G.N.W. Telegraph office, McAvery & Astle's law office, W. Poitras' law office, Boyer's notarial office. The total loss is believed to be about $18,000, partly insured. On the same day R. P. Butchart Bros.' iron warehouse in Owen Sound was burned at a loss of $10,000, partly covered by insurance.

The south wall of the Louise dock around the river basin at Quebec gave way on Thursday of last week, involving a loss to the Dominion Government of at least $20,000. The cave-in occurred within some few hundred feet of the cross-wall which divides the inner and outer basins, and extends 300 feet in length. The facade, built of solid masonry, has worn a bulged appearance for some years past, but it was never suspected that this defect would end seriously. When the wall fell into the water thousands of tons of earth followed it for a space of twenty-five feet from the wall, and displaced the railway tracks along the surface of the embankment. The accident, fortunately, does not interfere with shipping in the docks, and can be repaired.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

The Gananoque Bolt Company, Limited, has been granted a Dominion charter authorizing it to manufacture bolts, nuts and railway hardware. Its share capital is placed at $125,000. W. T. Sampson and E. L. Atkinson, of Gananoque, are among the members.

Mercantile Summary

The Montreal and Lake Superior Navigation Company, of Hamilton, are having built in Scotland a packet freight boat of 3,600 tons.

An assignment has been made by Philippe Duchesneau, dealing in groceries, provisions, etc., in a small way at St. Tite, Que., after his compromise proposition at the rate of 20 cents on the dollar had been offered and declined. He began business three years ago, and had previously been a day laborer.

Insolvency proceedings have been taken in the matter of L. Getz, who came from Russia several years ago, and started peddling about Lambton, in Beauce county, Quebec, ultimately establishing a store with a moderate stock in that village. He has been reported slow pay of late, with one or two suits taken against him by Montreal houses.

The Montreal Street Railway Company has voluntarily decided to increase the pay of a large number of its employees. All motormen and conductors who have been in the company's employ for five consecutive years will receive 19 cents per hour instead of 18 cents as at present. This will mean an additional $50,000 per year to the company's pay-roll.

We acknowledge receiving, through the courtesy of Mr. W. Wallace Bruce, manager of the Newmarket branch of the Sovereign Bank, a copy of the last issue of the Newmarket Express. It does credit to the publisher, Mr. J. D. McKay, and his staff. The issue is one of twelve pages, four of which are on better paper, and contain eleven half-tones, cabinet size, of local people, among them Mr. T. Herbert Lennox, M.P.P., and a picture of the Sharon Temple.

Napoleon Pomerleau, a farmer, of Audet, Que., being desirous of engaging in mercantile business, recently bought the fag end of an old stock of general goods, and, knowing nothing of merchandise values, paid the fullest price for it. To-day his affairs are in the hands of J. P. Royer, accountant, of Sherbrooke, and he is doubtless a sadder, but possibly a wiser man, with altered views of the "easy life" led by the retail merchant. May he also be vouchsafed the sense to see that farming is not an occupation to be either neglected or despised.

The firm of Marion & Marion, patent attorneys, Montreal, report the following Canadian patents recently secured through their agency: 92,427, Edmond N. Cusson, Montreal, cigar box; 92,433, Eugene S. Manny, Montreal, water heater; 92,457, Douglas J. MacLean, Montreal, drying apparatus; 92,476, James Drain, Peterboro, filing case; 92,580, Norbert Chapdelaine, Montreal, clamping tool; 92,632, George Klinck, Elmira, harrow; 92,633, Hermas LaRose, Vercheres, frames; 92.708, Robert H. Cobb, Rat Portage, tell-tale; 92,728, Murdock E. Sutherland, Westville, N.S., rifle sight.

Mercantile Summary.

The Metallic Roofing Company, of Canada, Limited, Toronto, has been authorized by Government to increase its capital stock to $200,000.

The Rideau Lakes Navigation Company propose to put a freight service on the Rideau route between Kingston and Ottawa this season.

W. C. Harrison's saw-mill, shingle mill and electric light plant at Norwood, Ont., have been completely destroyed by fire at an estimated loss of $8,000; not covered by insurance.

The steamers plying between Toronto and Hamilton and St. Catharines have been doing an exceptionally large business for a week or two past, and have been loaded with freight almost to their capacity.

Mr. R. S. Chilton, Jr., of Washington, D.C., took charge of the United States consulate a week ago, in succession to Mr. E. N. Gunsaulus, who goes to Cork, Ireland.

The firm of Parker & Co., real estate and mining brokers, for so long doing business at 61 Victoria Street, have moved into new and more commodious offices at 23 Colborne Street, in this city.

John Cowan Company, Limited, Montreal, is the name of a company recently organized under Dominion laws for the purpose of making and selling chemicals, dye-stuffs, cements, minerals, fertilizers, etc., and of acquiring other businesses of this nature. R. L. Gaunt, of Westmount, and Chas. Adams, of St. Lambert, are interested.

The Montreal Cement Company, Limited, capital stock $500,000, headquarters at Montreal, has received a Dominion charter authorizing it to take over as a going concern the cement manufacturing and selling business of T. M. Morgan at Longue Pointe, near Montreal, to purchase or lease cement lands, etc.

The Atikokan Iron Company, Limited, Toronto, capital stock $1,000,000, has been granted a charter by the Dominion Government. It will prospect for and develop mineral properties, acquire mines, build dams and sluices, etc. J. S. Lovell, accountant, and Wm. Bain, bookseller, of Toronto, are among those mentioned as the incorporating members, but the real parties are of much heavier metal.

We note some new companies in Nova Scotia. The Woburn Steamship Company, Limited, headquarters New Glasgow, N.S., capital $48,000, as freighters and common carriers of passengers, merchandise and mails. Also the Wasis Steamship Company, Limited, capital stock $18,000, headquarters also New Glasgow. Both of these companies have the same charter members, who are George Stairs, of Halifax, and James Drummond McGregor, James Carmichael McGregor, Thomas Cantley, George Forrest McKay and Harvey Graham, all five belonging to New Glasgow.

Mercantile Summary.

The shareholders of the Canada Atlantic Railway Company will hold a special general meeting on the 16th prox. for the purpose of authorizing the directors to issue bonds, debentures, or other securities not to exceed £3,292,200 sterling.

Mr. Owen N. Evans, solicitor of patents, Montreal, reports the following United States patents granted to Canadians: 787,352, artificial tooth, C. T. Campbell; 787,423, feeding mechanism for sawmills, F. E. Woodworth; 787,606, preserving jar, J. C. Anderson; 787,778, wrench, C. C. Longard; 787,869, making refractory bodies, E. G. Acheson.

L. H. Higgins & Co., of Moncton, N.B., large shoe jobbers, who, as already mentioned, purchased the stock of W. H. Redding & Sons at Yarmouth, in that Province, have purchased the building and plant, and will operate the factory. They have also bought the contents of the tannery, and may buy the building later.

The Grand Trunk Pacific Railway Company is making plans for the expropriation of property on Kai Wan Island and other localities on the coast of British Columbia. The property on Kai Wan Island is an Indian reserve. The plans are expected to be approved this week by the Government. They do not disclose where the Grand Trunk Pacific terminal is to be.

The Dominion Government is calling for tenders for a monthly service between Cuba and Canada. This new call for tenders is the outcome of the negotiations between the Mexican and the Canadian Governments for a monthly service between the Dominion ports and Mexico, and which fell through by reason of that republic objecting to the steamers making a call at the Cuban ports.

It is stated by a St. John paper that during the past few weeks fully six hundred families have left the Maritime Provinces for the West of Canada, and more are to follow. These six hundred families represent probably fourteen or fifteen hundred persons. Albert County, Charlotte and Carleton seem to have sent the greatest number. Since the ice has been broken up in the straits of Northumberland, a number of Island people have come across. Of Western points Northern Alberta seems to be the most favored.

The Ontario Library Association, at their convention in Toronto on Tuesday last, elected officers as follows: President, W. J. Robertson, B.A., St. Catharines; first vice-president, W. Gurd, Sarnia; second vice-president, Albert Sheldrick, Chatham; secretary, E. A. Hardy, Toronto; treasurer, A. B. McCallum, Toronto; executive councillors, James Bain, D.C.L., of Toronto; A. W. Cameron, of Streetsville; Rev. A. Bradley, of Berlin; J. P. Hoag, of Brantford; W. Tytler, B.A., of Guelph; W. K. T. Smellie. A topic for lively discussion was how to obtain from the Government a more generous treatment of the smaller public libraries.

Mercantile Summary.

Montreal Power, Heat and Light Company has declared a dividend of 1 per cent. for the quarter, payable on May 15th.

Messrs. Gourlay, Winter & Leeming, piano manufacturers in Toronto, are establishing a business and ware-rooms in Winnipeg.

A dispatch from Vancouver says that Mrs. S. A. McLagan, president and manager of "The World," of that city, has sold her interests to V. W. Odlum and L. D. Taylor, the price, it is said, being $75,000. The latter, it is stated, will put in great improvements, and turn out an enlarged paper.

It is announced at Rossland that the Cliff mine, which has been closed down for a year or more, is about to resume operations. It is said to possess extensive ledges of ore of a paying grade. A spur railroad is to be built to the C.P.R. from the mine.

Shipments of ore from Rossland district, B.C., last week were: Le Roi, 2,525 tons; Centre Star, 2,080 tons; War Eagle, 1,170 tons; Le Roi, No. 2, 150 tons; Jumbo, 200 tons; Spitzee, 270 tons; total for the week, 6,395 tons, and for the year, 108,932 tons.

The Bessemer and Barry's Bay Railway Company propose to issue $100,000 worth of bonds for the construction of five miles of line northerly from L'Amable, which is in Hastings county, north of Marmora.

It is satisfactory news to hear that the ice-breaking vessel, "Montcalm," has now escaped from the ice, and is safely moored at her wharf in Quebec. She has received practically no damage to her hull or engines.

The Dominion Government has just completed arrangements for sending the steamer "Neptune" north on another Hudson's Bay expedition under charge of Commander A. P. Low. This time, however, an earlier start will be made, with a view of investigating the ice conditions in Hudson's Trail during the spring. She will sail from Halifax on the 1st of June, the earliest date of departure of any Government expedition yet sent into northern waters. She will carry supplies for the Canadian steamer "Arctic," which wintered at Cape Fullerton, on the west coast of Hudson's Bay. After that the two vessels will perform a summer patrol, the "Neptune" probably striking north again to the entrance of Barrow Strait, where the conditions seemed so favorable last August for making the north-west passage.

The Peoples' Savings Increase.

Ten years ago, on December 31st, 1894, the Assets of the Manufacturers Life amounted to $821,320.00. On December 31st, 1904, they had increased to $6,112,344.00.

Such remarkable progress is not only creditable to the Management during that period, but proves this Company to be one of the best companies in Canada with which to place life insurance.

The last Annual Report demonstrates the wonderful success of the Company in 1904.

A copy can be had by applying to any of the Company's Agents, or to

The
Manufacturers Life
Insurance Company,
Head Office, Toronto.

The Government of the North-West Territories has granted a charter to the Calgary Building Society, Limited.

The Dominion Government has bought a corner property in Owen Sound on which to erect a building for inland revenue, post office, and customs office purposes.

The Canadian Pacific Railway freight sheds at Moose Jaw, Assa., were on the 25th inst. destroyed by fire, including a large quantity of freight and effects, at a loss of $20,000.

The Federal Government has disallowed the recent legislation by the British Columbia Parliament restricting the immigration of Japanese and their employment on public works and in coal mines.

The Dominion Department of Marine will shortly call for tenders for facing 4,000 feet of the pier at Port Colborne, with cement. The estimated cost is $20,000.

The village of St. André, in Kamouraska County, Quebec, was on Tuesday morning almost completely destroyed by fire, including the Desjardines Company's stove foundry and carriage factory. The loss is figured at nearly $30,000, with only small insurance.

A new dam has just been built by the Dominion Department of Public Works at Poupore's Village, near Buckingham. The old dam, it will be remembered, was washed away when the landslide occurred a year or so ago.

Dr. R. L. Botsford, of Moncton, is about to establish a sanitarium for the treatment of tuberculosis. A suitable spot is being selected. The institution will be placed close to Moncton, on a plot of land containing over 200 acres, at an elevation of about 800 feet.

The Miracle Pressed Stone Company, which has numerous plants at various points in the United States for the manufacture of concrete blocks for building purposes, proposes to establish a factory in Canada. Mr. H. W. Hogue, of Toronto, is the company's representative in Canada.

The Canadian Pacific Railway announces further particulars of the two new steamers it intends putting on the Atlantic route next summer. They are expected to make their maiden voyages early in the summer next year. Montreal will be the summer port, and St. John the winter port. They will be 570 ft. long with beam 65 ft., and hold 40 ft. deep, and will be fitted with quadruple expansion engines of the reciprocating type.

On the 18th inst. a terrific explosion occurred on board the Government vessel "Scout," at Kingston, Ont. An acetylene gas generator in the stern of the boat had just filled two huge buoys on the dock, and was engaged on a third when, in some manner, the gas exploded. Two of the buoys were hurled into the air, and in an instant the boat was a mass of flames. Three of the crew were killed instantly and several injured. Thousands of windows were broken in the vicinity. The boat was practically destroyed at a loss of $50,000.

Hamilton city council will ask the Legislature for power to issue debentures for $100,000, of which $20,000 will be used to extend water mains, etc., and $80,000 to pay the city debt.

The Boundary district, B.C., mines have made a large increase in their shipments of ore so far this year, while the smelters have also largely increased their output. In January the ore shipments amounted to 68,074 tons; in February the total was more than 30 per cent. more, or over 72,000 tons; in March another decided advance was made in tonnage output, being 90,000 tons, or 25 per cent. more than for February. The rate for March, if kept up for twelve months, would give a total output of over 1,000,000 tons for 1905. The total output for the district mines for the three months is in excess of 230,000 tons, or an estimated value of more than $1,000,000, all of which with few exceptions, came from what are known as low grade mines.

It is stated that the Ontario-Niagara Power Company has sold to manufacturers, and others in New York State, 60,000 horse-power per year for a period extending into 1950 with renewal rights for sixty years more. The company is to develop 125,000 horse-power, and is within its rights, according to the agreement with the Canadian Government, to export one-half of this.

WHOLESALE HOUSES.

TORONTO MARKETS.

Toronto, April 27th, 1905.

Drugs, Chemicals, Etc.—While no very striking feature presents itself for notice in the drug trade, local business circles may be said to be experiencing seasonably good conditions. Quinine still hangs fire, notwithstanding the recent decline in price. Opium is in large supply, though in primary markets considerable damage to crops is reported. Carbolic acid and Jamaica ginger have advanced slightly, while vanilla and nutmeg are easier. Cod-liver oil is also easier. Bromides are in fuller supply. Camphor is a little lower to meet the Japanese competition.

Flour and Grain.—Dullness prevails in the flour trade. Ninety per cent. patents are selling around $4.35 to $4.40. Manitoba is steady. The prices of bran and shorts are still very stiff. Wheat has made quite a slump since last report, owing to the sudden fall in May options in Chicago. Two to three cents is the drop in the local market on all grades. Other grains continue practically the same. Oatmeal is not quite so firm as it was.

Groceries.—Business is more active with the opening of navigation, and its volume is fully up to average for this time of the year. Payments are better than they were from the country districts. There is no further change in sugars, and there is some cessation of interest in it. Rice, tapioca, and spices are in normal request. Canned goods continue in very great strength. Coffees are quite firm.

Hardware.—In no line of trade has the opening of navigation exercised a more invigorating influence than in the hardware, both shelf and metal branches. Wholesalers report a highly satisfactory influx of orders, and they are sufficiently rushed in making shipments. Builders' and plumbers' supplies are in particularly good demand, and the season promises very well. Iron is beginning to make good movement, and it, as well as other metals, are held at steady prices.

Hides, Skins and Leather.—Sheepskins are now quoted at $1.25, and this is about the only change in market conditions since last report. Hides are steady in price, but there is no feature of particular note. The leather trade is rather unsettled as to prices. In volume it has been fairly good, but scarcely up to expectations.

Provisions.—Butter is coming in more freely, but there is not much change in quotations. Cheese is firm at 12 to 12¼c. Potatoes are easier with more abundant receipts. The demand for eggs is slackening somewhat, but the receipts are fully as or more abundant. In sympathy with advancing prices for live hogs, smoked meats and such products are firmer in value.

Live Stock.—While butchers' cattle were in good demand at this week's market, exporters were less keenly wanted, and prices for the latter were a little easier. For butchers', in some cases they ranged a few cents higher. Stockers and feeders were quiet. Calves are coming in in large quantities, and their quality, as a rule, is not super-excellent. Values are dwindling therefore. Sheep and lambs sell less freely.

DELAYS ARE DANGEROUS.

⁂

MONTREAL MARKETS.

Montreal, 26th April, 1905.

Ashes.—Offerings from makers continue to be very light, and as there is now some enquiry for export, values are firm. We quote $5.50 for good tares of No. 1 potash; seconds, $4.95 to $5; pearls, about $7.25 to $7.50, though there has been really no late business in the last-named line to establish definite figures.

THE STANDARD LIFE

ASSURANCE COMPANY.

Seventy-Ninth Annual Meeting.

The following results for the year ended 15th November, 1904, were reported:

5,466 policies were issued during the year, assuring....	$11,844,196 47
The total existing assurances in force at 15th November, 1904, excluding bonus additions amounted to	137,022,289 67
The claims by death during the year, including bonus additions, amounted to ..	3,530,844 53
The claims under endowments matured during the year, including bonus additions, amounted to	531,279 40
The revenue for the year from premiums and interest, amounted to	6,965,338 80
The amount received in purchase of annuities during the year, for which 162 bonds were issued, was ...	672,768 00
The accumulated funds at the same date amounted to	55,094,925 00

Showing an increase during the year of $1,491,915.60. The average rate of interest earned was reported to equal 4.17.

AGENCIES THROUGHOUT CANADA.

Cements and Firebricks.—Business in cements continues to improve, and for firebricks there is still good demand. Wharf prices are not yet in effect, and we quote from store as follows: Belgian, cement, $1.70 to $2.10; English, $2.05; American and Canadian, $2.30 to $2.40, less rebate for returned packages; bricks, $18 to $23 per thousand.

Dairy Products.—Some moderate offerings of new fodder cheese are now reported, which are stated to be realizing 11 to 11½c.; old stock of prime quality is steadily held at 12 to 12½c. Receipts of butter show material increase, and since last writing there has been a steady and notable decline in values, from 19½ to 20c. being the present outside figures for choice creamery.

Dry Goods.—With the somewhat more pleasant weather of the last day or two, an improvement is noted in the activity of city retail trade, but the volume of Easter shopping this spring has been distinctly disappointing. In the wholesale trade sorting orders are coming in rather better. General collections are just about fair. With regard to values nothing new is reported.

Groceries.—Though the country roads are now fairly settled, and river steamers are running to down-stream points on the river, the movement in this line of trade does not show any material increase, and there is complaint that applications for renewals are quite frequent. Prices show few changes. The sugar market rules about steady at quotations of last week,

with jobbers buying in moderation. Cables from Barbados advise a decline of 2 to 3c. in molasses, but the local jobbing price for single puncheons is maintained at 40 cents. Teas are again quiet, with China and Japan goods offering at easy figures. Ceylon greens are reported distinctly firmer.

Hides.—Business in beef hides has been quite slack for the past week or two, but there has been no easing off in values, probably owing to a new buyer being in the market, who is reported to have been

Cost Accounting.

A specialist in Costing, Organization and Systems would engage with a manufacturing concern. Competent to take assistant managership. Address "COSTING," c/o The Monetary Times, Toronto.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company,
Temple Building, - Toronto.

offering figures beyond the general range of quotations. No. 1 beef hides are still quoted at 9½c. per lb.; lambskins, 10c., but an advance is likely to take place next week; sheepskins, $1.20 each. Lambskins, 14c. per lb. for No. 1, and 12c. for No. 2.

Metals and Hardware.—There is a fairly active market, with values generally well sustained. Reports are current with regard to a probable combination of makers of galvanized sheets in Britain, for which there appears to be some substantial basis, as cabled orders have been declined except at an advance of 5s. a ton, and it is said bids on some considerable lots required by local consumers have been withdrawn. Canada plates are unchanged at $2.35, and black sheets at $2.15; tinplates, $3.65, and $3.90 for cokes and charcoal, respectively: Ternes, $6.50; boiler-plate, $2. Domestic bars are steady at $1.75 to $1.80, and ordinary mild steel at $2; tire steel is firmer at $2.10. Antimony is easier at 9 to 9¼c.; copper, 16¼c.; tin, 33½c.; lead, $3.45 to $3.50.

Oils, Paints and Glass.—The seal fishery is reported a comparative failure, and no quotations for new seal oil have yet been made by the Newfoundland people. Owing to the expected scarcity of seal oil, whale oil, which has been rather a drug on the the market, is showing rather firmer value. Cod liver oil is easier; in cod oil there is very little doing. The recent gain in strength in linseed oil is maintained, from 49 to 50c. being now quoted for boiled, and 46c. for raw. Turpentine has lost some of its recent strong advance, and is 3c. easier, at 87c. per gallon in barrel lots. Castor oil is quoted at 7 to 8c., according to quality and lot. Leads, window glass, etc., all remain at former figures.

Wool.—But a dull movement is reported at the moment, and any sales reported are of a limited character. Capes are quoted at 18 to 19½c.; good B.A., 39 to 42c.; domestic pulled, 28 to 30c.; there is no Australian or North-West here now.

⁂

WESTERN BANKING CODE.

This code is displayed in many banks in Wyoming and other parts of the wildest West:

Patrons thinking an error has been made are requested not to shoot the cashier before investigation.

Strangers must enter the bank holding their hands above their heads or they will be fired on by the staff.

Deposits of persons killed on the premises remain the property of the bank.

The bank will not be responsible for lost guns or bowie knives.

Patrons desirous of keeping in practice are requested to shoot the pens from the clerks' hands and to leave the cashier undisturbed.

Persons desirous of transacting business quickly will please remember that shooting out the lights tends to delay rather than hasten the work of the staff.—Detroit News.

⁂

FIFTY CENTS ON THE DOLLAR.

"No comedian can be funnier than an African citizen when he tries to be serious on a large scale," said M. K. Anderson, formerly of Kansas, recently. "Negroes are not as good imitators as the Chinese, and their attempts at Caucasian dignity are sometimes the perfection of burlesque. Down in Oklahoma a few years ago a colored citizen opened a bank. He did not have much capital, but he succeeded in doing considerable business among the colored brethren. Finally he went broke, and one morning his customers found a notice on the door announcing his suspension. In the course of the day a white man went to the bank to get a pair of new boots which he had left inside the day before, while in there to cash a check which some colored man had given him. He had hard work in arousing the proprietor, who was known to be inside, but kept up such a din that the general manager of the defunct financial institution finally opened a small crack in the door and exclaimed: 'We am suspended! Yo' kin see de notice dar on de door.' 'I don't want to do any business with the bank. I only want a pair of boots I left in there yesterday, and I'm going to have them.' 'Wait a minnit,' said the bankrupt financier, closing the door. In a few seconds he opened it again just a few inches and threw out one boot saying: 'We am only payin' 50 cents on de dollah.'"—Seattle Post Intelligencer.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office--Waterloo, Ont.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

PRINCE EDWARD ISLAND.

The claim of the province of Prince Edward Island to improved communication with the main land of Canada is one that ought to be treated with respectful consideration. That interesting little province of 2,184 miles area, so luxuriant in sheaf and fruit and flower, so attractive to the fisherman, the bicyclist, the bather from June to October, suffers painfully in severe winters from isolation by reason of floating ice swept here and there by the tide. It is often true that neither small boats nor large ones can navigate thence to the main land with safety. This was the case during the last severe winter; as a matter of fact there were fifty-nine days of the winter of 1904-5 when no navigation was possible, and when thousands of tons of merchandise destined for her ports inward and outward could not be moved. This was bad enough for exporters of her own farm produce, but still more serious because the inhabitants were suffering for lack of supplies.

It is a natural question, has all been done that could be done to overcome these difficulties of navigation? We know that great efforts have been made by the Dominion Government, and a great deal of money spent, within the last quarter century, to provide boats that would make the passage of twenty to thirty miles from the main land of New Brunswick in all weathers. But these have not proved adequate. The forces of Nature have proved too strong for even the ice-breakers. And the people of the island are crying out in their distress for what was promised them when they joined the Confederation in 1873, namely, "efficient steam service, to effect continuous communication with the Intercolonial Railway, and the railways of the Dominion."

In these circumstances the project of a tunnel has been revived. And from recent enquiries and borings made and engineering opinions given it seems no longer so forbidding a task as in 1885 or 1895 it was considered to be. Scientific men of prominence have declared its construction and ventilation feasible; and a contractor has within the last month even named a period during which he will undertake to build it and a price he is prepared to accept. Let us see, therefore, what are the conditions. Rev. Father Burke, who has come from Charlottetown, and addressed various Boards of Trade in leading Canadian cities in advocacy of the scheme, thus outlines it in an interview with the Monetary Times:—

The route contemplated is from Money Point, Westmoreland County, N.B., to Carleton Head, P.E.I., six and one-half miles, where sub-aqueous tunneling must be done. An approach of three-quarters of a mile on the Island side and one of one-half mile on the New Brunswick side makes the total length of the work say seven and three-quarter miles. Happily, the stratification is undisturbed. Borings at various points show red sandstone on the Island and some conglomerate. Two hundred feet down red clay shale is found which extends under Northumberland Strait at the point in question, and this is well adapted for the necessary borings. Below it is grey carboniferous sandstone, which, however, it is not necessary to touch. The New Brunswick end shows no insurmountable subterranean difficulties. Artificial ventilation will, of course, be necessary, but this has been successfully applied to tunnels three and four miles in length, and there is no strong reason to doubt that this can be applied in the present case.

Now to look at the matter on its financial side, which has been supposed to be the most appalling. The cost of the present system of operating steamers across the Strait is estimated to have been $150,000; the insurance upon them, 10 per cent. on a million dollars, $100,000; annual depreciation, $100,000; interest on a million of property at three per cent., $30,000; (i.e., already invested or about to be), subsidy in summer, $20,000; present cable service, which would be no longer necessary if the tunnel were built, $7,500; running ice-boats, $10,000. Then there is $30,000 yearly interest on a million dollars claimed by the Island and allowed by the Federal Government because of inadequate ferry service.

Here is $447,000 annual expenditure, which the present system requires. Now the deficit of operating the Prince Edward Island Railway costs $101,000; the tunnel itself would probably earn $100,000; and the Intercolonial Railway itself on the mainland could be made to earn, it is estimated, $100,000 more than it now does if the Island tunnel were constructed. Here we have $301,000 to add to the $447,000, which the present order of things is costing Canada, making the aggregate $748,500.

Consider now, the probable outgo which the constructed tunnel would entail. Mr. Haney, the contractor, offered in Ottawa the other day to undertake the building of the tunnel for $10,000,000, and to complete it in six years. This estimate of cost is practically the same as one made fourteen years ago by Douglas Fox, the British engineer. The interest charge on this sum would be $300,000 yearly; and the up-keep and depreciation are estimated to be say $50,000 more. Subtract this $350,000 from the $748,500, which it has been shown the present inadequate system of communication costs, and there remains $398,500 per annum, as the saving to the country by the construction of the Prince Edward Island tunnel.

Some of these statements and estimates are hypothetical, others possibly subject to deduction. The assumed earnings, for example, are an uncertain quantity. But even so, the case made out for the tunnel scheme looks much more favorable than any thing we had previously heard or read on the subject, while the construction is made to appear much more feasible than the general public has believed. True, the population of the province by last census is only 103,000—it was 109,000 in 1891, and the loss is in part attributed to the isolation of the Island by the winter conditions—but it is very important that these 103,000 stalwart people should not suffer year after year discomfort and loss when there is a reasonable probability that by tunnelling Northumberland Strait satisfaction could be given them, and even if Father Burke's postulates and estimates are even measurably correct, an economy will be effected by the Dominion of something considerable per year on the present outlay. It is significant that the Maritime Board of Trade, and the boards of Montreal, Halifax, and Toronto have all pronounced in favor of the scheme.

* * *

THE WHOLESALE GROCERY TRADE.

The opening of navigation has not brought any great increase in business in general lines. At the same time its present state cannot be complained of, for while it is by no means extraordinarily brisk, it is probably up to the normal.

Distinct easiness has come over the sugar market since the Easter holidays, owing to dullness in the primary markets for raw. The movement in granulated is for the present by no means large, but it is expected by wholesalers to improve before long. Molasses is also somewhat weaker than it was. New Orleans, however, is rather scarce, a feature attributed by American sources to uncertainty of the actings of the Canadian tariff. Maple syrup has been in brisk demand, but the quality of much of it, in spite of all the efforts towards absolute purity, leaves much to be desired.

A feature of the trade still continues to be in the strength of canned vegetables. Indeed it has become, with the growing scarcity, still more marked. Quite large importations have been made in tomatoes from the United States. These are now quoted at $1.25 to $1.30. Corn is also scarce and wanted. Practically all sorts of canned fruits and vegetables are in demand. Sardines also are scarce, and judging from reports to hand concerning the new pack, prices are likely to advance.

In teas the demand is fair, but no great business in the trade is to be remarked. Ceylons are in better request than Japans just now. On the other hand, the movement in coffee is increasingly good. Indeed there seems to be in this country at the present time a growing inclination towards coffee at the expense of tea. Perhaps we are imitating the Americans in this respect. Cocoa, too, is becoming more popular, but to a slower degree. For spices there is the ordinary quiet, but steady enquiry. In rice higher prices are expected to prevail.

For dried fruits, the demand may be said to be rather above the average for this time of year. Prices are moving quite quickly, and large sizes are on the scarce side, owing to the comparative shortness of the crop. Evaporated apricots are very costly, and the demand for them seems to suffer accordingly; evaporated apples are dull. Currants are weak, but prices keep fairly steady. New Brazil nuts are arriving, and meeting with fairly good enquiry. Peanuts are quite firm.

* * *

LIFE ASSURANCE IN CANADA.

Following up the brief comment we were able to make last week upon the growth of life assurance in Canada, we proceed to give further particulars of that business. The abstract of life companies' statements gives some interesting tables, one or two of which are reproduced on another page. Taking together life, endowment, term and every other kind of life policies issued, we find that the companies doing business in Canada issued in 1904, calendar year, 183,861 policies, covering $104,016,862, nearly half of which were life, about one-third endowment or industrial. This report deals with business done in Canada only, for several Canadian companies transact life assurance in other countries.

The aggregate of life policies of all kinds in force at the close of last year was 657,975 in number, and $593,713,800 in amount, $35,844,900 of this was industrial business. Much the larger share of these policies had been issued by Canadian companies, thus:—

	No. of Co's.	No. of Policies.	Amount.
Canadian companies....	21	329,710	$369,875.373
British companies.......	*14	21,722	43,184,512
United States companies	16	306,543	180,653.915
Total	51	657,975	$593,713.800

It is shown by these figures that the proportion in which this business is shared by the different groups of companies is as under: Canadian companies, 62.30 per cent.; British companies, 7.28 per cent.; United States companies, 30.42 per cent. The Canadian organizations getting not far from two-thirds of the whole.

Thirty years ago, only a fourth of the business was in the hands of Canadian companies, the record of amount at risk of 1875 standing $21,957,000 for the Canadian, $19,456,000 for the British, and $43,596,000 for the American—the last named having almost half the total life business and just about double the Canadian. In six years thereafter, namely in 1880, the record of the home companies had so changed that their share of the business equalled the American, which had declined while that of the English was stationary. In every year since the Canadian companies have been adding to their total at a more rapid rate than the other groups, for while the British total has risen to 40, and the American to 180, the Canadian exceeds 364 millions. Of course there are more home companies now than then, still they could not have made such an advance but for the feeling of the Canadian people that it was their duty, other things being equal, to give a preference to their own concerns over either British or foreign. And of the existence, indeed the rapid growth, of this feeling we may be sure the home companies have taken due advantage.

---

*It should be stated that of these 14 companies only seven take new business.

The new business of 1904 affords some interesting comparisons with that of the year which immediately preceded it. For example, the seven British companies which write new business—we have already stated that seven of them take renewals only—issued 1,635 policies last year, the aggregate of which was $3,109,778, where in 1903 they had written 1,706 policies with an aggregate of $3,132,904. Nevertheless, although their new business fell off, their total at risk increased, and the claims were less.

In the American group of life companies, four of them take no new business. The remaining dozen wrote fewer policies than in 1903, but increased their total of new business as well as the amount in force at the close of the year, while they paid half a million more to policy-holders. Thirty per cent. of their business was industrial.

The Canadian group exhibit increases all along the line, the advance in premiums being more than a million, in new business $3,882,000, and in net amount in force $29,000,000.

Analysis is made in the Superintendent's abstract of the payments last year to policy-holders. Comparing the three groups we find that while the Canadian paid back to policy-holders 38.71 per cent. of the amount taken for all premiums, the American group paid out 68.06 per cent., and the British group as much as 88.22 per cent. It is perhaps necessary to explain that there are variations in the nature and proportion of these payments, which consist, most largely of course, of death claims, but also of matured endowments, payments for surrendered policies, payments to annuitants, and dividends declared to policy-holders. The American and British companies, being older, have naturally more endowment business than the Canadian.

Of the net premium income, which includes consideration for annuities, the Canadian companies paid 23.78 per cent. for death claims, the British 56.29 per cent., the American 36.56 per cent. By far the largest proportion of surrenders is in the American group, which also shows the greatest proportion of dividends to policy-holders. Half of all the companies did no business in annuities, but the aggregate of this species of business is small. The amount which these life underwriting companies have paid back to their policy-holders in a year is worthy of remark. It is given on page 42 as $11,804,653. Over and above the death claims, of almost seven millions ($6,939,943), and matured endowments of more than two millions ($2,205,194), there was paid back for surrendered policies, $1,403,063; in the shape of dividends, $1,028,751; besides $227,699 paid out in annuities. All these five items together make up the total of $11,804,653 which we have given above, and which we remark includes the business done by Canadian companies outside of Canada as well as in it.

Readers who wish to know particulars about any particular company may turn to the table on page 1491 of the present issue, which is an exact reproduction of pages 32 and 33 of the Abstract of Statements submitted to the Government last month.

* * *

ENGLISH SCHOOLS AND COLONIAL EDUCATION.

How to treat the young man who has been brought up in the United Kingdom, that he may be made fit for a forward life in British Colonies, is the scope of a paper read before the Royal Colonial Institute recently by Mr. Hubert Reade. It appears to have been inspired by some remarks of Dr. George Parkin, one of which was that the Rhodes scholars, who come up to Oxford from the ends of the earth, whose talk runs on the Canadian forests and prairies, the African veld, the back blocks of Australia, "will act as apostles of colonization." It is pointed out by Mr. Reade that the pressure of economic causes must needs drive the educated Englishman to emigrate in an ever-increasing ratio inasmuch as the Army, Navy, and Civil Service have ceased to be a close preserve for the younger sons of the higher classes; "perhaps 400 out of 3,000 undergraduates now at Oxford and Cambridge will never earn a penny through their degrees; * * * while all the while many a broad acre beyond the seas is crying out to the sons of the Empire."

In the face of this state of things, the speaker tells us, Englishmen are gradually ceasing to take the lead in colonial life, "Germans are out-pacing Englishmen in every land under the Union Jack, the cradles of the Canadian North-West are filling with the children of the Icelander, the Russian, the citizen of the United States." Why is this? The reasons appear to the essayist to be the more practical education of the Germans in commercial subjects and geography * * * and the fact that English education has been given a wholly false direction, divorced from the realities of life by university and competitive examinations little in accordance with the real needs of the student. So much so that "even in that for the Army, *geography plays a wholly subordinate part.*" Mr. Reade could hardly have chosen a stronger illustration of the misfit education he denounces than the sentence last quoted. But Canadians who have to do with newly arrived and so-called educated Englishmen can find illustrations not less absurd of unfitness in them for the life they expect to lead. Some of us have known instances where the untrained and unknowing young emigrant from a home of plenty has had, (alas! for his crude ideals) as Mr. Reade puts it, "in a very liberal sense to go out into the fields to feed swine." How is he, in England, to get more accurate information about how to adapt himself for his future home "in the Colonies" when the Eton Calendar, which gives minute instructions how a lad must proceed if he would go into the civil or the diplomatic service, the navy or the army, the church or the bar, "cannot find space to give the addresses of the agents-general for the colonies in London, or to state how boys intending to emigrate can be trained as agriculturists, miners, or engineers in their new homes?"

As a cure for the evils now wrought in this way by want of thought, Mr. Reade would have a committee of the English Board of Education, which is considering how best to train prospective miners in the Transvaal, and assistants and managers for the Bengal collieries should also enquire into the whole subject of the connection between English higher education and colonial and Indian technical education. Briefly, to abridge the terms of the essay, that a lad from England who thinks of entering high school or college in Canada or South Africa should be told how he can enter them, what it will cost, and what he will have to learn when he gets there; also that he shall be enabled to enter his name for the colonial college, be it the Ontario Agricultural College in Canada or any technical school in Australia or India, and pay a part of his fees before he leaves to cross the ocean.

I think, concludes Mr. Reade, that "almost any young man of education and some small means, desiring to settle in one of our colonies would prefer to pass a certain period at one of their colleges or technical institutes in place of plunging by himself into an unknown world; whilst even our budding legislators might gain more real knowledge of our possessions by spending a term or two in study at a university in Winnipeg or elsewhere than by basing their assertions as to our Empire on a hasty scamper round the globe whether from hotel to hotel or from Government House to Government House."

The chairman of the evening, Sir Thomas E. Fuller, told of a prominent man at the Cape who had received as many as 5,000 letters from would-be emigrants in one week. "The applicants included men who had never been in a store at all, but who seemed to think that Africa was one vast wilderness in which they were crying out for tradesmen." And among the illuminating remarks made by Dr. Parkin upon the paper just read was this: "It is not enough merely to send men who are squeezed out by industrial necessities, though the more of the working class who go out the better, but we should send men of every class who will find and make the most of their opportunities. And to make the most of these opportunities they have to get the grain of the new country into the very blood in some way." Speaking of the tendency of English life and its institutions to make men artificial, he could not think of any thing better "as an addition to that charm of manner, that honesty and honor of thought, and all those qualities which make the young Englishman of the public school or university one of the most charming of men, than that experience of the outer world which was to be obtained by bringing him up against the facts of life, and which would come from giving him part of his education in the colonies as well as in England."

* * *

MR. GOODERHAM'S DEATH.

The sudden removal of a person who has been, as it were, a prominent part of the business mechanism of a community for long years, causes a sense of want that is hard to define. It is not only the loss of an estimable man that is felt, but there is a sense of wonder how the interests of the community will be affected, how the various concerns of the deceased will be carried on. A town or a district which has become accustomed to the presence and influence of a conspicuous citizen cannot all at once lose the accustomed effect of that presence, the influence of that personality. The news of the death of Mr. George Gooderham, sudden as it was—for he by no means looked his seventy-five years, and might well have been expected to exceed even the great age of his father—impressed Torontonians deeply, for he was a man who for forty years and more had been, so to speak, one of the commercial landmarks of the place by reason of the long connection of his family with the city and neighborhood, his prominence as a merchant and financier, and the wide range of his business connections in manufacturing, banking, mining, insurance, and many other avenues.

Mr. Gooderham had been successful to an uncommon degree in commercial and financial directions, had amassed great wealth, and exercised wide influence, but no one would ever discover these facts from his demeanor. He was of simple and kindly manner, unchanged by success or wealth, markedly domestic in his habits, averse to ostentation as he was to prodigality. A hard worker almost all his life long, he was very methodical, and in anything he undertook attentive to detail in an unusual degree. Immersed in business, as he had nearly always been, he found time to fill positions of trust in hospital and college; and though showing no desire for public or municipal life was an encourager of sport and a contributor to good works, always unobtrusively. Every one who knew Mr. Gooderham in a business way admired his quiet honesty and candor, and respected his good judgment; those who knew him intimately discovered in him lovable qualities, for he was a man who could show real cordiality though he did not wear his heart upon his sleeve.

A direction into which his taste for out-door life led him, and one that is perhaps little known outside Toronto and vicinity, was yachting and hunting. He took a general interest in the improvement of horse flesh and at one time rode to hounds. Of his various yachts, steam and sail, none was better known on Lake Ontario than the fast schooner "Oriole," and many a day's pleasure did he give his friends in her, year after year. A quiet man, he was yet what Doctor Johnson called "a clubable man;" his membership in clubs including the St. James, in Montreal, the Toronto Golf Club, the Hunt Club, the Toronto Club, the Albany Club, the Royal Canadian Yacht Club.

It is recalled with interest by an old resident that some forty years ago, while he was yet a young man, Mr. Geo. Gooderham had urged upon his father and his associates in the milling and distilling business, its marked extension and a widening of its character, predicting great success as a result. The other partners not concurring with him to the fullest extent, he offered, if permitted a larger share in the concern, to manage the enlargement he had recommended and to take the risk of its success, so confident was he of the future of Canada and so resolved to share in it. His ideas prevailed, and it is not too much to say that a large part of the growth of the Gooderham & Worts business was due to his stand at that time. Of course, he has never been, at any time since, without able assistants, chosen often from among his own family and connections, to manage the various concerns which his wealth has founded or vitalized. His knowledge of the business of flour-milling and distilling was very thorough. He knew the chemistry of his subject as well as its economy, and was accustomed to make minute tests of grain and of yeast under the microscope. It is related of him that he had repeatedly offered to scientific callers, and even to milling "cranks," the whole mill for experimental purposes for four days, to give them a chance to demonstrate that they could get more out of a bushel of grain than he could. But he never found any method more economical than his own.

It would be tedious to name all the institutions in which the deceased gentleman held prominent positions, but the principal ones may be mentioned. He was president of the Gooderham & Worts, Limited, whose business was founded by his father and uncle in 1832: president of the Bank of Toronto, president of the Canada Permanent Mortgage Corporation, president of the Dominion of Canada Accident and Guarantee Company, a director of the Toronto General Trusts Corporation and of the Consumers' Gas Company. In former years he was on the board of the Toronto and Nipissing and the Toronto, Grey and Bruce railways, and he assisted in completing these branches of the systems of both the Grand Trunk Railway and the Canadian Pacific Railway in Ontario. He was also, with Sir John Macdonald, one of the founders of the Manufacturers Life Insurance Company, and succeeded Sir John Macdonald in its presidency. Before its amalgamation with the Canada Permanent, Mr. Gooderham was also the vice-president of the old Western Canada Loan and Savings Company. Mr. Gooderham was president of the Toronto Hotel Company, the corporation which in the face of many difficulties built the King Edward Hotel, and he had extensive interests in mines in British Columbia.

* * *

MANITOULIN.

We have just given some attention, in another place, to the case of Prince Edward Island, and we have a circular from another island community, complaining of isolation and non-fulfilment of promises. The island of Manitoulin in Lake Huron is said to be the largest island surrounded by fresh water in the world, being 1,500 square miles in extent, it possesses oil and marl areas, and is well adapted for agriculture and grazing. There are sixteen thousand people on the island, whose nearest railway station is twenty-four miles across water and mountain to the main land of Ontario. Four years have passed since a charter was granted to the Manitoulin and North Shore Railway, a subsidiary enterprise of the Clergue Syndicate, which was given subsidies and other assistance on the understanding that railway building would be begun on the island, and communication would be established with the main land.

We are informed by Mr. F. W. Bell, the secretary of a public meeting of citizens held last month at Little Current, that the company in question have "ignored the rights of the residents of this district, and have failed in every way to carry out the object for which the charter was primarily granted." The hardships of the dwellers on the island are recounted: "Scarcely a season passes without travellers between the Island and the mainland sustaining serious loss of property, horses drowned, personal injury, and too frequently loss of life by drowning or perishing by cold. Added to this is the fact that our market is receding, the timber on the shore having been cut and the lumbermen consequently operating north of the C.P.R. line; on account of which distance is precluded the possibility of reaching it except by railway. This leaves us with a market for but six months in the year for our rapidly increasing products, and shuts us out from our natural and best markets."

The memorial of these Manitoulin dwellers sets forth in conclusion a claim for active sympathy. They ask, and it is not an unreasonable request, that we "see that any grants, subsidies, concessions, privileges, or otherwise in the nature of assisting the railways chartered, shall be granted only on condition that the construction of such railroad be commenced within a reasonable, specified time, and that such construction shall begin from a point on the Manitoulin Island; * * * or in the alternative, following the precedent of the Temiskaming Railway, that the Government do construct, equip, and operate, at the public expense, a railroad between such points as in their judgment may be deemed most advisable."

* * *

MONTREAL LETTER.

The wholesale trade is at present experiencing that "quiet feeling," which usually exists prior to the opening of navigation, and the time when the summer railway rates come into operation. That the lull is only temporary is generally accepted, and our merchants look forward with much confidence to a satisfactory spring and summer trade. There is a good demand for call money, and the general rate is 4½ per cent. A pretty extensive loan was asked for from one of our large banks which, however, refused to give it under 4½ per cent. A good demand exists for funds for commercial purposes, and mercantile paper is being discounted at 6 to 6½ and 7 per cent. A feeling exists that the outlook for the maritime trade of Montreal is rather unsatisfactory, the quantity of grain pointing this way for export being much smaller than at the corresponding dates of several previous seasons. It is hoped, however, that with the opening of navigation things will improve, and a fresh impetus be given to all branches of trade.

The weather during the early part of the week has been cold and blustering, with snow and frost; but even this, though unpleasant to the man about town, will have a beneficial effect, as it will check the too rapid growth of vegetation that might be damaged by frosts to be experienced later on. However, snow so late in April indicates, so the weather-wise claim, a long and warm spring, and judging by the sample served out during the past day or so we are tempted to believe that the happy season of spring has really come.

Considerable activity is shown in building operations in Montreal, and Building Inspector Chaussé states that hundreds of handsome buildings are to be erected this summer. One hundred and forty-four building permits were issued in March, and the stated aggregate cost of the work is $489,680.

The civic authorities of Montreal are experiencing some trouble on account of what is claimed to be a clerical error in the draft of a law passed at Quebec two years ago, relating to the taxation of insurance companies doing business in this city. If the contentions of the Royal Insurance Company are maintained, the trouble may result in a loss of a large amount of revenue. According to a by-law based on legislation obtained at Quebec a special tax of one per cent. on the premiums collected by fire insurance companies doing business, and taking risks in this city was imposed, with a maximum of $1,000. It was further provided that a special tax not exceeding $200 is imposed on "every accident or guarantee company, and $100 on every marine insurance company doing business or taking risks in the city; when any such insurance company combines two or more branches of any insurance one tax only shall be levied on such company, that is to say, the tax, the rate of which is the highest on any of the said branches of insurance." The Royal Insurance Company claims to have been compelled to pay $400 for carrying on a fire insurance business in 1903, and also $200 for the life department. The following year the tax on fire insurance amounted to $1,000, and $200 on life insurance. They contend that the city has not the power to impose both taxes under the provisions of the by-law, and on this account a claim is made for the $400 paid during these two years, on the life insurance business of the company. It appears that a portion of the draft of the published by-laws has been left out; but it is asserted that when the bill left Montreal it was complete, and also when it passed through the Quebec House. As it now appears, however, it is claimed it may have the effect of rendering the city powerless to impose the taxes on insurance companies. On the other hand the city authorities assert that the error is only a clerical one, and can be readily repaired by the Legislature.

At a special meeting of shareholders of the Montreal Trust & Deposit Company, held on Thursday of last week, it was decided to increase its capital to $1,500,000, which is the amount allowed by its charter. The intention is to increase in capital during the present year to an amount of $500,000, which is to be fully paid up, the balance to be issued later as may subsequently be decided.

MOUNT ROYAL.

Montreal, 29th April, 1905.

* * *

OUR ST. JOHN LETTER.

The lumbermen in all sections of the Province of New Brunswick, excepting the few who operate on small streams near the seaboard, are greatly worried over the situation. This spring has been a most remarkable one. Since March 1st there has not been a snow or rain storm of any consequence, and the snow that fell during the earlier part of the winter has melted away gradually without raising any freshet in the rivers. The logs will all be hung up unless unusually heavy rains come within the next two weeks. There are in safe waters, including the logs held over from last year, probably 40,000,000 feet. This the mills will soon use up and the outlook now is that hardly any of the more than 100,000,000 feet of logs on the upper St. John will get to the booms. The operators on the Miramichi and other waters are also complaining. Altogether, the situation looks blue, and it will be a very serious thing for New Brunswick if the lumber business of the year fails.

The winter port season closed with the departure on Sunday of the S.S. "Lake Manitoba" of the C.P.R. fleet, but details of the business are not yet available. It is known, however, that it will far exceed both in the volume of imports and exports that of any previous year. The city is working hard to secure increased wharf accommodation for next winter, so as to meet the demands of the steamship companies. It is now thought the Dominion Government will do the necessary dredging on condition that the city build the wharf and warehouses required. The plan is to finish one new wharf of 600 feet by next winter, and three others for the winter following. These will give good berths for the big new steamers of the Allan Line and of the Canadian Pacific.

Two St. John firms and five Boston firms tendered for the work in connection with the proposed improved water service of the city. The work was divided by the engineer into four sections, and when the tenders were opened it was found that Messrs. McArthur & McVey, a local firm, were lowest for sections one and two, while Messrs. B. Mooney & Son, the other home firm, were for sections three and four. They were accordingly given the work and have begun excavation for the seven miles or more of pipe-laying that is to be done. The job is to be completed by December, and this means that a large number of men will necessarily be employed. A section of the new pipe is to be of California redwood, and the local contractors have arranged with the Eureka Redwood Co., of Lynchburg, Virginia, to lay it. Large numbers of Italian workmen will probably be brought here for the work, as it is not likely that men enough can be secured in the city to finish the work in time.

Some opposition has developed among the labor organizations of the city to the employment, as engineer of the new work, of an American named Hunter, and action against him, under the Alien Labor Act, has been threatened. An engineer named Barbour, a St. John boy, now resident in Boston, prepared the plans for the improvements and Hunter is one of his subordinates. The matter, while exciting some talk among the unions, is not likely to develop serious trouble.

The exodus from New Brunswick to the Canadian West promises to be very heavy this year, heavier, perhaps, than for a long time. The Provincial Government are waking up to the importance of this movement of farmers to the far West, and have been conferring with the Salvation Army leaders, interesting them in bringing here a number of desirable English immigrants, who will take up vacant farm land. Some complaint is heard in these Maritime Provinces that all the effort of our Dominion agents in the Old Country is directed to securing settlers for the North-West, and that never a word is said on behalf of the older Provinces, although the older Provinces pay the heaviest portion of the bills.

The first of May is moving day in St. John, and always brings changes in the business world. This year two of St. John's best known merchants, Henry Maher, and Peter Chisholm, are retiring. The former has given fifty years to the trade, and the latter forty-eight, and they leave behind them names that are respected. Neither has grown rich, but each has enough to live on in comfort.

Thomas T. Langlois, president and managing director of the British Columbia Permanent Loan and Savings Company, and the Pacific Coast Fire Insurance Company, is here making preparations for the establishment of his companies in St. John.

Members of the St. John Board of Trade are putting up a vigorous fight to prevent the steamers that now run to the West Indies dropping St. John as a port of call. The line is operated by Messrs. Pickford & Black, of Halifax, and these gentlemen want to run from Halifax only. St. John furnishes about 25 per cent. of the business, and there are some St. John merchants who have worked up a big trade that would be killed if the steamers did not come here. It is believed the owners have some feeling against St. John because there has been criticism here of the steamers in the service. The matter is now before the Government at Ottawa, and it is believed no change will be made.

* * *

BANKING AND FINANCIAL.

We learn from our Halifax correspondent that shareholders of the defunct Bank of Yarmouth will resist the demand of the curator for the payment of double liability, in the hope that the curator, in his suits to collect, will have to include the directors in the proceedings.

A Chicago subscriber sends us the following paragraph, taken from one of the dailies of that city: "F. W. Taylor, assistant inspector of the Bank of Montreal, who has been in the local branch of that institution for about a year, will leave Chicago shortly to take charge of the London branch of the same bank."

The directors of the United States Corporation have issued a report which shows that for the first quarter of the present year the earnings, while not quite so large as anticipated, were $23,025,896, or $9,580,664 greater than in a similar period of last year. Moreover, the unfilled orders in hand on March 31st, were 5,597,560 tons, an increase of 1,460,599, compared with March 31st, 1904, and in excess of all previous records. The directors declared a regular dividend of 1¾ per cent. on the preferred stock, payable May 31st.

Readers of this column will recall the account given last week by an accomplished Montreal reporter of a series of three new bank buildings near Victoria Square, in that city, whose tops should, by 1906 or thereabout, reach the summer clouds—said clouds to be tinged with gray and gold. The cold light of fact dispelled the fiction with respect to two of the new buildings; and here is what we get from the Eastern Townships Bank about the third; the general manager writes: . . . "I beg to say in reply that nothing definite has been decided upon regarding the erection of a building on the corner of St. James and McGill streets. The matter is still under consideration. We are at a loss to know how these yarns get into the papers. It would be much better if they would take the precaution to enquire, as you have done, before publishing such items." . .

The Dominion Coal Company announces that it will make a new issue of five million dollars' worth of 5 per cent. first mortgage bonds and $3,000,000 of 7 per cent. cumulative preferred stock. Preferred stock will be convertible at the option of the holder, at any time before May 1st, 1910, into a like amount of common stock, while after that date it will be subject to redemption at 125 per cent. and accrued dividends. The company's object is to return all its outstanding bonds and preferred stock. Holders of 6 per cent. first mortgage gold bonds, due May 1st, 1913, are informed that the company will on the 12th inst. redeem that entire issue at par, together with a premium of 10 per cent., and that interest will cease to be payable after that date. The 6 per cent. first mortgage bonds are open for sale to the trustee, in order to absorb the sum of $145,988.38, that sum being the amount in hand in excess of the reserve of $250,000 required by the mortgage.

A courageous stand in the face of most alarming surroundings was that shown by the Merchants Bank clerk, Herman Von Metzke, at the branch of that bank in Lancaster, Ont., one night last week. Von Metzke, who slept over the bank, was awakened to find four men in his room, who when he awoke assaulted him with clubs. He struggled with them while lying on the bed, and getting one hand free reached under the pillow for his revolver, and fired. One man fell, the rest decamped, and when assistance came it was found that the unknown man who had been shot was dead. The bank has shown its recognition of its pluck by putting aside a sum of money for him, and on Wednesday, the Lancaster village council passed a resolution applauding the courage of the young man, "whose gallant fight prevented the robbery of the Merchants Bank, and perhaps averted a serious conflagration. A mass meeting of the citizens of the village appointed a committee to take steps to mark in a suitable manner the citizens' appreciation of Von Metzke's heroism."

A controversy has arisen between Mr. Alfred Marks and Mr. Henry W. Wolff, two correspondents of the London Economist, upon the subject of the deposits in the Post Office savings banks of the United Kingdom. That is to say, as to what class of the community these deposits mainly belong. Mr. Marks had stated that "at the present time the bulk of the deposits in the Post Office Saving Bank belongs not to the thrifty poor, the proper objects of the system, but to the well-to-do;" and Mr. Wolff controverts him and calls for proof of the assertion. Hence Mr. Marks quotes in the Economist of 15th April, the statement of Mr. Austen Chamberlain in the House of Commons, when he was Postmaster-General: "It was a great mistake to assume that the money in these banks was wholly the money of poor people. He thought that, on the contrary, a great deal of it was the money of well-to-do people," who had taken advantage of the Government's rate of interest to invest, when prices of good securities were high, and to take their money back when prices were low." But here is more conclusive evidence: In his evidence before the Select Committee of the House in 1902, the secretary to the Post Office said that 9 per cent. of the depositors held about 64 per cent. of the whole. He described the depositors, who held 68 per cent. of the whole, as being of the upper and middle classes, and in number they were about 10 per cent. of the whole. The curious circumstance comes out in this controversy that while the average London deposit rate for the five years 1894 to 1898 was one per cent. per annum, the Post Office Savings Bank was giving two and a half per annum. What wonder, then, that people with money preferred to deposit it with the Post Office?

* * *

INSURANCE NOTES.

It is announced that the National Board of Fire Underwriters will hold its annual meeting on May 11th in the rooms of the New York Board of Fire Underwriters, in New York City.

The John McDougall Caledonian Iron Works Company has been awarded the contract to supply for the Toronto waterworks a 6,000,000 gallon engine. It will be of the Holly type with box girder frames, and fitted with Babcock & Wilcox boilers. It will cost $43,947.

A large stock of logs, ties, posts, and tan bark, lying at Cape Chin dump, near Wiarton, Ont., and belonging to Kastner & Co., Robert Watt, Messrs. Hunter, Neigerball, & Crawford, John P. Newman, Wiarton Lumber Co., etc., was on the 26th ult. destroyed by fire at a loss of $50,000.

One of the big fire engines made for Toronto by the Waterous Co., of Brantford, reached the city four days ago, and is at fire headquarters on Lombard street. It is a massive piece of apparatus, weighs six and one-half tons, and is fitted with rubber tires. It is fitted for a "three-horse hitch."

The municipal authorities of Vienna, Austria, have decided to re-equip their fire brigade, together with the auxiliary suburban volunteer brigades, with motor fire-fighting apparatus. The Vienna brigade has for many years been looked upon in Europe as a model for its up-to-date equipment and pronounced tendency to move with the times.

While the argument most frequently urged in favor of steam boiler insurance is that a careful inspection by experts will tend to prevent explosions, there is an unavoidable possibility against which indemnity is very desirable. The investigation into the recent disastrous boiler explosion at Brockton, Mass., has shown that the defect which caused the explosion was due to a crack under a lap-seam, which it would be practically impossible to discover under any method of inspection.—Chicago Argus.

We have received a copy of the New York Insurance Journal Life Chart for 1905, showing the condition on January 1st, 1905 of ninety regular old line life insurance companies doing business in the United States and Canada. The figures of this chart, Mr. Kempson assures us, are absolutely correct, "being compiled by one of the best known insurance mathematicians under my supervision." The price is 25 cents. The assets, liabilities and surplus, the new business and total in force; the income and disbursements of each company are given.

The 26th of April marked the fifth anniversary of the great fire in Hull and Ottawa, which, starting from a blaze in the chimney of a small frame building in Hull, grew into a devastating conflagration, which destroyed millions of dollars' worth of property and several lives. "To-day," says the Citizen, "things are changed. A great part of the city that was fire-swept is built up, but there are still to be seen numerous marks of the great conflagration. The class of buildings since erected is an improvement on what was replaced and more stringent building regulations have been enacted. The people, in the main, have recovered from the effects of the awful occurrence, but there must be fresh in their minds the memories of that day, five years ago, when Ottawa and Hull added to the great fire records of the world's history.

They are going to have fine times in France now. That is to say, if the projected taking over by the State of the life, fire, accident and old age pension associations is carried into effect. The Post Office insurance business of Great Britain has been a dead failure, and principally because it is impersonal. No one knows or cares about anyone else, but with the insurance companies, as they stand here to-day, as well as in France, there is a personality about the individual assurer, and the company looks after its risks. And so, too, with friendly societies. These would never have obtained their present prosperous condition but for the fact of the personal cognizance of each of the other which takes place in the various branches, lodges, etc. So, also, with benefit societies on a smaller scale. The members have to report weekly to those who know them, and who are interested alike with them in the business. But when the State takes over the lot. as is suggested in France, then we shall see the business absolutely killed by red tape, with consequent gigantic losses for the tax-payers.

* * *

FOR GROCERS AND PROVISION DEALERS.

A fire, which broke out in the engine room of the Oshawa Canning Factory on the 27th ult., rapidly spread to the process room and totally destroyed both, with much valuable machinery and a large stock of goods. The loss is estimated at over $20,000, partly covered by insurance. The factory is to be rebuilt at once.

Great complaint has been heard this year regarding the quality of the maple sugar offered on the market. Many samples, at the instance of the city, were analyzed and showed that the juice of the maple was their most insignificant ingredient. It is understood that action will be taken against the offending parties under the Food Adulteration Act.

Part of the cargo of the foundered Allan line steamship "Parisian," consisting of 575 packages of nuts, almonds and walnuts, was sold by auction in Montreal. The goods were badly damaged, and realized low prices. Walnuts in 55-lb. boxes, fetched $1.70, and almonds in 25 lb. boxes, brought an average of $1.25. The sale was well attended.

The Farmers' Association of Canada having complained that the railway companies in Ontario and Quebec were in the habit of discriminating between the rates charged on grain and on flour and oatmeal, the first-named being now higher, the Board of Railway Commissioners has passed an order to the effect that the rates on grain must be reduced to the same basis as those on milled products.

A Vancouver syndicate has been organized with the object of developing the large natural oyster beds which exist at Blunden Harbor, off Queen Charlotte Sound. The oysters are said to be larger and whiter than the well-known Olympias grown artificially in the State of Washington. The syndicate has purchased some 640 acres of "tidal land." It is said to be the intention eventually to vary the natural product by the importation of "spats" from waters of the Atlantic. About 25,000 of these can be brought out in one barrel, and they grow and spread rapidly, so that in a couple of years their market value is multiplied many times.

* * *

DRY GOODS NOTES.

In the Bradford woolen market business is a little quieter, according to a correspondent of the Drapers' Record. It is believed that the slight fall in crossbred wools can have little effect on the buying of dress goods, as nothing nearly top prices, in proportion to those of wool, had ever been paid, and even at prevailing rates it would be impossible to put such goods as dress serges on the market profitably without getting an advance in price. Pure merino wools continue extremely firm in value, both in the Bradford market and also at the London sales, where all good parcels continue to be keenly competed for, both by home and foreign buyers at fully late rates.

The fall in the price of cotton has had a remarkable effect in the Lancashire cotton industry. There are said to be no fewer than twenty-three new mills for the spinning of Egyptian cotton, either completed or nearing that state. Four other mills, for the spinning of American cotton, are being built, with a total of 380,000 spindles, and six others for Egyptian cotton, with a total of 480,000 spindles, are proposed. The new mills will mean employment for 9,000 people, and the workpeople look for a continuance of the brisk times they are now experiencing. The Lancashire weaving trade is as busy as the sister industry. Ninety per cent. of the looms are running full time, and for the first time for some years there is a dearth of competent weavers.

There was another influential deputation of woolen manufacturers from various parts of the Dominion to the Government the other day, to urge again the necessity for increasing the duties on woolen goods. It was stated by one of the speakers that at the time the preference in favor of British goods took effect, there were some 75 woolen mills in Canada working full time, and many for 24 hours in the day. To-day there are less than twenty mills struggling to live and barely making expenses. It was argued that the difference in the cost of production in Canada was 38 per cent. higher than in the Mother Country, higher wages and increased cost of fuel being chiefly responsible for this condition of affairs.

In Manchester, says a recent report, heavy goods, such as woolens and linens, have much improved their position, though some complaint is still heard as regards flax goods. The fact is not surprising to those who have made a study of the trade for any number of years. For only too long some of the manufacturers have been satisfied with turning out goods of excellent quality, but with no great attractiveness of design. In the meantime cotton has forged ahead by virtue of the one quality so much lacking in the case of many linen cloths, and the inferior article has ousted the superior wearing material in every market of the world. To-day, however, a great change for the better is noticeable, and if all the novelties securable in linens were gathered within a single department, we should have a collection which would justify the appellation of "fancy" rather than "heavy." The beautiful designs produced by the Jacquard loom in damasks are this year very beautiful.

—The Molsons Bank has established a branch at Ste. Thérèse de Blainville, Que.

* * *

—The Canadian General Electric Company has been authorized by the Dominion Parliament to increase its capital stock from $3,000,000 to $5,000,000.

* * *

—The Shawinigan Company, Montreal, will issue $2,000,000 worth of 5 per cent. consolidated first mortgage bonds at 98 per cent. The issue forms part of a total authorized of $5,000,000, of which $2,000,000 has already been placed. The interest is payable half-yearly, and the principal is redeemable at par in 1934, or after January 1st. 1909, at 110 per cent. The present income of the company is £54,540 per annum, and on May 1st this will be increased to £57,800, by reason of contracts made, showing a surplus above all charges of £8,400 per annum of actual earnings.

* * *

—We acknowledge the courtesy of an invitation from the president, council and members of the Halifax Board of Trade to be represented at the formal opening of the new Board of Trade rooms, corner Hollis and Sackville streets, in that city, on Tuesday, May 2nd. The card was received too late for the Editor of this journal to make arrangements to be present. But it is not yet too late to congratulate the Halifax Board of Trade on its enterprise in providing itself with commodious quarters on a desirable site, and to wish that body increased influence in its task of looking after the commercial interests of that important city and district.

* * *

—The teamsters' strike in Chicago bids fair to develop into one of the most serious conflicts that have yet taken place between capital and labor. The employers seem to be of one mind; they are determined to have "open shop" in the city of Chicago, and are tired of being told with whom they may, and with whom they may not, do business. In the meantime, the methods of the strikers and of the troops who have already used firearms, and killed several, including non-combatants, is a pretty commentary upon the state of civilization achieved by a great modern city in the "most progressive country in the world."

* * *

—At a banquet in Montreal a few days ago, Mr. Chas. M. Hays, president of the Grand Trunk Pacific Railroad, asked the pertinent question, would Canada profit by the lessons of other countries in the matter of transportation? "Would she," he said, "frame her policies so as to afford opportunities for railways to make a fair return on the vast sums invested in them? No properly-constituted railway management would object to laws against discrimination or to safeguard life and property, but legislation should not be a bar to progress. The problem you must determine is how Canada may enjoy these benefits which increased transportation will bring," continued Mr. Hays, "and yet so enact laws that you will retain the good-will of the railway corporations and also the good-will of investors. The good-will of investors must be held, so that they will not be reluctant to place their capital in railway enterprises. This is a problem with which England and the United States are wrestling. I leave it to you, for it is well to remember that out of every dollar received from traffic, both passenger and freight, seventy cents is paid back to the country in wages, cost of maintenance and other expenses. This must be paid back before the company can pay dividends to shareholders." This is a suggestive line of thought, and may be commended to those persons or journals who perpetually curse the railways. It must be acknowledged, however, as a general rule, the railroads have usually been bright enough to take very good care of themselves.

NORTH OF ENGLAND LETTER.

Sir William Sinclair is a Manchester leader who is by no means unknown in Ontario and Quebec. He is a stalwart of the Chamberlain persuasion, and he has been favoring the press with his reading of mid-Canadian opinion. In essence, he says that sentiment is not considered a sufficient bond of Empire. The growing cosmopolitanism of Canada and the reciprocal relations with the States make a material tie desirable. Of course our Free Traders retort that the precarious nature of the alliance would be merely aggravated by the introduction of more sordid considerations. It is competent to accept a little of each of these views, and to be immediately practical, it is possible to act on both. Those who feel the dangers to be acute might well take steps to keep the intellectual communications between the countries open. A sober league with its emotions well restrained and its flag-wagging proclivities tightly curbed, might do a fine work in keeping sympathy alive. It is the misfortunte of Empire Leagues that they are liable to hysterics which remove them from intimacy with our phlegmatic people. Interchange of visits by such bodies as the C.M.A. and the Chambers of Commerce are very much to the good, but the ideal institution to help England in Canada and Canada in England should be free from any mercenary taint that may cling to the skirts of professedly mercantile bodies.

English butchers are not averse from the importation of Canadian cattle whatever our farmers may be. At the dinner of the York Butchers' Association, Mr. R. B. Lambert spoke the butchers' mind vigorously, insisting that our breeders must breed more or submit to importation from more countries. The dearness of store stock, he contended, was the principal difficulty of the English farmer, and while fresh blood was being denied, many of the best animals were shipped abroad from here leaving the unsound to propagate their defective kind. He claimed that Canada should be in no worse position legally than Ireland, and he concluded by saying that men of sound judgment estimated that five millions sterling had been lost to England in the last seven years by the exclusion of Canadian cattle. Enough has been quoted to prove the existence of two views of the question; the official view and another. But before the embargo is lifted some clever person will have to "square" Ireland. Is Canadian ingenuity equal to the occasion? What can be offered as a quid pro quo?

If Lancashire does not follow with acute interest the manœuvres of the Dominion Cotton Combine, it is probably because of her present plethora of business. For a year it can hardly matter to Lancashire whether the Canadian market is closed against her goods or not. That business is lucrative as well as plentiful is indicated by the 5 per cent. advance in wages, which is to date from July, and the more shadowy 2½ per cent. advance that is to be confirmed or refused in January next. From advices from Montreal it is possible for the Lancashire man to believe that the tariff is not to go prohibitively against him after all. But he is actually much too busy to worry.

A curiosity of our local Government regulations is the allowance of varying periods for the repayment of loans. The same town for works of the same kind may be accorded 60 years to pay off one debt and only 30 years to pay off another. Such is the case with Swansea and its waterworks. The burden on the present generation is increased most seriously by the whittling down of time for repayment. In the Swansea case it means a difference to the present payers of rates of 1½ cents on the dollar annually, and the Town Council is rebelling against the dictum of the Local Government Board. This is explicable enough, albeit the longer the loan the more interest must eventually become payable on the principal.

A feature of the mineral production of Canada accounts very noticeable to the Englishman is the paucity of flagstone and granite quarried. Less than $7,000 worth of the one and $100,000 worth of the other, looks somewhat incredible. Perhaps these statistics are as fallible as our own bearing on the same subjects. Our officials take great care with the returns made to them, but it is not possible in practice to make quarry-owners and others give details with precision.

Apropos of flagstones, it is due to say that great developments in this country have taken place in the manufacture of artificial flags in concrete. Granite clippings form the substance of most makes and these are bound with cement in the proportion of one to three or more parts. Even clinker has been used as a base, though the presence of sulphur in the ashes is detrimental to the durability of the stone. Experience has proved that "tailings" from the South African gold mines can be used thus and at least one English maker uses iron slag. Messages show that in Canada some new steps are being taken in the manufacture of cement. This being so, it may be said that not all makers on this side use mechanical or hydraulic pressure in forming slabs. More are hand-moulded than pressed, and there is a general desire to produce flags that shall not be slippery to walk upon.

Since the turn of the quarter quite a number of flotations have come upon the stock market. The Shawinigan Falls and Montreal Light and Heat are two Canadian ventures launched here. Of their reception it is too soon to speak, but if the presence of available capital and the good odor of Canada in the market are considered, the subscriptions should be good. Many financial propositions are waiting to appear and later on it may be that funds will be shorter.

Pig iron is a fair index to the prosperity of our industries. Now it promises to move upwards and forge-masters are reasonably confident of a more profitable year than the bad one now closed. Mr. Hugh Bell prophesies the coming of a time when demand shall again exceed supply. Steel frame building construction is to play its part in affecting the change. Doubtless Canadians will consider us far behind themselves in this respect, for steel building is only in its infancy here.

"Our trade our politics," has, perhaps libellously, been called the motto of the liquor interest. But the tea-drinker has now no good cause to throw indiscriminate stones. A determined attack by the Anti-Tea Duty League has certainly had something to do with the recent remission of twopence per lb. conveyed by the Budget. An over-whelming flood of posters depicted the inequity of a level tax of eight pence per lb. on cheap tea and fine tea alike. These and tons of leaflets flung away at the by-elections have created a weight of adverse opinion now translated into action. Altogether the phenomenon is interesting in that it gives a lesson in the power of advertising over politics. No statesman made a burning question of the tea-tax. Those affected most prejudicially made their protest by advertisement—and the tax diminished.

Manchester, April 14th. NORTH COUNTRY.

CANADIAN MUNICIPAL CONDITIONS.

The progress of urban concentration in Canada has, perhaps fortunately, hardly been sufficiently rapid to render the problem of municipal administration so acute as has been the experience of some other countries. It is true that during the last sixty years the proportion of total population of the Dominion, contained within towns and cities of over 5,000, has increased from 12 to 24 per cent., but this has been steady and uniform, and not characterized by large local concentration of foreign immigration, as has been the case largely in the United States. At the present time, ten Canadian cities of over 25,000 people, contain 16 per cent. of her total population, while five cities of over 50,000 contain only 10 per cent., though this is a blessing to the nation which past experience shows is likely, unfortunately to become less and less marked. As remarked by Mr. Munro: "The main political problem of the Canadian people is still that of national and provincial, rather than that of municipal government." Since the organization and control of local government is vested with the Provincial, and not with the Federal authorities, there is in the cities of the seven different provinces no exact conformity to any type of city political organization. In framing their general charter laws and in formulating special charters for particular cities, the Provincial authorities have been guided partly by English and partly by American experience. in the structure of municipal organizations in the different provinces are attributable to this diversity of influence. In general, the Maritime Provinces have borrowed largely from England, while Ontario, Quebec, and the Western Provinces have been disposed to incorporate into their municipal systems many features distinctively American.

In Mr. Munro's opinion, this system of municipal administration has, on the whole, proven satisfactory. That it has done so must be attributed in considerable degree to the fact that municipal have not been identified with provincial or national politics.

With regard to the large question of municipal ownership, we give the words of Mr. Munro himself:

"The movement toward municipalization of various public services has been making in Canada about the same rate of progress as in the United States. It has not been by any means as rapid or as successful as in England or in the other colonies, such as Australia. At the present time most of the Canadian cities own and operate their own water-works; some few have municipalized their lighting facilities, but beyond this the movement has not progressed. The other civic services, such as transit and the like, are still almost entirely in the hands of private corporations operating under lengthy franchises. A fair degree of success has attended the experience of municipal ownership, but not such as to warrant any general application of the policy. On the other hand, the strict supervision and control, which the provincial authorities have exercised over the granting of franchises has served more or less effectually to protect the cities against the private corporations."

* * *

A NEW INDUSTRY.

Monteith, Nixon & Co. is the name of a new concern whose factory is at 256 Macdonell Ave., this city. Mr. Monteith was formerly sales manager of the Ontario Wind Engine and Pump Co., while Mr. Nixon has been representing the well known American saw manufacturers, The E. C. Atkins Co., of Minneapolis.

A representative of the Monetary Times called the other day and found them housed in a compact, cheerful and well laid out factory at the above address. The buildings have been laid out with a view to securing the best work with the minimum of handling. Close by are the tracks of the Canadian Pacific and Grand Trunk Railways, so that shipping facilities are all than can be desired.

In addition to making galvanized flag poles, hose towers, bell towers, water supply outfits of every description, tank towers, etc., the firm will act as distributing house for Ontario of the well known pump manufacturers of F. E. Myers & Brother, of Ashland, Ohio. They have also, we are told, secured the agency for the Province of Ontario of the celebrated "Star" wind-mills, manufactured by Flint & Walling, Kendallville, Ind.

A line of work to which they intend to give special attention will be the manufacture of interior transportation equipments, warehouse and factory trucks; these will be on the floor rail and overhead system, depending upon the nature of goods to be moved. This is a field which up to the present has not been adequately filled, and the advent of this new firm should fill a long-felt want on the part of those looking for the latest in that line. Both gentlemen referred to are practical men and have an extensive acquaintance among the manufacturers of Canada.

* * *

OLD TIMES ON THE LAKES.

Editor Monetary Times,—

Sir,—Several copies of the Monetary Times, containing the letters referred to on "Old Time Lake Craft," have come to me. Little did I think that the few straggling thoughts contained in my letter to you of the 8th of March could have made the outcome of so many interesting papers on the subject, as you have mentioned. And I can assure you they were read here with the greatest interest for they brought back to my recollection facts which had passed out of it, and things that have long since passed away. I notice that neither you nor David Kemp in his letter happened to think of the steamer "Mayflower," which I think came into commission about the time the "Canada" and "London" would go out. She plied between Detroit and Buffalo for several seasons, being a fast boat for her day, and then went ashore on the east side of Point Pelee, Lake Erie, where her bones still lie. [The "Mayflower" was mentioned in the first paper.—Editor Monetary Times.] And I suppose you can hardly remember when the Canadian steamers, the "Canada" and "London," in order to comply with the coasting laws, had to truck all their freight outboard on to the dock at Amherstburg and then back on to the boat before they could be allowed to proceed on their then voyage.

I sent the two letters of J. H. to Capt. Gale, of Sarnia, an old friend, and a well known engineer, whom you no doubt, will remember. I enclose his letter, thanking you and me. You will notice what he tells about Mrs. Becker. His letter says: "I thank you, my worthy friend. Those papers were good. I am very feeble now." [But his strong, round handwriting does not look like it.] "Abigail Becker is dead two or three weeks—that woman that saved your brother Henry Hackett's life off the schooner 'Conductor' in wreck in the Fall of 1854. That woman was my aunt. She could swim Lake Erie." Charlie Gale left home when but ten years old, being fond of the water, and has followed the lakes (and sometimes sailed the ocean), all his days until obliged to retire from sailing. He is now far advanced in years, considerably over eighty, I believe. A good specimen of the strong, determined sailor that we have had so many of on the Great Lake of America and Canada in days gone by. He used to sail the brig "Vanguard," from Chicago to Kingston, and was as bold as my old father in cracking on canvas. He was an able navigator, and what you might call a pilot by nature.

ALEXANDER HACKETT.

Colchester, Ont., 20th April.

* * *

OUR HALIFAX LETTER.

After the men had been out for three weeks, the strike among the Westville coal miners in Pictou County was settled and the men returned to work. The mine was found to be in pretty good condition, the water having been kept down, and there will be more loss to the men than to the company. The loss to the former in wages will probably reach ten or fifteen thousand dollars. Commercial travellers report business as very dull in Pictou County just now, and orders for goods scarce—probably one consequence of the strike. The same condition, however, exists to a considerable extent in the Valley of the Annapolis, also.

A prominent lobster exporter of Halifax, R. J. Leslie, has been awarded the contract for the steamship service between Prince Edward Island and Newfoundland. The steamers are to call at Pictou, Sydney, and other provincial points, also at Cardigan, in Prince Edward Island.

Owing to the number of cars on the sidings at Halifax, and between here and Windsor Junction (an aftermath of last February's blockade), it has been almost an impossibility to deliver freight during April. The whole yard has been in a terrible "mix-up," and the Board of Trade applied

The Traders Bank of Canada.

Dividend No. 39.

Notice is hereby given that a Dividend of Three and One-half per Cent. upon the Paid-up Capital Stock of the Bank has been declared for the current half-year, being at the rate of Seven per Cent. per annum, and that the same will be payable at the Bank and its Branches, on and after

Thursday, the First Day of June next.

The Transfer Books will be closed from the 17th to the 31st of May next, both days inclusiv

The Annual Genera Meeting of the Shareholders of the Bank will be held at the Banking House, in Toronto, on TUESDAY, the 20th day of June next. The chair will be taken at twelve o'clock noon.

By order of the Board,

The Traders Bank of Canada. H. S. STRATHY,
Toronto, 20th April, 1905. General Manager.

to the Minister of Railways for relief. He sent General Superintendent J. E. Price to investigate conditions. That official found out that the trouble was due chiefly to lack of sidings, there being room at deep water on the harbor front for only 800 cars—about half the requirements.

Halifax has just elected a new Mayor and two new aldermen. There were three candidates for the mayoralty, and R. T. McIlreith, barrister, was elected by a very large majority, strictly on his merits as a representative candidate. One of the aldermen elected is Prof. W. C. Murray, of Dalhousie College. There has been a great effort lately to get a better class of men into the Council, and it is proving successful, as these elections show.

Linseed oil is advancing on this market very rapidly, and hardware men will not give quotations for publication at present. The greater part of the linseed oil sold here is imported from England.

Halifax, and several other places in Nova Scotia, suffered from the collapse of the International Mercantile Agency in its initial stages. A meeting of those who invested in this Chicago proposition was held in Halfax recently. A proposal was made that the shareholders should put up pro rata a sum of money to purchase a present going concern and use the equipment of the International to make a new start. The matter is being considered. The losses here and in New Glasgow in this concern were pretty heavy.

There are still signs of trouble among the men employed in the Sydney works. All classes of artisans are demanding higher wages, and as the management know that they cannot give an increase to one without doing likewise to all, they are refusing all demands. The bricklayers were giving trouble a week or two ago, and now the machinists and railway men are said to be formulating demands.

The Halifax Board of Trade has endorsed the proposal to pay a salary to the leader of the Opposition in the Federal House, but not in the Local Assemblies.

Farmers all over the Annapolis Valley complain of the destruction of fruit trees by small field mice. One orchard company had to uproot about 400 trees and replace them by new ones.

Nearly all of the Lunenburg "bankers," as the fishing fleet are called, have returned after a fairly successful fishing voyage, the majority clearing immediately for another spring trip. They averaged about 300 quintals on the early catch.

Sydney, C.B., is pressing strongly for a night train to Halifax. This would enable them to do business in the capital with the loss of only one day. Intermediate points, such as Antigonish and New Glasgow, object, as such a train would not serve them.

Meetings of creditors of some of the insolvent firms in Yarmouth have been held. In the case of Jacob Sweeny, furniture dealer, a ten days' adjournment was agreed to. W. A. Godfrey offered 25 cents on the dollar, which was refused, and his grocery stock will be disposed of in the interest of the creditors. In the case of M. A. Shaw, who keeps a haberdashery shop, a meeting will be held on May 20th. His stock, which was appraised at $2,300, will probably not realize more than enough to cover a bill of sale held by his father-in-law.

Burglars entered the men's furnishing store of C. B. Blackie, at Sydney, on Friday night, and destroyed about five hundred dollars' worth of goods, tore his cash book to pieces, and cut and slashed generally, apparently out of wanton mischief or revenge.

A rumor has been current that the various woolen mills of this Province were about to be amalgamated, but the management of both the Hewson Mills, at Amherst, and the Oxford Mills, at Oxford, in Cumberland County (the two largest in the Province), deny that such action is contemplated. There has been some correspondence on the subject, apparently, but not recently.

Halifax, N.S., 1st May.

* * *

AMHERST BOARD OF TRADE.

The Amherst Board of Trade has given good reason for its existence during the past year. The retiring president, John McKeen, Manager of the Bank of Nova Scotia branch at that point, made the annual meeting the occasion for an "at home" to the officers and members, and a few guests. In his address Mr. McKeen told of some of the things accomplished during the year. Among others were the enlargement of the Intercolonial Railway freight sheds, completion of Fort Laurence wharf; subsidy to steamer "Killkeel;" a summer suburban train to Pugwash; mailing boxes throughout the town; and a special Amherst section arranged for at the Provincial Exhibition. He also gave some interesting figures upon the condition of the town from which I quote: Capital invested in leading industries, $2,368,979; output of same, $3,594,105; wages paid, $717,409; number of employees, 1,870. The assessment of the town increased during the years 1904 from $2,395,661, to $2,617,905. The board passed a resolution endorsing the carriage factory proposition referred to in last letter. The officers were re-elected as follows: President, John McKeen, vice-president, C. A. Lusby; Secretary-treasurer, A. D. Ross.

* * *

—With the exception of the lathers, all the various branches of the building trades in Toronto went harmoniously to work on May 1st. The lathers, however, thought they were entitled to an advance in wages. At present, they get $2.85 to $3 for an eight-hour day, whereas they want a standard rate of $3.50 per day. Most of the contractors refuse to entertain the idea of such an increase which they characterize as exorbitant, particularly as several of the building unions had already agreed to accept the prevailing rate of wages for another year.

The FIVE per cent. Debentures issued by this Company afford the following advantages:

- The investment can be converted into cash at any time after two years by giving sixty days' notice.
- The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.
- The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.
- The Debentures issued by the Company will be a first charge upon the assets.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The ratepayers of Clinton have passed a by-law to loan the Clinton Knitting Company $6,000 for a period of twenty years, to assist in enlarging their factory, which they intend to do at once.

M. A. Shaw, dealing in men's furnishings, at Yarmouth, N.S., is reported in trouble, with premises in charge of an assignee. Liabilities are stated at about $4,000. Several recent suits were entered by Montreal and Toronto houses.

The Canadian Rubber Company intends, we are told, to spend about $250,000 this year in improving and extending its plant and erecting new factories in Montreal. It is hoped to increase the company's present capacity by at least 50 per cent. and to be able to manufacture goods in an extensive way of a character that is now scarcely produced at all in the Dominion.

The failure of Crain Bros., of Florenceville East, N.B., who have been running a small general store and sawmill for the past two and a half years, has caused hard feeling among the creditors, who are not likely to get much on their claims, which amount to some $4,900. It appears that Charles Crain, the senior brother, left suddenly for the United States, several weeks ago, taking with him, it is estimated, $3,000, having secured about $2,000 as advances on lumber. He also made a sale of the mill for $1,000, besides realizing some smaller amounts. This is too like deliberate rascality to be at all pleasant.

The directors of the Dominion Iron and Steel Company held a meeting in Montreal last week and listened to a report on the company's operations at Sydney. It was regarded as very satisfactory. The chairman reported the new issues of second mortgage bonds as fully subscribed, and a resolution passed authorized the proposed expenditure for improvements. Part of the money is for new coke ovens, so that there will be ample coking plant for keeping the blast furnaces in continuous operation, in view of the additional requirements of ore for the larger output; additions to the mining plant are to be made, and an extra steamer chartered to carry ore to Sydney, so as to have ample supply on hand when the three furnaces commence operations. The demand for the products of the company is increasing with sufficient orders on hand to take care of the output for some time to come. Great progress has been made on the rail mill since the snow blockade was removed.

The London City & Midland Bank, Limited.

ESTABLISHED 1836.

Paid-up Capital $15,000,000
Reserve Fund $15,000,000

Head Office:—

As an . . . Investment

We believe our 5% **DEBENTURES** to be one of the safest and surest that you could possibly enter into. It is safer than a Bank, because you have all of our Permanent Capital Stock, and the whole of our Assets, consisting of first mortgages on improved real estate, as a guarantee behind the Debenture. It is the surest, because the half-yearly coupons are attached to the Debenture and can be cashed at any bank in the country. . . . .

Write to-day for our booklet, entitled, "An Investment of Safety and Profit." 7

The general dealer, of Audet, Que., N. Pomerleau, referred to in a recent issue as insolvent, after a brief struggle to make a profit out of the fag end of an old stock he had bought, is now offering 30 cents on liabilities of $1,500.

Mercantile Summary

The Elder, Dempster & Furness Steamship Companies propose putting on two steamers monthly in order to accommodate the increased trade between Canada and South Africa. Hitherto there has been only a monthly service.

A fire broke out in the varnish department of the Palmer Piano Company's factory, in Toronto, owing, it is said, to spontaneous combustion in some cotton waste. The loss is estimated at about $40,000, with an insurance of $35,000.

The Bell Telephone Company is branching out in the Ottawa district. It has just completed two additional lines between that city and Montreal, and will shortly begin to build a direct line to Quyon, crossing the Ottawa by means of a submarine cable near Fitzroy Harbor. A line is also to be built up the Gatineau as far as Wakefield.

The city of Moncton, N.B., has ordered from the Robb Engineering Company, Amherst, N.S., a 450-h.p. Corliss engine, for direct connection to electric generator. And the town of Glace Bay, C.B., has ordered from the same company a 375-h.p. Corliss engine and a 150-h.p. Robb-Mumford boiler for the extension of its electric lighting plant.

An extension of time has been arranged for by A. D. McIsaac, an old time general merchant of Port Hood, N.S. His troubles are due to over-stocking, and a too free dispensing of credits, and though he shows nominal assets of $34,000, these are discounted in value nearly by half. At a meeting of his creditors, held in Halifax last week, he showed liabilities of $11,500, and an extension was granted with instalments spread over fifteen months.

At Stratford, on the 28th ult., a large and representative public meeting was held to consider the resolution from the railway committee of the city council and Board of Trade to submit a by-law to grant a bonus of $25,000 in lieu of right-of-way and $10,000 to cover the cost of approaches and to subway Mary and Huron streets to the C.P.R. The trend of the meeting was to support the by-law, and by a similar policy to encourage the establishment of factories and wholesale firms.

The Canadian Westinghouse Company, Limited, recently sold to the Edmonton, Alta., Street Railway Company a 200-K.W. railway generator and a number of double equipments of railway motors. It may be remarked that the city of Edmonton is the most northerly point on the American continent to operate an electric street railway. Another recent sale made by the same company was that of a 500-K.W. enclosed type turbo-generator unit to the Canadian Pacific Railway Company. This unit is to be installed at Fort William, and to be used for supplying power to the various grain elevators at that point.

Mercantile Summary.

The Peterboro Lock Works have decided to make large extensions to their buildings.

A by-law to loan the Dennis Wire and Iron Works $15,000 to build a factory in Berlin did not receive sufficient votes to carry.

J. C. Woods' general store, at Hartington, near Kingston, has been destroyed by fire at a loss of $3,000, partially covered by insurance.

The Brockville Navigation Company has declared a dividend of 4 per cent. The old directors and officers have been re-elected for the current year.

The Sault Ste. Marie Pulp and Paper Company has set up a plant in that Ontario town for the manufacture of tarred paper. Its capacity is 20 tons daily.

The British Columbia Electric Railway Company has declared an interim dividend on deferred ordinary stock for the half-year ending December 31st last of 6 per cent.

The St. Lawrence Engine Works, recently reorganized for the purpose of manufacturing gas and gasoline engines, have taken possession of their new premises in Brockville, and have started up.

The main building of the Government Immigration Hospital, at Quebec city, was on the 28th ult. destroyed by fire at a loss of $8,000. It was in course of being fitted up for the opening of the navigation season.

Mr. George A. McCarthy, assistant engineer of the Temiskaming and Northern Ontario Railway, has been appointed to the position of chief engineer in succession to W. B. Russell. Mr. McCarthy was for ten years in the employ of the Intercolonial Railway.

Work on the new $100,000,000 barge canal through New York State was begun on the 28th ult., at Fort Miller, where the plan is to construct a lock 400 ft. long by 120 ft. wide. In order that navigation on the Champlain Canal may not be interrupted, a temporary canal 800 feet long on the site of the Fort Miller lock will be built.

An assignment has been made to the court at Arthabaskaville, Que., by A. Provencher, general dealer of Ste. Anee du Sault. Formerly he was a farmer at Riviere Sauvage, and with a few hundred dollars derived from the disposal of his farm, after paying off a mortgage, he began business in December, 1903. The estate will likely be wound up.

An offer of compromise is being made by J. S. Price, general merchant, at Bishop's Mills, Ont., the proposition being that creditors should accept 25 per cent. of their claims. He first began business in 1896, and in 1900 he got "into deep water," and arranged to pay his creditors 75 cents on the dollar. His present indebtedness is figured at $2,500, and it is doubtful if he can pay so much.
